Paragraph (b) would require a person designated by the operator to examine roof conditions in the area where permanent supports are to be removed and specify which supports should be removed. The proposal would require these tasks to be completed before roof support removal is started. Testing roof conditions in these areas would determine whether it is safe to remove the supports.

Paragraph (c)(1) would require at least one row of temporary supports on not more than 5-foot centers or equivalent support to be installed prior to the removal of permanent supports. These supports would be required to be installed across the opening within 4 feet of the supports to be removed. If one row of temporary supports is not sufficient to assure safe removal, the standard would require additional supports to be installed across the opening.

The prior rule provided for two rows of temporary supports on not more than 4-foot centers wherever supports were to be removed. The proposal would recognize that supports on centers up to 5 feet can effectively prevent a roof fall from extending beyond where supports are being removed. This is consistent with MSHA's experience in applying previous criteria through the plan approval process. Likewise, the proposal retains the prior rule's compliance responsibility to install more support when conditions so require. For example, when one crossbar or a row of supports is being removed, one row of temporary supports is, in many mines, sufficient to prevent a roof fall from extending beyond the location where the supports are being removed. On the other hand, when multiple supports are being removed, two or more rows of supports may be necessary to control the roof. Likewise, where roof conditions are unstable, temporary supports may need to be closer together. This approach is consistent with MSHA's experience in approving plans for removing permanent roof supports.

Paragraph (c)(2) of the proposal would require a temporary support installed in accordance with § 75.213 to be installed as close as practicable to each roof bolt prior to its removal. This proposed requirement is consistent with the prior rule.

Paragraph (d) addresses the removal of temporary supports installed in accordance with § 75.213. The proposal would prohibit the removal of temporary supports unless they are removed from a location under permanent supports that have not been disturbed. In addition, two rows of temporary supports would be required to be maintained between the miners and the supports being removed. This provision is consistent with the prior rule, except that the prior rule provided for temporary supports to be placed on 4-foot centers. MSHA's experience with criteria applied in roof control plans has been that installation of temporary supports on a maximum of

5-foot centers has provided effective protection for miners during the removal of temporary supports. However, the District Manager could require, through the plan approval process, that temporary supports be set closer together depending on particular mining conditions.

Paragraph (e) would specify that each entrance to an area where roof supports have been removed be posted with a readily visible warning or a physical barrier installed to impede travel into the area. The prior rule provided for a barricade to be installed when recovery is completed or suspended for more than 3 days. The purpose of this standard is to provide a warning to persons approaching an area where the roof is hazardous. The Agency believes that this can be accomplished by either a visible warning or a physical barrier.

Paragraph (f) outlines the conditions under which removal of permanent roof supports is prohibited. Removal would be prohibited where roof bolt torque or tension measurements or the condition of conventional roof supports indicate excessive loading, where roof fractures are present, where there is any other indication that the roof is structurally weak, or where pillar recovery has been conducted. In these areas, any disturbance of the roof support may trigger a roof fall.

An exception is recognized by the proposal which would allow the removal of conventional supports if the persons involved in such removal are in a remote location under supported roof. For example, conventional supports could be removed through the use of cables pulled from a safe distance. The removal of conventional supports is sometimes necessary to induce roof falls, thereby reducing roof pressures from over-riding into active workings. However, the standard would prohibit the removal of roof bolts where any of the four conditions listed above are encountered.

The proposed exception for conventional supports was not specifically recognized in the prior rule. However, in the context of the mine plan approval process, this practice has been permitted and proved to be an effective measure for the protection of miners.

Paragraph (g) specifies that the provisions of this section do not apply when removing conventional support for starting crosscuts and pillar splits or lifts. Removal of supports in these situations does not present the same hazards. In addition, these situations are addressed by 30 CFR 75.202(c) and are required to be addressed in the roof control plan. However, the standard would require that roof conditions be determined before the supports are removed.

II. Executive Order 12291 and the Regulatory Flexibility Act

This proposed rule addresses two provisions published on January 27, 1988. MSHA has determined that the rule would not result in major cost increases nor have an incremental effect of $100 million or more on the economy. The Agency also determined that the proposed rule will not have a significant impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

III. Paperwork Reduction Act

There are no information collection requirements contained in this proposal.

List of Subjects in 30 CFR Part 75

Mine safety and health, Underground mining, Roof, Face and rib support.

Dated: August 25, 1989.

David C. O'Neal,

Assistant Secretary for Mine Safety and Health.

Therefore, part 75, subchapter 0, chapter I, title 30 of the Code of Federal Regulations is proposed to be amended under 30 U.S.C. 811 as follows:

PART 75—MANDATORY SAFETY STANDARDS—UNDERGROUND COAL MINES

1. The authority citation to 30 CFR part 75 continues to read as follows:

Authority: 30 U.S.C. 811, 957, and 961.

2. Section 75.204 (a) and (b) are revised to read as follows:

§ 75.204 Roof bolting.

(a) For roof bolts and accessories addressed in ASTM F432–88, "Standard Specification for Roof and Rock Bolts and Accessories", the mine operator shall—

(1) Obtain a manufacturer's certification that the material was manufactured and tested in accordance with the specifications of ASTM F432–88; and

(2) Make this certification available to an authorized representative of the Secretary.

(b) Roof bolts and accessories not addressed in ASTM F432–88 may be used, provided that the use of such materials is approved by the District Manager based on—

(1) Demonstrations which show that the materials have successfully supported the roof in an area of a coal mine with similar strata, opening dimensions and roof stresses; or

(2) Tests that show the materials to be effective for supporting the roof in an area of the affected mine that has strata, opening dimensions and roof stresses similar to the area where the roof bolts are to be used. During the test process, access to the test area shall be limited to persons necessary to conduct the test.

* * * * *

3. Section 75.213 is revised to read as follows:

§ 75.213 Roof support removal.

(a)(1) All persons who perform the work of removing permanent roof supports shall be experienced in this work, or they shall be supervised by a person experienced in removing roof supports who is designated by the mine operator.

(2) Only persons with at least one year of underground mining experience shall perform permanent roof support removal work.

(b) Prior to the removal of permanent roof supports, a person designated by the mine operator shall examine the roof conditions in the area where the supports are to be removed and designate each support to be removed.

(c)(1) Prior to the removal of permanent supports, a row of temporary supports on no more than 5-foot centers or equivalent support shall be installed across the opening within 4 feet of the supports being removed. Additional supports shall be installed where necessary to assure safe removal.

(2) Prior to the removal of roof bolts, temporary support shall be installed as close as practicable to each roof bolt being removed.

(d) Temporary supports installed in accordance with this section shall not be removed unless—

(1) Removal is done remotely from under roof where the permanent supports have not been disturbed; and

(2) At least two rows of temporary supports, set across the opening on no more than 5-foot centers, are maintained between the miners and the unsupported area.

(e) Each entrance to an area where supports have been removed shall be posted with a readily visible warning or a physical barrier shall be installed to impede travel into the area.

(f) Except when conventional supports are removed by persons who are in a remote location under supported roof, permanent support shall not be removed where—

(1) Roof bolt torque or tension measurements or the condition of conventional support indicate excessive loading;

(2) Roof fractures are present;

(3) There is any other indication that the roof is structurally weak; or

(4) Pillar recovery has been conducted.

(g) Except for paragraph (b) of this section, the provisions of this section do not apply to removal of conventional supports for starting crosscuts and pillar splits or lifts.

Part IV

Department of Agriculture

Animal and Plant Health Inspection Service

9 CFR Parts 1, 2, and 3
Animal Welfare; Final Rules

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 1

[Docket No 89–130]

RIN 0579–AA18

Animal Welfare; Definition of Terms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending part 1 of the Animal Welfare Act regulations in order to update, clarify, and expand the list of definitions of terms used in parts 2 and 3 of the regulations. These changes are necessary to assist the public in complying with the Animal Welfare regulations and to facilitate enforcement. Many of these changes are required by the amendments to the Animal Welfare Act (7 U.S.C. 2131, *et seq.*), enacted on December 23, 1985, and complement the final rule amending part 2 of the regulations. They also complement the standards set forth in part 3 of the regulations.

DATES: This final rule shall become effective October 30, 1989; however, the portions of the rule which concern or relate to information collection and recordkeeping will become effective October 30, 1989, upon approval by the Office of Management and Budget (OMB). The information collection requirements of this final rule have been submitted to OMB for review and approval. The Department has requested that OMB conclude its review no later than October 30, 1989. If any portion is disapproved, notice of disapproval will be published in the **Federal Register** prior to that date.

FOR FURTHER INFORMATION CONTACT: Dr. Dale F. Schwindaman, REAC, APHIS, USDA, Room 206, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–6491.

SUPPLEMENTARY INFORMATION:

Background

This final rule amends 9 CFR part 1, entitled "Definition of Terms" which provides the definitions for the terms used in the regulations in 9 CFR part 2, and the standards in 9 CFR part 3 for the humane handling, care, treatment, and transportation of regulated animals used for research or exhibition purposes, sold as pets, or transported in commerce. The Definitions, Regulations, and Standards (the regulations) are established pursuant to the authority in the Animal Welfare Act, as amended (7 U.S.C. 2131, *et seq.*) (the Act). This law requires the Secretary to promulgate regulations and standards governing the humane handling, housing, care, treatment, and transportation of certain animals by dealers, research facilities, exhibitors, operators of auction sales, carriers, and intermediate handlers. The standards and regulations must include minimum requirements with respect to handling, housing, feeding, sanitation, veterinary care, and other matters specified in section 13 of the Act (7 U.S.C. 2143). The definitions contained in this final rule provide specific meanings for many important terms used in the regulations and standards.

Proposed Rules

In two documents published in the **Federal Register**, on March 31, 1987 (52 FR 10292–10298 and 52 FR 10298–10322, respectively), we proposed to revise parts 1 and 2 of the Animal Welfare regulations to comply with the 1985 amendments to the Act, and to expand, clarify, and revise the current regulations. At that time, we did not publish a proposed rule to amend the standards set forth in part 3 of the regulations.

We solicited comments concerning the proposals for a 60-day period ending June 1, 1987. The comment period was twice extended and ended on August 27, 1987. A total of 7,857 comments were timely received and considered. Many of the comments we received stated that it was difficult to comment upon the proposals to amend parts 1 and 2 of the regulations independently of our proposal to amend the standards in part 3. We have maintained that upon their publication as final rules, parts 1 and 2 of the regulations can be fully implemented with the existing standards in part 3. In response to the comments, we decided to respond to the points raised by the commenters, and to publish revised proposals to amend parts 1 and 2 along with our proposed rule to amend part 3, to assist the public in reviewing the proposed standards in part 3 and to afford the public an opportunity to comment on the interrelationship of the definitions and regulations in parts 1 and 2 with the proposed standards in part 3. Accordingly, on March 15, 1989, we published in the **Federal Register** three documents: Docket no. 88–013, a proposed rule to amend part 1—"Definition of Terms," (54 FR 10822–10835); docket no. 88–014, a proposed rule to amend part 2—"Regulations," (54 FR 10835–10897); and docket no. 87–004, a proposed rule to amend subparts A through D of part 3—"Standards," (54 FR 10897–10954).

The revised proposals published in March, 1989, were prepared with the benefit of the public's comments and reflected our thinking at that time of how best to carry out our statutory mandate and animal welfare objectives. Throughout this rule-making process, however, we have continued our consideration of alternative means to implement the complex regulatory scheme required by the Animal Welfare Act, as amended, and addressed by the commenters in response to our initial proposal. To fully address these issues, we continued our consultation in accordance with the requirements of the Act (7 U.S.C. 2145), with the U.S. Department of Health and Human Services (HHS) and members of the Interagency Research Animal Committee (IRAC), a committee comprising representatives of Federal agencies concerned with animal welfare. Together, we explored and evaluated different means of accomplishing our regulatory objectives. This final rule reflects our consideration of the comments we received in response to our initial proposal and those addressing the interrelationship of the definitions in part 1 with the regulations proposed for part 2 and the standards proposed for part 3. It also reflects our consultation with other Federal agencies. We believe parts 1 and 2 can now be readily implemented while we continue to review the public's comments and consider alternatives concerning the standards that should be included in part 3.

Public Comments

The revised proposal published March 15, 1989, solicited comments on the narrow issue of the interrelationship of the definitions and regulations in parts 1 and 2 of 9 CFR, chapter 1, subchapter A, with the standards we proposed in part 3, for the reasons explained above. Comments were solicited for a 60-day period, ending May 15, 1989. Comments that were postmarked or received by that date were considered in preparing this final rule. We solicited comments on the standards of part 3 for a 120-day period, ending July 13, 1989. Comments that were not timely for consideration in preparing final rules for parts 1 and 2 will be considered if they address the proposed standards or the regulations in general.

We received 5,582 comments that were timely for consideration in preparing final rules for parts 1 and 2. Many comments concerned the Animal Welfare regulations generally or conceptually. We considered those comments in preparing the final rules

because they address the Department's regulatory approach as a unit, and thereby implicate the interrelationship of parts 1, 2, and 3. Our response to those comments is set forth in the supplementary information accompanying the final rule to amend part 2, docket no. 89.131, published elsewhere in this issue of the **Federal Register**.

On the basis of the comments we received and our consultation with HHS and members of the IRAC, we determined that certain changes to the revised proposal are necessary and that certain terms should be added to clarify parts 2 and 3 of the regulations. Certain changes are also necessary to conform part 1 with the revisions we are making in the final rule to amend part 2 (*see* docket no. 89–131, published elsewhere in this issue of the **Federal Register**. We discuss below, in alphabetical order, each of the terms that is revised, replaced, or added as a result of the comments we received and our consultation with HHS and members of the IRAC. We also discuss those comments we received addressing the interrelationship of terms contained in part 1 with the proposals to amend parts 2 and 3 for which we have determined that no revision of the final rule is necessary. Comments addressing the interrelationship of the revised proposal to amend part 2—"Regulations" with the proposed standards in part 3 are addressed in companion docket no. 89–131, published elsewhere in this issue of the **Federal Register**. Comments on the regulatory impact analysis and the regulatory flexibility analysis prepared by the Department in accordance with Executive Order 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), respectively, are also addressed in that document.

General

We received 480 comments (478 from members of the general public and 2 from members of the research or scientific community) expressing general support for the revised proposals to amend parts 1 and 2 and stating that the definitions in part 1 apply appropriately to part 3.

We are making two changes in the final rule for part 1 to reflect an internal agency reorganization within the Animal and Plant Health Inspection Service (APHIS) which created the Regulatory Enforcement and Animal Care organization unit (REAC). REAC is charged with responsibility for administering and enforcing the Animal Welfare Act and regulations for APHIS. Accordingly, the term "Deputy Administrator" is revised to mean "the Deputy Administrator for Regulatory Enforcement and Animal Care (REAC) or any other official to whom authority has been delegated to act in his stead." The term "Area Veterinarian in Charge" is replaced with "APHIS, REAC Sector Supervisor", however, the definition remains unchanged in the regulations. This change in designation reflects the Agency's internal reorganization and is nonsubstantive.

Animal; Exotic Animal; Wild Animal

Fifteen commenters (9 members of the general public and 6 members of the research or scientific community) stated that all animals should be regulated under the Act, including rats and mice, and 6 members of the research or scientific community commented that rats and mice should not be excluded from the regulations. In contrast, 10 members of the research or scientific community stated that all rodents should be excluded from the regulations.

As we stated in the supplementary information accompanying the revised proposal, we do have the authority to regulate rats and mice, though we have never included laboratory-bred rats and mice in the regulations (54 FR 10823). Wild rats and mice are covered by the regulations. We received numerous comments in response to the March 1987 proposal suggesting that we include rats and mice, and we are considering doing so. Development of regulations and standards applicable to rats and mice would be a lengthy endeavor, and we do not believe it is appropriate to delay promulgation of these final rules while we proceed with our consideration of this issue.

The statutory definition of "animal" specifically includes guinea pigs and hamsters, and we do not have the authority to remove these rodents from the regulations (7 U.S.C. 2132(g)). In order to clarify that rats and mice are the only rodents not covered by the regulations, we are revising the definition of "animal" in the final rule by specifying that the term excludes rats of the genus *Rattus* and mice of the genus *Mus* that have been bred for use in research. Rodents of other genera, such as kangaroo rats, are included within the definition.

We received 241 comments (67 from members of the general public, 172 from members of the research or scientific community, and 2 from dealers) requesting that we clarify when farm animals are covered by the regulations. One member of the general public and 3 members of the research or scientific community commented that the existing standards of 9 CFR part 3, subpart F, "Specifications for the Humane Handling, Care, Treatment and Transportation of Warmblooded Animals Other Than Dogs, Cats, Rabbits, Hamsters, Guinea Pigs, Nonhuman Primates, and Marine Mammals," should be applied to farm animals used or bred for biomedical research. In accordance with the Act, we have the authority to regulate farm animals when used for biomedical research and testing purposes. We do not have the authority to regulate farm animals under the Animal Welfare regulations when used or intended for use as food or fiber, or when used or intended for use in agricultural research, such as, improving animal nutrition, breeding, management, or production efficiency, or for improving the quality of food or fiber (7 U.S.C. 2132(g)). We are considering exercising our authority to enforce the regulations with respect to farm animals. If we determine to pursue this matter further, we will publish an advance notice of proposed rulemaking in the **Federal Register** soliciting public comments on whether the Agency should exercise this authority, and if so, what regulations and standards should apply.

Four members of the research or scientific community requested clarification as to whether the term "animal" includes free-living wild animals that are used in research. As set forth in the revised proposal, the term "animal" includes any warmblooded animal, other than those specifically excepted, that is being used, or is intended for use for research, teaching, testing, or experimentation (54 FR 10823–10824). Under the final rule amending part 2 (docket no. 89–131, published elsewhere in this issue of the **Federal Register**), research involving animals that are studied in their natural habitat without any invasive procedure and without harming or materially altering their behavior, is exempt from the Committee review and inspection requirements of 9 CFR part 2, subpart C.

One exhibitor opposed breaking down non-domestic animals into "wild animals" and "exotic animals". Both wild and exotic animals, as defined in the revised proposal, are covered by the regulations. We are including definitions of wild animals and exotic animals in the final rule to make it clear that certain exotic animals, now considered by many people to be domestic animals, are covered by the regulations. We are not revising these terms on the basis of this comment.

We received 236 comments (66 from members of the general public, 168 from members of the research or scientific community, and 2 from dealers) expressing agreement with the definition of "exotic animal" as set forth in the revised proposal. We had revised the definition from that initially proposed to exclude those animals specifically included in the definition of "animal", in response to the numerous comments we received. One member of the research or scientific community objected that the revised definition conflicts with the term "animal" when an exotic animal is used for exhibition purposes. The term "exotic animal", as well as "wild animal", is included in the regulations to make clear that all warmblooded animals (other than those specifically excluded) are covered by the regulations when used for research, teaching, testing, experimentation, exhibition, or as a pet. When the Act was first enacted in 1966, the term "animal" was defined as meaning "live dogs, cats, monkeys (nonhuman primate mammals), guinea pigs, hamsters, and rabbits." In 1970, Congress amended the Act to include other warm-blooded animals. By defining "exotic animal" as any animal not identified in the definition of "animal" that is of foreign origin or not native to the United States, the regulations make clear that exotic animals are covered by the regulations in addition to dogs, cats, nonhuman primates, guinea pigs, hamsters, and rabbits. The definition of "exotic animal" excludes the animals specifically identified in the Act because many species of these animals are now commonly found in the United States. Though originally of foreign origin, they are not considered to be exotic.

Animal Care and Use Procedure

We received 237 comments (66 from members of the general public, 169 from members of the research or scientific community, and 2 from dealers) stating that there is no need for an animal care and use procedure, and therefore the term should be deleted. We added the term "animal care and use procedure" or "ACUP" in the revised proposal in lieu of "protocol" to avoid any misunderstanding or implication that APHIS intends to become involved in the evaluation of the design, outlines, guidelines, and scientific merit of proposed research. The term "animal care and use procedure" was selected because it is descriptive of the areas with which we are concerned under the regulations, namely, how the research will treat or affect an animal, the condition of an animal, and the circumstances under which an animal is maintained.

As we describe in greater detail in the final rule to amend part 2 (docket no. 89–131, published elsewhere in this issue of the **Federal Register**), we have made certain changes in the regulations affecting research facilities in order to harmonize our requirements with those of the Public Health Service Policy on Humane Care and Use of Laboratory Animals (PHS Policy), wherever it is consistent with our statutory mandate to do so. As part of our harmonization efforts, we are replacing the term "animal care and use procedure" with the PHS Policy term, "activity." The term "activity" is defined to mean "those elements of research, testing, or teaching procedures that involve that care and use of animals." We consider this to be a nonsubstantive change.

Attending Veterinarian

Under the revised proposal, the term "attending veterinarian" would mean "a person who has graduated from a veterinary school accredited by the American Veterinary Medical Association's Council on Education, or has a certificate issued by the American Veterinary Medical Association's Education Commission for Foreign Veterinary Graduates, or has received equivalent formal education as determined by the Administrator; has received training and/or experience in the care and management of the species being attended; and who has direct or delegated authority for activities involving animals at a facility subject to the jurisdiction of the Secretary."

Two members of the research or scientific community objected to the requirement that the attending veterinarian have formal education in veterinary medicine. Rather, they felt that requiring equivalent formal education would be sufficient. We disagree with the commenters. Training in the sciences generally, or in medical or biological areas, would not ensure sufficient knowledge in the health, well-being, and care of animals. Veterinary medicine involves specialized knowledge and expertise that would not otherwise be acquired through non-veterinary training and education. Furthermore, we do not believe it would be practical for the Administrator to determine, on a case-by-case basis, whether someone is qualified to function as a veterinarian. Therefore, we are not making any change to this requirement in the final rule. The Administrator will consider equivalent formal education in veterinary medicine, as set forth in the revised proposal, so as not to exclude those graduates of foreign veterinary programs who do not have a certificate from the AVMA's Education Commission for Foreign Veterinary Graduates (*see* 54 FR 10824–10825).

We received 55 comments (5 from members of the general public, 14 from members of the research or scientific community, 2 from exhibitors, and 34 from dealers) stating that the requirement that the attending veterinarian have experience in the care and management of the species being attended would limit the pool of qualified veterinarians, and that experience with similar species should be sufficient. We disagree for the reasons set forth in the supplementary information accompanying the revised proposal (54 FR 10825). It is not our objective to severely limit the number of veterinarians who would be qualified to serve as attending veterinarians, and we do not believe that requiring some degree of familiarity with the animal being attended will do so. We proposed this requirement because different species have different requirements and needs that must be fulfilled in order to promote their health and well-being. For these reasons, we require that the attending veterinarian have training or experience in the care and management of the different species of animals being attended.

Two hundred fifty-five commenters (70 members of the general public, 183 members of the research or scientific community, and 2 dealers) objected to the requirement that attending veterinarians be responsible for "activities involving animals", as set forth in the revised proposal, rather than just the health of the animals. Under these regulations, the attending veterinarian is responsible for overseeing the care and use of animals and for ensuring that adequate veterinary care is provided. These responsibilities extend beyond the general health of an animal. They include personnel training and guidance in animal care matters, such as proper use of pain-relieving drugs, adequate pre-procedural and post-procedural care, and animal behavior and well-being. We are making no changes to the definition of "attending veterinarian" on the basis of these comments.

Commerce

Thirty-eight commenters (1 member of the general public, 2 members of the research or scientific community, 2 exhibitors, and 33 dealers) objected to Federal regulation of intrastate commerce. Twenty-two commenters (2 exhibitors and 20 dealers) objected to considering gifts or donations of animals as affecting commerce, and therefore requiring that the recipient be licensed as an exhibitor. Under the definition of "exhibitor" in this final rule, any person exhibiting any animals which were purchased in commerce or the intended distribution of which affects commerce, or will affect commerce, to the public for compensation is an exhibitor and must be licensed. The proposed definition of "commerce" is taken directly from the statute. Congress has defined "commerce" in the Act to mean "trade, traffic, transportation, or other commerce: (1) Between a place in a State and any place outside of such State, or between points within the same State but through any place outside thereof, or within any territory, possession, or the District of Columbia; (2) which affects trade, traffic, transportation, or other commerce described in paragraph (1), * * *" (7 U.S.C. 2132(c)). Animals received through donation or as a gift must be acquired and transported, and therefore, such gifts or donations affect commerce. The definition remains as proposed.

Committee

Two hundred thirty-six commenters stated that a research facility should be able to identify the Committee by whatever name it chooses. One member of the research or scientific community noted that the definition of "Committee" is appropriately addressed in part 2 and therefore need not be defined in part 1. As we stated in the supplementary information accompanying the revised proposal, we are not concerned with the name assigned to the Committee by a research facility. Rather, we are concerned that each research facility establish an administrative body in accordance with the definition of "Committee", as set forth in part 1, that is authorized to carry out the duties and reponsibilities assigned to it under the Act and the regulations. We refer to this body as the Institutional Animal Care and Use Committee to describe its areas of concern and for consistency with the PHS Policy, which similarly requires establishment of an Institutional Animal Care and Use Committee. The PHS Policy also notes that the term, Institutional Animal Care and Use Committee, is intended as a generic term for a committee whose function is to ensure appropriate and humane animal care and use. We are not making any changes in the final rule on the basis of the comments. We are making a change to allow a Doctor of Veterinary Medicine (DVM) to serve on the Committee instead of the attending veterinarian, if the research facility has more than one DVM, in accordance with the final rule to amend part 2 (*see* docket no 89–131, published elsewhere in this issue of the **Federal Register**).

Euthanasia

We are revising the definition of "euthanasia" based upon the comments we received and our ongoing discussions with members of the IRAC. In the revised proposal, the term "euthanasia" was defined as "the humane destruction of an animal accomplished by a method which produces instantaneous unconsciousness and immediate death without evidence of pain or distress, or a method that utilizes anesthesia produced by an agent which causes painless loss of consciousness and subsequent death." Thirty-five commenters (1 member of the general public, 7 members of the research or scientific community, 2 exhibitors, and 25 dealers) requested clarification of the word "immediate" as it appears in the proposed definition. Twenty-nine members of the research or scientific community stated that the definition should be consistent with the recommendations of the American Veterinary Medical Association Panel on Euthanasia. Two commenters (1 member of the general public and 1 member of the research or scientific community) suggested that the term be defined as "a quiet painless death", and 255 commenters (70 members of the general public, 183 members of the research or scientific community, and 2 dealers) suggested that the term be defined as "the humane destruction of an animal accomplished by a method which produces unconsciousness and death without evidence of pain or distress or a method that utilizes anesthesia produced by an agent which causes painless loss of consciousness and subsequent death." One commenter from the general public and 3 members of the research or scientific community suggested using the word "killed" in place of "destruction" in the definition.

Based upon these comments and our consultation with IRAC members, we have determined that the proposed definition of "euthanasia" is unnecessarily restrictive. Methods of euthanizing animals exist which induce rapidly occurring unconsciousness followed by subsequent death without evidence of pain or distress. The report of the AVMA Panel on Euthanasia lists numerous methods which, based upon information the Panel deems reliable, may be considered painless. We are therefore revising the definition to mean the humane destruction of an animal accomplished by a method that produces rapid unconsciousness and subsequent death without evidence of pain or distress, or a method that utilizes anesthesia produced by an agent that causes painless loss of consciousness and subsequent death. Methods of euthanasia that are consistent with this definition may be used. We believe that the definition as revised in the final rule fully addresses the commenters' concerns.

Housing Facility

The definition of "housing facility" in the revised proposal remained as originally proposed and has prompted concern among the commenters and members of the IRAC. The proposed definition would include any land, premises, shed, barn, building, trailer, or other structure or area housing or intended to house animals. Members of the IRAC stated that the proposed definition would be difficult to apply in field settings where animals are studied in their natural habitat. The National Science Foundation, a Federal agency that funds research conducted in field settings, expressed concern that it would not be feasible for research facilities to comply with many of the standards proposed in part 3 for housing facilities in such environments. In addition, 238 commenters (66 members of the general public, 170 members of the research or scientific community, and 2 dealers) requested clarification as to whether native habitats of free-living animals would be covered by the definition. Four members of the research or scientific community suggested that the definition be revised to exclude all field study sites where animals are not restrained for more than 12 hours before being released. Five members of the research or scientific community suggested that the definition exclude areas where animals are held for less than 24 hours. We also received four comments from the research or scientific community which stated that the proposed definition should be revised to clearly include all animal study areas. Two commenters, also from the research or scientific community, stated that animal study areas should only include survival surgery areas.

Upon further consideration of these suggestions, and for the reasons set forth in the supplementary information accompanying the final rule to amend part 2 (docket no. 89–131, published elsewhere in this issue of the **Federal Register**) we agree that a distinction should be made between research that is conducted under captive conditions and that which is conducted in the wild. A further distinction must also be made between studies conducted in the field on the basis of whether or not it involves an invasive procedure or change in the animals' behavior as part of the study. The final rules differentiate between studies of animals in their natural habitat which involve an invasive procedure, such as implanting a transponder, or which harm or alter the behavior of the animals, and field studies. Field studies are defined in this final rule to mean "any study conducted on free-living wild animals in their natural habitat, which does not involve an invasive procedure, and which does not harm or materially alter the behavior of the animals under study." Wildlife census studies and purely behavioral studies would be within the definition. Under part 2, subpart C of the final rule, field studies are exempt from Committee review and inspection.

Under § 2.31(c)(2) of the final rule, Committee inspection of a research facility's animal facilities as an agent of the research facility, including animal study areas, may not include animal areas involving free-living wild animals in their natural habitat. Such studies and areas must be maintained in compliance with the Animal Welfare regulations and standards, however.

We are also adding a definition of the term "study area" in response to the comments we received and to conform part 1 with the revised regulations set forth in the final rule to amend part 2. The term is defined as "any building, room, area, enclosure, or other containment outside of a core facility or centrally designated or managed area in which animals are housed for more than 12 hours." A study area is a type of housing facility. "Satellite facilities" under the PHS Policy are study areas, as that term is defined in this final rule. It also includes buildings or temporary structures set up at field sites where animals are maintained for more than 12 hours. We are not limiting the term to areas where survival surgery is conducted, contrary to the suggestion of two commenters, since the need to ensure animal welfare is not limited to surgical procedures.

Indoor Housing Facility

We received 236 comments (66 from members of the general public, 168 from members of the research or scientific community, and 2 from dealers) stating that the proposed requirement that an indoor housing facility be capable of maintaining humidity levels between 30 to 70 percent should be removed. Three commenters (1 member of the general public and 2 members of the research or scientific community) stated that the humidity control requirement should be clarified, and 1 member of the general public and 3 members of the research or scientific community stated that the humidity range provided in the definition should be revised to be between 40–60 percent.

Based upon our experience in administering the Act and the regulations, we believe an indoor housing facility must be capable of controlling the environment, including the temperature and humidity level, in which an animal is maintained in order to promote its health and well-being. The humidity level provided in the definition is consistent with the NIH Guide for the Care and Use of Laboratory Animals, and is appropriate for most warm-blooded animals. We believe this to be a reasonable requirement to impose upon persons who maintain animals in indoor housing facilities and that it is necessary for the welfare of the animals.

Institutional Official

We are adding a definition of the term "institutional official." In our revised proposal, we referred to the Chief Executive Officer of a research facility or a responsible institutional official with authority to bind the facility. We are replacing these terms with the single term "institutional official" in the final rule to amend part 2, to simplify the regulations and to make them consistent with the terminology used in the PHS Policy. We consider this to be a nonsubstantive change. Neither of the terms used in the revised proposal were defined in our proposals to amend part 1. We are adding a definition to facilitate understanding and compliance with the regulations. Under the final rule, "institutional official" means the individual at a research facility who is authorized to legally commit on behalf of the research facility that the requirements of 9 CFR parts 1, 2, and 3 will be met.

Isolation

Two members of the research or scientific community commented that the proposed definition of "isolation" would not be appropriate for open-sea floating pens for marine mammals. Use of such pens is generally not appropriate for the temporary isolation of marine mammals under part 3, subpart E for purposes of medical treatment or training. No change is made in the regulations on the basis of this comment.

Major Operative Experiment

We received 269 comments (74 from members of the general public, 193 from members of the research or scientific community, and 2 from dealers) objecting to the proposed definition of the term, "major operative experiment." The 1985 amendments to the Act prohibit the use of an animal in more than one major operative experiment from which it is allowed to recover, except under certain limited circumstances (7 U.S.C. 2143(a)(3) (D) and (E)). We are broadening this prohibition in the final rule to amend part 2 to apply to any major operative procedure, since an experiment could encompass a vast number of procedures

In the supplementary information accompanying the revised proposal, we stated that the potential for causing physical disability would be sufficient to consider an experiment to be within the proposed definition, and that we were not concerned with the intended effect of the principal investigator in performing the experiment. Upon further consideration of the comments we received, we have determined that determining whether a procedure is a major operative procedure can best be done retrospectively, rather than prospectively, and that doing so will satisfy the Act's prohibition against using the animal in a second major operative experiment. It is clear from a research proposal whether the research will involve surgical intervention that penetrates and exposes a body cavity. However, the permanent effects of a procedure can best be determined afterward. After a procedure is performed, the principal investigator and the Committee can determine whether it has produced a permanent impairment of the animal's physical or physiological functions. If it has, the animal cannot be used again for survival surgical purposes or for procedures generally considered to result in permanent impairment of the animal's functions. As four commenters stated, (1 member of the general public and 3 members of the research or scientific community) non-surgical procedures such as impact tests and severe burn studies are invasive and can result in permanent impairment. We are revising the definition in the final rule to mean "any surgical intervention that penetrates and exposes a body cavity or any procedure which produces permanent impairment of physical or physiological functions." The term "disability" is replaced in the definition with the term "impairment" to include any reduction in the animal's range or ability of functions.

Mobile or Traveling Housing Facility

Four commenters (1 member of the general public and 3 members of the research or scientific community) endorsed inclusion of an explicit definition of "mobile or traveling housing facility" in part 1. The

standards with which these facilities must comply when used to house dogs, cats, and nonhuman primates are contained in the proposal to amend part 3. (*See* docket no. 87–004, published in the **Federal Register** on March 15, 1989, 54 FR 10897–10954). We are considering comments on the proposed standards.

Outdoor Housing Facility

One dealer commented that the term "outdoor housing facility" should be revised to accommodate different types of outdoor primate housing enclosures and their temperature requirements. Specific housing facility requirements for nonhuman primates were proposed in docket no. 87–004, published in the **Federal Register** on March 15, 1989 for public comment (54 FR 10897–10954). Temperature requirements for indoor, outdoor, sheltered, and mobile housing facilities are addressed in that document. Some animals, such as dogs and cats can tolerate lower temperatures than nonhuman primates, and different species of nonhuman primates have different temperature requirements. Therefore, we do not believe it is appropriate to include specific requirements in the definition. Accordingly, no change is made in the final rule on the basis of this comment.

Painful Procedure

We received 240 comments (66 from members of the general public, 172 from members of the research or scientific community, and 2 from dealers) urging us to adopt the PHS Policy definition of a "painful procedure." As we stated in the supplementary information accompanying the revised proposal, the proposed definition is similar to and consistent with the PHS Policy, and we do not believe that any modification is needed.

Eleven commenters (2 members of the general public and 9 members of the research or scientific community) stated that the different species' perception of pain should be taken into consideration and that the attending veterinarian is qualified to determine whether a procedure should be considered painful. Under the Act, involvement by the attending veterinarian in planning a painful procedure is essential because of his or her expertise. To this extent, the commenters' view is incorporated in the regulations. One of the principal concerns of Congress underlying the 1985 amendments to the Act is the need to minimize pain and distress. In order to fulfill Congress's intent, we believe it is appropriate to define "painful procedure" in terms of human standards of pain, as does the PHS Policy, to ensure that all potentially painful practices are accorded the protections of the Act, such as those set forth in sections 13(a)(3)(C) and 13(b)(3)A). (7 U.S.C. 2143 (a)(3)(C) and 2143(b)(3)(A)). Four commenters (1 member of the general public and 3 members of the research or scientific community) endorsed using human standards of pain in defining the term.

Twenty-two members of the research or scientific community commented that when pain is relieved through anesthesia, a procedure should not be considered painful. The 1985 amendments to the Act refer repeatedly to the use of pain-relieving drugs and anesthetics in conducting painful procedures and practices (*See, e.g.*, 7 U.S.C. 2143(a)(3)(C)(ii) and 2143(e)(3)(B)). Therefore, under the Act, a procedure in which pain is relieved is still considered to be a painful procedure, and the provisions of the Act which address the conduct of painful procedures apply. We are not adopting the commenters' suggestion.

Pet Animal

We received 19 comments (2 from members of the general public, 3 from members of the research or scientific community, 2 from exhibitors, and 13 from dealers) stating that the definition of "pet animal" should include wild and exotic animals when they are used or sold as pets. These are specifically excluded, as explained in the supplementary information accompanying the revised proposal (54 FR 10829). Congress has exempted retail pet stores from the definition of "dealer" unless they sell animals to a research facility (7 U.S.C. 2132(f)(2)(i)) and therefore, they are not required to be licensed under the Act. We believe that Congress intended to limit this exclusion from the licensing requirements of the Act, and that only animals commonly sold as pets can properly be considered pet animals. In this manner, dealers would not be able to avoid the licensing requirements of the regulations by calling themselves retail pet stores. Excluding wild and exotic animals from the definition of pet animal is consistent with the Act and the definition of "retail pet store" included in this final rule. Accordingly, retail pet stores that sell exotic animals must be licensed under 9 CFR part 2, subpart A. We are not making any change in the definition of pet animal on the basis of this comment.

Positive Physical Contact

One member of the general public and 5 members of the research or scientific community commented that "positive physical contact" should be redefined to mean contact which is beneficial to the animal in the opinion of the attending veterinarian. We agree that attending veterinarians will be involved in assessing positive physical contact, as part of their responsibility for ensuring adequate veterinary care and providing for the animals' health and well-being. We are not making any changes to the definition in the final rule, however, so that all persons involved in the care and use of animals have a proper understanding of the term and their responsibilities under the regulations.

Primary Enclosure

Fourteen members of the research or scientific community stated that the term "primary enclosure" should be redefined to exclude any temporary enclosure used for less than 24 hours. We do not agree that it is appropriate to do so. Minimum requirements for the design, construction, and sanitation of primary enclosures and primary enclosures used for transporting animals are set forth in part 3 of the regulations. We are proposing to revise these requirements in accordance with the 1985 amendments to the Act and our experience in enforcing the Act. (*See* docket no. 87–004 published March 15, 1989, 54 FR 10897–10954). Based upon our experience, we believe that the same requirements are appropriate for any primary enclosure in which an animal is maintained, regardless of whether it is used on a short-term or long-term basis. Accordingly, we not making any changes in the definition of primary enclosure.

Principal Investigator

Four commenters from the research or scientific community suggested that the definition of "principal investigator" be revised to include proposed activities intended for use in teaching. Research conducted to instruct others is research nonetheless, and proposals to use animals in the course of teaching are the responsibility of the principal investigator. The proposed definition is consistent with the definition of research facility, which, in accordance with the Act, is defined to mean "any school * * * institution, organization, or person that uses or intends to use live animals in research, tests, or experiments * * *" (final rule § 1.1j). There is no separate reference to teaching. We are making one change in the definition to include any person associated with the research facility because it is common practice for persons who are not employees to be involved in research activities at such facilities. For these reasons, we do not

BEST COPY AVAILABLE

believe that any change in the definition is necessary in the final rule.

Research Facility

Three commenters from the research or scientific community suggested revising the definition of "research facility" to mean, in the case of a corporation, any administrative unit reasonably designated by the corporation. We do not agree with the commenters proposed change. Under the registration requirements applicable to research facilities in the final rule, the corporation must register as the research facility, or a subsidiary of a corporation must register as the research facility unless it is under the direct control of the parent corporation. In developing the final rule to amend part 2 of the regulations (*see* docket no. 89–131, published elsewhere in this issue of the **Federal Register**), we determined that it is the responsibility of the research facility to ensure compliance with the regulations. We did so to ensure that animal welfare concerns are addressed at the highest level of corporate or administrative responsibility. In this manner, we are assured of an entity's commitment to promoting animal welfare and that it will take appropriate measures to require compliance by all employees. We do not consider it appropriate or advisable to reduce the level at which this responsibility rests.

Suggestions for Additional Definitions

A number of commenters stated that other terms used in the revised proposal to amend part 2 and the proposal to amend part 3 of the regulations, published in the **Federal Register** on March 15, 1989 (54 FR 10835–10897 and 10897–10954, respectively) should be defined for purposes of clarity. We do not believe it is necessary or appropriate to define these terms. In some cases, we believe it is sufficient to rely on ordinary usage and dictionary definitions. In others, we believe that the changes made to the regulations in the final rule to amend part 2 will resolve the commenters' concerns. (*See* docket no. 89–131, published elsewhere in this issue of the **Federal Register**). For the reasons set forth below, we are not adding any terms to the final rule to amend part 1 on the basis of these comments.

One dealer commented that the words "verbal abuse" in § 2.4 of the revised proposal, "Non-interference with APHIS officials" are not clearly defined. We believe that ordinary understanding of those words will suffice and that they need not be defined in the regulations.

One member of the general public stated that "survival surgery" as the term is used in part 2, should be defined. We believe that this term is commonly understood to mean any surgery from which the subject is reasonably expected to recover, and that no further definition is necessary.

One member of the research or scientific community suggested that we provide a definition of the term "natural environment" as used in § 2.35(b)(1)(iii) of the revised proposal to clarify whether outdoor environments altered by man would be considered natural environments. The final rule is revised to provide an exception from the requirement for Committee inspection for studies of free-living wild animals in their natural habitat (final rule § 2.31(c)(2)). We are also exempting field studies from the Committee review and inspection requirements of 9 CFR part 2, subpart C, and have defined that term to mean any study conducted on free-living wild animals in their natural habitat which does not involve an invasive procedure and which does not harm or materially alter the behavior of the animals. The term "natural habitat" necessarily excludes human intervention, and we do not believe further clarification is required.

We received 241 comments (67 from members of the general public, 172 from members of the research or scientific community, and 2 from dealers) suggesting that we provide a definition of the term "animal area" as used in the revised proposal to amend part 2 (docket no. 88–014, published in the **Federal Register** on March 15, 1989, 54 FR 10835–10897). The revisions made in the final rule obviate the need to define the term. The term "animal area" is used in the final regulations only with regard to free-living wild animals living in their natural habitat. We believe that common understanding of the term when used in this context is sufficient, and that further clarification is unnecessary.

Eight commenters (1 member of the general public, 4 members of the research or scientific community, and 3 dealers) stated that we should include a definition of the term "compatible group". It is used in the proposed rule to amend part 3—"Standards" in describing the social grouping requirements proposed for dogs, cats, and nonhuman primates (docket no. 87–004, published in the **Federal Register** on March 15, 1989, 54 FR 10897–10954). We believe that this term is commonly understood to refer to animals that co-exist peaceably and with a sense of well-being, without exhibiting aggressive or hostile behavior towards the other animals. Certain species behave hostilely towards others, or exhibit aggressive behavior which would be detrimental to the other animals. Within species, some animals may exhibit this type of behavior and would be a source of harmful stress to fellow members of the same species. These animals would not be considered compatible. We believe that the common understanding of this term is appropriate when applied to the proposed standards and that further definition is not necessary. We are not making any changes in the regulations on the basis of these comments.

Seven commenters (2 members of the general public, 4 members of the research or scientific community, and 1 dealer) requested that we define "full-spectrum lighting". Under the proposed rule to amend part 3—"Standards", full-spectrum lighting is required if artificial light is used to illuminate indoor, sheltered, and mobile housing facilities used to house nonhuman primates, and indoor and mobile housing facilities used to house dogs and cats (docket no. 87–004, published in the **Federal Register** on March 15, 1989, 54 FR 10897–10954). Under this proposed requirement, if artificial lighting is used it must provide a wide range of wavelengths, such as infra-red and ultraviolet, so that it approximates natural sunlight. We do not believe that further clarification is necessary while we consider the comments received and develop regulations addressing the lighting requirements to be included in part 3.

We received 238 comments (68 from members of the general public, 168 from members of the research or scientific community, and 2 from dealers) stating that the terms "exercise" for dogs and "psychological well-being" of nonhuman primates must be defined in the final rules before research facilities can develop procedures and systems which satisfy the regulations. Two members of the general public and 1 member of the research or scientific community stated that "socialization" of dogs should be defined in part 1, and 44 commenters (3 members of the general public, 40 members of the research or scientific community, and 1 dealer) stated that "psychological well-being" of nonhuman primates should be defined. Requirements for exercise for dogs and for an environment that is adequate to promote the psychological well-being of nonhuman primates are statutorily mandated by the 1985 amendments to the Act. Congress directed the Secretary of Agriculture to promulgate minimum requirements that would fulfill these

needs. We proposed minimum requirements in docket no. 87–004, published in the **Federal Register** on March 15, 1989, 54 FR 10897–10954, based upon our own expertise and the recommendations of advisory committees that we formed to address the Congressional directives. We are considering the comments we received concerning the proposal and are continuing to consult with HHS and members of the IRAC in formulating means of fulfilling our objectives. Through these efforts, we are re-evaluating our proposal and are continuing to explore alternative regulatory solutions that satisfy our mandate from Congress. We do not believe that it is necessary to provide definitions of these terms. Rather, by developing appropriate standards, we believe that upon promulgation of a final rule to amend part 3, all regulated entities will have adequate guidance in complying with the Act, Accordingly, we are not making any changes in the regulations on the basis of these comments.

One dealer suggested that we define "quarantine period" as it is used in the proposal to amend part 3—"Standards", subpart D, as any isolation period imposed by Federal, State, or local laws. The commenter further stated that the appropriate quarantine period for newly-imported nonhuman primates should be 90–120 days, subject to extension at the direction of the attending veterinarian. Quarantine requirements are imposed by Federal, State, and local law, as noted in the proposed regulations (proposed § 3.80(c)(2)(v)(A)). Further definition of the term "quarantine period" is therefore unwarranted.

Another dealer suggested that we define "quarantine" as it relates to cage size and exercise requirements for nonhuman primates that are caught in the wild and those that are bred in captivity. Cage size requirements for animals maintained under quarantine by dealers are set forth in the proposed rules (proposed § 3.80(c)(2)(v)(A)), and there is no requirement in the proposed regulations for release by dealers of quarantined animals for exercise. We do not believe that defining the term "quarantine" is necessary.

Statutory Authority for This Proposed Rule

This final rule is issued pursuant to the Animal Welfare Act (Act), as amended, 7 U.S.C. 2131–2157. Congress recently added significantly to the Secretary's responsibilities under the Act by amendments in the Food Security Act of 1985, Public Law No. 99–198, approved December 23, 1985. The declared policy of the Act is to ensure that animals intended for use in research facilities, as pets, or for exhibition purposes are provided humane care and treatment; to assure the humane treatment of animals during transportation; and to prevent the sale of stolen animals.

The Act mandates that the Secretary of Agriculture promulgate regulations and standards to govern the humane handling, care, treatment, and transportation of animals by dealers, exhibitors, research facilities, carriers, and intermediate handlers. To accomplish this, the Secretary must define certain key words used in the regulations and standards so that persons subject to the Act, regulations, and standards can comply with their requirements.

The Act itself defines some of the terms which appear in this rule. The Act also authorizes the Secretary to promulgate such rules, including additional definitions, as he deems necessary to effectuate the purposes of the Act.

Executive Order 12291 and Regulatory Flexibility Act

This final rule contains new and revised definitions of terms that complement regulatory changes for parts 2 and 3 of the Animal Welfare regulations. The general intent is to update, clarify, and expand the list of relevant definitions as required by the amendments to the Act. The Department has determined that no economic impacts would result from this action. Therefore, this final rule is not a "major rule" for the purposes of Executive Order 12291, under the criteria therein. In addition, the Administrator hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities. It is anticipated that the economic impacts would result from final rules for part 2, "Animal Welfare Regulations," and part 3, "Standards." The regulatory impact analysis for part 2 of the regulations is included in the final rule for part 2, "Animal Welfare Regulations."

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V).

Paperwork Reduction Act

The information collection and recordkeeping provisions that are included in the final rules amending 9 CFR parts 1 and 2 have been submitted for approval to the Office of Management and Budget (OMB), in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) under control number 0579–0036, and upon approval, will become effective upon October 30, 1989. The Department has requested that OMB conclude its review no later than October 30, 1989.

The public reporting burden for this collection of information is estimated to average 0.96 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The public recordkeeping burden is estimated to average 4.0 annual hours per recordkeeper.

Send written comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Agriculture, Clearance Officer, OIRM, Room 404W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0579–0036), Washington, DC 20503.

List of Subjects in 9 CFR Part 1

Animal welfare, Animal housing, Dealers, Exhibitors, Research facilities, Humane animal handling.

We are amending 9 CFR part 1 as follows:

PART 1—DEFINITION OF TERMS

1. The authority citation for Part 1 is revised to read as follows:

Authority: 7 U.S.C. 2131–2157; 7 CFR 2.17, 2.51, and 371.2(g).

2. Section 1.1 is revised to read as follows:

§ 1.1 Definitions.

For the purposes of this subchapter, unless the context otherwise requires, the following terms shall have the meanings assigned to them in this section. The singular form shall also signify the plural and the masculine form shall also signify the feminine. Words undefined in the following paragraphs shall have the meaning attributed to them in general usage as reflected by definitions in a standard dictionary.

Act means the Act of August 24, 1966 (Pub. L. 89–544), (commonly known as the Laboratory Animal Welfare Act), as amended by the Act of December 24, 1970 (Pub. L. 91–579), (the Animal Welfare Act of 1970), the Act of April 22, 1976 (Pub. L. 94–279), (the Animal Welfare Act of 1976), and the Act of December 23, 1985 (Pub. L. 99–198), (the Food Security Act of 1985), and as it may be subsequently amended.

Activity means, for purposes of part 2, subpart C of this subchapter, those elements of research, testing, or teaching procedures that involve the care and use of animals.

Administrative unit means the organizational or management unit at the departmental level of a research facility.

Administrator means the Administrator of the Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or any other official of the Animal and Plant Health Inspection Service to whom authority has been delegated to act in his stead.

Ambient temperature means the air temperature surrounding the animal.

Animal means any live or dead dog, cat, nonhuman primate, guinea pig, hamster, rabbit, or any other warmblooded animal, which is being used, or is intended for use for research, teaching, testing, experimentation, or exhibition purposes, or as a pet. This term excludes: Birds, rats of the genus *Rattus* and mice of the genus *Mus* bred for use in research, and horses and other farm animals, such as, but not limited to livestock or poultry, used or intended for use as food or fiber, or livestock or poultry used or intended for use for improving animal nutrition, breeding, management, or production efficiency, or for improving the quality of food or fiber. With respect to a dog, the term means all dogs including those used for hunting, security, or breeding purposes.

Animal act means any performance of animals where such animals are trained to perform some behavior or action or are part of a show, performance, or exhibition.

APHIS means the Animal and Plant Health Inspection Service, United States Department of Agriculture.

APHIS official means any person employed by the Department who is authorized to perform a function under the Act and the regulations in 9 CFR parts 1, 2, and 3.

APHIS, REAC Sector Supervisor means a veterinarian or his designee, employed by APHIS, who is assigned by the Administrator to supervise and perform the official work of APHIS in a given State or States. As used in part 2 of this subchapter, the APHIS, REAC Sector Supervisor shall be deemed to be the person in charge of the official work of APHIS in the State in which the dealer, exhibitor, research facility, intermediate handler, carrier, or operator of an auction sale has his principal place of business.

Attending veterinarian means a person who has graduated from a veterinary school accredited by the American Veterinary Medical Association's Council on Education, or has a certificate issued by the American Veterinary Medical Association's Education Commission for Foreign Veterinary Graduates, or has received equivalent formal education as determined by the Administrator; has received training and/or experience in the care and management of the species being attended; and who has direct or delegated authority for activities involving animals at a facility subject to the jurisdiction of the Secretary.

Business hours means a reasonable number of hours between 7 a.m. and 7 p.m., Monday through Friday, except for legal Federal holidays, each week of the year, during which inspections by APHIS may be made.

Business year means the 12-month period during which business is conducted, and may be either on a calendar or fiscal-year basis.

Carrier means the operator of any airline, railroad, motor carrier, shipping line, or other enterprise which is engaged in the business of transporting any animals for hire.

Cat means any live or dead cat (Felis catus) or any cat-hybrid cross.

Class "A" licensee (breeder) means a person subject to the licensing requirements under part 2 and meeting the definition of a "dealer" (§ 1.1), and whose business involving animals consists only of animals that are bred and raised on the premises in a closed or stable colony and those animals acquired for the sole purpose of maintaining or enhancing the breeding colony.

Class "B" licensee means a person subject to the licensing requirements under part 2 and meeting the definition of a "dealer" (§ 1.1), and whose business includes the purchase and/or resale of any animal. This term includes brokers, and operators of an auction sale, as such individuals negotiate or arrange for the purchase, sale, or transport of animals in commerce. Such individuals do not usually take actual physical possession or control of the animals, and do not usually hold animals in any facilities. A class "B" licensee may also exhibit animals as a minor part of the business.

Class "C" licensee (exhibitor) means a person subject to the licensing requirements under part 2 and meeting the definition of an "exhibitor" (§ 1.1), and whose business involves the showing or displaying of animals to the public. A class "C" licensee may buy and sell animals as a minor part of the business in order to maintain or add to his animal collection.

Commerce means trade, traffic, transportation, or other commerce:

(1) Between a place in a State and any place outside of such State, including any foreign country, or between points within the same State but through any place outside thereof, or within any territory, possession, or the District of Columbia; or

(2) Which affects the commerce described in this part.

Committee means the Institutional Animal Care and Use Committee (IACUC) established under section 13(b) of the Act. It shall consist of at least three (3) members, one of whom is the attending veterinarian of the research facility and one of whom is not affiliated in any way with the facility other than as a member of the committee, however, if the research facility has more than one Doctor of Veterinary Medicine (DVM), another DVM with delegated program responsibility may serve. The research facility shall establish the Committee for the purpose of evaluating the care, treatment, housing, and use of animals, and for certifying compliance with the Act by the research facility.

Dealer means any person who, in commerce, for compensation or profit, delivers for transportation, or transports, except as a carrier, buys, or sells, or negotiates the purchase or sale of: Any dog or other animal whether alive or dead (including unborn animals, organs, limbs, blood, serum, or other parts) for research, teaching, testing, experimentation, exhibition, or for use as a pet; or any dog for hunting, security, or breeding purposes. This term does not include: A retail pet store, as defined in this section, unless such store sells any animals to a research facility, an exhibitor, or a dealer (wholesale); or any person who does not sell, or negotiate the purchase or sale of any wild or exotic animal, dog, or cat and who derives no more than $500 gross income from the sale of animals other than wild or exotic animals, dogs, or cats, during any calendar year.

Department means the U.S. Department of Agriculture.

Deputy Administrator means the Deputy Administrator for Regulatory Enforcement and Animal Care (REAC) or any other official of REAC to whom

authority has been delegated to act in his stead.

Dog means any live or dead dog (*Canis familiaris*) or any dog-hybrid cross.

Dwarf hamster means any species of hamster such as the Chinese and Armenian species whose adult body size is substantially less than that attained by the Syrian or Golden species of hamsters.

Endangered species means those species defined in the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and as it may be subsequently amended.

Euthanasia means the humane destruction of an animal accomplished by a method that produces rapid unconsciousness and subsequent death without evidence of pain or distress, or a method that utilizes anesthesia produced by an agent that causes painless loss of consciousness and subsequent death

Exhibitor means any person (public or private) exhibiting any animals, which were purchased in commerce or the intended distribution of which affects commerce, or will affect commerce, to the public for compensation, as determined by the Secretary. This term includes carnivals, circuses, animal acts, zoos, and educational exhibits, exhibiting such animals whether operated for profit or not. This term excludes retail pet stores, horse and dog races, organizations sponsoring and all persons participating in State and county fairs, livestock shows, rodeos, field trials, coursing events, purebred dog and cat shows and any other fairs or exhibitions intended to advance agricultural arts and sciences as may be determined by the Secretary.

Exotic animal means any animal not identified in the definition of "animal" provided in this part that is native to a foreign country or of foreign origin or character, is not native to the United States, or was introduced from abroad. This term specifically includes animals such as, but not limited to, lions, tigers, leopards, elephants, camels, antelope, anteaters, kangaroos, and water buffalo, and species of foreign domestic cattle, such as Ankole, Gayal, and Yak.

Farm animal means any domestic species of cattle, sheep, swine, goats, llamas, or horses, which are normally and have historically, been kept and raised on farms in the United States, and used or intended for use as food or fiber, or for improving animal nutrition, breeding, management, or production efficiency, or for improving the quality of food or fiber. This term also includes animals such as rabbits, mink, and chinchilla, when they are used solely for purposes of meat or fur, and animals such as horses and llamas when used solely as work and pack animals.

Federal agency means an Executive agency as such term is defined in section 105 of title 5, United States Code, and with respect to any research facility means the agency from which the research facility receives a Federal award for the conduct of research, experimentation, or testing involving the use of animals.

Federal award means any mechanism (including a grant, award, loan, contract, or cooperative agreement) under which Federal funds are used to support the conduct of research, experimentation, or testing, involving the use of animals. The permit system established under the authorities of the Endangered Species Act, the Marine Mammal Protection Act, and the Migratory Bird Treaty Act, are not considered to be Federal awards under the Animal Welfare Act.

Federal research facility means each department, agency, or instrumentality of the United States which uses live animals for research or experimentation.

Field study means any study conducted on free-living wild animals in their natural habitat, which does not involve an invasive procedure, and which does not harm or materially alter the behavior of the animals under study.

Handling means petting, feeding, watering, cleaning, manipulating, loading, crating, shifting, transferring, immobilizing, restraining, treating, training, working and moving, or any similar activity with respect to any animal.

Housing facility means any land, premises, shed, barn, building, trailer, or other structure or area housing or intended to house animals.

Hybrid cross means an animal resulting from the crossbreeding between two different species or types of animals. Crosses between wild animal species, such as lions and tigers, are considered to be wild animals. Crosses between wild animal species and domestic animals, such as dogs and wolves or buffalo and domestic cattle, are considered to be domestic animals.

Impervious surface means a surface that does not permit the absorption of fluids. Such surfaces are those that can be thoroughly and repeatedly cleaned and disinfected, will not retain odors, and from which fluids bead up and run off or can be removed without their being absorbed into the surface material.

Indoor housing facility means any structure or building with environmental controls housing or intended to house animals and meeting the following three requirements:

(1) It must be capable of controlling the temperature within the building or structure within the limits set forth for that species of animal, of maintaining humidity levels of 30 to 70 percent and of rapidly eliminating odors from within the building; and

(2) It must be an enclosure created by the continuous connection of a roof, floor, and walls (a shed or barn set on top of the ground does not have a continuous connection between the walls and the ground unless a foundation and floor are provided); and

(3) It must have at least one door for entry and exit that can be opened and closed (any windows or openings which provide natural light must be covered with a transparent material such as glass or hard plastic).

Intermediate handler means any person, including a department, agency, or instrumentality of the United States or of any State or local government (other than a dealer, research facility, exhibitor, any person excluded from the definition of a dealer, research facility, or exhibitor, an operator of an auction sale, or a carrier), who is engaged in any business in which he receives custody of animals in connection with their transportation in commerce.

Inspector means any person employed by the Department who is authorized to perform a function under the Act and the regulations in 9 CFR parts 1, 2, and 3.

Institutional official means the individual at a research facility who is authorized to legally commit on behalf of the research facility that the requirements of 9 CFR parts 1, 2, and 3 will be met.

Isolation in regard to marine mammals means the physical separation of animals to prevent contact and a separate, noncommon, water circulation and filtration system for the isolated animals.

Licensed veterinarian means a person who has graduated from an accredited school of veterinary medicine or has received equivalent formal education as determined by the Administrator, and who has a valid license to practice veterinary medicine in some State.

Licensee means any person licensed according to the provisions of the Act and the regulations in part 2 of this subchapter.

Major operative procedure means any surgical intervention that penetrates and exposes a body cavity or any procedure which produces permanent impairment of physical or physiological functions.

Minimum horizontal dimension (MHD) means the diameter of a circular pool of water, or in the case of a square, rectangle, oblong, or other shape pool.

the diameter of the largest circle that can be inserted within the confines of such a pool of water.

Mobile or traveling housing facility means a transporting vehicle such as a truck, trailer, or railway car, used to house animals while traveling for exhibition or public education purposes.

Nonconditioned animals means animals which have not been subjected to special care and treatment for sufficient time to stabilize, and where necessary, to improve their health.

Nonhuman primate means any nonhuman member of the highest order of mammals including prosimians, monkeys, and apes.

Operator of an auction sale means any person who is engaged in operating an auction at which animals are purchased or sold in commerce.

Outdoor housing facility means any structure, building, land, or premise, housing or intended to house animals, which does not meet the definition of any other type of housing facility provided in the regulations, and in which temperatures cannot be controlled within set limits.

Painful procedure as applied to any animal means any procedure that would reasonably be expected to cause more than slight or momentary pain or distress in a human being to which that procedure was applied, that is, pain in excess of that caused by injections or other minor procedures.

Paralytic drug means a drug which causes partial or complete loss of muscle contraction and which has no anesthetic or analgesic properties, so that the animal cannot move, but is completely aware of its surroundings and can feel pain.

Person means any individual, partnership, firm, joint stock company, corporation, association, trust, estate, or other legal entity.

Pet animal means any animal that has commonly been kept as a pet in family households in the United States, such as dogs, cats, guinea pigs, rabbits, and hamsters. This term excludes exotic animals and wild animals.

Positive physical contact means petting, stroking, or other touching, which is beneficial to the well-being of the animal.

Primary conveyance means the main method of transportation used to convey an animal from origin to destination, such as a motor vehicle, plane, ship, or train.

Primary enclosure means any structure or device used to restrict an animal or animals to a limited amount of space, such as a room, pen, run, cage, compartment, pool, hutch, or tether. In the case of animals restrained by a tether (e.g., dogs on chains), it includes the shelter and the area within reach of the tether.

Principal investigator means an employee of a research facility, or other person associated with a research facility, responsible for a proposal to conduct research and for the design and implementation of research involving animals.

Quorum means a majority of the Committee members.

Random source means dogs and cats obtained from animal pounds or shelters, auction sales, or from any person who did not breed and raise them on his or her premises.

Registrant means any research facility, carrier, intermediate handler, or exhibitor not required to be licensed under section 3 of the Act, registered pursuant to the provisions of the Act and the regulations in part 2 of this subchapter.

Research facility means any school (except an elementary or secondary school), institution, organization, or person that uses or intends to use live animals in research, tests, or experiments, and that (1) purchases or transports live animals in commerce, or (2) receives funds under a grant, award, loan, or contract from a department, agency, or instrumentality of the United States for the purpose of carrying out research, tests, or experiments: *Provided*, That the Administrator may exempt, by regulation, any such school, institution, organization, or person that does not use or intend to use live dogs or cats, except those schools, institutions, organizations, or persons, which use substantial numbers (as determined by the Administrator) of live animals the principal function of which schools, institutions, organizations, or persons, is biomedical research or testing, when in the judgment of the Administrator, any such exemption does not vitiate the purpose of the Act.

Retail pet store means any outlet where only the following animals are sold or offered for sale, at retail, for use as pets: Dogs, cats, rabbits, guinea pigs, hamsters, gerbils, rats, mice, gophers, chinchilla, domestic ferrets, domestic farm animals, birds, and coldblooded species. Such definition excludes—

(1) Establishments or persons who deal in dogs used for hunting, security, or breeding purposes;

(2) Establishments or persons exhibiting, selling, or offering to exhibit or sell any wild or exotic or other nonpet species of warmblooded animals (except birds), such as skunks, raccoons, nonhuman primates, squirrels, ocelots, foxes, coyotes, etc.;

(3) Any establishment or person selling warmblooded animals (except birds, and laboratory rats and mice) for research or exhibition purposes; and

(4) Any establishment wholesaling any animals (except birds, rats and mice).

(5) Any establishment exhibiting pet animals in a room that is separate from or adjacent to the retail pet store, or in an outside area, or anywhere off the retail pet store premises.

Sanitize means to make physically clean and to remove and destroy, to the maximum degree that is practical, agents injurious to health.

Secretary means the Secretary of Agriculture of the United States or his representative who shall be an employee of the Department.

Sheltered housing facility means a housing facility which provides the animals with shelter; protection from the elements; and protection from temperature extremes at all times. A sheltered housing facility may consist of runs or pens totally enclosed in a barn or building, or of connecting inside/outside runs or pens with the inside pens in a totally enclosed building.

Standards means the requirements with respect to the humane housing, exhibition, handling, care, treatment, temperature, and transportation of animals by dealers, exhibitors research facilities, carriers, intermediate handlers, and operators of auction sales as set forth in part 3 of this subchapter.

State means a State of the United States, the District of Columbia, Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, or any other territory or possession of the United States.

Study area means any building room, area, enclosure, or other containment outside of a core facility or centrally designated or managed area in which animals are housed for more than 12 hours.

Transporting device means an interim vehicle or device, other than man, used to transport an animal between the primary conveyance and the terminal facility or in and around the terminal facility of a carrier or intermediate handler.

Transporting vehicle means any truck, car, trailer, airplane, ship, or railroad car used for transporting animals.

Weaned means that an animal has become accustomed to take solid food and has so done, without nursing, for a period of at least 5 days.

Wild animal means any animal which is now or historically has been found in the wild, or in the wild state, within the boundaries of the United States, its

territories, or possessions. This term includes, but is not limited to, animals such as: Deer, skunk, opossum, raccoon, mink, armadillo, coyote, squirrel, fox, wolf.

Wild state means living in its original, natural condition; not domesticated.

Zoo means any park, building, cage, enclosure, or other structure or premise in which a live animal or animals are kept for public exhibition or viewing, regardless of compensation.

Done in Washington, DC, this 25th day of August, 1989.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 89-20425 Filed 8-30-89; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF AGRICULTURE

9 CFR Parts 2 and 3

[Docket No. 89-131]

RIN 0579-AA18

Animal Welfare

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the Animal Welfare regulations contained in 9 CFR part 2, to comply with and implement the amendments to the Animal Welfare Act (7 U.S.C. 2131, *et seq.*) ("Act") contained in Pub. L. 99-198, "The Food Security Act of 1985," enacted December 23, 1985, and to reflect our experience in administering the regulations. In addition to rewriting the regulations to facilitate compliance by making them easier to understand, we are adding a new subpart which pertains exclusively to research facilities, and which consolidates all of the regulations in part 2 applicable to research facilities. The revised regulations also provide requirements for registration and licensing under the Act, adequate veterinary care, handling, holding facilities, identification of animals, and recordkeeping. The revised regulations are necessary to clarify the responsibilities of regulated persons under the Act, as amended, and to promote animal welfare.

DATES: This final rule shall become effective October 30, 1989; however, the portions of the rule which concern or relate to information collection and recordkeeping will become effective October 30, 1989, upon approval by the Office of Management and Budget (OMB). The information collection requirements of this final rule have been submitted to OMB for review and approval. The Department has requested that OMB conclude its review no later than October 30, 1989. If any portion is disapproved, notice of disapproval will be published in the **Federal Register** prior to that date.

FOR FURTHER INFORMATION CONTACT: Dr. Dale F. Schwindaman, REAC, APHIS, USDA, Room 206, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-6491.

SUPPLEMENTARY INFORMATION:

Background

This final rule revises the regulations contained in 9 CFR 2.1 through 2.130. It is the result of an intensive effort that began in 1985 when Congress amended the Animal Welfare Act (7 U.S.C. 2131, *et seq.*) (the Act) in Public Law 99-198, "The Food Security Act of 1985," and directed the Secretary of Agriculture to promulgate regulations governing the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors, including requirements for exercise of dogs and a physical environment adequate to promote the psychological well-being of nonhuman primates. The final rule reflects APHIS's many years of experience in enforcing the Act and the Animal Welfare regulations. We considered many thousands of public comments in deciding upon the content of the final rule. Our ongoing consultation with the U.S. Department of Health and Human Services, as well as other Federal agencies concerned with animal welfare, also contributed significantly to determining how best to fulfill our statutory mandate.

Due to the length and complexity of this document, it is broken down into general headings and specific subheadings where appropriate, to assist the reader. The supplementary information begins with a brief history of this rule-making. Next we describe the changes we have made in the final rule, both in form and in content. These changes are based upon our reconsideration of the proposed regulations in light of the comments we received and our consultation with other Federal agencies. Part 2 has been reorganized, in part, in this final rule, so that all requirements imposed upon research facilities are contained in one subpart of the regulations. We then discuss, in detail, how the requirements imposed upon research facilities under the final rule differ substantively from the two previous proposals, and how they do not. We also describe other changes we are making to part 2 based upon our reconsideration of those provisions. Our response to the comments we received in response to the March 15, 1989 revised proposal follows. Lastly, we address the concerns raised in the public comment letters and by Federal agencies regarding our economic assessments of the cost of implementing the proposed regulations.

Proposed Rules

The Animal Welfare regulations are contained in Title 9 of the Code of Federal Regulations, chapter I, subchapter A—Animal Welfare, parts 1, 2, and 3 (the regulations). Part 1 provides definitions of the terms used in parts 2 and 3. Part 2 sets forth the administrative and institutional responsibilities of regulated persons under the Act, and part 3 provides specifications for the humane handling, care, treatment, and transportation of animals covered by the Act by regulated entities.

In two documents published in the **Federal Register**, on March 31, 1987 (52 FR 10292-10298 and 52 FR 10298-10322, respectively), we proposed to revise parts 1 and 2 of the Animal Welfare regulations. In addition to the definitions of terms, the proposed amendments pertained to licensing of dealers and exhibitors, and registration of intermediate handlers, research facilities, and carriers. The proposed regulations also set forth requirements applicable to all regulated entities for recordkeeping and identification of animals, holding periods and facilities, inspections, adequate veterinary care, and requirements for Institutional Animal Care and Use Committees as agents of the research facilities. These changes were proposed under the authority of the Animal Welfare Act, as amended by Congress in 1985. At that time, we did not publish a proposed rule to amend part 3—"Standards" of the regulations.

We solicited comments concerning the proposal for a 60-day period ending June 1, 1987. The comment period was twice extended and ended on August 27, 1987. A total of 7,857 comments were timely received and considered. Many of the comments we received stated that it was difficult to comment upon the proposals to amend parts 1 and 2 of the regulations independently of our proposal to amend the standards in part 3. We have maintained that upon their publication as final rules, parts 1 and 2 of the regulations can be fully implemented with the existing standards in part 3. In response to the comments, we decided to publish revised proposals to amend parts 1 and 2 along with our proposed rule to amend part 3, to assist the public in reviewing the proposed standards in part 3 and to afford the public an opportunity to comment on the interrelationship of the definitions and regulations in parts 1 and 2 with the proposed standards in part 3. Accordingly, on March 15, 1989, we published in the **Federal Register** three documents: Docket No. 88–013, a proposed rule to amend part 1—"Definition of Terms," (54 FR 10822–10835); Docket No. 88–014, a proposed rule to amend part 2—"Regulations," (54 FR 10835–10897); and Docket No. 87–004, a proposed rule to amend subparts A through D of part 3—"Standards," (54 FR 10897–10954).

The revised proposals published in March, 1989, were prepared with the benefit of the public's comments and reflected our thinking at that time of how best to carry out our statutory mandate and our animal welfare objectives. Throughout this rule-making process, however, we have continued our consideration of alternative means to implement the complex regulatory scheme required by the Animal Welfare Act, as amended, and addressed by the commenters in response to our initial proposal. Many of the comments we received in response to our initial proposal concerned the administrative and economic burdens that the regulations would impose on regulated persons. These concerns were repeated in many comments submitted for our consideration following publication of the March 15, 1989 revised proposal.

We also continued our consultation, in accordance with the requirements of the Act (7 U.S.C. 2145), with the U.S. Department of Health and Human Services (HHS) and members of the Interagency Research Animal Committee (IRAC), a committee comprising representatives of Federal agencies concerned with animal welfare. Together, we evaluated different means of reducing the administrative and recordkeeping burdens the proposed rules imposed upon regulated entities without sacrificing our underlying objectives. The regulatory and economic burdens imposed upon the regulated public in this final rule have been substantially reduced by harmonizing the requirements contained in part 2 for research institutions with those imposed upon the large number of research facilities receiving funding under the Health Research Extension Act of 1985, Public Law 99–158, wherever consistent with our statutory mandate.

We believe this final rule provides a responsible regulatory response to our statutory mandate. It reflects our consideration of the interrelationships between parts 1 and 2 and the standards in part 3 suggested to us in the comments we received. We believe parts 1 and 2 can now be readily implemented while we continue to review the public's comments and consider alternatives concerning the standards that should be included in part 3.

Reorganization of Part 2

The 1985 amendments to the Act affect all regulated entities. However, the most wide-ranging impact is on research facilities. As a result of the amendments, additional institutional responsibilities are imposed on the research community, including: The establishment of institutional animal committees with inspection and reporting duties; providing adequate veterinary care; training of personnel in animal care and treatment; and assurances that animal pain and distress are minimized and that alternatives to painful procedures are considered. Both of our proposals to amend part 2 contained a separate subpart C, applicable only to research facilities, which set forth the duties of the facilities' Institutional Animal Care and Use Committee (IACUC) and many institutional responsibilities. In addition, subpart B set forth the requirements and procedures for research facilities to register under the Act, and subpart D—"Attending Veterinarian and Adequate Veterinary Care," imposed specific requirements on research facilities regarding the provision of veterinary care, which were in addition to the requirements set forth for all licensed or registered entities. Other regulations in the proposed rules contained separate requirements for research facilities as well, such as requirements for identification of animals, recordkeeping, and holding periods.

We have determined that placing all of these requirements in one subpart of the regulations would assist research facilities in understanding their responsibilities under the regulations, and would therefore facilitate their compliance. Accordingly, subpart C is renamed, "Research facilities," in the final rule. It consists of all of the regulations in part 2 that are applicable to research facilities. References to research facilities that were contained in other subparts of part 2 in the revised proposal are removed. Although this results in some duplication in the regulations in cases where an identical provision applies to other regulated entities, we believe it is appropriate to consolidate the many research facility requirements in one discrete subpart to facilitate compliance.

The remaining subparts of part 2 remain substantially as proposed in the revised proposal for the reasons set forth in that document and as discussed below under the general headings, "Other changes to part 2" and "Public comments." Certain sections and paragraphs have been redesignated as a result of the reorganization of research facility requirements.

Subpart C—Research Facilities

Many of the regulations pertaining to research facilities in the revised proposal remain unchanged in the final rule except for their location in the rule and their numerical designation. Others were modified to harmonize them with the guidelines already in place at federally funded institutions, as suggested by many commenters and other Federal agencies. Those facilities comply with the guidelines set forth in the Public Health Service Policy on Humane Care and Use of Laboratory Animals (PHS Policy). The modified provisions, as well as those containing more significant departures from the 1987 and 1989 proposals, are discussed below, in the order in which they appear in the final rule.

The following chart provides the derivation of the sections contained in subpart C, paragraph by paragraph, to assist the reader. The sections and paragraphs listed under the heading, "Final rule" were derived either conceptually or specifically from the corresponding sections and paragraphs listed under the heading, "Revised proposed rule."

Derivation Table

Final rule	Revised proposed rule
§ 2.30(a)(1)	§ 2.25(a).

Section 2.30 Registration

Section 2.30 of the final rule sets forth registration requirements and procedures for research facilities. Except for replacement of the term, "Area Veterinarian in Charge," with "APHIS, REAC Sector Supervisor," the registration requirements remain unchanged from the March 1989 proposal. This change reflects an internal agency reorganization within the Animal and Plant Health Inspection Service (APHIS) which created the Regulatory Enforcement and Animal Care organizational unit (REAC). REAC is charged with responsibility for administering and enforcing the Animal Welfare Act and regulations. This term is defined in the final rule to amend part 1—"Definition of Terms," a related document published elsewhere in this issue of the **Federal Register**.

Section 2.31 Institutional Animal Care and Use Committee (IACUC)

As explained in detail in the revised proposal, we received many comments from the research community expressing concern that the Institutional Animal Care and Use Committee (IACUC or Committee) and attending veterinarian were allocated too much responsibility and authority, so that they functioned, in effect, as enforcement agents for APHIS. In response to those comments, we revised the proposed rule by reorganizing the provisions of §§ 2.30 and 2.35 to clarify that the duties performed by the IACUC and the attending veterinarian to ensure compliance with the regulations are ultimately the responsibility of the research facility, and that the research facility must provide them with adequate authority to carry out their functions.

Despite these modifications, it has become evident to us, through our further consideration of the comments received and continued consultation with HHS, that research facilities should be accorded greater flexibility in determining how best to ensure compliance. Research facilities vary greatly in size, in the number of animals they handle, and in the number of personnel they employ. Due to these variations, rigid administrative requirements would be inappropriate for all research facilities, and they should be permitted to develop procedures that satisfy the requirements of the Act and correspond to their operations. We agree that a more flexible approach will achieve the Act's objectives at lower cost to research facilities, many of which already maintain internal review and reporting mechanisms, such as those required under the PHS Policy, than would be incurred under the revised proposal. The mechanisms employed must allow us to inspect for and verify compliance, however, as under the proposed rules. We have therefore modified the provisions regulating the manner in which a research facility, through its Committee, carries out its statutorily assigned duties so that research facilities have the necessary flexibility to develop internal procedures which are best suited for their particular needs. Research facilities are ultimately responsible for complying with the Act and regulations, and must ensure that the procedures they adopt, including those of the Committee, are an effective means of satisfying their obligations.

Changes reflecting greater flexibility, as well as other modifications to the Committee's functions, are explained in detail in this section, in the order in which they appear in the final rule. Due to the redesignation of sections and paragraphs in the final rule, we have included the source paragraph from which the final rule is derived, where appropriate, to assist the reader. The source section number refers to the corresponding provision in our initial proposal or the revised proposed rule of March 1989.

Committee Membership

Section 2.31(a) (revised proposal § 2.30(b)) of the final rule requires that the Chief Executive Officer of the research facility, rather than the "research facility" itself, as required in the proposed rule and revised proposal, appoint an Institutional Animal Care and Use Committee. This change is made to more accurately reflect the statutory language (7 U.S.C. 2143(b)(1)).

We are revising the requirement that the attending veterinarian for the facility be a member of the Committee. Section 2.33(a)(3) of the final rule requires that the attending veterinarian for the facility be a voting member of the Committee, except that facilities that employ more than one Doctor of Veterinary Medicine (DVM) may use another DVM with delegated program responsibility as the

DVM member of the Committee. Accordingly, § 2.31(b)(3)(i) of the final rule (revised proposal § 2.35(a)(5)(i)) is revised to provide that at least one member of the Committee shall be a Doctor of Veterinary Medicine with training or experience in laboratory animal science and medicine. This change continues to fully satisfy the provisions of the Act, as amended (7 U.S.C. 2143(b)(1)(A)), and is consistent with the PHS Policy. It may in fact be preferable at larger institutions where the attending veterinarian's clinical responsibilities are a full-time concern. At many larger institutions, the volume of animal subjects and animal sites under the Committee's purview results in the veterinarian member of the Committee filling an administrative, rather than clinical, role. We believe that a Doctor of Veterinary Medicine, other than the attending veterinarian, can be an appropriate representative for animal care and medical concerns as long as he or she has training or experience in laboratory animal science and medicine.

The final rule does not contain a requirement that the research facility maintain an up-to-date list of Committee members indicating their degrees, position, and qualifications. We had required that this information be maintained by the attending veterinarian and available to us for inspection (revised proposal § 2.35(a)(7)). This information is available to us through a variety of sources and through the Chief Executive Officer of the research facility who is responsible for appointing qualified members to the Committee. Therefore, this recordkeeping requirement can be removed without affecting the ready availability to us of this information.

Committee Functions

The final rule sets forth the functions that the Committee shall perform, "as an agent of the research facility" (final rule § 2.31(c)). We have added this language to allay the commenters' concerns that under the proposed rules, the Committee would operate as an enforcement agent for APHIS. It was never our intent that the Committee carry out APHIS's regulatory responsibilities. Rather, the Committee is intended to function in an oversight and clearing-house capacity to assist the facility in maintaining compliance with the Act and regulations. As stated in the supplementary information accompanying the revised proposal, it is "our intent that institutions act through [the Committee and attending veterinarian] while remaining ultimately responsible." (54 FR 10838)

1. *Semi-annual review and evaluation.* We are retaining the requirement in the final rule for Committee review and evaluation at least once every 6 months of activities involving animals (final rule §§ 2.31(c) (1) and (2)). The revised proposal would require, as part of the inspection of all animal study areas and facilities, that the Committee review "all practices and procedures involving pain to animals" and "the condition of all animals, in order to ensure compliance with the provisions of the Act to minimize pain and distress to the animals." (Revised proposal § 2.35(b)(1)(i) (A) and (B)). We have simplified the final rule by requiring that the Committee inspect all of the research facility's animal facilities, including animal study areas (*see* companion docket 89–130, published elsewhere in this issue of the **Federal Register** for the definition of "study area"), and that it review the facility's program for humane care and use of animals. The requirement that the Committee use title 9 of the Code of Federal Regulations, chapter I, subchapter A—Animal Welfare, as the basis for its inspection, is continued in the final rule. There is no need to specify that the twice yearly review include a review of painful procedures, since they are necessarily subsumed in the reviews of a facility's program for humane care and use of animals and of all animal facilities and study areas. Specific reference to painful procedures and the condition of animals was based upon the language of the Act and its emphasis on minimizing animal pain and distress (7 U.S.C. 2143(b)(3)). However, as all animal facilities and study areas must be inspected at least once every 6 months under the final rule, we believe this simplification of the regulations accomplishes the same result. In addition, the Committee's review every 6 months of the facility's program for humane care and use of animals will include review of provisions requiring that pain and distress are minimized, and Committee inspection will determine whether the activities are in compliance.

Revised proposal § 2.35(b)(1)(iii) would allow research facilities to apply to the Administrator for an exemption from the twice yearly Committee inspection requirements for animal study areas where the animals are studied in their natural environment and the study area prohibits easy access. Members of the IRAC stated that the requirement to apply for an exemption for field studies would be burdensome, and that as a practical matter, it would be impossible to hold field sites to the same regulatory standards and requirements as dedicated surgical facilities and laboratories.

We agree that it may be impractical and burdensome for research facilities to send their Committees to field sites to conduct inspections and observe subject animals in their natural habitat. In some instances, it may be impossible for the Committee members to observe the condition of the animals if the animals' instincts are to avoid being seen. The Animal Welfare Act, as amended, is primarily intended to promote the humane care and treatment of animals used in biomedical research under captive or laboratory conditions. Subject animals that are studied in their natural habitat would not require the same level of protection as captive animals. We are therefore providing in § 2.31(c)(2) of the final rule that research facilities may determine whether their Committee will inspect animal areas containing free-living wild animals in their natural habitat, and we are deleting the requirement that research facilities apply to the Administrator for an exemption (revised proposal § 2.35(b)(1)(iii)). We are exempting inspection of such areas in the regulations rather than requiring an application for an exemption. However, animals studied at field sites in research activities involving some form of surgical intervention or invasive procedure, or that harm or materially alter their behavior, must be conducted in accordance with the regulations, and the Committee must review any such proposed activity. Field studies, as defined in part 1 of the regulations (*see* companion docket No. 89–130, published elsewhere in this issue of the **Federal Register**), are exempt from Committee review.

Committee inspection reports must be submitted to the Institutional Official under the final rule (§ 2.31(c)(3)). The revised proposal would require that the Committee also provide a copy of its report to the administrative unit representative (revised proposal § 2.35(b)(2)(ii)(B)). The research facility is responsible for ensuring compliance with the regulations and for correcting deficiencies. For this reason, we are removing the proposed additional requirement in the final rule. The research facility is left to determine what additional administrative reporting steps are necessary for it to ensure compliance, and may include providing a copy of the Committee report to the administrative unit representative as part of its internal procedures.

In response to numerous comments we received following publication of the March 1987 proposal, we revised the proposed regulations to allow greater flexibility to Committees in performing the requisite twice yearly inspections. The revised proposal would allow subcommittees to perform inspections, as provided under the PHS Policy, however, we added the requirement that all inspections be completed within 30 days of commencing the first inspection.

After further consideration of those comments and further consultation with HHS, we have decided that even greater flexibility is warranted so that the Committee, as an agent of the facility, can determine the best means of conducting and completing the necessary evaluations, based upon the particular circumstances of the research facility. Some institutions maintain dozens or even hundreds of animal study areas and hundreds of animals. At those institutions, Committee responsibilities may require nearly all of the Committee members' time, even though membership on the Committee may be in addition to, and not instead of, their daily work responsibilities.

The Act specifies that semi-annual inspection is one of the principal formal actions required of the Committee. It also specifies that a quorum of the Committee is required for all such formal actions (7 U.S.C. 2143(b)(2)). We believe it is appropriate to allow the Committee to determine its own methodology and timetable for conducting inspections and reviews subject to the requirements of the Act. The Committee must conduct their inspections at least once every 6 months, however, and their reports will be subject to examination by APHIS upon inspection. In this manner, we will be able to determine whether the means selected by the Committee for the conduct of twice yearly evaluations meets the requirements of the statute and the regulations. The research facilities remain ultimately responsible for ensuring compliance with the statute and regulations, and, therefore, must ensure that their Committees are performing their statutory and regulatory duties properly.

In our revised proposal, we sought to satisfy the Act's requirements through the use of subcommittees which would present their findings to a quorum of the Committee for approval. In addition to allowing the IACUC to appoint subcommittees to conduct evaluations, under the terms of the final rule the Committee will also be permitted the option of inviting *ad hoc* consultants to assist in conducting evaluations. Committees may find that using consultants to assist them in fulfilling their responsibilities is beneficial where the consultants have particular knowledge or expertise not otherwise represented on the Committee.

As we noted above, the semi-annual inspection is a vital formal action of the Committee, and the Committee, as an agent for the research facility, is responsible for the conduct of the inspection and the contents of the report as provided in § 2.31(c)(3) of the final rule. A majority of Committee members must review and sign the report, and it must include any minority views. We believe the final rule provides the Committee with additional flexibility to determine the best means of satisfying the statutory requirement. We have modified the reporting requirements in the final rule to allow the Committee to update its report every 6 months (final rule § 2.31(c)(3)). This provision will prove useful for those activities that are ongoing and therefore are repeatedly inspected, and will relieve some of the reporting burden that would be imposed upon the Committee under the revised proposed rule.

The proposed rules would require that the Committee's inspection report contain certain information that is not specifically mandated by the Act. We are revising the reporting requirements in the final rule so that they satisfy both section 13(b)(4) of the Act (7 U.S.C. 2143(b)(4)) and the PHS Policy requirements. Institutions that perform federally funded research under the Health Research Extension Act are already subject to the Committee reporting requirements of the PHS Policy and therefore will not have increased reporting requirements.

The modifications we are making concerning the content of the Committee's report do not affect the substantive elements of the report that are critical for ensuring compliance with the regulations. Section 2.31(c)(3) of the final rule requires that the Committee report describe the nature and extent of the research facility's adherence to the regulations; identify specifically any departure from the regulations and state the reasons for each departure; distinguish significant deficiencies (those that are or may be a threat to the health or safety of the animals) from minor ones, and set forth a reasonable and specific plan and schedule, including dates, for correcting each deficiency. Failure to adhere to the plan and schedule for remedying significant deficiencies shall be reported in writing by the Committee to APHIS and to any Federal funding agency through the research facility's Institutional Official. As under the revised proposal (revised proposal § 2.35(b)(2)(i)(B)), the Committee's report must be signed by a majority of Committee members and must include any minority views of the Committee. We believe the report will be an effective tool for providing information to both the research facilities and to APHIS, and that providing uniformity in reporting requirements for institutions receiving Federal funding will reduce their administrative and reporting requirements.

We are removing the requirement contained in revised proposal § 2.35(b)(2)(i) that the Committee must file its inspection report within 10 business days of completing its inspection of all animal areas. Upon reconsideration of this requirement we have determined that it may not be practical or feasible at large institutions with many animal study areas or at research facilities having more than 3 Committee members, since it may not be possible for those facilities to consolidate all the required information into one report within 10 days. Furthermore, at many institutions the IACUC meets once each month to consider Committee business, and their scheduled meeting may not coincide with a rigid 10-day requirement. In the revised proposal of March 1989, we explained that the 10-day time period was desirable to ensure that inspection information is kept on file and current. The IACUC, as an agent of the facility, is responsible for the evaluation and report; however, research facilities are responsible for ensuring compliance with the Act and the regulations at all times, and for ensuring that the twice yearly evaluations are properly conducted. Accordingly, if upon inspection, we determine that a Committee has not conducted its evaluations and prepared evaluation reports as required by the regulations, we could allege, in an enforcement proceeding, that the research facility is in violation of the regulations. We believe that the provisions contained in the final rule concerning the Committee's reporting requirements will satisfy the statutory objectives and ensure compliance with the Act and regulations.

The proposed requirement for deficiency notification reports and the 30-day correction period are removed from the final rule. We received numerous comments objecting to this requirement, as originally proposed in the March 1987 proposal. Many commenters stated that a fixed 30-day correction period was inappropriate. We revised this requirement in the March

1989 revised proposal to require that notification of a deficiency be reported to the CEO or institutional official, since the research facility is responsible for assuring compliance, within 1 business day of discovery, and to clarify that the 30-day period runs from notification. We also added a 5-day notification period following expiration of the 30-day correction period for notifying APHIS and any Federal funding agency if the deficiency remained uncorrected. Finally, as under the PHS Policy, the revised proposal would allow the Committee to suspend an activity by withdrawing its approval due to noncompliance with an approved activity, formerly referred to as the animal care and use procedure or ACUP.

The rationale underlying the proposed requirements for prompt notification to the facility, the fixed 30-day correction period, and prompt notification to APHIS in the event of noncorrection, was to help ensure timely relief for animals found suffering due to noncompliance with the regulations. We have continued to explore alternative means of assuring that deficiencies are corrected within a reasonable and appropriate timeframe, and have pursued this issue with other Federal agencies concerned with animal welfare. Members of the IRAC were concerned that the 30-day correction period may not be uniformly appropriate for all deficiencies. They stated that the Committee, having observed the deficiency, is in the best position to determine the appropriate amount of time that should be allowed for correcting any deficiency found during an inspection. We agree with the IRAC suggestion and are revising the final rule to provide that the Committee shall set forth in its evaluation report a specific plan and schedule, with dates, for correcting deficiencies. We are maintaining the requirement that uncorrected significant deficiencies must be reported, in writing, to APHIS and funding Federal agencies; however, we are revising the regulations to allow the Committee 15 days to notify the Administrator and any funding Federal agency so that the Committee will have sufficient time to complete the necessary paperwork. We are also maintaining the Committee's authority to suspend an activity for noncompliance. Upon implementation, these provisions will provide an effective mechanism for ensuring that suffering animals are given prompt relief.

Research facilities will continue to be responsible for ensuring that corrective action is taken in a timely manner, in accordance with their responsibility for compliance with the Act and the regulations. Committee reports must be submitted to the Institutional Official under § 2.31(c)(3) of the final rule, and must be maintained by the research facility. They must also be available to APHIS upon request. This will allow us to review the timeframes set by the Committee for correcting deficiencies, and to determine whether they are reasonable and appropriate.

2. *Review and investigation of complaints.* We initially proposed in March 1987, that the Committee must establish a reporting procedure whereby laboratory or research facility personnel or employees could report violations of the Act or regulations, including problems, deviations, or deficiencies in animal care or use. We revised this requirement in § 2.30(j) of the March 1989 revised proposal by placing this responsibility on the research facilities, since they are ultimately responsible for compliance.

We are removing this requirement in the final rule, as explained in greater detail below, and are requiring that research facilities provide training to personnel in methods of reporting deficiencies (7 U.S.C. 2143(d)(4)). The requirement for this training is contained in § 2.32(c)(4) of the final regulations.

We are continuing to require that the Committee, as an agent of the research facility, review, and, if warranted, investigate concerns involving the care and use of animals at the research facility (final rule § 2.31(c)(4); revised proposal § 2.30(j)). We are expanding this requirement, however, to include review, and if warranted, investigation of complaints received from the public, in addition to those received from facility personnel and employees. In amending the Act, Congress acknowledged the importance of public concern for the care and treatment of laboratory animals (7 U.S.C. 2131). We believe that it is important and appropriate that research facilities be responsive to the public, and consider complaints made directly to a facility.

We are removing the requirement that the Committee prepare and file a formal report of these investigations at a central location at the research facility, as required by revised proposal § 2.30(j). The research facility must maintain documentation of the Committees' reviews and investigations conducted in response to complaints received in order to demonstrate its compliance with these regulations, however. In the final rule, the research facility may determine the form and method of such documentation.

3. *Recommendations.* We are adding to the final rule a provision that will require that the Committee make recommendations to the Institutional Offical regarding any aspect of the research facility's animal program, facilities, or personnel training, as part of the Committee's functions (final rule § 2.31(c)(5)). We believe it is appropriate to impose this responsibility upon the Committee, as an agent of the facility, since it conducts first-hand observation of the implementation of the research facility's animal care program. The research facility is responsible for implementing Committee recommendations in order to bring the facility into compliance with the Act and regulations.

4. *Review and approval of proposed activities.* Under the final rule, the Committee is authorized to review and approve, require modifications in, or withhold approval of those components of proposed activities involving animals that are related to the care and use of animals (final rule § 2.31(c)(6)) and significant changes to those activities (final rule § 2.31(c)(7)). These provisions incorporate the prohibition contained in revised proposal § 2.35(b)(3)(i) which states that "[n]o research, testing, or teaching involving warm-blooded animals covered by the Act performed by a facility's personnel at any location shall commence prior to approval of the [animal care and use procedure] of the research, testing, or teaching by the Committee * * *." The language of the final rule reflects that used in the PHS Policy in order to harmonize our mutual requirements, however its substantive import remains unchanged. As explained in greater detail in docket No. 89–130, part 1—"Definition of Terms," the term "activity" is used in the final rule instead of "animal care and use procedure" or "ACUP" to conform the term with that used in the PHS Policy.

Following our initial proposal, we received numerous comments objecting to the requirement for Committee review of animal care and use procedures as exceeding our statutory authority. For the reasons set forth in the supplementary information accompanying the revised proposal (54 FR 10848–10849), we continue to believe that ample statutory authority exists for requiring Committee review of all proposed activities for the care and use of animals, and that such review is necessary in order to fulfill the intent of the Act. Committee review and approval is also required under the PHS Policy for all research facilities receiving funds

under the Health Research Extension Act of 1985. We believe that this requirement should be uniformly applied to all research facilities, as Congress intended.

Our initial proposal of March 1987, would require Committee approval of all painful procedures. As part of the approval process, the Committee would be required to ensure that a proposed activity (referred to as a "protocol" in that document) contained provisions for acceptable and proper animal care, treatment, practices, methods, and use of pain-relieving drugs (initial proposal § 2.35(b)(3)(ii)). Committee approval would be conditioned on the "protocol" containing certain measures and precautions to minimize animal pain and distress unless scientifically necessary and justified in the proposal, and to assure adequate veterinary care. The Committee would be required to obtain written assurances from the principal investigator that alternative procedures were considered and that the experiment was not unnecessarily duplicative (initial proposal § 2.35(b)(3)(iii)–(v)).

The Committee would also be responsible under the initial proposal for the following: (1) Requiring that the principal investigator consult with the attending veterinarian in planning a painful procedure and during it; (2) requiring that the principal investigator provide for the use of pain-relieving drugs in accordance with the attending veterinarian's recommendations; (3) requiring that pre-surgical and post-surgical care be provided in accordance with the attending veterinarian's instructions and veterinary medical and nursing procedures; (4) requiring that all aseptic survival surgeries be performed under aseptic conditions by trained personnel; (5) prohibiting the use of paralytic drugs without anesthesia; and (6) prohibiting the withholding of pain-relieving drugs except when scientifically necessary and approved by the Committee and attending veterinarian. The Committee would have to assure that no animal would be used in more than one major operative experiment from which it was allowed to recover except as provided in the regulations. The Committee would allow exceptions to the Animal Welfare regulations when necessary for accomplishing the research design and explained in detail, in writing, by the principal investigator. (*See* initial proposal § 2.35(b)(3) (vi), (vii) and 2.35(c)).

In the March 1989 revised rule, we stated that many commenters objected that the regulations, as initially proposed, would place too much authority on the Committee and the attending veterinarian. In the supplementary information accompanying the revised proposal, we stated that the statute and the legislative history of the 1985 amendments to the Act supported our initial proposal to impose certain duties and responsibilities on the Committee and the attending veterinarian (54 FR 10845). We also noted our agreement with the commenters that the ultimate responsibility for those duties lies with the research institutions themselves. We revised the proposed rule accordingly, to place responsibility on the research facilities except where specifically reserved to the Committee or attending veterinarian by the Act.

We have continued our consideration of the allocation of authority and responsibilities under the Act. We persist in the view that the research facility is ultimately responsible for assuring that it is in compliance with the Act and regulations. As previously stated in this document, we believe that the Committee, as an agent for the facility, is best situated to carry out many of the research facility's responsibilities under the Act. The research facility must provide the Committee with sufficient authority to carry out the duties delegated to it under the regulations, in order to ensure that it is in compliance.

The final rule is revised to reflect that the Committee, as an agent of the research facility, shall review the animal care and use components of proposed activities to determine that they are in accordance with the regulations unless justification for a departure is presented by the principal investigator in writing (final rule § 2.31(d)). As previously discussed, field studies, as defined in Part 1 of the regulations (*see* companion docket No. 89–130, published elsewhere in this issue of the **Federal Register**) are exempt from Committee review. The requirements that would be imposed upon research facilities under the revised proposal when they engage in potentially painful procedures shall be carried out by the Committee in reviewing all proposed activities involving animals. Accordingly, revised proposal § 2.30(e)(10), requiring that each research facility that engages in any practice or procedure that might reasonably be expected to be a painful procedure establish a written policy to ensure compliance with those requirements, and § 2.30(f), requiring that each research facility establish a written policy which assures that no animal is used in more than one major operative experiment from which it is allowed to recover, are removed.

This modification to the final rule will allow research facilities greater flexibility in carrying out their responsibilities under the Act through their Committee, and will ensure that proposed activities are subjected to close scrutiny, as contemplated by the Act and the proposed regulations. The Committee can develop mechanisms for covering the various elements that must be addressed in conducting their review, however, Committee activities must be reflected in their records in accordance with § 2.35 of the final rule, and available for APHIS inspection. We have conformed the language of the final rule with that of the PHS Policy as it pertains to Committee review of proposed activities involving animals, as part of our effort to harmonize our mutual requirements.

We describe below the requirements that must be satisfied for the Committee to approve a proposed activity or a proposed significant change in an ongoing activity under § 2.31(d) of the final rule.

(a) Procedures involving animals must avoid or minimize discomfort, distress, and pain to the animals (final rule § 2.31(d)(1)(i)). Revised proposal § 2.35(b)(3)(ii)(A) would have required that functional or sensory impairment be minimized, in addition to animal pain and distress in order for the Committee to approve a proposed activity.

The term "discomfort" in the final rule includes a broad range of uncomfortable sensations, including functional or sensory impairment. We consider this modification to be a nonsubstantive conforming change.

(b) Alternatives to procedures that may cause more than momentary or slight pain or distress to the animals must have been considered, and the principal investigator must provide a narrative description, in writing, of the methods and sources that were used to determine that alternatives were not available. This requirement is derived from revised proposal § 2.30(d). In addition, revised proposal § 2.30(e)(1) would have required that the principal investigator provide written assurance to the Committee that alternative procedures were considered and found not suitable, and indicate what information sources were considered.

We have modified the requirement concerning consideration of alternative procedures to allow research facilities greater flexibility in devising internal procedures for their principal investigators to follow, which simplify their task of indicating what sources were consulted. The principal investigator must provide a written narrative of the sources consulted, such as biological abstracts, Index Medicus, the Current Research Information Service (CRIS), and the Animal Welfare Information Center that is operated by the National Agricultural Library. We believe that in fulfilling this requirement, Committee members will discuss these efforts with the principal investigator in reviewing the proposed activity. We also believe that consideration of alternatives will be discussed during Committee meetings where proposed activities are presented for approval, and made part of the meeting minutes. If the Committee determines that the written narrative prepared by the principal investigator provides adequate assurance that alternatives were considered, the Committee's meeting minutes need only reflect this determination. Committee meeting minutes will be available for APHIS inspection to determine whether alternatives were in fact discussed, and the written narrative of information sources consulted will be made part of the Committee's record. Research facilities will be held responsible if it is subsequently determined that an alternative procedure was available to accomplish the objectives of the proposed experiment. Therefore, the Committee, as an agent of the facility, must satisfy itself that alternatives were adequately considered. We believe that the Act's objectives will be satisfied through this Committee review process.

(c) Similarly, the principal investigator must provide written assurance that the proposed activities do not unnecessarily duplicate previous experiments (final rule § 2.31(d)(1)(iii)). Revised proposal § 2.30(e)(1)(ii) would have required that the written assurance indicate what information sources were consulted, what other procedures were considered, and what techniques will be used to minimize pain and discomfort to animals.

Under the final rule, research facilities are allowed flexibility in devising their own internal procedures for principal investigators to follow in preparing their written assurance. As stated above, we believe that the Committee will explore the efforts underlying the assurance with the principal investigator to determine whether a reasonable good faith effort was made by the principal investigator in determining that a proposed experiment is not unnecessarily duplicative. As is the case in determining whether alternative procedures were available, the Committee, as an agent of the facility, must be satisfied with the assurance. The assurance will be made part of the Committee record in accordance with § 2.35 of the final rule, as will Committee deliberations concerning the proposal, and are therefore available for APHIS inspection. Research facilities will be held responsible if it is subsequently determined that an experiment is unnecessarily duplicative and that a good faith review of available sources would have indicated as much.

(d) If a procedure may cause more than momentary or slight pain or distress to the animals, it must be performed with appropriate pain-relieving drugs, unless withholding of such drugs is justified for scientific reasons, in writing, and continues only for as long as necessary; the attending veterinarian or a designee shall be consulted in planning the proposed activity; and it must not include the use of paralytics without anesthesia.

These provisions are set forth in § 2.31(d)(1)(iv) of the final rule and, except as explained below, are nonsubstantive modifications of the revised proposal (revised proposal §§ 2.30(e) (3), (4); 2.30(e)(2); and 2.30(e)(9); and 2.35(b)(3)(ii)(E)) to conform the language of the final rule with that found in the PHS Policy and to reflect the Committee's review functions under the final rule. The use of appropriate pain-relieving drugs and requirement for consultation with the attending veterinarian will ensure that the drugs are administered in accordance with their accepted and established use. These responsibilities were assigned to the research facility under the revised proposal. As previously explained, we have reassigned these responsibilities to the Committee in the final rule, to carry out as an agent of the facility.

The revised proposal would specifically require that the research facility ensure that the attending veterinarian is allowed access to all animal and research areas at any time during actual research involving a potentially painful procedure (revised proposal § 2.30(e)(2)). This language does not appear in the final rule. The research facility is responsible under § 2.33 of the final rule for ensuring that adequate veterinary care is provided, and that the attending veterinarian has appropriate authority to ensure that adequate veterinary care is provided. This would necessarily require that the attending veterinarian have access to animal study areas in order for the research facility to ensure its responsibilities are satisfied. In addition, the attending veterinarian or his or her delegated representative may be the Doctor of Veterinary Medicine member of the Committee, and would be assured access to all animal study areas in that capacity.

(e) Animals that would otherwise experience severe or chronic pain or distress that cannot be relieved will be painlessly euthanized at the end of the procedure, or during the procedure, if appropriate. This requirement is added to the final rule to reduce animal suffering, pain, and distress.

(f) The living conditions of animals must be appropriate for their species, in accordance with the standards of part 3, and contribute to their health and comfort. The attending veterinarian or other trained, experienced scientist will direct proper housing, feeding, and nonmedical care. The revised proposal would require that the research facility ensure that animals are housed and cared for in accordance with the regulations in 9 CFR, chapter 1, subchapter A (revised proposal § 2.30(a)(4)). It also would require that any deviations from the regulations be fully explained by the principal investigator and approved by the Committee.

We are allowing someone other than the attending veterinarian to direct the housing, feeding, and nonmedical care of the animals as long as that individual has training and experience in the species being maintained or handled. We believe that such an individual is qualified to supervise nonmedical aspects of care. Medical care must be provided as necessary by a qualified veterinarian under final rule § 2.31(d)(1)(vii).

(g) Activities that involve surgery must include appropriate provision for pre-operative and post-operative care of animals in accordance with current established veterinary medical and nursing practices. This requirement modifies revised proposal § 2.30(e)(6) which would require that all pre-procedural, procedural, and post-procedural care be provided by personnel in accordance with the instructions of the attending veterinarian and established veterinary medical and nursing procedures. By not requiring the direct involvement of the attending veterinarian in all matters relating to medical care, research facilities are accorded greater flexibility under the final rule in providing care. However, they are responsible for ensuring that adequate veterinary care is provided. As modified, this requirement satisfies the statutory mandate that a doctor of veterinary medicine be consulted in planning any procedure that could cause pain to animals and that adequate veterinary care be provided (7 U.S.C. 2143(a)(3) (A) and (C)).

Section 2.31(d)(1)(ix) of the final rule modifies the requirement that would be imposed upon research facilities under revised proposal § 2.30(e)(7) (and upon the Committee, in part, in revised proposal § 2.35(b)(3)(ii)(B)) that survival surgeries be conducted only in facilities intended for that purpose, under aseptic conditions using aseptic techniques. Under the final rule, the requirement for a dedicated surgical area applies to major operative procedures conducted on animals other than rodents, however all survival surgery or operative procedures must be done under aseptic conditions using aseptic procedures. There is no statutory requirement that procedures be performed in dedicated surgical areas. However, we believe it is advisable to require such areas when surgical procedures are performed on larger animals to reduce the risk of infection. Surgeries performed on rodents typically require limited, contained work space, and therefore can be performed in non-dedicated areas using aseptic procedures and techniques. Requiring that surgical procedures performed on rodents be done under aseptic conditions, and that adequate veterinary care be provided, should be sufficient to protect those rodents that are covered by the Act from infections due to surgery. In addition, dedicated facilities are not required at field sites, however, all operative procedures must be performed under aseptic conditions using aseptic procedures.

(h) Personnel who conduct procedures on the species being maintained or studied must be appropriately qualified and trained in those procedures. This language modifies the requirements of revised proposal §§ 2.30(e)(6) and 2.30(e)(8). Under § 2.32 of the final rule, research facilities are responsible for ensuring that personnel are appropriately qualified. Section 2.33 requires that the facility's program of adequate veterinary care include pre- and post-procedural care in accordance with current established veterinary medical and nursing procedures. This change is intended to allow research facilities greater flexibility in accomplishing the same objective.

(i) No animal can be used in more than one major operative procedure from which it is allowed to recover unless justified, such as when required by or related to other surgical procedures, in writing, by the principal investigator; required as a routine veterinary procedure or to protect the health or well-being of the animal as determined by the attending veterinarian; or in other special circumstances as determined by the Administrator upon request. This requirement and the exceptions to it were contained in revised proposal §§ 2.30(f)(1) and 2.35(b)(3)(ii)(D), except that reference to endangered species or marine mammals and the provision that cost savings is not adequate justification for multiple use of animals are removed. Such concerns may be addressed to the Administrator as an element of the special circumstances which might justify multiple major operative procedures.

(j) The method of euthanasia that will be used in a proposed activity must be consistent with the definition set forth in part 1 of the regulations (*see* docket No. 89–130, published elsewhere in this issue of the **Federal Register**), unless a deviation is justified for scientific reasons, in writing, by the principal investigator. This provision is added to the final rule in order to ensure that only humane methods of euthanasia are utilized.

The revised proposal would have provided that the research facility require that the attending veterinarian provide training of personnel in the proper use of pain-relieving drugs in order to minimize pain and distress to animals (revised proposal § 2.30(e)(5)). This requirement does not appear in the final rule. However, we believe our objective is satisfied by requiring that the Committee, in reviewing a proposed activity, determine that appropriate pain-relieving drugs will be used unless scientifically justified in writing (final rule § 2.31(d)(1)(iv)) and that the personnel who will be conducting procedures on the animals are appropriately qualified and trained in those procedures (final rule § 2.31(d)(1)(x)).

As set forth above, § 2.31(d)(1) of the final rule continues, in modified form, the provision of revised proposal § 2.30(g) that exceptions to compliance with the regulations and standards contained in title 9 CFR, chapter I, subchapter A—Animal Welfare may be made by the research facility when necessary to accomplish the research design, specified in the proposal for the activity, explained in detail, and approved by the Committee. Under the final rule, the Committee as an agent of the facility, has responsibility for determining that a proposed activity is in accordance with 9 CFR, chapter I, subchapter A, unless an acceptable justification is presented. As under the revised proposal, the research facility must maintain, as part of its recordkeeping responsibilities under § 2.35 of the final rule, records of proposed activities. These records will therefore contain the written justification presented by the principal investigator for any departure from the regulations, and, in accordance with the final rule, must be available to APHIS inspectors. This will enable us to determine whether the facility is in compliance with this provision of the regulations and is allowing departures from the regulations only when properly justified and documented.

We are removing the requirement that a copy of all written reports detailing and explaining exceptions to the regulations be attached to the research facility's annual report. During our consultation with members of the IRAC, objections were raised to attaching copies of written reports to the annual report on the grounds that it is unduly burdensome and not required by the Act. Section 13(a)(7) of the Act requires that research facilities provide assurance to the Secretary that the facility is adhering to the standards and provide an explanation for any deviation. We proposed that a copy of the detailed report be attached to a research facility's annual report, in addition to being made available at the facility to APHIS inspectors, to assist us in determining whether a facility is in compliance with the Act and the regulations. It would also assist us in preparing our comprehensive annual report to Congress, as required under section 25 of the Act (7 U.S.C. 2155).

Upon reflection, we believe the IRAC comment has merit. Copies of the written reports are not necessary to fulfill the statutory requirement. Therefore, we are requiring in the annual report an assurance that the facility is adhering to the standards and regulations under the Act, and that it has required that exceptions be specified and explained by the principal investigator and approved by the Committee. We believe that requiring this assurance and inspecting Committee records at the research facility will reduce the paperwork and administrative burden that would be imposed upon those facilities under the revised proposal, and still fulfill the statutory directive of the Act. A summary of all written detailed reports of departures from the regulations, including a brief explanation of the departure and identification of the species and number of animals affected by the exception must be attached to the annual report (7 U.S.C. 2143(a)(7)(B)(iii)).

It must also include the numbers of animals used in painful procedures for which pain-relieving drugs were not used and an explanation for withholding the drugs. This information is necessary to enable us to determine whether a facility is in compliance with the regulations, to prepare our report to Congress, and to determine whether closer scrutiny of an approved exception or the Committee approval process itself is warranted. Requirements for the research facility's annual report are contained in § 2.36 of the final rule.

Our initial proposal of March 1987 would have required Committee approval of a proposed "protocol" that would cause more than short-term minor pain or distress before the procedure could commence. As explained in ample detail in the supplementary information accompanying the March 1989 revised proposal, we eliminated the proposed categories of animal use and determined that requiring Committee review and approval of all animal care and use procedures, consistent with the PHS Policy, was preferable. (*See* 54 FR 10865–10866). In further response to the comments we received, we revised the mechanism for accomplishing Committee review in order to relieve the heavy burden that would be imposed upon the Committee, by incorporating the PHS Policy approach of assigning ACUPs to individual Committee members for review and recommendation, unless a member requests in depth review by a quorum of the Committee. The revised proposal would require that the Committee member's recommendations be presented to the Committee for formal action by a quorum of its members, under authority of section 13(b)(2) of the Act (7 U.S.C. 2143(b)(2)).

During our consultation with members of the IRAC, concern was expressed that assembling a quorum of the Committee would delay or impede research, and in cases where immediate action would be required, such as a proposal to harvest vital organs from euthanized animals, would be impractical. It would also place a huge burden on Committee members at research facilities that conduct a great many activities, since Committee members would be responsible for official action on large numbers of proposals.

We have decided to retain the provisions of the revised proposal which allow proposed activities to be assigned to individual Committee members for review in order to allow greater flexibility in carrying out the Committee's review and approval responsibilities. Under the final rule, however, the reviewing member(s) of the Committee will also be authorized to approve or require modifications to proposed activities in order to secure approval. The reviewing member of the Committee may also request full Committee review. In addition, as under revised proposal § 2.35(b)(3)(i), any member of the Committee may request full Committee review of a proposal.

Our purpose in requiring Committee review of proposed activities involving animals, as stated in the supplementary information accompanying our initial proposal, is to ensure "that all possible steps have been taken to reduce or eliminate as much pain and distress as possible, and that the proper level of animal care and treatment has been planned for and carried out using acceptable practices and methods." (52 FR 10302). We believe that the final rule, as further revised, accomplishes this objective with less burden on Committee members.

Section 2.31(d)(2) of the final rule requires that each Committee member receive a list of proposed activities before they are reviewed, and that written descriptions of proposed activities involving animal care and use be available to all members for their consideration. As stated above, any member of the Committee can request full Committee review. In this manner, all of the Committee members participate in determining whether an individual member of the Committee may be authorized, as an agent of the Committee, to approve a proposed activity. If any Committee member determines that more in depth scrutiny of a proposed activity is necessary, approval may be granted only after review at a convened meeting of a quorum of the Committee. As an additional precaution, the final rule precludes the participation in the approval process of any member who has a conflicting interest in the proposed activity.

As with inspections, the final rule provides for the participation of invited consultants in reviewing proposed activities. Since publication of our initial proposal in March 1987, we have continued to consider the most effective means of carrying out Committee reviews so that they accomplish our stated objective, as set forth above. We can foresee instances where the Committee, composed of a minimum of 3 members, 1 of whom is not affiliated with the research facility and is intended to represent community interests, may not possess the requisite expertise to evaluate all of the complex issues presented by a proposal or to understand its implications for the animals' health and well-being. By allowing research facilities, through their Committees, to invite consultants to participate in the review process, we are providing research facilities with the authority they require to conduct meaningful reviews and thereby ensure the proper care, treatment, and use of animals.

Section 2.31(d)(4) provides the mechanism by which the Committee notifies the principal investigator and the research facility, in writing, of its decision to approve, withhold approval, or require modification of a proposed activity. Our proposals did not prescribe requirements for notification, although the research facility would be responsible if it allowed unapproved activities to proceed. We are supplementing our proposals by requiring written notification of the Committee's disposition of each proposed activity involving the care and use of animals. If the Committee determines to withhold approval, it must provide the principal investigator and the research facility with a written statement explaining its decision. The principal investigator then has the opportunity to respond to the Committee, either in person or in writing. On the basis of the response, the Committee may reconsider its decision.

Section 2.35(b)(1)(iv) of the revised proposal added a mechanism, in accordance with the PHS Policy, for the Committee to suspend or withdraw its approval of an activity involving pain to animals if the Committee determines upon inspection that the practice or procedure is not being conducted in accordance with the approved animal care and use procedure (ACUP) or the regulations. As explained in the supplementary information accompanying the revised proposal, withdrawal of approval means that the procedure or practice must cease, or the research facility will be considered to be in violation of the regulations (54 FR 10866). Accordingly, the revised proposal provided that the Committee must direct the CEO or institutional official to instruct the principal investigator to cease all noncomplying activities immediately.

Upon further consideration of this provision, we have determined that additional clarification of the Committee's role and the institution's responsibilities in this regard is necessary. The final rule is revised to clarify that the Committee may suspend an activity after a convened quorum of

the Committee has reviewed the matter and a majority of the quorum favors suspension. Suspending an activity that is in progress may require that the principal investigator discontinue an experiment and start the project over from the very beginning. This may be an exceedingly costly consequence, in terms of time and funds, and may require that the animals involved be destroyed or replaced. We believe that before such drastic action is taken, a quorum of the Committee should be presented with this decision. If immediate action is necessary, the Committee member who discovered the deficiency may request an emergency meeting. Under the final rule, the Committee, as agent of the research facility, rather than the CEO or Institutional Official, is authorized to direct cessation of noncomplying activities. In order to provide the Committee with this authority, which was previously reserved to the head of the facility, it is necessary in accordance with section 13(b)(2) of the Act to require a quorum of the Committee (7 U.S.C. 2143(b)(2)).

As under the revised proposal, we are requiring that the Institutional Official be apprised that by virtue of the suspended activity the facility had not been operating in compliance with the regulations. The Institutional Official must review the reasons for the suspension with the Committee and take appropriate corrective action in order to bring the facility back into compliance. The Institutional Official must report the corrective action taken to APHIS, and to any funding Federal agency (final rule § 2.31(d)(7)). This requirement carries out the directive of section 13(b)(4)(A)(ii) of the Act which requires that the Committee include, as part of its inspection report, any deficient conditions and any deviations of research practices from originally approved proposals that adversely affect animal welfare, any notification to the facility regarding such conditions, and any corrections made thereafter (7 U.S.C. 2143(b)(4)(A)(ii)), and does so in a manner that is consistent with the PHS Policy. This practice is therefore already in place at many research institutions.

In addition, we are adding a provision to allow officials of the research facility to further review activities approved by the Committee and significant changes to approved activities that are ongoing. Research facilities are ultimately responsible for ensuring compliance with the Act and regulations and are therefore responsible for the proper functioning of their Committees. Section 2.31(d)(8) of the final rule, consistent with the PHS Policy, specifically provides that Institutional Officials at research facilities may review Committee activities and determinations, however, they may not override or circumvent the Committee's decision on a proposed activity, including a decision on suspension.

We are adding a provision to the final rule to require that the Committee conduct continuing review of activities covered by the Animal Welfare regulations at appropriate intervals, and at least annually (final rule § 2.31(d)(5)). This review is in addition to the twice yearly evaluations required by final rule § 2.31(c) and is intended to provide current information to the research facility regarding all ongoing activities so that it can remain in compliance. Follow-up reviews of problematic conditions discovered during evaluations must be conducted, as determined necessary by the Committee.

Section 2.31(e) of the final rule identifies the information that must be provided by the principal investigator to the Committee as part of his or her proposal to conduct an activity involving animals. The revised proposal did not specifically list the information that must be provided to the Committee, however, it did specify the aspects of animal care and use the Committee must consider in evaluating a proposed care and use procedure. In order to perform its evaluation completely and properly, the Committee would need to consider this information. In order to provide guidance to principal investigators in the preparation of proposals and thereby facilitate implementation of the rule, we have identified in final rule § 2.31(e) the information that must, at a minimum, be included in a proposal submitted to the Committee.

Personnel Qualifications and Training

Section 2.30(i) of the revised proposal would require that each research facility provide for the training and continuing education of personnel involved with animal use, care, and treatment, and that the training be reviewed by the Committee and the attending veterinarian. It would also require that training be made available annually or as appropriate to individuals and their responsibilities, and that research facilities review the status of the training and qualifications of researchers who use animals at least once each year.

Although the Act places responsibility for training upon the research facility (7 U.S.C. 2143(d)), in considering the comments we received and in preparing the revised proposal, we determined that this responsibility could best be carried out through the attending veterinarian because of his or her expertise, and through Committee review (*See* 54 FR 10854–10855).

Based upon our ongoing consultation with HHS and members of the IRAC, as well as our continuing consideration of the comments we received, we have revised the final rule to place responsibility for training on the research facilities, and to let them determine the best means of satisfying their statutory obligations. Accordingly, § 2.32(a) of the final rule provides that it shall be the responsibility of the research facility to ensure that its personnel involved in animal care, use, and treatment are qualified to perform their duties, and that partial fulfillment of this responsibility shall be through providing training and instruction to those personnel.

The revised proposal would require that research facilities maintain a written policy ensuring that all personnel qualifications are reviewed annually. The review could be done separately or as part of another personnel review. The latter requirement was added in the revised proposal in response to the numerous comments we received objecting that a separate, annual review would be costly and impractical. It was also based upon our consultation with HHS, during which it was pointed out that many facilities have internal mechanisms for reviewing personnel qualifications and performance.

In the course of our further consultation with HHS and members of the IRAC following publication of the revised proposal, we recognized that because many, if not most, research activities last far longer than one year, it is more important that research facilities establish at the outset of the activity that the personnel involved in the care, use, and treatment of animals are properly qualified and trained to assure their humane care and treatment, and that the requirement of annual review would be unnecessary and burdensome in many instances. We are therefore revising the final rule to clarify that research facilities are responsible for ensuring that their personnel are properly trained and qualified. Accordingly, § 2.32(b) of the final rule requires that training and instruction be made available, and the qualifications of personnel reviewed, with sufficient frequency to fulfill the research facility's responsibilities to ensure its personnel are qualified and that it is in compliance with the regulations. Under this provision, facilities may establish their own internal means and procedures for assessing the training and qualifications of their personnel, as long as they ensure that their statutory responsibilities are satisfied. The requirement that research facilities maintain a written policy ensuring annual review of personnel is removed.

We have also removed the requirement that training be available for review by APHIS inspectors. Rather than looking at prepared training materials in order to determine whether personnel are qualified to perform their duties and are complying with the regulations, APHIS inspectors will be better able to assess and evaluate the qualifications of laboratory personnel by observing their performance in the course of APHIS inspections, and by determining, through observation and review of Committee records, that personnel are properly carrying out approved activities and are in compliance with the regulations.

We are continuing to require training in the areas listed in the revised proposal § 2.30(i)(4), except that we have removed the reference in paragraph (i)(4)(xi) to requiring other training, techniques, or procedures as the research facility or the Secretary may feel is necessary. The research facility has the authority to require additional training under § 2.32(a) of the final rule. If we identify other areas of training that should be included in the regulations, we will publish a document in the **Federal Register** proposing to do so. We are removing the requirement for training in the common or accepted use of pain-relieving drugs in those species for which the drug is not licensed, in order to conform our regulations with the requirements of the Food, Drug, and Cosmetic Act. Finally, we have made minor modifications in the description of the areas in which we require training, to conform our language more closely with that used in the PHS Policy. We consider these changes to be nonsubstantive.

We are removing reference to an established reporting procedure whereby laboratory or research facility employees can report violations of the Act or regulations. The final rule requires training in methods for reporting deficiencies in animal care and treatment. As part of this training, research institutions may choose to establish formal procedures for reporting violations, and we encourage them to do so. However, we do not believe it is necessary to prescribe such a procedure in the regulations.

Attending Veterinarian and Adequate Veterinary Care

We initially proposed in March 1987, that research facilities, as well as other regulated entities, establish and maintain written programs of adequate veterinary care and provide a copy annually to APHIS for our review (initial proposal § 2.40). The requirement that research facilities provide adequate veterinary care is statutorily mandated. Section 13(a)(2) of the Act directs the Secretary to promulgate standards to govern the humane handling, care, treatment, and transportation of animals, including minimum requirements for adequate veterinary care (7 U.S.C. 2143(a)(2)(A)). Section 13(a)(3)(A) further requires that adequate veterinary care include the appropriate use of pain-relieving drugs in painful procedures or euthanasia (7 U.S.C. 2143(a)(3)(A)).

Our objective in requiring a program of adequate veterinary care was to ensure that research facilities attend to the health needs of animals, including disease control and prevention, pest and parasite control, pre- and post-procedural care, nutrition, euthanasia, and the appropriate use of pain-relieving drugs. Our objective in requiring that a written program be maintained was to provide a means of verifying that all aspects of veterinary care were covered by the facility's program, and to ensure upon inspection that research facilities were operating in compliance with their program requirements. We did not prescribe more precise requirements for addressing the areas that should be included in such a program, because, as we stated in the supplementary information accompanying the revised proposal, "[i]t is the responsibility of the dealer, exhibitor, or research facility to ensure that its program of veterinary care adequately covers those areas." (54 FR 10868)

In response to the March 1987 proposal, we received many comments critical of our requirement for a written program of veterinary care at facilities with full-time or staff attending veterinarians. As explained in the supplementary information accompanying the revised proposal, HHS suggested to us in the course of our consultation following publication of the 1987 proposal, that because institutions having a full-time attending veterinarian on staff would maintain written standard operating procedures covering their program of veterinary care, they should not be required to maintain a separate written program. They felt that this requirement would unnecessarily burden research facilities by requiring duplication of effort with no additional benefit to animal welfare. We agreed with their position in the March 1989 revised proposal, and modified our proposed requirements to provide that the written program could be incorporated within the facility's standard operating procedure or other document. APHIS inspectors could then examine it on the premises, rather than requiring a separate submission.

Upon further consideration of the proposed requirements, we have determined that research institutions that employ a full-time attending veterinarian to administer the facility's program of adequate veterinary care, need not present to us a written program of veterinary care. They must maintain a program of adequate veterinary care, however, and are responsible for ensuring that adequate veterinary care is provided to the animals. The research facility must accordingly provide the attending veterinarian with appropriate authority to carry out the facility's program of veterinary care. The program of adequate veterinary care must include having appropriate facilities, personnel, equipment, and services to comply with the Animal Welfare regulations; apppropriate methods to prevent, control, diagnose, and treat diseases and injuries, including emergency and weekend care; daily observation of all animals to assess their health and well-being; guidance by the attending veterinarian to personnel in animal care and use techniques, including the use of pain-relieving drugs and euthanasia; and adequate pre-procedural and post-procedural care. Upon inspection, APHIS inspectors will evaluate the appearance and condition of the animals as well as the facility, to determine whether the veterinary care program is adequate to ensure that proper care is being rendered, and whether the facility is in compliance with its program. Accordingly, we believe the revised language of § 2.33 in the final rule will achieve our objective of ensuring that proper veterinary care is provided to all animals.

Part-time attending veterinarians would be less likely to have the degree of oversight over compliance with the facility's program of adequate veterinary care that full-time attending veterinarians enjoy. For this reason, and for the reasons set forth in the supplementary information accompanying the March 1989 revised proposal, research facilities, as well as other regulated entities, that utilize an attending veterinarian on a part-time or consultant basis, are required to maintain a written program of adequate

veterinary care under the final rule. They must employ the attending veterinarian under formal, that is, contractual arrangements, that include regularly scheduled visits to the facility, to ensure that the program is properly implemented on an ongoing basis. The written program of adequate veterinary care should include such things as the facility's name and address; the attending veterinarian's name and address; provision for the different areas of care identified above as necessary for an adequate program of veterinary care; the system or method of euthanasia that will be employed and the personnel authorized to perform it; and the dated signature of the attending veterinarian and the Institutional Official. This document must be maintained by the facility and made available to APHIS inspectors in accordance with § 2.38(b) of the final rule.

We have modified the requirement for daily observation of animals to provide that someone other than the attending veterinarian may carry it out, provided that the research facility maintains a means of direct and frequent communication to the attending veterinarian so that care can be promptly provided. Such care should also include the humane disposal of sick, diseased, injured, lame, or blind animals, as would be required under revised proposal § 2.40(d), unless doing so is inconsistent with research purposes.

As explained under the subheading, "Committee membership," under the final rule, the attending veterinarian is not required to be a member of the Committee at those facilities employing more than one Doctor of Veterinary Medicine. A DVM with delegated program responsibility may also serve on the Committee, in accordance with the Act (7 U.S.C. 2143(b)(1)(A)).

Recordkeeping Requirements

Section 2.35 of the final rule consolidates the various recordkeeping requirements imposed upon research facilities in the revised proposal. Paragraph (a) requires that research facilities maintain Committee records, including minutes of Committee meetings, records of attendance, records of any Committee activities and deliberations, records of proposed activities involving animals and proposed significant changes in those activities, the Committee's disposition of the proposed activity, and the Committee's reports of reviews and evaluations prepared in accordance with § 2.31(c)(3) of the final rule. Any actions taken by a Committee member or subcommittee in carrying out their duties under this part must be recorded in writing and maintained by the research facility as a Committee record. This includes reviews and evaluations as required under § 2.31(c), reviews of proposed activities as required under § 2.31(d), and any action taken regarding an activity involving animals under § 2.31(d).

As under the revised proposal, research facilities are responsible for maintaining all such records, and must do so for at least 3 years (final rule § 2.35(f)). We have added a requirement that records that relate to an approved activity be maintained for the duration of the activity plus an additional 3 years after completion of the activity (final rule § 2.35(f)). This requirement replaces the provisions of revised proposal § 2.81, as they relate to research facilities, which would prohibit research facilities from destroying or disposing of records for a period of 1 year without the written consent of the Administrator, and require that facilities maintain records pertaining to an animal for at least 1 year after the animal is euthanized. All records and reports must be available for inspection and copying by authorized APHIS or funding Federal agency representatives as under revised proposal § 2.35(b)(2)(i), and must be retained pending completion of an investigation or proceeding under the Act.

The remaining requirements for recordkeeping set forth in § 2.35 of the final rule are taken directly from § 2.76 of the revised proposal without change for the reasons set forth in the supplementary information accompanying the initial proposal and the March 1989 revised proposal.

Annual Report

The requirements imposed upon research facilities in completing and submitting their annual report are set forth in § 2.36 of the final rule. We have made conforming changes to reflect changes in terminology from the revised proposal. The requirements remain substantially as proposed in the March 1989 revised proposal, except as indicated and explained below.

We are revising the requirement that an explanation detailing and explaining any deviation from the standards and regulations be attached to the annual report (revised proposal §§ 2.30(g) and 2.31(b)(3)) and the requirement that a detailed statement on the procedures producing pain or distress and explaining the reasons pain-relieving drugs were not used be attached to the annual report (revised proposal § 2.31(b)(7)). The Act requires that each research facility report annually that the provisions of the Act are being followed and that professionally acceptable standards are being followed during research or experimentation (7 U.S.C. 2143(a)(7)(A)). Section 13(a)(7)(B)(iii) of the Act further requires that research facilities provide, as part of their report, "an explanation for any deviation from the standards promulgated under this section." (7 U.S.C. 2143(a)(7)(B)(iii)). Upon reconsideration of our proposal, we have determined that requiring a summary and explanation of all exceptions to the regulations which indicates the number of animals, by species, that were affected by those exceptions, and requiring an explanation for the withholding of pain-relieving drugs in any painful procedure, will be sufficient to fulfill the requirements of the Act. If, based upon our review of the summaries attached to a facility's annual report, we determine that additional information is required in order to assess whether the facility is in compliance with the Act and regulations, we may request further documentation and detail. For this reason, and as explained above, under the heading, "Committee functions," we have revised the annual reporting requirements in the final rule to require a summary and brief explanation of all exceptions to the regulations, rather than a more detailed explanation.

We are removing the statement that would be required by the Chief Executive Officer or institutional official under revised proposal § 2.31(b)(9) regarding the authority of the Committee and the attending veterinarian to enter any animal or research area at any reasonable time in order to carry out their responsibilities, and that the facility complies with the Act, regulations, and standards. We received numerous comments in response to this requirement as proposed in our initial proposal of March 1987, objecting to it as redundant and unnecessary. In the supplementary information accompanying the revised proposal, we noted our general concurrence with the commenters' argument, however we felt an additional statement from the institutional official was warranted. Upon reconsideration, we agree with the commenters that the additional assurance does not provide any greater assurance of compliance, and that it may be removed. The research facility is responsible under the regulations for ensuring that the Committee and the attending veterinarian have sufficient authority to carry out their duties, therefore an assurance to that effect is subsumed in the assurances required under § 2 36(b)(1) that professionally acceptable standards governing the care, treatment, and use of animals were followed, and under § 2.36(b)(3) that the facility is adhering to the standards and regulations under the Act. Accordingly, this additional assurance is removed in the final rule.

We are also removing the provision set forth in the revised proposal which would require that the institutional official certify that each member of the Committee was given an opportunity to express concurrence or nonconcurrence with the report and to attach a minority report. This provision is not mandated by the Act. In the supplementary information accompanying the revised proposal, we stated that we felt it was important that all members of the Committee be afforded an opportunity to express a minority or nonconcurring view to the Department (54 FR 10860–10861). We are removing this provision from the final rule because section 13(b)(4)(A)(iii) of the Act and § 2.31(c)(3) of the final rule expressly provide a mechanism for Committee members to express minority views and it is therefore unnecessary to require additional minority opinions in the annual report. All minority views of Committee members must be included in the Committee's twice yearly evaluation reports and made available to APHIS inspectors upon inspection.

Miscellaneous

1. *Access and inspection of records and property.* We received many comments from the research community objecting to the provisions of proposed § 2.126 which would require research facilities, as well as other regulated entities, to permit APHIS representatives to enter facilities during business hours for inspection purposes and to take photographs to document their findings. As explained in the supplementary information accompanying the revised proposal, there is ample statutory authority for this provision (54 FR 10877). We believe it is essential for enforcement purposes that APHIS have access to research facilities at all reasonable times. Accordingly, we have made no substantive change in our regulations in this regard. However, we are mindful that, in amending the Act, Congress did not authorize the Secretary to interrupt the conduct of actual research or experimentation during inspections (7 U.S.C. 2143(a)(6)(A)(iii)), and APHIS inspections will be conducted in accordance with the statutory requirements.

2. *Inspection for missing animals.* We are removing the provision in the revised proposal which would allow research facilities to limit access of law enforcement officers searching for missing animals to those not undergoing actual research or experimentation. We believe the proposed limitation on the authority of law enforcement officers would be inappropriate.

3. *Confiscation and destruction of animals.* We are making one change in the regulations concerning confiscation and destruction of animals held by research facilities. Under the revised proposal, APHIS officials would have authority to attempt to notify the research facility that an animal is found suffering and that the situation must be corrected or the animal euthanized, when the animal "is no longer required" to carry out the research, test, or experiment for which it was utilized (revised proposal § 2.129(a)). Section 2.38(e)(1) of the final rule broadens this authority by including animals that are not in actual use. Under the final rule, an APHIS official can require that the situation be corrected or may confiscate an animal when he or she finds that it is suffering due to noncompliance with the regulations, even if the animal is being held for future use. We believe that this provision is necessary as a means of minimizing animal suffering resulting from a facility's failure to comply with the regulations.

4. *Handling.* The revised proposal continued the prohibition set forth in the initial proposal of March 1987 against food or water deprivation as a means of training, working, or handling animals (revised proposal § 2.131). This provision prompted comments from the research community stating that it was unnecessarily restrictive and would interfere with research. HHS suggested that such practices be addressed by the principal investigator and reviewed by the Committee. As explained in the supplementary information accompanying the revised proposal, we decided to retain the prohibition to prevent inhumane practices (54 FR 10879). During our ongoing consultation with HHS and members of the IRAC, members of the IRAC stated that short-term food or water deprivation has become an accepted practice in incentive-reward training systems utilized by the research community, as well as exhibitors, and that if done in accordance with reasonable and customary professional practices, is not inhumane. Rather, they stated that short-term deprivation more closely approximates animals' natural feeding patterns in the wild, where they must hunt or forage for food.

We agree that certain short-term food or water deprivation may be an effective and humane method of handling animals, however, it must be conducted with the approval of the research facility's Committee and monitored by the facility to ensure that it is reasonable and in accordance with professional practices.

Section 2.38(f)(2)(ii) of the final rule provides that short-term withholding of food or water is allowed when specified in a proposed activity and approved by the Committee. The animal care and use procedure specified in the proposal must include a description of the monitoring procedures that will be employed, to ensure the animal's welfare and compliance with the approved proposal. We believe that with these safeguards, short-term withholding of food or water will not endanger the animals or be inhumane.

5. *Compliance with standards.* We are revising the provision requiring compliance by research facilities with the regulations unless an exception to compliance has been specified and justified in the proposal to conduct an activity involving animals, and approved by the Committee. Section 2.100(a) of our initial proposal addressed the requirement for compliance by research facilities with the standards in part 3. We revised paragraph (a) in the March 1989 revised proposal by including § 2.131. Handling, in addition to the standards in part 3. This change was necessary because the regulations for handling are currently contained in part 3. Our proposals to amend part 2 have included uniform provisions for handling all the animals covered by the Act. Part 3 will now be amended by removing the separate provisions for handling found in the different subparts.

In the final rule, we have revised this provision by adding that exceptions to the regulations in subpart C—"Research Facilities," may also be made only when specified and justified in the proposal and approved by the Committee. This change merely restates § 2.31(d)(1) which requires that the animal care and use components of a proposed activity be in accordance with the Animal Welfare regulations unless acceptable justification for a departure is presented and approved by the Committee. We therefore consider this to be a nonsubstantive change.

Other Changes to Part 2

Section 2.27 Notification of Change of Operation

We are revising § 2.27(b) by removing the requirement that a registrant file an annual report. This change clarifies that registrants other than research facilities

are not required to submit annual reports.

Section 2.40 Attending Veterinarian and Adequate Veterinary Care

We are revising the requirements applicable to dealers and exhibitors concerning their attending veterinarian and program of adequate veterinary care. We are doing so for reasons similar to those explained under the heading, "Subpart C—Research Facilities, Attending Veterinarian and Adequate Veterinary Care." We initially proposed in March 1987, that dealers and exhibitors, in addition to research facilities, maintain written programs of adequate veterinary care and provide a copy annually to APHIS for our review. Dealers and exhibitors must comply with standards which require that they provide adequate veterinary care, in accordance with the Act (7 U.S.C. 2143(a)(2)(A)). We did not prescribe detailed program requirements for providing such care, other than that the program of veterinary care include disease control and prevention, pest and parasite control, pre- and post-procedural care, nutrition, and euthanasia, because, as we stated in the supplementary information accompanying the revised proposal, "[i]t is the responsibility of the dealer, exhibitor, or research facility to ensure that its program of veterinary care adequately covers those areas." (54 FR 10868).

In response to our initial proposal, we received numerous comments objecting to the regulations concerning the written program of adequate veterinary care, and stating that they would not be appropriate for entities having a full-time attending veterinarian on staff. We agreed with the commenters in part, and in the revised proposal modified the regulations to provide that dealers, exhibitors, and research facilities having a full-time attending veterinarian need only have a written program of veterinary care available for APHIS inspection on the premises. The written program could be included in another document.

We have reconsidered those comments and have revised the final rule to require that dealers and exhibitors employ, under formal arrangements, an attending veterinarian who shall provide adequate veterinary care. If the attending veterinarian is a full-time employee, the program of veterinary care need not be written. As stated above, it is the responsibility of the dealer or exhibitor to ensure that adequate veterinary care is provided. If, upon inspection, we determine from the appearance and condition of the animals and premises that adequate veterinary care is not being provided, we will find the dealer or exhibitor in violation of the Act and the regulations.

If a dealer or exhibitor employs a part-time or consultant attending veterinarian, the final rule requires that the formal arrangements include a written program of adequate veterinary care and regularly scheduled visits to the dealer or exhibitor (final rule § 2.40(a)(1)). This is because part-time attending veterinarians would be less likely to maintain the degree of oversight over the provision of veterinary care that full-time attending veterinarians enjoy. Employees of the dealer or exhibitor would require the guidance of a written program, and dealers and exhibitors must ensure that their personnel comply with the program.

The written program of adequate veterinary care should include such things as the facility's name and address; the attending veterinarian's name and address; provision for the different areas of care identified in the regulations; the system or method of euthanasia that will be employed and the personnel authorized to perform it; and the dated signature of the attending veterinarian and a responsible official of the dealer or exhibitor.

As under the requirements applicable to research facilities, we are modifying the requirement for daily observation of animals to provide that someone other than the attending veterinarian may carry out the requirement as long as a mechanism of direct and frequent communication is in place to keep the attending veterinarian informed. The final rule also specifically requires the availability of emergency, weekend, and holiday care.

Because we are consolidating the requirements to provide veterinary care to all regulated animals in this section, we are removing the requirements for providing veterinary care set forth in 9 CFR part 3 of the regulations.

Section 2.131 Handling

We are revising the handling regulations to allow exhibitors to withhold food or water on a short-term basis only. As explained above under the heading "Subpart C—Research Facilities, Miscellaneous," short-term food or water deprivation has become an accepted practice in incentive-reward training systems used by exhibitors. We proposed to prohibit any such deprivation because of our concern that such methods of training can be cruel and inhumane. We agree with members of the IRAC, however, that if done in accordance with reasonable and customary professional practices, they are not inhumane. They may, in fact, more nearly approximate the animals' feeding patterns in nature. In order to ensure that deprivation is done on a short-term basis only, we are requiring that each animal receive by the end of each day, its normal daily intake of food and nutrition requirements, and that it is sufficient to meet the animals' dietary requirements.

Sections 3.111 and 3.135 of part 3—"Standards," subparts E and F provide handling requirements for marine mammals and warmblooded animals other than dogs, cats, rabbits, hamsters, guinea pigs, and nonhuman primates respectively. Section 3.135 was included as part of part 3, subpart F, which was added when Congress amended the Act in 1970 to include all warmblooded animals used for research or exhibition purposes, or sold as pets. Section 3.111 was added in 1979 when standards covering marine mammals were added to part 3. Subparts A through D do not contain comparable provisions. As stated in the supplementary information accompanying the proposed rule for part 2, published March 31, 1987, 52 FR 10306, our experience has demonstrated the necessity for handling regulations to protect the welfare of all animals covered by the Act, and to enable the Department to better prosecute cases of inhumane handling and treatment. Accordingly, § 2.131 of the final rule provides handling regulations applicable to all animals covered by the Act. Sections 3.111 and 3.135 are removed from part 3.

Public Comments

The revised proposal published March 15, 1989, solicited comments on the narrow issue of the interrelationship of the definitions and regulations in parts 1 and 2 of 9 CFR, chapter I, subchapter A, with the standards we proposed in part 3. As explained in that document, we did so to allow the public an opportunity to comment on parts 1 and 2 where they are inextricably intertwined with part 3, since the proposed standards had not been presented for public comment in March 1987, and to give the public the benefit of our most current thinking on how to implement the 1985 amendments to the Act in preparing their comments on the proposed standards. This continuation of the rule-making process enabled us to consider further the comments we received in response to our initial proposal, to look at additional regulatory alternatives, and to continue our consultation with the U.S. Department of Health and Human

BEST COPY AVAILABLE

Services and other Federal agencies interested in animal welfare, and to do so in light of the comments submitted on the interrelationship of the different parts of the regulations.

We solicited comments on the narrow interrelationship issue for a 60-day period, ending May 15, 1989. Comments that were postmarked or received by that date were considered in preparing this final rule. We solicited comments on the standards of part 3 for a 120-day period, ending July 13, 1989. Comments that were not timely for consideration in preparing final rules for parts 1 and 2 will be considered if they address the proposed standards or the regulations in general.

Five thousand five hundred eighty-two comments were timely received for consideration in preparing final rules for parts 1 and 2. Many comments concerned the Animal Welfare regulations generally or conceptually. We considered those comments in preparing this document since they address the Department's regulatory approach as a unit, and thereby implicate the interrelationship of parts 1, 2, and 3. Many comments went beyond the issue of the interrelationship of the three parts and duplicated previously stated concerns that the regulations, as proposed, would impose unnecessary additional administrative burdens upon research facilities and did not allow research facilities to utilize their existing internal procedures and lines of authority to accomplish our objectives. The comments also objected that many of the proposed recordkeeping and reporting requirements imposed upon regulated entities would be time consuming, costly, and unduly burdensome, without any corresponding benefit to animal welfare. Comments submitted by the research community continued to address the responsibilities and authority that would be imposed upon the Institutional Animal Care and Use Committee and the attending veterinarian under the revised proposal. These points were raised in response to our initial proposal of March 1987, and have had a profound and continuing impact on the development of alternative regulatory approaches. As such, they have been integrated into this final rule.

We address below the comments we received in response to the revised proposal of March 1989 concerning the interrelationship of parts 1, 2, and 3. Comments on the proposed definitions of terms as they apply to parts 2 and 3 are addressed in companion docket No. 89–130, published elsewhere in this issue of the **Federal Register**. Comments on the regulatory impact analysis and the regulatory flexibility analysis prepared by the Department in accordance with Executive Order 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), respectively, are addressed separately at the conclusion of this supplementary information.

General Comments on the Interrelationship of the Regulations

We received 303 comments (293 from members of the general public, 9 from the research or scientific community, and 1 from a dealer) expressing general support for the revised proposal, although one commenter from the general public stated that subpart C—"Research Facilities" was poorly organized and redundant. Subpart C has been revised in the final rule to include all requirements applicable to research facilities. We describe those changes under the heading, "Subpart C—Research Facilities," elsewhere in this document. Twenty-six commenters (19 members of the general public, 5 members of the research or scientific community, and 2 dealers) supported an increased budget for animal welfare matters. Three hundred fourteen commenters (41 members of the general public, 244 members of the research or scientific community, and 29 dealers) expressed general opposition to more stringent regulations, and one dealer commented that the budget should be reduced.

We believe these final regulations carry out the mandate of Congress, as expressed in the 1985 amendments to the Animal Welfare Act, that regulated persons be required to establish and maintain internal procedures that ensure the humane care and use of animals, and that they demonstrate their compliance with the Act to the Department.

Six hundred sixty commenters (652 members of the general public and 8 members of the research or scientific community) urged that the revised proposed rules be published as final regulations no later than June 15, 1989. In a civil action filed by the Animal Legal Defense Fund against the Department, the Office of Management and Budget, and the U.S. Department of Health and Human Services, seeking the publication of final regulations on parts 1 and 2 without further delay, we represented to the court that USDA would make the necessary changes in parts 1 and 2 of the regulations in consideration of the public comments and in consultation with interested Federal agencies within 30 days following the close of the comment period. As promptly as practicable, USDA would submit the final rules to the **Federal Register** for publication. The enormous task of reviewing the large volume of comments we received in response to the March 1989 revised proposal, and the task of completing our consultation with HHS and other Federal agencies, have prevented us from publishing final rules on parts 1 and 2 by June 15, 1989.

In order to accommodate this timetable, and to achieve our objective of publishing final rules on parts 1 and 2 without further delay, we declined to extend the 60-day comment period, as some commenters requested. We received 614 comments (72 from members of the general public, 537 from members of the research or scientific community, 3 from exhibitors, and 2 from dealers) requesting that we reopen parts 1 and 2 for substantive comments. The primary impact of the changes made in the revised proposal was to reallocate responsibility for certain duties and obligations under the Act from the Committee and attending veterinarian at research facilities to the facility itself. These changes were made in response to the nearly 8,000 comments we received following the March 1987 proposal. We solicited additional comments on the issue of the interrelationship of the various parts of the regulations only, and did so in response to the comments we received following the March 1987 proposal. The additional changes we are making in this final rule reflect our further consideration of those comments as well as the comments we received on the interrelationship of the regulations. This final rule presents the Agency's response to the more than 13,000 comments we have received. We believe that final rules may now be promulgated without further delay.

Forty-two commenters (24 members of the general public, 17 members of the research or scientific community, and 1 dealer) wrote to express their opposition to the use of any animals in research. By way of contrast, 21 commenters (10 members of the general public and 11 members of the research or scientific community) wrote to express their support for the unrestricted use of animals in biomedical research, and 385 commenters (100 members of the general public, 283 members of the research or scientific community, and 2 dealers) expressed support for the responsible and caring use of animals in research when no scientifically valid alternative to animal use exists. We also received 739 comments (504 from members of the general public, 232 from members of the research of scientific community, and 3

from dealers) supporting provisions intended to reduce the suffering of laboratory animals. One member of the general public stated that laboratory animals should be relieved from any pain whatsoever.

In amending the Animal Welfare Act, Congress explicitly acknowledged that "the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals; * * *" (7 U.S.C. 2131). At the same time, however, Congress determined that alternative testing methods that do not require animals are being developed that are faster, less expensive, and more accurate, and that eliminating or minimizing unnecessary duplication of experiments on animals can result in more productive use of Federal funds (7 U.S.C. 2151). In response to public concern for laboratory animal care and treatment, the 1985 amendments to the Act imposed restrictions on the use of animals so that pain and distress will be minimized whenever possible, alternatives to painful procedures will be considered and unnecessary duplication of experiments avoided, withholding of pain-relieving drugs will be limited to when scientifically justified, and adequate veterinary care will be provided. The 1985 amendments also prohibit using an animal in more than one major operative experiment unless necessary for scientific purposes or under other special circumstances (7 U.S.C. 2143(a)). These final regulations reflect the determination of Congress that while biomedical research using animals is necessary, regulations to ensure that such research is conducted responsibly and humanely are also necessary.

We received 984 comments (159 from members of the general public, 823 from members of the research or scientific community, and 2 from dealers) objecting that the revised proposal exceeds the statutory authority provided by the Act, and that it does not comport with the Congressional intent underlying the 1985 amendments. Five members of the research or scientific community stated that the regulations as proposed go beyond ensuring the humane care and use of laboratory animals.

The March 1989 revised proposal points out, in precise detail, APHIS's statutory authority for the proposed regulatory amendments. It does so in response to the comments we received to the March 1987 proposal objecting that APHIS lacked statutory authority for many of the proposed changes. The revised proposal also demonstrated that the legislative history supports those changes. In this final rule, we have included specific references to our statutory authority, as we did in the supplementary information accompanying the revised proposal, to demonstrate that ample statutory authority for these final rules exists.

We received 476 comments (132 from members of the general public, 342 from members of the research or scientific community, and 2 from dealers) stating that the revised proposal consists of rigid engineering standards rather than performance standards, contrary to the directives of Executive Order 12498, which requires adherence to the policy guidelines established by the Presidential Task Force on Regulatory Relief. The Task Force expressed preference for performance-based or result-oriented regulatory standards, rather than precise engineering requirements, because the latter are generally considered cost-ineffective, especially when uniformly applied on a nationwide basis.

The regulations made final in this rule reflect our further consideration of the concerns raised by the commenters, and those expressed by other Federal agencies in the course of our consultation with them. Through the process of ongoing consultation with HHS and members of the IRAC, we explored additional regulatory alternatives that would allow regulated entities to develop internal procedures that accomplish our regulatory objectives. The flexibility allowed regulated persons under this final rule should allay the commenters' concern that we are imposing unnecessarily rigid engineering requirements at unwarranted expense. The final rule for part 2 imposes responsibility upon research facilities for ensuring compliance with the regulations and standards promulgated under the Animal Welfare Act. We will inspect those facilities and examine their records and reports to determine that they are fulfilling this responsibility.

Two hundred eighty commenters (74 members of the general public, 204 members of the research or scientific community, and 2 dealers) argued that the legislative history of the 1985 amendments to the Act indicates that APHIS's authority is limited to promulgating regulations that are consistent with the guidelines contained in the PHS Policy, issued by HHS pursuant to the Health Research Extension Act of 1985, and was not intended to result in significant cost increases for regulated entities. That Act directs the Secretary of HHS, through the Director of the National Institutes of Health (NIH), to establish guidelines for the proper care and treatment of animals used in biomedical and behavioral research, including the establishment of animal care committees. Those guidelines are contained in the PHS Policy on Humane Care and Use of Laboratory Animals (PHS Policy). Two hundred thirty-seven commenters (66 members of the general public, 169 members of the research or scientific community, and 2 dealers) further suggested that if HHS and APHIS remain unable to agree on the nature and scope of our statutory authority the Attorney General should be requested to resolve the dispute in accordance with Executive Order 12146.

Three hundred fifty commenters (75 members of the general public, 273 members of the research or scientific community, and 2 dealers) protested that the revised proposal would radically alter established PHS and NIH policies, and were not supported by scientific evidence to justify doing so. Five hundred eleven commenters (132 members of the general public, 377 members of the research or scientific community, and 2 dealers) recommended that we adopt the PHS Policy to reduce duplication and avoid inconsistency between the regulations and the Policy. Ten members of the research or scientific community urged that we reconsider allowing research facilities to comply with either the Animal Welfare regulations, the PHS Policy, Food and Drug Administration regulations, or the American Association for the Accreditation of Laboratory Animal Care (AAALAC) accreditation standards. We received 365 comments (85 from members of the general public, 278 from members of the research or scientific community, and 2 from dealers) objecting that we did not coordinate with the Secretary of HHS in issuing the revised proposal. Two hundred sixty-three commenters (70 members of the general public, 191 members of the research or scientific community, and 2 dealers) further suggested that APHIS does not have the technical competence to promulgate these rules.

The Animal Welfare Act was passed by Congress in 1966, long before the Health Research Extension Act of 1985 and the PHS Policy existed. The Act has been amended several times, most recently in 1985, to reflect public concern over the care and treatment of animals used in research, and maintained or handled by dealers, exhibitors, carriers, and intermediate handlers. Section 15(a) of the Act requires that the Secretary of Agriculture consult and cooperate with other Federal agencies in establishing standards, and consult with the Secretary of HHS before issuing regulations (7 U.S.C. 2145(a)). We have continued the consultation described in the supplementary information accompanying the revised proposal (54 FR 10837), in an effort to coordinate our requirements wherever it is consistent with our statutory mandate to do so. We believe that this final rule resolves all of the issues raised by HHS in response to our proposals to amend parts 1 and 2 of the regulations, and that it serves our mutual objectives of animal welfare.

Notwithstanding our desire to resolve our outstanding differences with HHS, we are mindful that Congress has entrusted the Department with responsibility for establishing minimum requirements to carry out its mandate, and for administering the Act because of our expertise in animal welfare matters. We are accountable to Congress and the public for doing so. By harmonizing our regulations with the HHS guidelines wherever doing so is consistent with the Act, we have developed final rules that allow those research facilities receiving funds under the Health Research Extension Act of 1985 to utilize their existing internal procedures where they satisfy the requirements of the Act. The modifications made in the final rule will also allow other research facilities greater flexibility in developing internal procedures which ensure that the objectives of the Act are satisfied. Modifications to the requirements imposed upon research facilities in the final rule are explained in detail under the heading, "subpart C—Research Facilities." Any outstanding differences remaining between the PHS Policy and these final rules are necessary to fulfill our statutory obligations, as directed by Congress.

We are not adopting the regulations of the Food and Drug Administration or the accreditation standards of AAALAC. Congress has mandated that we promulgate regulations implementing the Animal Welfare Act, and that we provide minimum standards for the humane care and use of laboratory animals. Standards or requirements promulgated by other agencies or associations do not accomplish our objective of ensuring compliance with certain minimum requirements. The PHS Policy and the AAALAC accreditation standards are guidelines for facilities that are either Federally funded or that desire accreditation status, respectively. We do not have the authority to enforce them. Furthermore, the 1985 amendments require specific minimum standards, such as exercise for dogs and psychological well-being of nonhuman primates, that have no counterpart in the regulations of other agencies. We believe it is desirable to administer and enforce one uniform body of regulations at all research facilities regulated by the Act. We considered the regulations and guidelines of other agencies and research associations in developing our earlier proposals and these final rules, and have attempted to harmonize our mutual requirements wherever it was consistent with our mandate to do so.

Three hundred thirty commenters (66 members of the general public, 262 members of the research or scientific community, and 2 dealers) repeated the comment that APHIS has failed to show a rational connection between the proposed rules and the Agency record. As we stated in the supplementary information accompanying the revised proposal, we have been charged with the responsibility of administering and enforcing the Animal Welfare Act, and implementing regulations, since the Act was enacted in 1966. The proposed amendments to the regulations and the regulations promulgated in this final rule reflect our many years of experience in implementing the Act. We have determined where additional regulatory requirements are needed to ensure the safeguards intended by the Act are provided and to promote animal welfare. We believe that, upon implementation, these final rules will assist us in enforcing the Act and in preventing circumvention of its requirements.

We received 396 comments (100 from members of the general public, 294 from members of the research or scientific community, and 2 from dealers) stating that we did not respond fully in the revised proposal to the comments submitted in response to the March 1987 proposal, and that we did not provide sufficient reasons for declining to make changes suggested by the commenters. We disagree. Many months were devoted to reviewing the nearly 8,000 comment letters received. All of the comments were carefully considered, and many changes were made as a result of those comments. The rationale underlying our decisions to revise the proposed regulations, or not to revise them to include suggested changes, is explained in great detail in nearly 60 **Federal Register** pages, in the supplementary information accompanying the revised proposals for parts 1 and 2 (see 54 FR 10822–10832 and 54 FR 10835–10882)

Two commenters (1 dealer and 1 exhibitor) stated that the revised proposal is written in a manner that makes it difficult to understand and to comment upon. One of our stated objectives in revising the regulations is to make them easier to understand, thereby increasing compliance and making them more effective. We believe that we have accomplished this objective in the final rules for parts 1 and 2. If, upon implementation of the regulations, we determine that further clarification is necessary, we will provide it in a document published in the **Federal Register**. No further changes are made in the final rule based upon this comment.

We received a number of different comments objecting to the regulations on the grounds that they will impede research in various ways. We received 643 comments (104 from members of the general public, 534 from members of the research or scientific community, and 2 from dealers) objecting that the regulations in the revised proposal would unduly burden research with excessive paperwork, in contravention of the Paperwork Reduction Act. One member of the general public and 3 commenters from the research or scientific community noted, however, that the March 1989 proposal was carefully drafted to avoid unnecessary paperwork. Through our ongoing consultation with HHS and members of the IRAC, we have determined that certain paperwork and reporting requirements presented in the revised proposal can be coordinated with those already required under the PHS Policy, thereby reducing any additional burden that would be imposed upon grantee institutions. Certain other reporting requirements have been modified in the final rule to require less specific detail than originally proposed, and will also reduce the paperwork burden imposed upon research facilities. With these changes, explained in detail under the heading, "subpart C—Research Facilities," we believe we have reduced the paperwork and reporting requirements to the minimum necessary to effectuate the Act, and still enable us to administer the Act by determining whether research facilities are in compliance. We believe these regulations, as modified will not impede research.

We received 547 comments (103 from members of the general public, 442 from members of the research or scientific community, and 2 from dealers) stating that the revised proposal would interfere with research due to its rigidity, by not allowing the flexibility

and innovations necessary for the optimal care and treatment of animals. The final rules have been modified to allow research facilities greater flexibility in developing internal procedures to ensure compliance with the regulations. Ample opportunity for innovative research existed under the proposed rules, and is maintained in the final rules. The regulations provide for departures from the standards and regulations if justified by the principal investigator and approved by the Committee (final rule § 2.31(d)(1)). Under this provision, the research facility, through its Committee, is responsible for approving and allowing any innovations in research that are justified as necessary for scientific purposes. We do not agree with the commenters and believe that their concerns will not materialize upon implementation of the final rules.

Throughout this rulemaking process, we have remained cognizant that the Act proscribes the Secretary from interfering with research design or the performance of actual research. Section 13(a)(6) of the Act provides that "[n]othing in [the] Act (i) except as provided in paragraph (7) of [subsection (a)] shall be construed as authorizing the Secretary to promulgate rules, regulations, or orders with regard to the design, outlines, or guidelines of actual research or experimentation by a research facility as determined by such facility; (ii) except as provided * * * shall be construed as authorizing the Secretary to promulgate rules, regulations, or orders with regard to the performance of actual research or experimentation by a research facility as determined by such research facility; * * *" (7 U.S.C. 2143(a)(6)(A)(i) and (ii)). The regulations being promulgated today are necessary to effectuate the intent of the Act that animals used in biomedical research be provided humane care and treatment. They do not prescribe or interfere with research design or procedures.

Some commenters (28 members of the general public and 17 members of the research or scientific community) were concerned that the proposed regulations would result in research being conducted overseas, due to the added burdens and expense imposed upon the research community, and 5 commenters from the research or scientific community cautioned that the regulations will permit our competitors to overtake and surpass the lead we have enjoyed in biotechnology. We do not believe a significant amount of research activities will be conducted in other countries rather than the United States as a result of these rules. We also do not perceive that Congress or HHS would provide Federal funds for research conducted abroad to avoid the requirements of the Animal Welfare regulations. Similar concerns were raised in 1966 and 1967 when the Animal Welfare Act was first enacted and regulations were promulgated to implement it. History has shown that these concerns were not borne out. To the contrary, tremendous advancements in human and animal health have been made possible through continued support for biomedical research. We are not making any changes in the regulations on the basis of these concerns.

Nor do we agree with the 83 commenters from the research or scientific community who stated that many of the proposed revisions could be used to eliminate animals from biomedical research altogether.

The 1985 amendments to the Act impose specific requirements upon research facilities, including provisions ensuring adequate veterinary care, proper use of pain-relieving drugs, consideration of alternatives to the use of animals and to painful procedures, exercise for dogs, and psychological well-being of nonhuman primates, and some costs will necessarily be associated with these changes. In enacting the amendments, Congress specifically found that the use of animals is instrumental in certain research and education (7 U.S.C. 2131(b)). Congress also determined that the benefit to society of providing for the humane care and use of animals in research justifies its attendant costs. We believe that these final rules effectuate the intent of Congress without imposing an unnecessary, unreasonable, or unjustified financial burden.

Twenty commenters (2 members of the general public and 18 members of the research or scientific community) expresed concern that the proposed regulations, as revised in the March 1989 proposal, would discourage young people from entering medical research fields. We disagree. The requirements of the Animal Welfare Act to reduce pain and distress to animals, to reduce unnecessary duplication of experiments, to encourage development of alternative methods of research, and to provide a more humane environment for animals used in biomedical research, will not discourage young people from entering the field of medical research. We believe that greater concern for the humane care and use of animals may in fact encourage new scientists and foster greater support for biomedical research throughout our society.

One hundred eighty-three commenters (6 members of the general public and 177 members of the research or scientific community) protested that many of the proposed revisions to the regulations appeared to be a direct reaction to a vocal minority in the animal rights movement, whose purpose is to eliminate the use of animals in research entirely. This is a misperception. As noted above, the Act specifically states that "the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals; * * *" (7 U.S.C. 2131(b)). In passing the 1985 amendments to the Act, Congress responded to the concerns of the American public regarding the use of animals in biomedical research, and stated that alternatives to the use of animals should be encouraged, and unnecessary duplication of experiments on animals avoided (7 U.S.C. 2131(b)). These final regulations reflect the mandate of Congress that while animal experimentation shall continue, humane methods of animal care and use be implemented by biomedical research institutions.

We received 419 comments (74 from members of the general public, 223 from members of the research or scientific community, and 2 from dealers) stating that research would be impeded if research protocols and records are made part of the public record and subject to Freedom of Information Act (FOIA) requests. The commenters were concerned that public availability of this information would divulge trade secrets and would subject researchers to harrassment. Forty-six commenters (5 members of the general public and 41 members of the research or scientific community) were concerned with terrorist acts against researchers and their families as a result of public disclosure under the FOIA. One member of the research or scientific community stated that such records should be made part of the public record.

The regulations, as revised in this final rule, require that a summary of exceptions to the standards and regulations be attached to the research facility's annual report (final rule § 2.36(b)(3)). Neither the research "protocol", nor the animal care and use procedure that will be followed in carrying out the research, is required in the annual report. APHIS inspectors are authorized to inspect such records under the Act, but there is no requirement in the final regulations that the records be submitted to and maintained by APHIS as a regular practice. Therefore, these records generally are not agency records available under the Freedom of Information Act. Furthermore, APHIS records of inspections (VS Form 18-8) and the annual reports submitted by research facilities list animal use sites at research facilities. They do not list researchers by name and address. We believe the commenters concerns are unwarranted, and that no further change is needed in the final rule.

Three hundred twenty-six commenters (93 members of the general public, 231 members of the research or scientific community, and 2 dealers) asserted that under the revised proposal, an adversarial relationship between veterinarians and researchers would result. We do not agree with this characterization. We revised our initial proposal to clarify areas of responsibility to avoid potential conflict, and to ensure that provision is made for proper veterinary care in the planning and conduct of animal care and use procedures. This allocation of authority by the research facility to the attending veterinarian is maintained in the final rule. Section 2.33(a)(2) requires that a facility's attending veterinarian be given appropriate authority to ensure that adequate veterinary care is provided, and to oversee animal care and use. These areas are within the expertise of doctors of veterinary medicine. In recognition of this fact, section 13(a)(3)(C) of the Act requires that a veterinarian be consulted in planning a potentially painful procedure (7 U.S.C. 2143(a)(3)(C)), and the final rule reflects this determination of Congress (final rule § 2.33). As we stated in the revised proposal, we do not regard this interaction as an impediment to research, but rather as a necessary ingredient of the research facilities' commitment to assuring animal welfare.

We received 269 comments (78 from members of the general public, 189 from members of the research or scientific community, and 2 from dealers) stating that the Secretary does not have the authority to establish committees with power to review or disapprove of research protocols for any reason, since this authority would deprive researchers of the scientific discretion necessary for the conduct of research. The revised proposal was explicitly clear that Committees would be authorized to review the animal care and use procedure to be employed in a proposed research activity, in accordance with the requirements of the Act, and that this authority did not extend to research "protocol" approval. It is the mandate of Congress that Committees assess animal care, treatment, and practices (7 U.S.C. 2143(b)(1)).

As we explained in detail in the supplementary information accompanying the revised proposal, it is necessary that Committees review the animal care and use procedures proposed to be followed in the conduct of research in order for a research facility to assure us that it is in compliance with the Act and regulations. This authority is limited to the animal care and use portion of a proposal to determine how the research will treat or affect an animal and its condition, and the circumstances under which the animal will be maintained. It does not extend to evaluating the design, outlines, guidelines, and scientific merit of proposed research (54 FR 10849). We have attempted to clarify this point further in the final rule, and put such concerns to rest, by stating that the Committee shall function as an agent of the research facility (final rule § 2.31(c)). In that capacity, the Committee shall review those components of proposed activities, or proposed changes in activities, related to the care and use of animals and determine that they are in accordance with the Animal Welfare regulations unless otherwise justified (final rule § 2.31(d)(1)).

We received 254 comments (70 from members of the general public, 182 from members of the research or scientific community, and 2 from dealers stating that APHIS's regulatory role should be limited to detecting deviations from approved activities, and should not extend to formulation of proposals. Upon implementation of the final rules, APHIS's role will be to administer and enforce the Animal Welfare Act and regulations to ensure compliance. The Act itself provides that certain procedures and safeguards must be followed in research involving potentially painful procedures in order to ensure the humane care and use of animals and that adequate veterinary care is provided (7 U.S.C. 2143(a)(3)). Our regulatory authority extends to ensuring that these procedures and safeguards are adequately addressed and adhered to. We repeat here, for the benefit of the commenters, that we acknowledge the limitation on our authority to promulgate rules, regulations, or orders with regard to the design, outlines, guidelines, or performance of actual research (7 U.S.C. 2143(a)(6)(A)).

Four hundred eighty-five commenters (68 members of the general public, 315 members of the research or scientific community, and 2 dealers) objected to the tone of our March 1989 regulatory proposals, stating that they imply that research (and researchers) is (are) unethical. We do not intend to imply any ethical judgments in these regulations. In amending the Act in 1985, Congress determined that "the use of animals is instrumental in certain research and education for advancing knowledge of cures and treatment for diseases and injuries which afflict both humans and animals; * * *" (7 U.S.C. 2131(b)). However, Congress also determined that certain measures must be prescribed and followed by research facilities to "help meet the public concern for laboratory animal care and treatment * * *" (7 U.S.C. 2131(b)). We are promulgating these regulations which govern the care, use, treatment, and handling of warm-blooded animals by research facilities and other entities, to carry out the mandate of Congress.

Comments on Specific Interrelationships Between Parts 2 and 3

We received 392 comments (95 from members of the general public, 295 from members of the research or scientific community, and 2 from dealers) stating that part 1 (Definition of terms) and part 2 (Regulations) of the regulations should not be made final without the final rule for part 3 (Standards), because they are interdependent. We also received 249 comments (68 from members of the general public, 177 from members of the research or scientific community, and 4 from dealers) stating that parts 1 and 2 should not become final without part 3 in order to be cost-effective.

We have considered the public's comments on the interrelationship of the regulations and standards and have revised the final rule accordingly. We believe that parts 1 and 2 of the regulations can be effectively implemented without further delay. Standards governing the humane handling, care, treatment, and transportation of the warm-blooded animals covered by the Act are contained in part 3 of the regulations. Although we are proposing to amend those standards, we believe that these final rules can now be implemented using the existing standards. Prompt implementation of these final rules will carry out many of the provisions for animal welfare mandated by Congress in amending the Act. No further delay is necessary to ensure that adequate veterinary care is provided to all animals under the Act and that pain-relieving drugs are used where appropriate.

Comments on the interrelationship of the terms contained in parts 2 and 3 of the regulations that are defined in part 1 are discussed in companion docket No. 89-130, published elsewhere in this issue of the **Federal Register**. In that document, we address comments suggesting that additional definitions or clarifications are necessary.

We received 480 comments (478 from members of the general public and 2 from members of the research or scientific community) expressing support for parts 1 and 2 as they relate to part 3.

Three dealers and one member of the general public requested that we clarify when an exhibitor should be registered under part 2, subpart B, or licensed, in accordance with subpart A and the term, "Class "C" licensee." Persons who meet the definition of the term "Exhibitor" provided in § 1.1 of the final rule must obtain a Class "C" license if their business involves the showing or displaying of animals to the public. Section 2.25 requires that all other exhibitors register in accordance with the requirements of subpart B of the final rule, unless they are exempt from the licensing requirements under section 3 of the Act. Section 3 exempts "any retail pet store or other person who derives less than a substantial portion of his income (as determined by the Secretary) from the breeding and raising of dogs or cats on his own premises and sells any such dog or cat to a dealer or research facility * * *" (7 U.S.C. 2133). We believe that the definitions provided in the final rule for "Exhibitor" and "Class "C" licensee" are clear, and that no further clarification of the registration regulations in subpart B are necessary.

One member of the research or scientific community requested that we clarify the Committee's responsibility regarding animals that are not covered by the Act. The Animal Welfare Act and regulations apply only to regulated animals. The term "animal" is defined in the final rule for part 1 for purposes of these regulations. The Committee has no responsibilities under these regulations for animals that are not covered by the Act.

We received several comments objecting to the requirement of revised proposal § 2.30(g) which would require that exceptions to the standards and regulations be permitted by research facilities only when necesary in order to accomplish the research design, specified in the proposed animal care and use procedure submitted to the Committee for approval, explained in detail, and approved by the Committee. Paragraph (g) provided that the principal investigator must first file a report with the Committee "explaining the areas of noncompliance in detail." Three commenters (1 member of the general public and 2 members of the research or scientific community) objected that requiring a detailed explanation of deviations or exceptions to compliance with the regulations and standards will delay research.

The Act requires that exceptions to the standards be allowed only when specified by research protocol (7 U.S.C. 2143(a)(3)(E)). Any such exceptions must be detailed and explained in the research facility's annual report and filed with the Committee (7 U.S.C. 2143(a)(3)(E)). It is the responsibility of the research facility to ensure that it is in compliance with the Act and regulations. In order to do so the final regulations provide that the Committee, as an agent of the research facility, shall review all proposed activities and proposed changes on ongoing activities, to determine whether they are in compliance, or whether an exception is justified. Under the final rule, the principal investigator must present an acceptable justification for the exception, in writing. A summary of all such exceptions must also be attached to the facility's annual report in accordance with the requirements of the Act (final rule § 2.36(b)(3)). We believe that the burden imposed upon principal investigators in explaining how their proposal departs from the regulations and standards, and justifying the proposed exception, is reasonable and necessary to keep the institution informed of research activities and in compliance with the Act. The final rule provides means by which the research facilities can ensure that Committee review is provided without undue delay. We do not believe that this requirement, as revised in the final rule, will delay research.

Four members of the research or scientific community objected to the term, "areas of noncompliance" and suggested that we refer to "scientifically justified exceptions to the standards" instead. As noted briefly above, and explained in greater detail under the heading, "subpart C—Research Facilities", § 2.31(d)(1) of the final rule is revised to require that the Committee review proposed activities to determine that the animal care and use components of those activities are in accordance with the regulations, "unless acceptable justification for a departure is presented; * * *" (final rule § 2.31(d)(1)). This language is consistent with the PHS Policy and is more appropriate, since an approved departure from the regulations would not be deemed a violation of the Act, as the term "noncompliance" may connote.

One member of the research or scientific community objected to considering scientifically necessary exceptions to the regulations as being areas of noncompliance or deviations which must be explained in detail by the principal investigator and included in a written report that is attached to the annual report. As noted above, the Act requires that exceptions to the standards be explained in a written report and included in the research facility's annual report (7 U.S.C. 2143(a)(3)(E)). Under the final rule, therefore, the research facility must assure that it has required "that exceptions to the standards and regulations be specified and explained by the principal invetigator and approved by the IACUC." (Final rule § 2.31(d)(3)). We are requiring that a "summary of all such exceptions * * *" be attached to the annual report (final rule § 2.36(b)(3)). The terms "areas of noncompliance" or "deviations" used in the revised proposal are referred to as "departures" from the regulations, or "exceptions" in the final rule, for the reason set forth immediately above. Therefore, scientifically necessary exceptions must be explained by the principal investigator and described, in writing, in the facility's annual report, contrary to the commenter's assertion.

Four commenters (2 members of the general public and 2 members of the research or scientific community) opposed the requirement that written reports of exceptions to the standards and regulations be attached to the annual report, as required under revised proposal § 2.30(g). This requirement is statutorily mandated, as set forth above, and is retained in the final rule (final rule § 2.31(d)(3)). We have modified it to require summaries of such exceptions, however, as explained in greater detail under the heading, "Subpart C—Research facilities", subheading, "Annual report."

We received 628 comments (619 from members of the general public and 9 from members of the research or scientific community) endorsing the requirements of revised proposal § 2.30(h), "Exercise for dogs and psychological well-being of nonhuman primates." It would require that "[t]he research facility shall establish, in consultation with the attending veterinarian, written procedures and systems for the exercise of dogs and for the psychological well-being of primates in accordance with the regulations and standards, and a record system documenting that such a procedure or system is being carried out." We also received 203 comments (198 from members of the general public, 4 from members of the research or scientific community, 1 from a dealer) supporting the requirement for documentation of the release of dogs for exercise (revised proposal § 2.30(h) and proposed § 3.07(d)), and 193 comments (189 members of the general public and 4 members of the research or scientific community) supporting the requirement for documentation of primate exercise and psychological well-being (revised proposal § 2.30(h) and proposed § 3.81(c)). Fourteen commenters (1 member of the general public and 13 members of the research or scientific community) opposed the requirement for written procedures and record systems, and 303 commenters (74 members of the general public, 227 members of the research or scientific community, and 2 dealers) stated that the requirements of revised proposal § 2.30(h), if included in the final rule, could not be met in the absence of the standards set forth in part 3. In addition, although the revised proposal made clear that the procedures may be included in the facility's standard operating procedure and need not be a separate document, members of the IRAC expressed concern in the course of our consultation, that the requirement for written procedures for the exercise of dogs and recordkeeping systems for documenting exercise would be administratively burdensome.

We proposed that recordkeeping systems be maintained to ensure compliance, since exercise could not otherwise be verified. We continue to endorse this approach, as stated in the supplementary information accompanying the revised proposal. However, requirements for exercise of dogs and for promoting the psychological well-being of nonhuman primates will, upon publication of a final rule, be set forth in subparts A and D of part 3 of the regulations. Until the proposed regulations for part 3 are published as a final rule, there are no such procedures and systems to record. We believe that making this requirement of part 2 final before the promulgation of standards for exercise and psychological well-being would be premature, confusing, and difficult to enforce. We are therefore removing from the final rule for part 2 the requirement that a record system documenting that a procedure or system for exercise of dogs and for the psychological well-being of nonhuman primates be established, pending promulgation of a final rule for part 3.

Three members of the research or scientific community commented that all Federal research facilities should be covered by the regulations. The Act provides that Federal research facilities shall establish Committees having the same composition and responsibilities required at nonfederal research facilities (7 U.S.C. 2143(c)). It also provides that Federal research facilities shall comply with the standards and requirements promulgated under Section 13 (a), (f), (g), and (h) of the Act (7 U.S.C. 2144). (This section reference appears in the Act as Section 13 (a), (g), (h), and (i) due to a drafting error which created two paragraphs designated as (f).) Although we do not exercise authority to inspect Federal research facilities, they must comply with the standards promulgated under the Act. The requirement that Federal facilities maintain Committees having the same composition, duties, and responsibilities required of other research facilities is contained in § 2.37 of the final rule.

Two members of the research or scientific community commented that pounds and shelters should be regulated under the Act. We do not have authority under the Act to regulate governmentally owned and operated pounds and shelters. We do regulate private or contract pounds and shelters, however, if they meet the definition of a dealer, as set forth in final rule § 1.1. Regulations governing their operations are set forth in § 2.132 of the final rule.

Two hundred forty-two commenters (67 members of the general public, 173 members of the research or scientific community, and 2 dealers) objected to the revised proposal arguing that there is no proof that large numbers of stolen animals end up at research facilities. Certain of the provisions in the regulations are intended to prevent this from occurring (*see, e.g.*, final rule §§ 2.38 (d), (j), (k), 2.60, 2.101)).

One of the original findings of Congress underlying enactment of the Animal Welfare Act in 1966 was the need "to protect the owners of animals from the theft of their animals by preventing the sale or use of animals which have been stolen." (7 U.S.C. 2131(b)). This is still a valid concern of Congress and the public, and therefore the Department. Regulations intended to prevent the sale of stolen animals to research facilities and the use by research facilities of stolen animals are therefore included in the final rule for part 2.

Public Comments on Regulatory Impact Analysis and Regulatory Flexibility Act Analysis

The anticipated economic impact of implementing the 1985 amendments to the Animal Welfare Act has generated much interest, discussion, and controversy. The Department conducted a regulatory impact analysis of the proposed rules as required by Executive Order 12291. The analysis determined that implementation of the proposed rules would have a cost impact in excess of $100 million on the economy, thus it would be a "major rule." The analysis of cost impacts was based on our best assessment; available information indicated that the costs to regulated establishments would amount to $207 million for annual operating expenditures and $876 million for capital investments.

We received 632 comments (3 from the research community, 2 from dealers, and 627 from the general public) noting that the regulatory impact analysis contained "overinflated" cost estimates. Only 1 of the comments from the general public provided detailed information of compliance costs for each new provision in the proposed rules. The rest of the comments contained a formatted statement indicating that costs in the analysis were "overinflated" and the proposed rules asked for nothing more than a well-run animal facility already provided for regulated animals.

We also received 270 comments (91 members of the general public, 177 members of the research or scientific community, and 2 dealers) noting that the cost estimates in the regulatory impact analysis were too low. Again, only 1 commenter from the research community provided detailed information and different compliance cost estimates of implementing the proposed rules. The commenter estimated that implementation of the proposed rules will cost regulated establishments more than $450 million annually plus a capital investment of at least $1.6 billion over the next several years.

In conducting the regulatory impact analysis, the Department decided early in the analysis that attempting to construct a coherent analytical framework to estimate potential compliance costs was inappropriate. Time and resources did not allow the traditional economic approach of conceptualizing and estimating an analytical framework. Also, a single framework would not have provided all useful answers to all questions on anticipated cost impacts because of the

complexity of factors being measured, the lack of statistical data sources, and the diversity of regulated establishments. Instead, the Department relied on several informational sources such as expert opinion from across the country, our inspection of regulated sites, and our own experience in administering the Animal Welfare regulations. The cost estimates represented best efforts by the Department and are not to be construed as exact estimates of compliance due to obvious limitations, as stated in the analysis.

However, we disagree with those commenters who stated that the potential costs on regulated establishments were "overinflated." The proposed rules contained many new animal welfare provisions required by the statute which are not presently prescribed in the existing regulations. Compliance with these new provisions will require regulated establishments to update their facilities and practices so that the level of humane care and treatment afforded to regulated animals will increase. The derivation of cost estimates provided by the commenter from the research community which doubled the cost estimates in the regulatory impact is also subject to data and analytical constraints. Furthermore, the commenter provided insufficient detail, methodology, and data to support its cost estimates. We believe that these cost estimates represent a "worst case" scenario of implementing the proposed rules.

Sixty-six commenters from the general public, 168 commenters from the research or scientific community, and 2 dealers stated that the regulatory impact analysis did not contain sufficient detail to explain the discrepancies between the Department's cost estimates (referenced above), and those submitted by a commenter from the research or scientific community. The regulatory analysis provides an internal mechanism for the Department to promulgate new rules or revise existing rules based on information which is available to the Department. It is impossible for the Department to compare its own findings in the regulatory analysis with those provided by a commenter after the proposed rules have been made public.

Four hundred ninety-two commenters (275 from the research or scientific community, 114 from the general public, and 3 dealers) stated that the proposed regulations would inflate the cost of animal research making it cost prohibitive. Two hundred sixty-one commenters (68 members of the general public, 168 members of the research or scientific community, and 25 dealers) also stated that the proposed rules will cost too much to implement and will put small dealers out of business. Two hundred forty-three commenters (66 members of the general public, 175 members of the research or scientific community, and 2 dealers) also stated that the proposed rules will cost too much and will put small researchers out of business. In addition, 70 commenters from the general public, 179 commenters from the research community, and 2 dealers were shocked that the Department discounted the impact of the proposed rules believing that no establishment would abandon the use of animals in biomedical research due to increased compliance costs. Most of these commenters also stated that the increased costs for animal research are important, and when coupled with the delay in research advances, would make the real costs staggering.

The regulatory review has indicated that a cost impact on animal research and small entities would occur. Moreover, the regulatory review has also indicated that the cost impact of the regulations result from the implementation of the new provisions in the 1985 amendments to the Animal Welfare Act. The Department has not discounted the potential economic effects of the proposed rules on biomedical research using animals as mere cost increases. We have acknowledged that the overall impact on biomedical research is difficult to assess. Whether biomedical research facilities would abandon the use of animals depends on the extent of compliance costs to be imposed on each facility. Biomedical research facilities vary extensively as to their research needs, operations, animal premises, and their inventory of regulated species.

In developing final rules, the Department has considered and will continue to consider regulations that will impose the least cost on regulated establishments within statutory goals. The Department does not consider the regulations to be imposing prohibitive costs on regulated establishments. Most facilities meeting or exceeding present compliance requirements may not be greatly impacted by the regulations, except for the new provisions as stated in the amendments.

Two hundred ninety-two commenters (72 members of the general public, 178 members of the research or scientific community, and 2 dealers) indicated that the Department has failed to do a cost-benefit analysis as required by Executive Order 12291. Ninety-three members of the general public, 301 members of the research or scientific community, and 2 dealers stated that the regulations provided no benefit to animals or improvements in animal care.

The general requirements for a regulatory impact analysis under Executive Order 12291 of proposed federal rules require that costs and benefits be identified and examined. They also require that regulatory objectives be chosen to maximize net benefits to society or involve the least cost to society. The regulatory analysis examined the presence of benefits to society and animals arising from the regulatory proposals and indicated that these benefits could not be properly quantified. In the absence of actual dollar figures for benefits, it was impossible to estimate the net potential benefits from the regulations.

The Department disagrees with the opinion that animals will not receive improved animal care or benefits under the proposed rules. There has been considerable scientific data and increased public opinion that supports the intent of Congress to increase the level of animal care and treatment afforded to animals in regulated establishments. Requirements that provide for better and enriched animal housing environments, appropriate veterinary care, procedures that minimize animal pain and discomfort, and alternatives to animal research are some of the factors which support the increased level of welfare and benefits to regulated animals.

Seventy-four commenters members of the general public, 172 members of the research or scientific community, and 2 dealers stated that the Department has failed to consider alternatives that will achieve statutory goals and involve the least cost to society. The Department disagrees with these commenters. In developing the proposed rules, the Department has sought comments and input from the regulated establishments, the general public, and interested Federal agencies. Previous proposals contain extensive discussion and explanation of alternative provisions for each new revision or change required by the amendments. The Department will also finalizes rules after all relevant factors are considered, including least costly alternatives, in achieving statutory goals.

Statutory Authority

This rule is issued pursuant to the Animal Welfare Act (Act), as amended, 7 U.S.C. 2131–2157. Congress recently added significantly to the Secretary's responsibilities under the Act, particularly with regard to the use of animals by research facilities, in the Food Security Act of 1985, Public Law No. 99–198, approved December 23, 1985. The declared policy of the Act is to ensure that animals intended for use in research facilities, as pets, or for exhibition purposes, are provided humane care and treatment; to assure the humane treatment of animals during transportation; and to prevent the sale of stolen animals.

The Act requires that animal dealers and exhibitors obtain a license from the Secretary, and that research facilities, carriers, and intermediate handlers register with the Secretary. The Act directs the Secretary to issue specific regulations concerning, *inter alia* recordkeeping, veterinary care, handling, transportation, identification of animals, and holding period requirements. In addition, the 1985 amendments require the Secretary to issue expanded regulations governing the use of animals in research facilities. Section 21 of the Act continues to authorize the Secretary to issue such regulations as he deems necessary to effectuate the purposes of the Act.

The recent amendments mandate that these regulations are to include standards for care, treatment, and practices in experimental procedures which will minimize pain and distress. The Secretary is to require that researchers consider alternatives to painful procedures and that, with regard to painful procedures, researchers must consult a veterinarian; use adequate tranquilizers, anesthetics, and analgesics; and provide for adequate pre- and post-surgical care. Moreover, exceptions to these standards may be made only when specified by research protocol and explained in a report mandated in the Act.

The Act also mandates that the Secretary issue regulations requiring research facilities to show and report that they are complying with the Act and that they are following professionally acceptable standards in the care and treatment of animals during research. The Act directs the Secretary to require each research facility to establish a committee to assess the facility's use and treatment of animals. The Act specifies the composition of the committee, including the requirement that each committee must be composed of at least three members and that each committee must have at least one member who is a veterinarian and at least one who represents the community interest in proper animal care. The Act mandates many of the committee's responsibilities, including that it inspect and report at least semi-annually on the condition and use of animals and report any violations of the standards. The Secretary is also to require each research facility to provide training for all personnel involved in animal care.

This rule contains regulations required by the 1985 amendments as well as modifications to existing regulations based on the Department's experience in administering the Act.

Executive Order 12291

The Department has examined the economic impact of this final rule in accordance with Executive Order 12291.

Amendments to the Animal Welfare Act require changes in the existing Animal Welfare regulations. The Department has finalized revisions to part 2 of the Animal Welfare regulations under its statutory authority. The final regulations for part 2 contain revisions and new requirements intended to improve the welfare of animals and the regulated public's understanding of the regulations, thereby increasing compliance and effectiveness. In developing these regulations, the Department has given full consideration to the input and comments received from regulated establishments, the general public, and interested Federal agencies to previous alternative regulatory proposals. These regulations are consistent with and do not contradict other Federal regulations, policies, or guidelines on laboratory animal care, use, and treatment practices.

The regulatory analysis focuses on the changes to part 2 of the Animal Welfare regulations required by the amendments. The analytical emphasis is on the incremental costs to be imposed on regulated establishments (research facilities, breeders, dealers, and exhibitors) when these regulations become effective. These compliance costs are attributed to the statute itself and are mainly due to new requirements for the establishment and maintenance of institutional animal care and use committees in research facilities, programs of adequate veterinary care, and the use of procedures to ensure that animal pain and distress are minimized.

Revisions to part 2 of the regulations will require Federal and nonfederal research facilities to spend between $43.5 and $132.8 million in capital expenditures to renovate, equip, replace, or construct aseptic surgical facilities, and provide for adequate pre-operative and post-operative care of animals. Only those facilities performing surgery on regulated species of animals will be affected. A range is provided because the Department is unaware of the degree to which research facilities currently comply with these standard veterinary procedures in the absence of specific regulations. The Department estimates $33 million in additional annual compliance costs for Federal and nonfederal research institutions to comply with the new regulations and requirements for the operation of the institutional animal care and use committees, increased responsibilities for attending veterinarians, and increased recordkeeping requirements. These costs represent additional costs for laboratory personnel and the need for additional personnel in research facilities.

Overall, the Department does not anticipate a significant economic impact from part 2 of the regulations on biomedical research, testing, and education, since current outlays are estimated to be in excess of $14 billion per year. In terms of annual compliance costs, the regulatory impact on biomedical research would account for far less than one percent (0.2%) of the aggregate annual outlays. However, there could be small, but important, implications and distributional effects associated with allocating additional funds or expenditures for compliance with the regulations.

Licensees (breeders, dealers, and exhibitors) would be required to spend an additional $0.6 million to comply with the revised requirements for licensing, animal identification, and adequate veterinary care. With the exception of increases in annual license fees, the additional cost of these new requirements are also attributed to the statute itself. These additional costs would not have any adverse effects on the ability of licensees to continue animal ventures and the implementation of the regulations will assist the Department by enhancing traceability of animals purchased, sold or transported. These costs could also be passed on to other regulated establishments or consumers who purchase their animals.

Other economic impacts that are examined but not quantified in this analysis include the benefits which would result from increased levels of humane care and treatment of animals used for research, testing, teaching, exhibition and business ventures. The main intent of the amendments and the regulations is to increase the welfare of animals. Direct benefits accrue to society based on perceptions of increased improvements in the manner in which animals would be cared for under the new regulations. Animal research will benefit from the avoidance of unnecessary duplication of animal

experiments or protocols, increased exchange of technical information, and the renewed emphasis on and interest in the use of scientifically and economically feasible alternatives to animal experimentation.

Based on the analysis of potential cost impacts, the Department has determined that implementing parts 1 and 2 of the regulations may constitute a "major rule." The estimated total additional compliance costs for part 2 of the regulations are treated together with the economic implications that part 3—"Standards" may have on regulated establishments. The amendments mandate changes in animal housing, environmental enrichments, and exercise and socialization of dogs. Available information indicates that the bulk of the regulatory impact will be due to new requirements for the exercise of dogs and a physical environment that promotes the psychological well-being of non-human primates, specific provisions required by the amendments. The Department considers the changes in all three parts of the Animal Welfare regulations will be a "major rule" based on anticipated cost increases in excess of $100 million for animal uses, care, and treatment. For that purpose, the Department has considered and will continue to examine least cost feasible alternatives, whenever appropriate and within statutory goals, in developing the final Animal Welfare regulations.

Regulatory Flexibility Act

The Department has analyzed the potential impact on small entities of this final rule for part 2 of the Animal Welfare regulations as required by the Regulatory Flexibility Act (Pub. L. 96-354).

Based upon our analysis, the Department determines that this final rule could affect all small regulated entities, primarily by increases in annual license fees, and identification requirements for dogs and cats. However, the economic impacts would not be significant. The greatest economic burden of this rule would be imposed on large regulated entities and large research facilities. It is anticipated that the largest economic impact on small entities would result from changes in part 3—"Standards." Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR part 3015, subpart V.)

Paperwork Reduction Act

The information collection and recordkeeping provisions that are included in the final rules amending 9 CFR parts 1 and 2 have been submitted for approval to the Office of Management and Budget (OMB), in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) under control number 0579–0036, and upon approval, will become effective upon October 30, 1989. The Department has requested that OMB conclude its review no later than October 30, 1989.

The public reporting burden for this collection of information is estimated to average 0.96 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The public recordkeeping burden is estimated to average 4.0 annual hours per recordkeeper.

Send written comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Agriculture, Clearance Officer, OIRM, Room 404W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0579–0036), Washington, DC 20503.

List of Subjects

9 CFR Part 2

Licensing, Registration, Identification of animals, Records, Institutional animal care and use committees and adequate veterinary care, Miscellaneous.

9 CFR Part 3

Animal welfare, Humane animal handling, Pets, Transportation.

Accordingly, based on the rationale set forth in the preamble, we are amending 9 CFR parts 2 and 3 as follows:

1. Part 2 is revised to read as follows:

PART 2—REGULATIONS

Subpart A—Licensing

Sec.
2.1 Requirements and application.
2.2 Acknowledgement of regulations and standards.
2.3 Demonstration of compliance with standards and regulations.
2.4 Non-interference with APHIS officials.
2.5 Duration of license and termination of license.
2.6 Annual license fees.
2.7 Annual report by licensees.
2.8 Notification of change of name, address, control, or ownership of business.
2.9 Officers, agents, and employees of licensees whose licenses have been suspended or revoked.
2.10 Licensees whose licenses have been suspended or revoked.
2.11 Denial of initial license application.

Subpart B—Registration

2.25 Requirements and procedures.
2.26 Acknowledgement of regulations and standards.
2.27 Notification of change of operation.

Subpart C—Research Facilities

2.30 Registration.
2.31 Institutional Animal Care and Use Committee (IACUC).
2.32 Personnel qualifications.
2.33 Attending veterinarian and adequate veterinary care.
2.34 [Reserved]
2.35 Recordkeeping requirements.
2.36 Annual report.
2.37 Federal research facilities.
2.38 Miscellaneous.

Subpart D—Attending Veterinarian and Adequate Veterinary Care

2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Subpart E—Identification of Animals

2.50 Time and method of identification.
2.51 Form of official tag.
2.52 How to obtain tags.
2.53 Use of tags.
2.54 Lost tags.
2.55 Removal and disposal of tags.

Subpart F—Stolen Animals

2.60 Prohibition on the purchase, sale, use, or transportation of stolen animals.

Subpart G—Records

2.75 Records: Dealers and exhibitors.
2.76 Records: Operators of auction sales and brokers.
2.77 Records: Carriers, and intermediate handlers.
2.78 Health certification and identification.
2.79 C.O.D. shipments.
2.80 Records, disposition.

Subpart H—Compliance With Standards and Holding Period

2.100 Compliance with standards.
2.101 Holding period.
2.102 Holding facility.

Subpart I—Miscellaneous

2.125 Information as to business; furnishing of same by dealers, exhibitors, operators of auction sales, intermediate handlers, and carriers.
2.126 Access and inspection of records and property.

2.127 Publication of names of persons subject to the provisions of this part.
2.128 Inspection for missing animals.
2.129 Confiscation and destruction of animals.
2.130 Minimum age requirements.
2.131 Handling of animals.
2.132 Procurement of random source dogs and cats, dealers.

Authority: 7 U.S.C. 2131–2157; 2.17, 2.51, and 371.2(g).

Subpart A—Licensing

§ 2.1 Requirements and application.

(a)(1) Any person operating or desiring to operate as a dealer, exhibitor, or operator of an auction sale, except persons who are exempted from the licensing requirements under paragraph (a)(3) of this section, must have a valid license. A person must be 18 years of age or older to obtain a license. A person seeking a license shall apply on a form which will be furnished by the APHIS, REAC Sector Supervisor in the State in which that person operates or intends to operate. The applicant shall provide the information requested on the application form, including a valid mailing address through which the licensee or applicant can be reached at all times, and a valid premises address where animals, animal facilities, equipment, and records may be inspected for compliance. The applicant shall file the completed application form with the APHIS, REAC Sector Supervisor.

(2) If an applicant for a license or license renewal operates in more than one State, he or she shall apply in the State in which he or she has his or her principal place of business. All premises, facilities, or sites where such person operates or keeps animals shall be indicated on the application form or on a separate sheet attached to it. The completed application form, along with the application fee indicated in paragraph (d) of this section, and the annual license fee indicated in table 1 or 2 of § 2.6 shall be filed with the APHIS, REAC Sector Supervisor.

(3) The following persons are exempt from the licensing requirements under section 2 or section 3 of the Act:

(i) Retail pet stores which sell nondangerous, pet-type animals, such as dogs, cats, birds, rabbits, hamsters, guinea pigs, gophers, domestic ferrets, chinchilla, rats, and mice, for pets, at retail only: *Provided, That,* Anyone wholesaling any animals, selling any animals for research or exhibition, or selling any wild, exotic, or nonpet animals retail, must have a license;

(ii) Any person who sells or negotiates the sale or purchase of any animal except wild or exotic animals, dogs, or cats, and who derives no more than $500 gross income from the sale of such animals to a research facility, an exhibitor, a dealer, or a pet store during any calendar year and is not otherwise required to obtain a license;

(iii) Any person who maintains a total of three (3) or fewer breeding female dogs and/or cats and who sells only the offspring of these dogs or cats, which were born and raised on his or her premises, for pets or exhibition, and is not otherwise required to obtain a license;

(iv) Any person who sells fewer than 25 dogs and/or cats per year which were born and raised on his or her premises, for research, teaching, or testing purposes or to any research facility and is not otherwise required to obtain a license. The sale of any dog or cat not born and raised on the premises for research purposes requires a license;

(v) Any person who arranges for transportation or transports animals solely for the purpose of breeding, exhibiting in purebred shows, boarding (not in association with commercial transportation), grooming, or medical treatment, and is not otherwise required to obtain a license;

(vi) Any person who buys, sells, transports, or negotiates the sale, purchase, or transportation of any animals used only for the purposes of food or fiber (including fur);

(vii) Any person who breeds and raises domestic pet animals for direct retail sales to another person for the buyer's own use and who buys no animals for resale and who sells no animals to a research facility, an exhibitor, a dealer, or a pet store (e.g., a purebred dog or cat fancier) and is not otherwise required to obtain a license;

(viii) Any person who buys animals solely for his or her own use or enjoyment and does not sell or exhibit animals, or is not otherwise required to obtain a license;

(b) Any person who sells fewer than 25 dogs or cats per year for research or teaching purposes and who is not otherwise required to obtain a license may obtain a voluntary license, provided the animals were born and raised on his or her premises. A voluntary licensee shall comply with the requirements for dealers set forth in this part and the Specifications for the Humane Handling, Care, Treatment, and Transportation of Dogs and Cats set forth in part 3 of this subchapter and shall agree in writing on a form furnished by APHIS to comply with all the requirements of the Act and this subchapter. Voluntary licenses will not be issued to any other persons. To obtain a voluntary license the applicant shall submit to the APHIS, REAC Sector Supervisor the application fee of $10 plus an annual license fee. The class of license issued and the fee for a voluntary license shall be that of a Class "A" licensee (breeder). Voluntary licenses will not be issued to any other persons or for any other class of license.

(c) No person shall have more than one license.

(d) A license will be issued to any applicant, except as provided in §§ 2.10 and 2.11, when the applicant:

(1) Has met the requirements of this section and of §§ 2.2 and 2.3; and

(2) Has paid the application fee of $10 and the annual license fee indicated in § 2.6 to the APHIS, REAC Sector Supervisor and the payment has cleared normal banking procedures.

(e)(1) On or before the expiration date of the license, a licensee who wishes a renewal shall submit to the APHIS, REAC Sector Supervisor a completed application form and the application fee of $10, plus the annual license fee indicated in § 2.6 by certified check, cashier's check, personal check, or money order. A voluntary licensee who wishes a renewal shall also submit the $10 application fee plus an annual license fee. An applicant whose check is returned by the bank will be charged a fee of $15 for each returned check. One returned check will be deemed nonpayment of fees and will result in denial of license. Payment of fees must then be made by certified check, cashier's check, or money order. An applicant will not be licensed until his or her payment has cleared normal banking procedures.

(2) The $10 application fee must also be paid if an applicant is applying for a changed class of license. The applicant may pay such fees by certified check, cashier's check, personal check, or money order. An applicant whose check is returned by a bank will be charged a fee of $15 for each returned check and will be required to pay all subsequent fees by certified check, money order, or cashier's check. A license will not be issued until payment has cleared normal banking procedures.

(f) The failure of any person to comply with any provision of the Act, or any of the provisions of the regulations or standards in this subchapter, shall constitute grounds for denial of a license; or for its suspension or revocation by the Secretary, as provided in the Act.

§ 2.2 Acknowledgment of regulations and standards.

APHIS will supply a copy of the applicable regulations and standards to the applicant with each request for a license application or renewal. The applicant shall acknowledge receipt of the regulations and standards and agree to comply with them by signing the application form before a license will be issued or renewed.

§ 2.3 Demonstration of compliance with standards and regulations.

(a) Each applicant must demonstrate that his or her premises and any animals, facilities, vehicles, equipment, or other premises used or intended for use in the business comply with the regulations and standards set forth in parts 2 and 3 of this subchapter. Each applicant for an initial license or license renewal must make his or her animals, premises, facilities, vehicles, equipment, other premises, and records available for inspection during business hours and at other times mutually agreeable to the applicant and APHIS, to ascertain the applicant's compliance with the standards and regulations.

(b) In the case of an application for an initial license, the applicant must demonstrate compliance with the regulations and standards, as required in paragraph (a) of this section, before APHIS will issue a license. If the applicant's animals, premises, facilities, vehicles, equipment, other premises, or records do not meet the requirements of this subchapter, APHIS will advise the applicant of existing deficiencies and the corrective measures that must be completed to come into compliance with the regulations and standards. The applicant will have two more chances to demonstrate his or her compliance with the regulations and standards through re-inspection by APHIS. If the applicant fails the third inspection he or she will forfeit the application fee and cannot re-apply for a license for a period of 6 months following the third inspection. Issuance of the license will be denied until the applicant demonstrates upon inspection that the animals, premises, facilities, vehicles, equipment, other premises and records are in compliance with all regulations and standards in this subchapter.

§ 2.4 Non-interference with APHIS officials.

A licensee or applicant for an initial license shall not interfere with, threaten, abuse (including verbally abuse), or harass any APHIS official in the course of carrying out his or her duties.

§ 2.5 Duration of license and termination of license.

(a) A license issued under this part shall be valid and effective unless:

(1) The license has been revoked or suspended pursuant to section 19 of the Act.

(2) The license is voluntarily terminated upon request of the licensee, in writing, to the APHIS, REAC Sector Supervisor.

(3) The license has expired or been terminated under this part.

(4) The applicant has failed to pay the application fee and the annual license fee as required in §§ 2.1 and 2.6.

There will be no refund of fees if a license is terminated prior to its expiration date.

(b) Any person who is licensed must file an application for a license renewal and an annual report form (VS Form 18-3) as required by § 2.7, and pay the required fees, on or before the expiration date of the present license or the license shall expire and automatically terminate on its anniversary date. The licensee will be notified by certified mail at least 60 days prior to the expiration date of the license. Failure to comply with the annual reporting requirements, or to pay the required license fees prior to the expiration date of the license, shall result in automatic termination of such license on the anniversary date of the license.

(c) Licensees must accept delivery of registered mail or certified mail notice and provide the APHIS, REAC Sector Supervisor notice of their address in conformity with the requirements in § 2.1.

(d) Any person who seeks the reinstatement of a license that has been automatically terminated must follow the procedure applicable to new applicants for a license set forth in § 2.1.

(e) Licenses are issued to specific persons for specific premises and do not transfer upon change of ownership, nor are they valid at a different location.

(f) A license which is invalid under this part shall be surrendered to the APHIS, REAC Sector Supervisor. If the license cannot be found, the licensee shall provide a written statement so stating to the APHIS, REAC Sector Supervisor.

§ 2.6 Annual license fees.

(a) In addition to the application fee of $10 required to be paid upon the application for a license, license renewal, or changed class of license under § 2.1, each licensee shall submit to the APHIS, REAC Sector Supervisor the annual license fee prescribed in this section. Paragraph (b) of this section indicates the method used to calculate the appropriate fee. The amount of the fee is determined from Table 1 or 2 in paragraph (c) of this section.

(b)(1) Class "A" license. The annual license renewal fee for a Class "A" dealer shall be based on 50 percent of the total gross amount, expressed in dollars, derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale, by the dealer or applicant during his or her preceding business year (calendar or fiscal) in the case of a person who operated during such a year. If animals are leased, the lessor shall pay a fee based on 50 percent of any compensation received from the leased animals and the lessee shall pay a fee based upon the net compensation received from the leased animals, as indicated for dealers in Table 1 in paragraph (c) of this section.

(2) Class "B" license. The annual license renewal fee for a Class "B" dealer shall be established by calculating the total amount received from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale, during the preceding business year (calendar or fiscal) less the amount paid for the animals by the dealer or applicant. This net difference, exclusive of other costs, shall be the figure used to determine the license fee of a Class "B" dealer. If animals are leased, the lessor and lessee shall each pay a fee based on the net compensation received from the leased animals calculated from Table 1 in paragraph (c) of this section.

(3) The annual license renewal fee for a broker or operator of an auction sale shall be that of a class "B" dealer and shall be based on the total gross amount, expressed in dollars, derived from commissions or fees charged for the sale of animals, or for negotiating the sale of animals, by brokers or by the operator of an auction sale, to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, during the preceding business year (calendar or fiscal).

(4) In the case of a new applicant for a license as a dealer, broker or operator of an auction sale who did not operate during a preceding business year, the annual license fee will be based on the anticipated yearly dollar amount of business, as provided in paragraphs (b)(1), (2), and (3) of this section, derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale.

(5) The amount of the annual fee to be paid upon application for a class "C" license as an exhibitor under this section shall be based on the number of

animals which the exhibitor owned, held, or exhibited at the time the application is signed and dated or during the previous year, whichever is greater, and will be the amount listed in Table 2 in paragraph (c) of this section. Animals which are leased shall be included in the number of animals being held by both the lessor and the lessee when calculating the annual fee. An exhibitor shall pay his or her annual license fee on or before the expiration date of the license and the fee shall be based on the number of animals which the exhibitor is holding or has held during the year (both owned and leased).

(c) The license fee shall be computed in accordance with the following tables:

TABLE 1.—DEALERS, BROKERS AND OPERATORS OF AN AUCTION SALE CLASS "A" AND "B" LICENSE

Over	But Not Over	Fee
$0	$500	$30
500	2,000	60
2,000	10,000	120
10,000	25,000	225
25,000	50,000	350
50,000	100,000	475
100,000		750

TABLE 2.—EXHIBITORS—CLASS "C" LICENSE

Number of Animals	Fee
1 to 5	$30
6 to 25	75
26 to 50	175
51 to 500	225
501 and up	300

(d) If a person meets the licensing requirements for more than one class of license, he shall be required to obtain a license and pay the fee for the type business which is predominant for his operation, as determined by the Secretary.

(e) In any situation in which a licensee shall have demonstrated in writing to the satisfaction of the Secretary that he or she has good reason to believe that the dollar amount of his or her business for the forthcoming business year will be less than the previous business year, then his or her estimated dollar amount of business shall be used for computing the license fee for the forthcoming business year: *Provided, however,* That if the dollar amount upon which the license fee is based for that year does in fact exceed the amount estimated, the difference in amount of the fee paid and that which was due under paragraphs (b) and (c) of this section based upon the actual dollar business upon which the license fee is based, shall be payable in addition to the required annual license fee for the next subsequent year, on the anniversary date of his or her license as prescribed in this section.

§ 2.7 Annual report by licensees.

(a) Each year, within 30 days prior to the expiration date of his or her license, a licensee shall file with the APHIS, REAC Sector Supervisor an application for license renewal and annual report upon a form which the APHIS, REAC Sector Supervisor will furnish to him or her upon request.

(b) A person licensed as a dealer shall set forth in his or her license renewal application and annual report the dollar amount of business, from the sale of animals, upon which the license fee is based, directly or through an auction sale, to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, by the licensee during the preceding business year (calendar or fiscal), and any other information as may be required thereon.

(c) A licensed dealer who operates as a broker or an operator of an auction sale shall set forth in his or her license renewal application and annual report the total gross amount, expressed in dollars, derived from commissions or fees charged for the sale of animals by the licensee to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, during the preceding business year (calendar or fiscal), and any other information as may be required thereon.

(d) A person licensed as an exhibitor shall set forth in his or her license renewal application and annual report the number of animals owned, held, or exhibited by him or her, including those which are leased, during the previous year or at the time he signs and dates the report, whichever is greater.

§ 2.8 Notification of change of name, address, control, or ownership of business.

A licensee shall promptly notify the APHIS, REAC Sector Supervisor by certified mail of any change in the name, address, management, or substantial control or ownership of his business or operation, or of any additional sites, within 10 days of any change

§ 2.9 Officers, agents, and employees of licensees whose licenses have been suspended or revoked.

Any person who has been or is an officer, agent, or employee of a licensee whose license has been suspended or revoked and who was responsible for or participated in the violation upon which the order of suspension or revocation was based will not be licensed within the period during which the order of suspension or revocation is in effect.

§ 2.10 Licensees whose licenses have been suspended or revoked.

(a) Any person whose license has been suspended for any reason shall not be licensed in his or her own name or in any other manner within the period during which the order of suspension is in effect. No partnership, firm, corporation, or other legal entity in which any such person has a substantial interest, financial or otherwise, will be licensed during that period. Any person whose license has been suspended for any reason may apply to the APHIS, REAC Sector Supervisor, in writing, for reinstatement of his or her license.

(b) Any person whose license has been revoked shall not be licensed in his or her own name or in any other manner; nor will any partnership, firm, corporation, or other legal entity in which any such person has a substantial interest, financial or otherwise, be licensed.

(c) Any person whose license has been suspended or revoked shall not buy, sell, transport, exhibit, or deliver for transportation, any animal during the period of suspension or revocation.

§ 2.11 Denial of initial license application.

(a) A license will not be issued to any applicant who:

(1) Has not complied with the requirements of §§ 2.1, 2.2, 2.3, and 2.4 and has not paid the fees indicated in § 2.6;

(2) Is not in compliance with any of the regulations or standards in this subchapter;

(3) Has had a license revoked or whose license is suspended, as set forth in § 2.10;

(4) Has been fined, sentenced to jail, or pled nolo contendere (no contest) under State or local cruelty to animal laws within 1 year of application, except that if no penalty is imposed as a result of the plea of nolo contendere the applicant may reapply immediately; or

(5) Has made any false or fraudulent statements, or provided any false or fraudulent records to the Department.

(b) An applicant whose license application has been denied may request a hearing in accordance with the applicable rules of practice for the purpose of showing why the application for license should not be denied. The license denial shall remain in effect until the final legal decision has been rendered. Should the license denial be upheld, the applicant may again apply

for a license 1 year from the date of the final order denying the application.

(c) No partnership, firm, corporation, or other legal entity in which a person whose license application has been denied has a substantial interest, financial or otherwise, will be licensed within 1 year of the license denial.

Subpart B—Registration

§ 2.25 Requirements and procedures.

(a) Each carrier and intermediate handler, and each exhibitor not required to be licensed under section 3 of the Act and the regulations of this subchapter, shall register with the Secretary by completing and filing a properly executed form which will be furnished, upon request, by the APHIS, REAC Sector Supervisor. The registration form shall be filed with the APHIS, REAC Sector Supervisor for the State in which the registrant has his or her principal place of business, and shall be updated every 3 years by the completion and filing of a new registration form which will be provided by the APHIS, REAC Sector Supervisor.

(b) A subsidiary of a business corporation, rather than the parent corporation, will be registered as an exhibitor unless the subsidiary is under such direct control of the parent corporation that the Secretary determines that it is necessary that the parent corporation be registered to effectuate the purposes of the Act.

§ 2.26 Acknowledgment of regulations and standards.

APHIS will supply a copy of the regulations and standards in this subchapter with each registration form. The registrant shall acknowledge receipt of and shall agree to comply with the regulations and standards by signing a form provided for this purpose by APHIS, and by filing it with the APHIS, REAC Sector Supervisor.

§ 2.27 Notification of change of operation.

(a) A registrant shall notify the APHIS, REAC Sector Supervisor by certified mail of any change in the name, address, or ownership, or other change in operations affecting its status as an exhibitor, carrier, or intermediate handler, within 10 days after making such change.

(b)(1) A registrant which has not used, handled, or transported animals for a period of at least 2 years may be placed in an inactive status by making a written request to the APHIS, REAC Sector Supervisor A registrant shall notify the APHIS, REAC Sector Supervisor in writing at least 10 days before using, handling, or transporting animals again after being in an inactive status.

(2) A registrant which goes out of business or which ceases to function as a carrier, intermediate handler, or exhibitor, or which changes its method of operation so that it no longer uses, handles, or transports animals, and which does not plan to use, handle, or transport animals again at any time in the future, may have its registration canceled by making a written request to the APHIS, REAC Sector Supervisor. The former registrant is responsible for reregistering and demonstrating its compliance with the Act and regulations should it start using, handling, or transporting animals at any time after its registration is canceled.

Subpart C—Research Facilities

§ 2.30 Registration.

(a) *Requirements and procedures.* (1) Each research facility other than a Federal research facility, shall register with the Secretary by completing and filing a properly executed form which will be furnished, upon request, by the APHIS, REAC Sector Supervisor. The registration form shall be filed with the APHIS, REAC Sector Supervisor for the State in which the research facility has its principal place of business, and shall be updated every 3 years by the completion and filing of a new registration form which will be provided by the APHIS, REAC Sector Supervisor. Except as provided in paragraph (a)(2) of this section, where a school or department of a university or college uses or intends to use live animals for research, tests, experiments, or teaching, the university or college rather than the school or department will be considered the research facility and will be required to register with the Secretary. An official who has the legal authority to bind the parent organization shall sign the registration form.

(2) In any situation in which a school or department of a university or college demonstrates to the Secretary that it is a separate legal entity and its operations and administration are independent of those of the university or college, the school or department will be registered rather than the university or college.

(3) A subsidiary of a business corporation, rather than the parent corporation, will be registered as a research facility unless the subsidiary is under such direct control of the parent corporation that the Secretary determines that it is necessary that the parent corporation be registered to effectuate the purposes of the Act.

(b) *Acknowledgment of regulations and standards.* APHIS will supply a copy of the regulations and standards in this subchapter with each registration form. The research facility shall acknowledge receipt of and shall agree to comply with the regulations and standards by signing a form provided for this purpose by APHIS, and by filing it with the APHIS, REAC Sector Supervisor.

(c) *Notification of change of operation.* (1) A research facility shall notify the APHIS, REAC Sector Supervisor by certified mail of any change in the name, address, or ownership, or other change in operations affecting its status as a research facility, within 10 days after making such change.

(2) A research facility which has not used, handled, or transported animals for a period of at least 2 years may be placed in an inactive status by making a written request to the APHIS, REAC Sector Supervisor. A research facility shall file an annual report of its status (active or inactive). A research facility shall notify the APHIS, REAC Sector Supervisor in writing at least 10 days before using, handling, or transporting animals again after being in an inactive status.

(3) A research facility which goes out of business or which ceases to function as a research facility, or which changes its method of operation so that it no longer uses, handles, or transports animals, and which does not plan to use, handle, or transport animals at any time in the future, may have its registration canceled by making a written request to the APHIS, REAC Sector Supervisor. The research facility is responsible for reregistering and demonstrating its compliance with the Act and regulations should it start using, handling, or transporting animals at any time after its registration is canceled.

§ 2.31 Institutional Animal Care and Use Committee (IACUC).

(a) The Chief Executive Officer of the research facility shall appoint an Institutional Animal Care and Use Committee (IACUC), qualified through the experience and expertise of its members to assess the research facility's animal program, facilities, and procedures. Except as specifically authorized by law or these regulations, nothing in this part shall be deemed to permit the Committee or IACUC to prescribe methods or set standards for the design, performance, or conduct of actual research or experimentation by a research facility.

(b) IACUC Membership. (1) The members of each Committee shall be appointed by the Chief Executive Officer of the research facility;

(2) The Committee shall be composed of a Chairman and at least two additional members;

(3) Of the members of the Committee:

(i) At least one shall be a Doctor of Veterinary Medicine, with training or experience in laboratory animal science and medicine, who has direct or delegated program responsibility for activities involving animals at the research facility;

(ii) At least one shall not be affiliated in any way with the facility other than as a member of the Committee, and shall not be a member of the immediate family of a person who is affiliated with the facility. The Secretary intends that such person will provide representation for general community interests in the proper care and treatment of animals;

(4) If the Committee consists of more than three members, not more than three members shall be from the same administrative unit of the facility.

(c) IACUC Functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall:

(1) Review, at least once every six months, the research facility's program for humane care and use of animals, using title 9, chapter I, subchapter A—Animal Welfare, as a basis for evaluation;

(2) Inspect, at least once every six months, all of the research facility's animal facilities, including animal study areas, using title 9, chapter I, subchapter A-Animal Welfare, as a basis for evaluation; *Provided, however,* That animal areas containing free-living wild animals in their natural habitat need not be included in such inspection;

(3) Prepare reports of its evaluations conducted as required by paragraphs (c) (1) and (2) of this section, and submit the reports to the Institutional Official of the research facility; *Provided, however,* That the IACUC may determine the best means of conducting evaluations of the research facility's programs and facilities; and *Provided, further,* That no Committee member wishing to participate in any evaluation conducted under this subpart may be excluded. The IACUC may use subcommittees composed of at least two Committee members and may invite *ad hoc* consultants to assist in conducting the evaluations, however, the IACUC remains responsible for the evaluations and reports as required by the Act and regulations. The reports shall be reviewed and signed by a majority of the IACUC members and must include any minority views. The reports shall be updated at least once every six months upon completion of the required semiannual evaluations and shall be maintained by the research facility and made available to APHIS and to officials of funding Federal agencies for inspection and copying upon request. The reports must contain a description of the nature and extent of the research facility's adherence to this subchapter, must identify specifically any departures from the provisions of title 9, chapter I, subchapter A—Animal Welfare, and must state the reasons for each departure. The reports must distinguish significant deficiencies from minor deficiencies. A significant deficiency is one which, with reference to Subchapter A, and, in the judgment of the IACUC and the Institutional Official, is or may be a threat to the health or safety of the animals. If program or facility deficiencies are noted, the reports must contain a reasonable and specific plan and schedule with dates for correcting each deficiency. Any failure to adhere to the plan and schedule that results in a significant deficiency remaining uncorrected shall be reported in writing within 15 business days by the IACUC, through the Institutional Official, to APHIS and any Federal agency funding that activity;

(4) Review, and, if warranted, investigate concerns involving the care and use of animals at the research facility resulting from public complaints received and from reports of noncompliance received from laboratory or research facility personnel or employees;

(5) Make recommendations to the Institutional Official regarding any aspect of the research facility's animal program, facilities, or personnel training;

(6) Review and approve, require modifications in (to secure approval), or withhold approval of those components of proposed activities related to the care and use of animals, as specified in paragraph (d) of this section;

(7) Review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities; and

(8) Be authorized to suspend an activity involving animals in accordance with the specifications set forth in paragraph (d)(6) of this section.

(d) IACUC review of activities involving animals. (1) In order to approve proposed activities or proposed significant changes in ongoing activities, the IACUC shall conduct a review of those components of the activities related to the care and use of animals and determine that the proposed activities are in accordance with this subchapter unless acceptable justification for a departure is presented in writing; *Provided, however,* That field studies as defined in part 1 of this subchapter are exempt from this requirement. Further, the IACUC shall determine that the proposed activities or significant changes in ongoing activities meet the following requirements:

(i) Procedures involving animals will avoid or minimize discomfort, distress, and pain to the animals;

(ii) The principal investigator has considered alternatives to procedures that may cause more than momentary or slight pain or distress to the animals, and has provided a written narrative description of the methods and sources, *e.g.*, the Animal Welfare Information Center, used to determine that alternatives were not available;

(iii) The principal investigator has provided written assurance that the activities do not unnecessarily duplicate previous experiments;

(iv) Procedures that may cause more than momentary or slight pain or distress to the animals will:

(A) Be performed with appropriate sedatives, analgesics or anesthetics, unless withholding such agents is justified for scientific reasons, in writing, by the principal investigator and will continue for only the necessary period of time;

(B) Involve, in their planning, consultation with the attending veterinarian or his or her designee;

(C) Not include the use of paralytics without anesthesia;

(v) Animals that would otherwise experience severe or chronic pain or distress that cannot be relieved will be painlessly euthanized at the end of the procedure or, if appropriate, during the procedure;

(vi) The animals' living conditions will be appropriate for their species in accordance with part 3 of this subchapter, and contribute to their health and comfort. The housing, feeding, and nonmedical care of the animals will be directed by the attending veterinarian or other scientist trained and experienced in the proper care, handling, and use of the species being maintained or studied;

(vii) Medical care for animals will be available and provided as necessary by a qualified veterinarian;

(viii) Personnel conducting procedures on the species being maintained or studied will be appropriately qualified and trained in those procedures;

(ix) Activities that involve surgery include appropriate provision for pre-operative and post-operative care of the animals in accordance with established

veterinary medical and nursing practices. All survival surgery will be performed using aseptic procedures, including surgical gloves, masks, sterile instruments, and aseptic techniques. Major operative procedures on non-rodents will be conducted only in facilities intended for that purpose which shall be operated and maintained under aseptic conditions. Non-major operative procedures and all surgery on rodents do not require a dedicated facility, but must be performed using aseptic procedures. Operative procedures conducted at field sites need not be performed in dedicated facilities, but must be performed using aseptic procedures;

(x) No animal will be used in more than one major operative procedure from which it is allowed to recover, unless:

(A) Justified for scientific reasons by the principal investigator, in writing;

(B) Required as routine veterinary procedure or to protect the health or well-being of the animal as determined by the attending veterinarian; or

(C) In other special circumstances as determined by the Administrator on an individual basis. Written requests and supporting data should be sent to the Administrator, APHIS, USDA, 6505 Belcrest Road, Room 268, Hyattsville, MD 20782;

(xi) Methods of euthanasia used must be in accordance with the definition of the term set forth in 9 CFR part 1, § 1.1 of this subchapter, unless a deviation is justified for scientific reasons, in writing, by the investigator.

(2) Prior to IACUC review, each member of the Committee shall be provided with a list of proposed activities to be reviewed. Written descriptions of all proposed activities that involve the care and use of animals shall be available to all IACUC members, and any member of the IACUC may obtain, upon request, full Committee review of those activities. If full Committee review is not requested, at least one member of the IACUC, designated by the chairman and qualified to conduct the review, shall review those activities, and shall have the authority to approve, require modifications in (to secure approval), or request full Committee review of any of those activities. If full Committee review is requested for a proposed activity, approval of that activity may be granted only after review, at a convened meeting of a quorum of the IACUC, and with the approval vote of a majority of the quorum present. No member may participate in the IACUC review or approval of an activity in which that member has a conflicting interest (e.g., is personally involved in the activity), except to provide information requested by the IACUC, nor may a member who has a conflicting interest contribute to the constitution of a quorum;

(3) The IACUC may invite consultants to assist in the review of complex issues arising out of its review of proposed activities. Consultants may not approve or withhold approval of an activity, and may not vote with the IACUC unless they are also members of the IACUC;

(4) The IACUC shall notify principal investigators and the research facility in writing of its decision to approve or withhold approval of those activities related to the care and use of animals, or of modifications required to secure IACUC approval. If the IACUC decides to withhold approval of an activity, it shall include in its written notification a statement of the reasons for its decision and give the principal investigator an opportunity to respond in person or in writing. The IACUC may reconsider its decision, with documentation in Committee minutes, in light of the information provided by the principal investigator;

(5) The IACUC shall conduct continuing reviews of activities covered by this subchapter at appropriate intervals as determined by the IACUC, but not less than annually;

(6) The IACUC may suspend an activity that it previously approved if it determines that the activity is not being conducted in accordance with the description of that activity provided by the principal investigator and approved by the Committee. The IACUC may suspend an activity only after review of the matter at a convened meeting of a quorum of the IACUC and with the suspension vote of a majority of the quorum present;

(7) If the IACUC suspends an activity involving animals, the Institutional Official, in consultation with the IACUC, shall review the reasons for suspension, take appropriate corrective action, and report that action with a full explanation to APHIS and any Federal agency funding that activity; and

(8) Proposed activities and proposed significant changes in ongoing activities that have been approved by the IACUC may be subject to further appropriate review and approval by officials of the research facility. However, those officials may not approve an activity involving the care and use of animals if it has not been approved by the IACUC.

(e) A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain the following:

(1) Identification of the species and the approximate number of animals to be used;

(2) A rationale for involving animals, and for the appropriateness of the species and numbers of animals to be used;

(3) A complete description of the proposed use of the animals;

(4) A description of procedures designed to assure that discomfort and pain to animals will be limited to that which is unavoidable for the conduct of scientifically valuable research, including provision for the use of analgesic, anesthetic, and tranquilizing drugs where indicated and appropriate to minimize discomfort and pain to animals; and

(5) A description of any euthanasia method to be used.

§ 2.32 Personnel qualifications.

(a) It shall be the responsibility of the research facility to ensure that all scientists, research technicians, animal technicians, and other personnel involved in animal care, treatment, and use are qualified to perform their duties. This responsibility shall be fulfilled in part through the provision of training and instruction to those personnel.

(b) Training and instruction shall be made available, and the qualifications of personnel reviewed, with sufficient frequency to fulfill the research facility's responsibilities under this section and § 2.31.

(c) Training and instruction of personnel must include guidance in at least the following areas:

(1) Humane methods of animal maintenance and experimentation, including:

(i) The basic needs of each species of animal;

(ii) Proper handling and care for the various species of animals used by the facility;

(iii) Proper pre-procedural and post-procedural care of animals; and

(iv) Aseptic surgical methods and procedures;

(2) The concept, availability, and use of research or testing methods that limit the use of animals or minimize animal distress;

(3) Proper use of anesthetics, analgesics, and tranquilizers for any species of animals used by the facility;

(4) Methods whereby deficiencies in animal care and treatment are reported, including deficiencies in animal care and treatment reported by any employee of the facility. No facility employee, Committee member, or laboratory personnel shall be discriminated against or be subject to any reprisal for

reporting violations of any regulation or standards under the Act;

(5) Utilization of services (e.g., National Agricultural Library, National Library of Medicine) available to provide information:

(i) On appropriate methods of animal care and use;

(ii) On alternatives to the use of live animals in research;

(iii) That could prevent unintended and unnecessary duplication of research involving animals; and

(iv) Regarding the intent and requirements of the Act.

§ 2.33 Attending veterinarian and adequate veterinary care.

(a) Each research facility shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section:

(1) Each research facility shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the research facility;

(2) Each research facility shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use; and

(3) The attending veterinarian shall be a voting member of the IACUC; *Provided, however,* That a research facility with more than one Doctor of Veterinary Medicine (DVM) may appoint to the IACUC another DVM with delegated program responsibility for activities involving animals at the research facility.

(b) Each research facility shall establish and maintain programs of adequate veterinary care that include:

(1) The availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter;

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

(3) Daily observation of all animals to assess their health and well-being; *Provided, however,* That daily observation of animals may be accomplished by someone other than the attending veterinarian; and *Provided, further,* That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

(4) Guidance to principal investigators and other personnel involved in the care and use of animals regarding handling, immobilization, anesthesia, analgesia, tranquilization, and euthanasia; and

(5) Adequate pre-procedural and post-procedural care in accordance with current established veterinary medical and nursing procedures.

§ 2.35 Recordkeeping requirements.

(a) The research facility shall maintain the following IACUC records:

(1) Minutes of IACUC meetings, including records of attendance, activities of the Committee, and Committee deliberations;

(2) Records of proposed activities involving animals and proposed significant changes in activities involving animals, and whether IACUC approval was given or withheld; and

(3) Records of semiannual IACUC reports and recommendations (including minority views), prepared in accordance with the requirements of § 2.31(c)(3) of this subpart, and forwarded to the Institutional Official.

(b) Every research facility shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each live dog or cat purchased or otherwise acquired, owned, held, or otherwise in their possession or under their control, transported, euthanized, sold, or otherwise disposed of by the research facility. The records shall include any offspring born of any animal while in the research facility's possession or under its control:

(1) The name and address of the person from whom a dog or cat was purchased or otherwise acquired, whether or not the person is required to be licensed or registered under the Act;

(2) The USDA license or registration number of the person if he or she is licensed or registered under the Act;

(3) The vehicle license number and state, and the driver's license number and state of the person, if he or she is not licensed or registered under the Act;

(4) The date of acquisition of each dog or cat;

(5) The official USDA tag number or tattoo assigned to each dog or cat under § 2.38(g) of this subpart;

(6) A description of each dog or cat which shall include:

(i) The species and breed or type of animal;

(ii) The sex;

(iii) The date of birth or approximate age; and

(iv) The color and any distinctive markings;

(7) Any identification number or mark assigned to each dog or cat by the research facility.

(c) In addition to the information required to be kept and maintained by every research facility concerning each live dog or cat under paragraph (a) of this section, every research facility transporting, selling, or otherwise disposing of any live dog or cat to another person, shall make and maintain records or forms which fully and correctly disclose the following information:

(1) The name and address of the person to whom a live dog or cat is transported, sold, or otherwise disposed of;

(2) The date of transportation, sale, euthanasia, or other disposition of the animal; and

(3) The method of transportation, including the name of the initial carrier or intermediate handler, or if a privately owned vehicle is used to transport the dog or cat, the name of the owner of the privately owned vehicle.

(d)(1) The USDA Interstate and International Certificate of Health Examination for Small Animals (VS Form 18–1) and Record of Dogs and Cats on Hand (VS Form 18–5) are forms which may be used by research facilities to keep and maintain the information required by paragraph (b) of this section.

(2) The USDA Interstate and International Certificate of Health Examination for Small Animals (VS Form 18–1) and Record of Disposition of Dogs and Cats (VS Form 18–6) are forms which may be used by research facilities to keep and maintain the information required by paragraph (c) of this section.

(e) One copy of the record containing the information required by paragraphs (b) and (c) of this section shall accompany each shipment of any live dog or cat sold or otherwise disposed of by a research facility *Provided, however,* That information which indicates the source and date of acquisition of any dog or cat need not appear on the copy of the record accompanying the shipment. One copy of the record containing the information required by paragraphs (b) and (c) of this section shall be retained by the research facility.

(f) All records and reports shall be maintained for at least three years. Records that relate directly to proposed activities and proposed significant changes in ongoing activities reviewed and approved by the IACUC shall be maintained for the duration of the activity and for an additional three years after completion of the activity.

All records shall be available for inspection and copying by authorized APHIS or funding Federal agency representatives at reasonable times. APHIS inspectors will maintain the confidentiality of the information and will not remove the materials from the research facilities' premises unless there has been an alleged violation, they are needed to investigate a possible violation, or for other enforcement purposes. Release of any such materials, including reports, summaries, and photographs that contain trade secrets or commercial or financial information that is privileged or confidential will be governed by applicable sections of the Freedom of Information Act. Whenever the Administrator notifies a research facility in writing that specified records shall be retained pending completion of an investigation or proceeding under the Act, the research facility shall hold those records until their disposition is authorized in writing by the Administrator.

§ 2.36 Annual report.

(a) The reporting facility shall be that segment of the research facility, or that department, agency, or instrumentality of the United States, that uses or intends to use live animals in research, tests, experiments, or for teaching. Each reporting facility shall submit an annual report to the APHIS, REAC Sector Supervisor for the State where the facility is located on or before December 1 of each calendar year. The report shall be signed and certified by the CEO or Institutional Official, and shall cover the previous Federal fiscal year.

(b) The annual report shall:

(1) Assure that professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by the research facility;

(2) Assure that each principal investigator has considered alternatives to painful procedures;

(3) Assure that the facility is adhering to the standards and regulations under the Act, and that it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the IACUC. A summary of all such exceptions must be attached to the facility's annual report. In addition to identifying the IACUC-approved exceptions, this summary must include a brief explanation of the exceptions, as well as the species and number of animals affected;

(4) State the location of all facilities where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes;

(5) State the common names and the numbers of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs. Routine procedures (e.g., injections, tattooing, blood sampling) should be reported with this group;

(6) State the common names and the numbers of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used;

(7) State the common names and the numbers of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used shall be attached to the annual report;

(8) State the common names and the numbers of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.

§ 2.37 Federal research facilities.

Each Federal research facility shall establish an Institutional Animal Care and Use Committee which shall have the same composition, duties, and responsibilities required of nonfederal research facilities by § 2.31 with the following exceptions:

(a) The Committee shall report deficiencies to the head of the Federal agency conducting the research rather than to APHIS; and

(b) The head of the Federal agency conducting the research shall be responsible for all corrective action to be taken at the facility and for the granting of all exceptions to inspection protocol.

§ 2.38 Miscellaneous.

(a) *Information as to business: furnishing of same by research facilities.* Each research facility shall furnish to any APHIS official any information concerning the business of the research facility which the APHIS official may request in connection with the enforcement of the provisions of the Act, the regulations, and the standards in this subchapter. The information shall be furnished within a reasonable time and as may be specified in the request for information.

(b) *Access and inspection of records and property.* (1) Each research facility shall, during business hours, allow APHIS officials:

(i) To enter its place of business;

(ii) To examine records required to be kept by the Act and the regulations in this part;

(iii) To make copies of the records;

(iv) To inspect the facilities, property, and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations, and the standards in this subchapter; and

(v) To document, by the taking of photographs and other means, conditions and areas of noncompliance.

(2) The use of a room, table or other facilities necessary for the proper examination of the records and for inspection of the property or animals shall be extended to APHIS officials by the research facility.

(c) *Publication of names of research facilities subject to the provisions of this part.* APHIS will publish lists of research facilities registered in accordance with the provisions of this subpart in the **Federal Register**. The lists may be obtained upon request from the APHIS, REAC Sector Supervisor.

(d) *Inspection for missing animals.* Each research facility shall allow, upon request and during business hours, police or officers of other law enforcement agencies with general law enforcement authority (not those agencies whose duties are limited to enforcement of local animal regulations) to enter its place of business to inspect animals and records for the purpose of seeking animals that are missing, under the following conditions:

(1) The police or other law officer shall furnish to the research facility a written description of the missing animal and the name and address of its owner before making a search;

(2) The police or other law officer shall abide by all security measures required by the research facility to prevent the spread of disease, including the use of sterile clothing, footwear, and masks where required, or to prevent the escape of an animal.

(e) *Confiscation and destruction of animals.* (1) If an animal being held by a research facility is not being used to carry out research, testing, or experimentation, and is found by an APHIS official to be suffering as a result of the failure of the research facility to comply with any provision of the regulations or the standards set forth in this subchapter, the APHIS official shall make a reasonable effort to notify the research facility of the condition of the animal(s) and request that the condition be corrected and that adequate care be given to alleviate the animal's suffering or distress, or that the animal(s) be destroyed by euthanasia. In the event that the research facility refuses to comply with this request, the APHIS official may confiscate the animal(s) for care, treatment, or disposal as indicated in paragraph (e)(2) of this section, if, in the opinion of the Administrator, the circumstances indicate the animal's health is in danger.

(2) In the event that the APHIS official is unable to locate or notify the research facility as required in this section, the APHIS official shall contact a local police or other law officer to accompany him or her to the premises and shall provide for adequate care when necessary to alleviate the animal's suffering. If, in the opinion of the Administrator, the condition of the animal(s) cannot be corrected by this temporary care, the APHIS official shall confiscate the animal(s).

(3) Confiscated animals may be placed, by sale or donation, with other registrants or licensees that comply with the standards and regulations and can provide proper care, or they may be euthanized. The research facility from which the animals were confiscated shall bear all costs incurred in performing the placement or euthanasia activities authorized by this section.

(f) *Handling.* (1) Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

(2)(i) Physical abuse shall not be used to train, work, or otherwise handle animals.

(ii) Deprivation of food or water shall not be used to train, work, or otherwise handle animals; *Provided, however:* That the short-term withholding of food or water from animals, when specified in an IACUC-approved activity that includes a description of monitoring procedures, is allowed by these regulations.

(g) *Identification of dogs and cats.* (1) All live dogs or cats, including those from any exempt source, delivered for transportation, transported, purchased or otherwise acquired, sold, or disposed of by a research facility, shall be identified at the time of such delivery for transportation, purchase, sale, disposal, or acquisition in one of the following ways:

(i) By the official tag or tattoo which was affixed to the animal at the time it was acquired by the research facility, as required by this section; or

(ii) By a tag, tattoo, or collar, applied to the live dog or cat by the research facility and which individually identifies the dog or cat by number.

(2) All official tag or tattoo numbers shall be correctly listed in the records of purchase, acquisition, disposal, or sale which shall be maintained in accordance with § 2.35.

(3) Unweaned puppies or kittens need not be individually identified while they are maintained as a litter with their dam in the same primary enclosure, provided the dam has been individually identified.

(4) The official tag shall be made of a durable alloy such as brass, bronze, or steel, or of a durable plastic. Aluminum of a sufficient thickness to assure the tag is durable and legible may also be used. The tag may be circular in shape and not less than 1¼ inches in diameter, or oblong and flat in shape and not less than 2 inches by ¾ inch, and riveted to an acceptable collar.

(5) Each tag shall have the following information embossed or stamped on so that it is easily readable:

(i) The letters "USDA";

(ii) Numbers identifying the State and dealer, exhibitor, or research facility (e.g., 39–AB); and

(iii) Numbers identifying the animal (e.g., 82488).

(6) Official tags shall be serially numbered and shall be applied to dogs or cats in the manner set forth in this section in as close to consecutive numerical order as possible. No tag number shall be used to identify more than one animal or shall be reused within a 5-year period.

(7) Research facilities may obtain, at their own expense, official tags from commercial tag manufacturers.[1] At the time the research facility is registered, the Department will assign identification letters and numbers to be used on the official tags.

(8) Each research facility shall be held accountable for all official tags acquired. In the event an official tag is lost from a dog or cat while in the possession of a research facility, the facility shall make a diligent effort to locate and reapply the tag to the proper animal. If the lost tag is not located, the research facility shall affix another official tag to the animal in the manner prescribed in this section and record the tag number on the official records.

(9) When a dog or cat wearing or identified by an official tag arrives at a research facility, the facility may continue to use that tag to identify the dog or cat or the tag may be replaced as indicated in paragraph (g)(1) of this section. All tags removed by a research facility shall be retained and disposed of as indicated in this section.

(10) Where a dog or cat to which is affixed or which is identified by an official tag is euthanized, or dies from other causes, the research facility shall remove and retain the tag for the required period, as set forth in paragraph (g)(11) of this section.

(11) All official tags removed and retained by a research facility shall be held until called for by an APHIS official or for a period of 1 year.

(12) When official tags are removed from animals for disposal, the tags must be disposed of so as to preclude their reuse for animal identification. No animal identification number shall be used within any 5-year period following its previous use.

(h) *Health certification.* (1) No research facility, including a Federal research facility, shall deliver to any intermediate handler or carrier for transportation, in commerce, or shall transport in commerce any dog, cat, or nonhuman primate unless the dog, cat, or nonhuman primate is accompanied by a health certificate executed and issued by a licensed veterinarian. The health certificate shall state that:

(i) The licensed vetarinarian inspected the dog, cat, or nonhuman primate on a specified date which shall not be more than 10 days prior to the delivery of the dog, cat, or nonhuman primate for transportation; and

(ii) When so inspected, the dog, cat, or nonhuman primate appeared to the licensed veterinarian to be free of any infectious disease or physical abnormality which would endanger the animal(s) or other animals or endangar public health.

(2) The Secretary may provide exceptions to the health certification requirement on an individual basis for animals shipped to a research facility for purposes of research, testing, or experimentation when the research facility requires animals not eligible for certification. Requests should be addressed to the Administrator, APHIS, USDA, Room 268, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

---

[1] A list of the commercial manufacturers who produce these tags and are known to the Department may be obtained from the APHIS, REAC Sector Supervisor. Any manufacturer who desires to be included in the list should notify the Administrator.

(3) The U.S. Interstate and International Certificate of Health Examination for Small Animals (VS Form 18–1) may be used for health certification by a licensed veterinarian as required by this section.

(i) *Holding of animals.* If any research facility obtains prior approval of the APHIS, REAC Sector Supervisor, it may arrange to have another person hold animals: *Provided,* That:

(1) The other person agrees, in writing, to comply with the regulations in this part and the standards in part 3 of this subchapter, and to allow inspection of the premises by an APHIS official during business hours;

(2) The animals remain under the total control and responsibility of the research facility; and

(3) The Institutional Official agrees, in writing, that the other person or premises is a recognized animal site under its research facility registration. Veterinary Services Form 18–9 shall be used for approval.

(j) *Holding period.* Research facilities that obtain dogs and cats from sources other than dealers, exhibitors, and exempt persons shall hold the animals for 5 full days, not including the day of acquisition, after acquiring the animal, excluding time in transit, before they may be used by the facility. Research facilities shall comply with the identification of animals requirements set forth in § 2.38(g) during this period.

(k) *Compliance with standards and prohibitions.* (1) Each research facility shall comply in all respects with the regulations set forth in subpart C of this part and the standards set forth in part 3 of this subchapter for the humane handling, care, treatment, housing, and transportation of animals; *Provided, however,* That exceptions to the standards in part 3 and the provisions of subpart C of this part may be made only when such exceptions are specified and justified in the proposal to conduct the activity and are approved by the IACUC.

(2) No person shall obtain live random source dogs or cats by use of false pretenses, misrepresentation, or deception.

(3) No person shall acquire, buy, sell, exhibit, use for research, transport, or offer for transportation, any stolen animal.

Subpart D—Attending Veterinarian and Adequate Veterinary Care

§ 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

(1) Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor; and

(2) Each dealer and exhibitor shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(1) The availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter;

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

(3) Daily observation of all animals to assess their health and well-being; *Provided, however,* That daily observation of animals may be accomplished by someone other than the attending veterinarian; and *Provided, further,* That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

(4) Adequate guidance to personnel involved in the care and use of animals regarding handling, immobilization, anesthesia, analgesia, tranquilization, and euthanasia; and

(5) Adequate pre-procedural and post-procedural care in accordance with established veterinary medical and nursing procedures.

Subpart E—Identification of Animals

§ 2.50 Time and method of identification.

(a) A class "A" dealer (breeder) shall identify all live dogs and cats on the premises as follows:

(1) All live dogs and cats held on the premises, purchased, or otherwise acquired, sold or otherwise disposed of, or removed from the premises for delivery to a research facility or exhibitor or to another dealer, or for sale, through an auction sale or to any person for use as a pet, shall be identified by an official tag of the type described in § 2.51 affixed to the animal's neck by means of a collar made of material generally considered acceptable to pet owners as a means of identifying their pet dogs or cats [2], or shall be identified by a distinctive and legible tattoo marking acceptable to and approved by the Administrator.

(2) Live puppies or kittens, less than 16 weeks of age, shall be identified by:

(i) An official tag as described in § 2.51;

(ii) A distinctive and legible tattoo marking approved by the Administrator; or

(iii) A plastic-type collar acceptable to the Administrator which has legibly placed thereon the information required for an official tag pursuant to § 2.51.

(b) A class "B" dealer shall identify all live dogs and cats under his or her control or on his or her premises as follows:

(1) When live dogs or cats are held, purchased, or otherwise acquired, they shall be immediately identified:

(i) By affixing to the animal's neck an official tag as set forth in § 2.51 by means of a collar made of material generally acceptable to pet owners as a means of identifying their pet dogs or cats [3]; or

(ii) By a distinctive and legible tattoo marking approved by the Administrator.

(2) If any live dog or cat is already identified by an official tag or tattoo which has been applied by another dealer or exhibitor, the dealer or exhibitor who purchases or otherwise acquires the animal may continue identifying the dog or cat by the previous identification number, or may replace the previous tag with his own official tag or approved tattoo. In either case, the class B dealer or class C exhibitor shall correctly list all old and new official tag numbers or tattoos in his or her records of purchase which shall be maintained in accordance with §§ 2.75 and 2.77. Any new official tag or tattoo number shall be used on all

---

[2] In general, well fitted collars made of leather or plastic will be acceptable under this provision. The use of certain types of chains presently used by some dealers may also be deemed acceptable. APHIS will determine the acceptability of a material proposed for usage as collars from the standpoint of humane considerations on an individual basis in consultation with the dealer or exhibitor involved. The use of materials such as wire, elastic, or sharp metal that might cause discomfort or injury to the dogs or cats is not acceptable.

[3] See footnote 2 in § 2.50(a)(1).

BEST COPY AVAILABLE

records of any subsequent sales by the dealer or exhibitor, of any dog or cat.

(3) Live puppies or kittens less than 16 weeks of age, shall be identified by:

(i) An official tag as described in § 2.51;

(ii) A distinctive and legible tattoo marking approved by the Administrator; or

(iii) A plastic-type collar acceptable to the Administrator which has legibly placed thereon the information required for an official tag pursuant to § 2.51.

(4) When any dealer has made a reasonable effort to affix an official tag to a cat, as set forth in paragraphs (a) and (b) of this section, and has been unable to do so, or when the cat exhibits serious distress from the attachment of a collar and tag, the dealer shall attach the collar and tag to the door of the primary enclosure containing the cat and take measures adequate to maintain the identity of the cat in relation to the tag. Each primary enclosure shall contain no more than one weaned cat without an affixed collar and official tag, unless the cats are identified by a distinctive and legible tattoo or plastic-type collar approved by the Administrator.

(c) A class "C" exhibitor shall identify all live dogs and cats under his or her control or on his or her premises, whether held, purchased, or otherwise acquired:

(1) As set forth in paragraph (b)(1) or (b)(3) of this section, or

(2) By identifying each dog or cat with:

(i) An official USDA sequentially numbered tag that is kept on the door of the animal's cage or run;

(ii) A record book containing each animal's tag number, a written description of each animal, the data required by § 2.75(a), and a clear photograph of each animal; and

(iii) A duplicate tag that accompanies each dog or cat whenever it leaves the compound or premises.

(d) Unweaned puppies or kittens need not be individually identified as required by paragraphs (a) and (b) of this section while they are maintained as a litter with their dam in the same primary enclosure, provided the dam has been individually identified.

(e)(1) All animals, except dogs and cats, delivered for transportation, transported, purchased, sold, or otherwise acquired or disposed of by any dealer or exhibitor shall be identified by the dealer or exhibitor at the time of delivery for transportation, purchase, sale, acquisition or disposal, as provided for in this paragraph and in records maintained as required in §§ 2.75 and 2.77.

(2) When one or more animals, other than dogs or cats, are confined in a primary enclosure, the animal(s) shall be identified by:

(i) A label attached to the primary enclosure which shall bear a description of the animals in the primary enclosure, including:

(A) The number of animals;

(B) The species of the animals;

(C) Any distinctive physical features of the animals; and

(D) Any identifying marks, tattoos, or tags attached to the animals;

(ii) Marking the primary enclosure with a painted or stenciled number which shall be recorded in the records of the dealer or exhibitor together with:

(A) A description of the animal(s);

(B) The species of the animal(s); and

(C) Any distinctive physical features of the animal(s); or

(iii) A tag or tattoo applied to each animal in the primary enclosure by the dealer or exhibitor which individually identifies each animal by description or number.

(3) When any animal, other than a dog or cat, is not confined in a primary enclosure, it shall be identified on a record, as required by § 2.75, which shall accompany the animal at the time it is delivered for transportation, transported, purchased, or sold, and shall be kept and maintained by the dealer or exhibitor as part of his or her records.

§ 2.51 Form of official tag.

(a) The official tag shall be made of a durable alloy such as brass, bronze, or steel, or of a durable plastic. Aluminum of a sufficient thickness to assure the tag is durable and legible may also be used. The tag shall be one of the following shapes:

(1) Circular in shape and not less than 1¼ inches in diameter, or

(2) Oblong and flat in shape, not less than 2 inches by ¾ inch and riveted to an acceptable collar.

(b) Each tag shall have the following information embossed or stamped on so that it is easily readable:

(1) The letters "USDA";

(2) Numbers identifying the State and dealer, exhibitor, or research facility (*e.g.*, 39–AB); and

(3) Numbers identifying the animal (*e.g.*, 82488).

(c) Official tags shall be serially numbered. No individual dealer or exhibitor shall use any identification tag number more than once within a 5-year period.

§ 2.52 How to obtain tags.

Dealers or exhibitors may obtain, at their own expense, official tags from commercial tag manufacturers.[4] At the time the dealer or exhibitor is issued a license or is registered, the Department will assign identification letters and numbers and inform them of the identification letters and numbers to be used on the official tags.

§ 2.53 Use of tags.

Official tags obtained by a dealer, exhibitor, or research facility, shall be applied to dogs or cats in the manner set forth in § 2.50 and in as close to consecutive numerical order as possible. No tag number shall be used to identify more than one animal. No number shall be repeated within a 5-year period.

§ 2.54 Lost tags.

Each dealer or exhibitor shall be held accountable for all official tags acquired. In the event an official tag is lost from a dog or cat while in the possession of a dealer or exhibitor, the dealer or exhibitor shall make a diligent effort to locate and reapply the tag to the proper animal. If the lost tag is not located, the dealer or exhibitor shall affix another official tag to the animal in the manner prescribed in § 2.50, and record the tag number on the official records.

§ 2.55 Removal and disposal of tags.

(a) Where a dog or cat to which is affixed or which is identified by an official tag is euthanized, or dies from other causes, the dealer or exhibitor shall remove and retain the tag for the required period, as set forth in paragraph (b) of this section.

(b) All official tags removed and retained by a dealer or exhibitor shall be held until called for by an APHIS official or for a period of 1 year.

(c) When official tags are removed from animals for disposal, the tags must be disposed of so as to preclude their reuse for animal identification. No animal identification number shall be used within any 5-year period following its previous use.

Subpart F—Stolen Animals

§ 2.60 Prohibition on the purchase, sale, use, or transportation of stolen animals.

No person shall buy, sell, exhibit, use for research, transport, or offer for transportation, any stolen animal.

---

[4] A list of the commercial manufacturers who produce these tags and are known to the Department may be obtained from the APHIS, REAC Sector Supervisor. Any manufacturer who desires to be included in the list should notify the Administrator.

Subpart G—Records

§ 2.75 Records: Dealers and exhibitors.

(a)(1) Each dealer, other than operators of auction sales and brokers to whom animals are consigned, and each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

(i) The name and address of the person from whom a dog or cat was purchased or otherwise acquired whether or not the person is required to be licensed or registered under the Act;

(ii) The USDA license or registration number of the person if he or she is licensed or registered under the Act;

(iii) The vehicle license number and state, and the driver's license number and state of the person, if he or she is not licensed or registered under the Act;

(iv) The name and address of the person to whom a dog or cat was sold or given and that person's license or registration number if he or she is licensed or registered under the Act;

(v) The date a dog or cat was acquired or disposed of, including by euthanasia;

(vi) The official USDA tag number or tattoo assigned to a dog or cat under §§ 2.50 and 2.54;

(vii) A description of each dog or cat which shall include:

(A) The species and breed or type;

(B) The sex;

(C) The date of birth or approximate age; and

(D) The color and any distinctive markings;

(viii) The method of transportation including the name of the initial carrier or intermediate handler or, if a privately owned vehicle is used to transport a dog or cat, the name of the owner of the privately owned vehicle;

(ix) The date and method of disposition of a dog or cat, e.g., sale, death, euthanasia, or donation.

(2) Record of Dogs and Cats on Hand (VS Form 18–5) and Record of Disposition of Dogs and Cats (VS Form 18–6) are forms which may be used by dealers and exhibitors to make, keep, and maintain the information required by paragraph (a)(1) of this section.

(3) The USDA Interstate and International Certificate of Health Examination for Small Animals (VS Form 18–1) may be used by dealers and exhibitors to make, keep, and maintain the information required by paragraph (a)(1) of this section and § 2.79.

(4) One copy of the record containing the information required by paragraph (a)(1) of this section shall accompany each shipment of any dog or cat purchased or otherwise acquired by a dealer or exhibitor. One copy of the record containing the information required by paragraph (a)(1) of this section shall accompany each shipment of any dog or cat sold or otherwise disposed of by a dealer or exhibitor: *Provided, however*, That information which indicates the source and date of acquisition of a dog or cat need not appear on the copy of the record accompanying the shipment. One copy of the record containing the information required by paragraph (a)(1) of this section shall be retained by the dealer or exhibitor.

(b)(1) Every dealer other than operators of auction sales and brokers to whom animals are consigned, and exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

(i) The name and address of the person from whom the animals were purchased or otherwise acquired;

(ii) The USDA license or registration number of the person if he or she is licensed or registered under the Act;

(iii) The vehicle license number and state, and the driver's license number and state of the person, if he or she is not licensed or registered under the Act;

(iv) The name and address of the person to whom an animal was sold or given;

(v) The date of purchase, acquisition, sale, or disposal of the animal(s);

(vi) The species of the animal(s); and

(vii) The number of animals in the shipment.

(2) Record of Animals on Hand (other than dogs and cats) (VS Form 18–19) and Record of Acquisition, Disposition, or Transport of Animals (other than dogs and cats) (VS Form 18–20) are forms which may be used by dealers and exhibitors to keep and maintain the information required by paragraph (b)(1) of this section concerning animals other than dogs and cats except as provided in § 2.79.

(3) One copy of the record containing the information required by paragraph (b)(1) of this section shall accompany each shipment of any animal(s) other than a dog or cat purchased or otherwise acquired by a dealer or exhibitor. One copy of the record containing the information required by paragraph (b)(1) of this section shall accompany each shipment of any animal other than a dog or cat sold or otherwise disposed of by a dealer or exhibitor; *Provided, however*, That information which indicates the source and date of acquisition of any animal other than a dog or cat need not appear on the copy of the record accompanying the shipment. The dealer or exhibitor shall retain one copy of the record containing the information required by paragraph (b)(1) of this section.

§ 2.76 Records: Operators of auction sales and brokers.

(a) Every operator of an auction sale or broker shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each animal consigned for auction or sold, whether or not a fee or commission is charged:

(1) The name and address of the person who owned or consigned the animal(s) for sale;

(2) The name and address of the buyer or consignee who received the animal;

(3) The USDA license or registration number of the person(s) selling, consigning, buying, or receiving the animals if he or she is licensed or registered under the Act;

(4) The vehicle license number and state, and the driver's license number and state of the person, if he or she is not licensed or registered under the Act;

(5) The date of the consignment;

(6) The official USDA tag number or tattoo assigned to the animal under §§ 2.50 and 2.54;

(7) A description of the animal which shall include:

(i) The species and breed or type of animal;

(ii) The sex of the animal; and

(iii) The date of birth or approximate age; and

(iv) The color and any distinctive markings;

(8) The auction sales number or records number assigned to the animal.

(b) One copy of the record containing the information required by paragraph (a) of this section shall be given to the consignor of each animal, one copy of the record shall be given to the purchaser of each animal: *Provided, however*, That information which indicates the source and date of

OL

consignment of any animal need not appear on the copy of the record given the purchaser of any animal. One copy of the record containing the information required by paragraph (a) of this section shall be retained by the operator of such auction sale, or broker, for each animal sold by the auction sale or broker.

§ 2.77 Records: Carriers and intermediate handlers.

(a) In connection with all live animals accepted for shipment on a C.O.D. basis or other arrangement or practice under which the cost of an animal or the transportation of an animal is to be paid and collected upon delivery of the animal to the consignee, the accepting carrier or intermediate handler, if any, shall keep and maintain a copy of the consignor's written guarantee for the payment of transportation charged for any animal not claimed as provided in § 2.80, including, where necessary, both the return transportation charges and an amount sufficient to reimburse the carrier for out-of-pocket expenses incurred for the care, feeding, and storage of the animal. The carrier or intermediate handler at destination shall also keep and maintain a copy of the shipping document containing the time, date, and method of each attempted notification and the final notification to the consignee and the name of the person notifying the consignee, as provided in § 2.80.

(b) In connection with all live dogs, cats, or nonhuman primates delivered for transportation, in commerce, to any carrier or intermediate handler, by any dealer, research facility, exhibitor, operator of an auction sale, broker, or department, agency or instrumentality of the United States or of any state or local government, the accepting carrier or intermediate handler shall keep and maintain a copy of the health certification completed as required by § 2.79, tendered with each live dog, cat, or nonhuman primate.

§ 2.78 Health certification and identification.

(a) No dealer, exhibitor, operator of an auction sale, broker, or department, agency, or instrumentality of the United States or of any State or local government shall deliver to any intermediate handler or carrier for transportation, in commerce, or shall transport in commerce any dog, cat, or nonhuman primate unless the dog, cat, or nonhuman primate is accompanied by a health certificate executed and issued by a licensed veterinarian. The health certificate shall state that:

(1) The licensed veterinarian inspected the dog, cat, or nonhuman primate on a specified date which shall not be more than 10 days prior to the delivery of the dog, cat, or nonhuman primate for transportation; and

(2) when so inspected, the dog, cat, or nonhuman primate appeared to the licensed veterinarian to be free of any infectious disease or physical abnormality which would endanger the animal(s) or other animals or endanger public health.

(b) The Secretary may provide exceptions to the health certification requirement on an individual basis for animals shipped to a research facility for purposes of research, testing, or experimentation when the research facility requires animals not eligible for certification. Requests should be addressed to the Administrator, APHIS, USDA, Room 206, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

(c) No intermediate handler or carrier to whom any live dog, cat, or nonhuman primate is delivered for transportation by any dealer, research facility, exhibitor, broker, operator of an auction sale, or department, agency, or instrumentality of the United States or any State or local government shall receive a live dog, cat, or nonhuman primate for transportation, in commerce, unless and until it is accompanied by a health certificate issued by a licensed veterinarian in accordance with paragraph (a) of this section, or an exemption issued by the Secretary in accordance with paragraph (b) of this section.

(d) The U.S. Interstate and International Certificate of Health Examination for Small Animals (VS Form 18–1) may be used for health certification by a licensed veterinarian as required by this section.

§ 2.79 C.O.D. shipments.

(a) No carrier or intermediate handler shall accept any animal for transportation, in commerce, upon any C.O.D. or other basis where any money is to be paid and collected upon delivery of the animal to the consignee, unless the consignor guarantees in writing the payment of all transportation, including any return transportation, if the shipment is unclaimed or the consignee cannot be notified in accordance with paragraphs (b) and (c) of this section, including reimbursing the carrier or intermediate handler for all out-of-pocket expenses incurred for the care, feeding, and storage or housing of the animal.

(b) Any carrier or intermediate handler receiving an animal at a destination on a C.O.D. or other basis any money is to be paid and collected upon delivery of the animal to the consignee shall attempt to notify the consignee at least once every 6 hours for a period of 24 hours after arrival of the animal at the animal holding area of the terminal cargo facility. The carrier or intermediate handler shall record the time, date, and method of each attempted notification and the final notification to the consignee, and the name of the person notifying the consignee, on the shipping document and on the copy of the shipping document accompanying the C.O.D. shipment. If the consignee cannot be notified of the C.O.D. shipment within 24 hours after its arrival, the carrier or intermediate handler shall return the animal to the consignor, or to whomever the consignor has designated, on the next practical available transportation, in accordance with the written agreement required in paragraph (a) of this section and shall notify the consignor. Any carrier or intermediate handler which has notified a consignee of the arrival of a C.O.D. or other shipment of an animal, where any money is to be paid and collected upon delivery of the animal to the consignee, which is not claimed by the consignee within 48 hours from the time of notification, shall return the animal to the consignor, or to whomever the consignor has designated, on the next practical available transportation, in accordance with the written agreement required in paragraph (a) of this section and shall notify the consignor.

(c) It is the responsibility of any carrier or intermediate handler to hold, feed, and care for any animal accepted for transportation, in commerce, under a C.O.D. or other arrangement where any money is to be paid and collected upon delivery of the animal until the consignee accepts shipment at destination or until returned to the consignor or his or her designee should the consignee fail to accept delivery of the animal or if the consignee could not be notified as prescribed in paragraph (b) of this section.

(d) Nothing in this section shall be construed as prohibiting any carrier or intermediate handler from requiring any guarantee in addition to that required in paragraph (a) of this section for the payment of the cost of any transportation or out-of-pocket or other incidental expenses incurred in the transportation of any animal.

§ 2.80 Records, disposition.

(a) No dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler shall, for a period of 1 year, destroy or dispose of, without the consent in writing of the Administrator, any books, records, documents, or other papers required to be kept and maintained under this part.

(b) Unless otherwise specified, the records required to be kept and maintained under this part shall be held for 1 year after an animal is euthanized or disposed of and for any period in excess of one year as necessary to comply with any applicable Federal, State, or local law. Whenever the Administrator notifies a dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler in writing that specified records shall be retained pending completion of an investigation or proceeding under the Act, the dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler shall hold those records until their disposition is authorized by the Administrator.

Subpart H—Compliance With Standards and Holding Period

§ 2.100 Compliance with standards.

(a) Each dealer, exhibitor, operator of an auction sale, and intermediate handler shall comply in all respects with the regulations set forth in part 2 and the standards set forth in part 3 of this subchapter for the humane handling, care, treatment, housing, and transportation of animals.

(b) Each carrier shall comply in all respects with the regulations in part 2 and the standards in part 3 of this subchapter setting forth the conditions and requirements for the humane transportation of animals in commerce and their handling, care, and treatment in connection therewith.

§ 2.101 Holding period.

(a) Any live dog or cat acquired by a dealer [5] or exhibitor shall be held by him or her, under his or her supervision and control, for a period of not less than 5 full days, not including the day of acquisition, after acquiring the animal, excluding time in transit: *Provided, however*:

(1) That any live dog or cat acquired by a dealer or exhibitor from any private or contract animal pound or shelter shall be held by that dealer or exhibitor under his or her supervision and control for a period of not less than 10 full days, not including the day of acquisition, after acquiring the animal, excluding time in transit;

(2) Live dogs or cats which have completed a 5-day holding period with another dealer or exhibitor, or a 10-day holding period with another dealer or exhibitor if obtained from a private or contract shelter or pound, may be sold or otherwise disposed of by subsequent dealers or exhibitors after a minimum holding period of 24 hours by each subsequent dealer or exhibitor excluding time in transit;

(3) Any dog or cat suffering from disease, emaciation, or injury may be destroyed by euthanasia prior to the completion of the holding period required by this section; and

(4) Any live dog or cat, 120 days of age or less, that was obtained from the person that bred and raised such dog or cat, may be exempted from the 5-day holding requirement and may be disposed of by dealers or exhibitors after a minimum holding period of 24 hours, excluding time in transit. Each subsequent dealer or exhibitor must also hold each such dog or cat for a 24-hour period excluding time in transit.

(b) During the period in which any dog or cat is being held as required by this section, the dog or cat shall be unloaded from any means of conveyance in which it was received, for food, water, and rest, and shall be handled, cared for, and treated in accordance with the standards set forth in part 3, subpart A, of this subchapter and § 2.131.

§ 2.102 Holding facility.

(a) If any dealer or exhibitor obtains the prior approval of the APHIS, REAC Sector Supervisor, he may arrange to have another person hold animals for the required period provided for in paragraph (a) of § 2.101: *Provided*, That:

(1) The other person agrees ip writing to comply with the regulations in part 2 and the standards in part 3 of this subchapter and to allow inspection of his premises by an APHIS official during business hours; and

(2) The animals remain under the total control and responsibility of the dealer or exhibitor.

(3) Approval will not be given for a dealer or exhibitor holding a license as set forth in § 2.1 to have animals held for purposes of this section by another licensed dealer or exhibitor. Veterinary Services Form 18–9 shall be used for approval.

(b) If any intermediate handler obtains prior approval of the APHIS, REAC Sector Supervisor, it may arrange to have another person hold animals: *Provided*, That:

(1) The other person agrees in writing to comply with the regulations in part 2 and the standards in part 3 of this subchapter and to allow inspection of the premises by an APHIS official during business hours; and

(2) The animals remain under the total control and responsibility of the research facility or intermediate handler.

Subpart I—Miscellaneous

§ 2.125 Information as to business; furnishing of same by dealers, exhibitors, operators of auction sales, intermediate handlers, and carriers.

Each dealer, exhibitor, operator of an auction sale, intermediate handler, and carrier shall furnish to any APHIS official any information concerning the business of the dealer, exhibitor, operator of an auction sale, intermediate handler or carrier which the APHIS official may request in connection with the enforcement of the provisions of the Act, the regulations and the standards in this subchapter. The information shall be furnished within a reasonable time and as may be specified in the request for information.

§ 2.126 Access and inspection of records and property.

(a) Each dealer, exhibitor, intermediate handler, or carrier, shall, during business hours, allow APHIS officials:

(1) To enter its place of business;

(2) To examine records required to be kept by the Act and the regulations in this part;

(3) To make copies of the records;

(4) To inspect and photograph the facilities, property and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations and the standards in this subchapter; and

(5) To document, by the taking of photographs and other means, conditions and areas of noncompliance.

(b) The use of a room, table, or other facilities necessary for the proper examination of the records and inspection of the property or animals shall be extended to APHIS officials by the dealer, exhibitor, intermediate handler or carrier.

§ 2.127 Publication of names of persons subject to the provisions of this part.

APHIS will publish lists of persons licensed or registered in accordance with the provisions of this part in the **Federal Register**. The lists may be obtained upon request from the APHIS, REAC Sector Supervisor.

§ 2.128 Inspection for missing animals.

Each dealer, exhibitor, intermediate handler and carrier shall allow, upon request and during business hours, police or officers of other law enforcement agencies with general law enforcement authority (not those agencies whose duties are limited to enforcement of local animal regulations) to enter his or her place of business to inspect animals and records for the purpose of seeking animals that are missing, under the following conditions:

---

[5] An operator of an auction sale is not considered to have acquired a dog or cat which is sold through the auction sale.

(a) The police or other law officer shall furnish to the dealer, exhibitor, intermediate handler or carrier a written description of the missing animal and the name and address of its owner before making a search.

(b) The police or other law officer shall abide by all security measures required by the dealer, exhibitor, intermediate handler or carrier to prevent the spread of disease, including the use of sterile clothing, footwear, and masks where required, or to prevent the escape of an animal.

§ 2.129 Confiscation and destruction of animals.

(a) If an animal being held by a dealer, exhibitor, intermediate handler, or by a carrier is found by an APHIS official to be suffering as a result of the failure of the dealer, exhibitor, intermediate handler, or carrier to comply with any provision of the regulations or the standards set forth in this subchapter, the APHIS official shall make a reasonable effort to notify the dealer, exhibitor, intermediate handler, or carrier of the condition of the animal(s) and request that the condition be corrected and that adequate care be given to alleviate the animal's suffering or distress, or that the animal(s) be destroyed by euthanasia. In the event that the dealer, exhibitor, intermediate handler, or carrier refuses to comply with this request, the APHIS official may confiscate the animal(s) for care, treatment, or disposal as indicated in paragraph (b) of this section, if, in the opinion of the Administrator, the circumstances indicate the animal's health is in danger.

(b) In the event that the APHIS official is unable to locate or notify the dealer, exhibitor, intermediate handler, or carrier as required in this section, the APHIS official shall contact a local police or other law officer to accompany him to the premises and shall provide for adequate care when necessary to alleviate the animal's suffering. If in the opinion of the Administrator, the condition of the animal(s) cannot be corrected by this temporary care, the APHIS official shall confiscate the animals.

(c) Confiscated animals may be placed, by sale or donation, with other licensees or registrants which comply with the standards and regulations and can provide proper care, or they may be euthanized. The dealer, exhibitor, intermediate handler, or carrier from whom the animals were confiscated shall bear all costs incurred in performing the placement or euthanasia activities authorized by this section.

§ 2.130 Minimum age requirements.

No dog or cat shall be delivered by any person to any carrier or intermediate handler for transportation, in commerce, or shall be transported in commerce by any person, except to a registered research facility, unless such dog or cat is at least eight (8) weeks of age and has been weaned.

§ 2.131 Handling of animals.

(a)(1) Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

(2)(i) Physical abuse shall not be used to train, work, or otherwise handle animals.

(ii) Deprivation of food or water shall not be used to train, work, or otherwise handle animals; *Provided, however,* That the short-term withholding of food or water from animals by exhibitors is allowed by these regulations as long as each of the animals affected receives its full dietary and nutrition requirements each day.

(b)(1) During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

(2) Performing animals shall be allowed a rest period between performances at least equal to the time for one performance.

(3) Young or immature animals shall not be exposed to rough or excessive public handling or exhibited for periods of time which would be detrimental to their health or well-being.

(4) Drugs, such as tranquilizers, shall not be used to facilitate, allow, or provide for public handling of the animals.

(c)(1) Animals shall be exhibited only for periods of time and under conditions consistent with their good health and well-being.

(2) A responsible, knowledgeable, and readily identifiable employee or attendant must be present at all times during periods of public contact.

(3) During public exhibition, dangerous animals such as lions, tigers, wolves, bears, or elephants must be under the direct control and supervision of a knowledgeable and experienced animal handler.

(4) If public feeding of animals is allowed, the food must be provided by the animal facility and shall be appropriate to the type of animal and its nutritional needs and diet.

§ 2.132 Procurement of random source dogs and cats, dealers.

(a) A class "B" dealer may obtain live random source dogs and cats only from:

(1) Other dealers who are licensed under the Act and in accordance with the regulations in part 2;

(2) State, county, or city owned and operated animal pounds or shelters; and

(3) A legal entity organized and operated under the laws of the State in which it is located as an animal pound or shelter, such as a humane shelter or contract pound.

(b) A class "B" dealer shall not obtain live random source dogs and cats from individuals who have not bred and raised the dogs and cats on their own premises.

(c) Live nonrandom source dogs and cats may be obtained from persons who have bred and raised the dogs and cats on their own premises, such as hobby breeders.

(d) No person shall obtain live random source dogs or cats by use of false pretenses, misrepresentation, or deception.

(e) Any dealer, exhibitor, research facility, carrier, or intermediate handler who also operates a private or contract animal pound or shelter shall comply with the following:

(1) The animal pound or shelter shall be located on premises that are physically separated from the licensed or registered facility. The animal housing facility of the pound or shelter shall not be adjacent to the licensed or registered facility.

(2) Accurate and complete records shall be separately maintained by the licensee or registrant and by the pound or shelter. The records shall be in accordance with §§ 2.75 and 2.76, unless the animals are lost or stray. If the animals are lost or stray, the pound or shelter records shall provide:

(i) An accurate description of the animal;

(ii) How, where, from whom, and when the dog or cat was obtained;

(iii) How long the dog or cat was held by the pound or shelter before being transferred to the dealer; and

(iv) The date the dog or cat was transferred to the dealer.

(3) Any dealer who obtains or acquires a live random source dog or cat from a private or contract pound or

shelter, including a pound or shelter he or she operates, shall hold the dog or cat for a period of at least 10 full days, not including the day of acquisition, excluding time in transit, after acquiring the animal, and otherwise in accordance with § 2.101.

PART 3—STANDARDS

1. The authority citation for part 3 is revised to read as follows:

Authority: 7 U.S.C. 2131–2156; 7 CFR 2.17, 2.51, and 371.2(d).

§ 3.10 [Removed and Reserved]

2. Subpart A is amended by removing and reserving § 3.10.

§ 3.34 [Removed and Reserved]

3. Subpart B is amended by removing and reserving § 3.34.

§ 3.59 [Removed and Reserved]

4. Subpart C is amended by removing and reserving § 3.59.

§ 3.84 [Removed and Reserved]

5. Subpart D is amended by removing and reserving § 3.84.

§ 3.110 [Amended]

6. Subpart E, § 3.110, paragraphs (a) through (c) are removed, and paragraphs (d) through (g) are redesignated respectively as paragraphs (a) through (d).

§ 3.111 [Removed and Reserved]

7. Subpart E is amended by removing and reserving § 3.111.

§§ 3.134 and 3.135 [Removed and Reserved]

8. Subpart F is amended by removing and reserving §§ 3.134 and 3.135.

Done in Washington, DC, this 25th day of August 1989.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-62079; FRL 3638-2]

Asbestos-Containing Materials in Schools; EPA Approved Courses and Accredited Laboratories Under the Asbestos Hazard Emergency Response Act (AHERA)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In section 206(c)(3) of Title II, the Administrator, in consultation with affected organizations, was directed to publish (and revise as necessary) a list of asbestos courses and tests in effect before the date of enactment of this title which qualify for equivalency treatment for interim accreditation purposes, and a list of asbestos courses and tests which the Administrator determines are consistent with the Model Plan and which will qualify a contractor for accreditation. In addition, under the amendment to TSCA Title II, section 206(f) was added which requires the Administrator to publish quarterly, beginning August 31, 1988, a list of EPA-approved asbestos training courses. The Administrator is also required to publish on a quarterly basis beginning August 31, 1988, a list of laboratories which have received accreditation from EPA. This **Federal Register** notice includes the cumulative eighth list of course approvals and a list that includes State accreditation programs that EPA has approved as meeting the requirements of the Model Plan. Additionally, this notice includes the most current list of accredited laboratories as of August 15, 1989.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-545, 401 M St., SW., Washington, DC 20460, Telephone: (202) 382-3790, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: Section 206 of Title II of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2646, required EPA to develop a Model Contractor Accreditation Plan by April 20, 1987. The plan was issued on April 20, 1987, and was published in the **Federal Register** of April 30, 1987 (52 FR 15875), as Appendix C to Subpart E, 40 CFR Part 763.

To conduct asbestos-related work in schools, persons must receive accreditation in order to inspect school buildings for asbestos, develop management plans, and design or conduct response actions. Such persons can be accredited by States, which are required under Title II to adopt contractor accreditation plans at least as stringent as the EPA Model Plan, or by completing an EPA-approved training course and passing an examination for such course. The EPA Model Contractor Accreditation Plan establishes those areas of knowledge of asbestos inspection, management plan development, and response action technology that persons seeking accreditation must demonstrate and States must include in their accreditation programs.

In the **Federal Register** of October 30, 1987 (52 FR 41826), EPA promulgated a final "Asbestos-Containing Materials In Schools" rule (40 CFR Part 763, Subpart E) which required all local education agencies (LEAs) to identify asbestos-containing materials (ACM) in their school buildings and take appropriate actions to control the release of asbestos fibers. The LEAs are also required to describe their activities in management plans, which must be made available to the public and submitted to State governors. Under Title II, LEAs are required to use specially trained persons to conduct inspections for asbestos, develop the management plans, and design or conduct major actions to control asbestos. The new rule took effect on December 14, 1987.

The length of initial training courses for accreditation under the Model Plan varies by discipline. Briefly, inspectors must take a 3-day training course; management planners must take the inspection course plus an additional 2 days devoted to management planning; and abatement project designers are required to have at least 3 days of training. In addition, asbestos abatement contractors and supervisors must take a 4-day training course and asbestos abatement workers are required to take a 3-day training course. For all disciplines, persons seeking accreditation must also pass an examination and participate in annual re-training courses. A complete description of accreditation requirements can be found in the Model Accreditation Plan at 40 CFR Part 763, Subpart E, Appendix C.I.1.A through E.

In section 206(c)(3) of Title II, and as amended by section 206(f), the Administrator, in consultation with affected organizations, is directed to publish quarterly a list of asbestos courses and tests in effect before the date of enactment of this title which qualified for equivalency treatment for interim accreditation purposes, and a list of asbestos courses and tests which the Administrator determined were consistent with the Model Plan and which qualify a contractor for accreditation. In addition, the Agency has included in this notice the most current list of laboratories which have received interim accreditation from EPA or full accreditation from the National Institute of Standards and Technology (NIST), formerly the National Bureau of Standards (NBS), for the analysis of bulk materials for asbestos by polarized light microscopy (PLM).

The **Federal Register** notice of October 30, 1987, included the initial list of course approvals. In addition, the list included State accreditation programs that EPA has approved as meeting the requirements of the Model Plan. The second **Federal Register** notice of February 10, 1988 (53 FR 3982), the third **Federal Register** notice of June 1, 1988 (53 FR 20066), the fourth **Federal Register** notice of August 31, 1988 (53 FR 33574), the fifth **Federal Register** notice of November 30, 1988 (53 FR 48424), the sixth **Federal Register** notice of February 28, 1989 (54 FR 8438), and the seventh **Federal Register** notice of May 31, 1989 (54 FR 23392), were cumulative listings of EPA course approvals and EPA approved State accreditation programs.

This **Federal Register** notice is divided into five units. Unit I discusses EPA approval of State accreditation programs. Unit II covers EPA approval of training courses. Unit III discusses EPA approval of training courses for interim accreditation. Unit IV provides the list of State accreditation programs and training courses approved by EPA as of April 1989. Unit V contains a listing of all laboratories under the EPA Interim Accreditation Program and the NIST accreditation program for laboratories that are conducting analysis of bulk samples of ACMs. Subsequent **Federal Register** notices will add other State programs and training courses as well as accredited laboratories to this eighth cumulative list.

I. EPA Approval of State Accreditation Programs

As discussed in the Model Plan, EPA is able to approve State accreditation programs that the Agency determines are at least as stringent as the Model Plan. In addition, the Agency is able to approve individual disciplines within a State's accreditation program. For example, a State that currently only has an accreditation requirement for inspectors can receive EPA approval for that discipline immediately rather than waiting to develop accreditation requirements for all disciplines in the Model Plan before seeking EPA approval. EPA can also approve State training programs that do not fully meet the Model Plan's requirements but do meet the requirements for interim accreditation.

As listed in Unit IV, Arkansas, Colorado, Delaware, Iowa, Kansas, Massachusetts, Michigan, Minnesota, New Jersey, North Dakota, Oregon, Rhode Island, South Dakota, Virginia, and Utah have received EPA full approval for two accreditation disciplines, abatement workers as well as contractors and supervisors, that are at least as stringent as the Model Plan. In addition, the States of Colorado, Iowa, Massachusetts, Michigan, North Dakota, Rhode Island, South Dakota, Utah, and Virginia have received full approval for their inspector/management planner and project designer disciplines. Any training courses in those disciplines approved by the aforementioned States are EPA-approved courses for purposes of accreditation. These training courses are EPA-approved courses for purposes of TSCA Title II in these States and in all States without an EPA-approved accreditation program for that discipline. Current lists of training courses approved by Arkansas, Massachusetts, Michigan, New Jersey, North Dakota, Oregon, Rhode Island, South Dakota, and Virginia are listed under Unit IV. Kansas, Michigan, and Minnesota do not have separate provider listings since the States have not independently approved any additional courses.

Each State accreditation program may have different requirements for State accreditation. For example, New Jersey requires participants of their courses to take the State exam. Therefore, those New Jersey-approved course sponsors who are contemplating presenting the training in another State must develop their own examination. They must also submit a detailed statement about the development of the course examination as required by the Model Plan to the Regional Asbestos Coordinator in their region for EPA approval.

EPA has also approved a number of State programs for purposes of providing interim accreditation for persons who have met the training and examination requirements of these State programs. Persons meeting such requirements in these States have completed a training course and examination similar to the Model Plan's requirements before December 14, 1987. However, these individuals must become fully accredited within the time period specified in the Model Plan.

States that have approval for interim accreditation purposes for abatement contractors, supervisors, and workers include Alaska and Washington. Illinois has approval for interim accreditation purposes for abatement workers only. Persons with interim accreditation in these States are eligible to conduct work during the time period specified in the Model Plan. *However*, these persons must eventually become fully accredited. In addition, these persons must take a complete EPA-approved course (see Unit II) or an EPA-approved State program's course for full accreditation. In most States, the complete course will have to be taken before autumn 1989. All States programs nationwide that do not fully meet the Model Plan's requirements must be upgraded within the time period specified in TSCA Title II to be at least as stringent as the Model Plan.

II. EPA Approval of Training Courses

A cumulative list of training courses approved by EPA is listed under Unit IV. The examinations for these approved courses under Unit IV have also been approved by EPA. EPA has three categories of course approval: full, contingent, and approved for interim accreditation. Courses approved for interim accreditation will be discussed in Unit III.

Full approval means EPA has reviewed and found acceptable the course's written submission seeking EPA approval and has conducted an on-site audit and determined that the training course meets or exceeds the Model Plan's training requirements for the relevant discipline.

Contingent approval means the Agency has reviewed the course's written submission seeking EPA approval and found the material to be acceptable (i.e., the written course materials meet the Model Plan's training course requirements). However, EPA has not yet conducted an on-site audit.

Successful completion of either a fully approved course or a contingently approved course provides full accreditation for course attendees. If EPA subsequently audits a contingently approved course and withdraws approval due to deficiencies discovered during the audit, future course offerings would no longer have EPA approval. However, withdrawal of EPA approval would not effect the accreditation of persons who took previously offered training courses, including the course audited by EPA.

EPA-approved training courses listed under Unit IV are approved on a national basis. EPA has organized Unit IV by EPA Region to assist the public in locating those training courses that are offered nearby. Training courses are listed in the Region where the training course is headquartered. Although several sponsors offer their courses in various locations throughout the United States, a large number of course sponsors provide most of their training within their own Region.

EPA-approved State accreditation programs have the authority to have more stringent accreditation requirements than the Model Plan. As a result, some EPA-approved training courses listed under Unit IV may not meet the requirements of a particular State's accreditation program. Sponsors of training courses and persons who have received accreditation or are seeking accreditation should contact individual States to check on accreditation requirements.

A number of training courses offered before EPA issued the Model Plan equaled or exceeded the subsequently issued Model Plan's training course requirements. These courses are listed under Unit IV as being fully approved. It should be noted that persons who have successfully completed these courses are fully accredited; they are not limited only to being accredited on an interim basis.

III. EPA Approval of Training Courses for Interim Accreditation

TSCA Title II enables EPA to permit persons to be accredited on an interim basis if they have attended previous EPA-approved asbestos training and have passed (or pass) an asbestos examination. As a result, the Agency has approved training courses offered previously for purposes of accrediting persons on an interim basis. Only those persons who have taken training courses since January 1, 1985, will be considered under these interim accreditation provisions. In addition, EPA will not grant interim accreditation to any person who takes an equivalent training course after the date on which the asbestos-in-schools rule took effect (i.e., December 14, 1987). This accreditation is interim since the person shall be considered accredited for only 1 year after the date on which the State where the person is employed establishes an accreditation program at least as stringent as the EPA Model Plan. If the State does not adopt an accreditation program within the time period required by Title II, persons with interim accreditation must become fully accredited within 1 year after the date the State was required to have established a program. These persons must take a complete EPA-approved course (see Unit II) or an EPA-approved State program's course for full accreditation. In most States, the complete course will have to be taken before autumn 1989.

Under the Model Plan, an equivalent training course for interim accreditation purposes is one that is essentially similar in length and content to the curriculum found in the Model Plan. In addition, an equivalent examination must be essentially similar to the examination requirements found in the Model Plan.

Persons who have taken equivalent courses in their discipline for purposes of interim accreditation, and can produce evidence that they have successfully completed the course by passing an examination, are accredited on an interim basis under TSCA Title II. Evidence of successful completion of a course would include a certificate or photo identification card that showed the person completed the training course on a certain date and passed the examination.

For persons who took one of the EPA-approved courses for interim accreditation listed under Unit IV, but did not take the course's examination, these persons may become accredited on an interim basis by passing an examination at an EPA-funded training center. These EPA-funded training centers are listed under Unit IV. Before taking the examination, persons must provide evidence to the EPA-funded center that they previously had taken one of the training courses listed under Unit IV that is approved by EPA for interim accreditation.

The New York City Department of Environmental Protection, Bureau of Air Resources has a training program for asbestos abatement workers and contractors/supervisors that does meet the requirements for EPA approval of training courses for interim accreditation (See Unit IV, Region II). As a result, persons who have met the training and examination requirements of the New York City Abatement Worker (i.e., "handler") or Contractor/Supervisor program between April 1, 1987 and December 14, 1987, are accredited as listed under Unit IV on an interim basis.

Courses approved by EPA as of April 1989 for interim accreditation are listed under Unit IV. Examinations offered by these courses also are approved for purposes of interim accreditation.

IV. List of EPA-Approved State Accreditation Programs and Training Courses

The eighth cumulative listing of EPA-approved State accreditation programs and training courses is listed in Unit IV. As discussed above, quarterly notifications of EPA approval of State accreditation programs and EPA approval of training courses will be published in subsequent **Federal Register** notices. The closing date for the acceptance of submissions to EPA for inclusion in this eighth notice was July 1989. Omission from this list does not imply disapproval by EPA, nor does the order of the courses reflect priority or quality. The format of the notification lists first the State accreditation programs approved by EPA, followed by EPA-approved training courses listed by Region. The name, address, phone number, and contact person is provided for each training provider followed by the courses and type of course approval (i.e., full, contingent, or for interim purposes). Unless otherwise specified by an alternative date, interim approvals are issued from January 1, 1985.

As of July 28, 1989, a total of 489 training providers are offering 887 EPA-approved training courses for accreditation under TSCA Title II. There are 396 asbestos abatement worker courses, 296 contractor/supervisor courses, 161 inspector/management planner courses, 14 inspector only courses, and 20 project designer courses. In addition, EPA has approved 475 refresher courses. Eighteen States have either interimly or fully approved State accreditation programs in one or more disciplines.

The EPA-funded model course for inspectors and management planners is available in final form. In addition, a previous EPA developed course for asbestos abatement contractors and supervisors has been revised and is available in final form for interested parties that plan to offer training courses. EPA anticipates that its model worker course will be available in autumn 1989. A fee for each course will be charged to cover the reproduction costs for the written and visual aid materials. Interested parties should contact the following firm to receive copies of the training courses: ATLIS Federal Services, Inc., EPA AHERA Program, 6011 Executive Blvd., Rockville, MD 20852, Phone number: (301) 468-1916.

The following is the cumulative list of EPA-approved State accreditation programs and training courses:

Approved State Accreditation Programs

(1)(a) *State:* Arkansas.

State Agency: Arkansas Dept. of Pollution Control and Ecology, Address: 8001 National Dr., P.O. Box 9583, Little Rock, AR 72209, Contact: Wilson Tolefree, Phone: (501) 562-7444.

(b) *Approved Accreditation Program Disciplines:*

Abatement Worker (interim from 11/22/85).
Abatement Worker (full from 1/22/88).
Contractor/Supervisor (interim from 11/22/85).
Contractor/Supervisor (full from 1/22/88).

Arkansas Department of Pollution Control and Ecology, EPA-Approved Courses for Abatement Workers and Contractors/Supervisors

(i)(a) *Training Provider:* Arkansas Laborers Training Fund.

Address: 4501 West 61st St., Little Rock, AR 72209, Contact: W. Rudy Osborne, Phone: (501) 562-5502.

(b) *Approved Course:*

Abatement Worker (Certified 5/2/88).

(ii)(a) *Training Provider:* Asbestos Training & Employment, Inc.

Address: 809 East 11th St., Michigan City, IN 46360, Contact: Bruce H. Connell, Phone: (219) 874-7348.

(b) *Approved Courses:*

Abatement Worker (Certified 5/18/88).
Contractor/Supervisor (Certified 5/18/88).

(iii)(a) *Training Provider:* Critical Environmental Training, Inc.

Address: 5815 Gulf Freeway, Houston, TX 77023, Contact: Charles M. Flanders, Phone: (713) 921-6921.

(b) *Approved Courses:*

Abatement Worker (Certified 9/12/88).
Contractor/Supervisor (Certified 9/12/88).

(iv)(a) *Training Provider:* Environmental Institute.

Address: 350 Franklin Rd., Suite 300, Marietta, GA 30067, Contact: Eva Clay, Phone: (404) 425-2000.

(b) *Approved Course:*

Contractor/Supervisor (Certified 10/7/88).

(v)(a) *Training Provider:* Environmental Technologies.

Address: P.O. Box 21243, Little Rock, AR 72221, Contact: Phyllis Moore, Phone: (501) 569-3518.

(b) *Approved Courses:*

Abatement Worker (Certified 3/16/88).
Contractor/Supervisor (Certified 3/16/88).

(vi)(a) *Training Provider:* Hall-Kimbrell Environmental Services.

Address: P.O. Box 307, Lawrence, KS 66044, Contact: Patrick Shrepf, Phone: (913) 749-2381.

(b) *Approved Courses:*

Abatement Worker (Certified 6/8/88).

Contractor/Supervisor (Certified 6/8/88).

(vii)(a) *Training Provider:* Professional Asbestos Training Service.

Address: P.O. Box 45233, Little Rock, AR 72214, Contact: Harold Lewis, Phone: (501) 562-1519.

(b) *Approved Courses:*

Abatement Worker (Certified 4/18/88).
Contractor/Supervisor (Certified 4/18/88).

(viii)(a) *Training Provider:* University of Arkansas.

Address: 521 South Razorback Rd., Fayettville, AR 72701, Contact: Greg Weeks, Phone: (501) 575-6175.

(b) *Approved Course:*

Abatement Worker (Certified 10/7/88).

(2)(a) *State:* Colorado.

State Agency: Colorado Dept. of Health, Address: 4210 East 11th Ave., Denver, CO 80220, Contact: David R. Ouimette, Phone: (303) 320-8333.

(b) *Approved Accreditation Program Disciplines:*

Abatement Worker (full from 7/8/89).
Contractor/Supervisor (full from 7/8/89).
Inspector/Management Planner (full from 7/8/89).
Project Designer (full from 7/8/89).

(3)(a) *State:* Delaware.

State Agency: Delaware Dept. of Administrative Services, Address: O'Neill Building, P.O. Box 1401, Dover, DE 19903, Contact: Robert Foster, Phone: (302) 736-5644.

(b) *Approved Accreditation Program Disciplines:*

Abatement Worker (full from 8/14/89).
Contractor/Supervisor (full from 8/14/89).

Delaware Department of Administrative Services, EPA-Approved Courses for Abatement Workers and Contractors/Supervisors

(i)(a) *Training Provider:* Delaware Technical & Community College Terry Campus.

Address: 1832 North Dupont Pkwy., Dover, DE 19901, Contact: David T. Stanley, Phone: (302) 736-5428.

(b) *Approved Courses:*

Abatement Worker (Certified 4/1/88).
Contractor/Supervisor (Certified 4/1/88).

(4)(a) *State:* Iowa.

State Agency: Iowa Dept. of Education School Facilities Administration & Accreditation, Address: Grimes State Office Bldg., Des Moines, IA 50319-0146, Contact: C. Milton Wilson, Phone: (515) 281-4743.

(b) *Approved Accreditation Program Disciplines:*

Abatement Worker (full from 11/30/87).
Contractor/Supervisor (full from 11/30/87).
Inspector (full from 11/30/87).

Address: Barclay Pavillion, Suite 222 E, Rte. 70 E, Cherry Hill, NJ 08034, Contact: James Mitchell, Phone: (609) 795-1991.

(b) *Approved Courses:*

Abatement Worker (Certified 4/25/85).

Contractor/Supervisor (Certified 4/25/85).

(ii)(a) *Training Provider:* Asbestos Abatement Council, AWCI.

Address: 1600 Cameron St., Alexandria, VA 22314-2705, Contact: Carol Pacquin, Phone: (703) 684-2924.

(b) *Approved Courses:*

Abatement Worker (Certified 6/17/87).

Contractor/Supervisor (Certified 6/17/87).

(iii)(a) *Training Provider:* Asbestos Training Academy - NJ.

Address: 218 Cooper Center, Pennsauken, NJ 08109, Contact: Jean Bodman or Ron Rominski, Phone: (609) 488-9200.

(b) *Approved Courses:*

Abatement Worker (Certified 5/1/85).

Contractor/Supervisor (Certified 5/1/85).

(iv)(a) *Training Provider:* Asbestos Training Academy - NY.

Address: 315 West 38th St., 9th Fl., New York, NY 10018, Contact: R. Green or C. Hicks, Phone: (212) 971-0370.

(b) *Approved Courses:*

Abatement Worker (Certified 5/1/85).

Contractor/Supervisor (Certified 5/1/85).

(v)(a) *Training Provider:* Asbestos Training Institute- LVI, Inc.

Address: 64 South State St., South Hackensack, NJ 07606, Contact: Roger Bason, Phone: (201) 343-5133.

(b) *Approved Courses:*

Abatement Worker (Certified 3/4/87).

Contractor/Supervisor (Certified 3/4/87).

(vi)(a) *Training Provider:* BCM Eastern, Inc.

Address: One Plymouth Meeting Mall, Plymouth Meeting, PA 19462, Contact: Robert Ferguson, Phone: (215) 825-3800.

(b) *Approved Courses:*

Abatement Worker (Certified 6/7/87).

Contractor/Supervisor (Certified 6/7/87).

(vii)(a) *Training Provider:* Building Laborers of N.J. - Training Center.

Address: P.O. Box 163, Jamesburg, NJ 08831, Contact: Emmanuel Riggi, Phone: (201) 521-0200.

(b) *Approved Courses:*

Abatement Worker (Certified 7/19/85).

Contractor/Supervisor (Certified 7/19/85).

(viii)(a) *Training Provider:* Certified Abatement Technologies, Inc.

Address: 47 Midland Ave., Elmwood Park, NJ 07407, Contact: Daniel Curtin, Phone: (201) 796-9589.

(b) *Approved Courses:*

Abatement Worker (Certified 6/3/87).

Contractor/Supervisor (Certified 6/3/87).

(ix)(a) *Training Provider:* Drexel University.

Address: 32nd & Chestnut Sts., Philadelphia, PA 19104, Contact: Robert Ross or Jackie Saguin, Phone: (215) 895-2154.

(b) *Approved Courses:*

Abatement Worker (Certified 4/13/88).

Contractor/Supervisor (Certified 4/13/88).

(x)(a) *Training Provider:* E.I. DuPont DeNemours & Co.

Address: Chamber Works, Deepwater, NJ 08023, Contact: Charles Battle or Helen Giova, Phone: (609) 540-2434.

(b) *Approved Courses:*

Abatement Worker (Certified 5/1/86).

Contractor/Supervisor (Certified 5/1/86).

(xi)(a) *Training Provider:* IT Corporation.

Address: 336 West Anaheim St., Wilmington, CA 90744, Contact: Ron Freeman, Phone: (213) 830-1720.

(b) *Approved Courses:*

Abatement Worker (Certified 8/29/85).

Contractor/Supervisor (Certified 8/29/85).

Inspector/Management Planner (full from 2/22/88).
Inspector/Management Planner Refresher Course (contingent from 12/15/88).
Project Designer (contingent from 9/15/88).
Project Designer Refresher Course (contingent from 3/3/89).

(116)(a) *Training Provider:* William E. Fink & Associates.

Address: 3695 Indian Run, Suite 5, Canfield, OH 44406, Contact: William E. Fink, Phone: (216) 533-6290.

(b) *Approved Courses:*

Abatement Worker (contingent from 8/11/88).
Abatement Worker (full from 2/13/89).
Abatement Worker Refresher Course (contingent from 8/11/88).

(117)(a) *Training Provider:* Wisconsin Laborers Training Center.

Address: P.O. Box 150, Almond, WI 54909, Contact: Dean Jensen, Phone: (715) 366-8221.

(b) *Approved Courses:*

Abatement Worker (contingent from 1/8/87).
Abatement Worker (full from 11/29/88).
Abatement Worker Refresher Course (contingent from 11/14/88).
Contractor/Supervisor (contingent from 11/21/88).
Contractor/Supervisor (full from 11/29/88).

(118)(a) *Training Provider:* Wonder Makers, Inc.

Address: 3101 Dermo St., Kalamazoo, MI 49008, Contact: Michael A. Pinto, Phone: (616) 382-4154.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/16/89).
Abatement Worker Refresher Course (contingent from 3/9/89).
Contractor/Supervisor (contingent from 3/16/89).
Contractor/Supervisor Refresher Course (contingent from 3/16/89).
Inspector/Management Planner (contingent from 4/21/89).
Inspector/Management Planner Refresher Course (contingent from 4/21/89).

EPA-Approved Training Courses

REGION VI – Dallas, TX

Regional Asbestos Coordinator: John West, 6T-PT, EPA, Region VI, 1445 Ross Avenue, Dallas, TX 75202-2733, (214) 655-7244, (FTS) 255-7244.

List of Approved Courses: The following training courses have been approved by EPA. The courses are listed under (b). This approval is subject to the level of certification indicated after the course name. Training Providers are listed in alphabetical order and do not reflect a prioritization. Approvals for Region VI training courses and contact points for each, are as follows:

(1)(a) *Training Provider:* AAR, Inc.

Address: P.O. Box 742648, Houston, TX 77274-2648, Contact: David S. Barnett, Phone: (713) 777-9205.

(b) *Approved Course:*

Abatement Worker (contingent from 1/26/89).

(2)(a) *Training Provider:* AC & C Systems Corp.

Address: 7801 North Robinson, Oklahoma City, OK 73116, Contact: Turner Stallings, Phone: (405) 842-9872.

(b) *Approved Courses:*

Abatement Worker (contingent from 10/20/88).
Contractor/Supervisor (contingent from 10/26/88).

(3)(a) *Training Provider:* AEGIS Associates, Inc.

Address: 4868 Research Dr., San Antonio, TX 78240, Contact: John J. Gokelman, Phone: (512) 641-6320.

(b) *Approved Courses:*

Contractor/Supervisor (contingent from 5/25/89).
Inspector Refresher Course (contingent from 4/4/89).

(4)(a) *Training Provider:* Abateco, Inc.

Address: 10000 Old Katy Rd., Suite 200, Houston, TX 77055, Contact: W.D. Heimbrook, Phone: (713) 461-0692.

(b) *Approved Courses:*

Abatement Worker (contingent from 11/14/88).
Abatement Worker Refresher Course (contingent from 3/17/89).

(5)(a) *Training Provider:* American Specialty Contractors, Inc.

Address: 8181 West Darryl Pkwy, Baton Rouge, LA 70898, Contact: Kurt Jones, Phone: (504) 926-0824.

(b) *Approved Courses:*

Abatement Worker (contingent from 11/18/88).
Abatement Worker (full from 5/3/89).
Contractor/Supervisor (contingent from 11/18/88).
Contractor/Supervisor (full from 5/4/89).

(6)(a) *Training Provider:* Analytical Labs Training Center.

Address: 218 Market St., Baird, TX 79504, Contact: Bob Dye, Phone: (915) 854-1264.

(b) *Approved Courses:*

Abatement Worker (contingent from 4/21/89).
Contractor/Supervisor (contingent from 4/21/89).

(7)(a) *Training Provider:* Asbestos Surveys & Training, Inc.

Address: 5959 Centralcrest, Houston, TX 77092, Contact: J.T. Stoneburger, Phone: (713) 681-2839.

(b) *Approved Course:*

Abatement Worker (full from 10/22/87).

(8)(a) *Training Provider:* Carpenters Apprenticeship Training School.

Address: 8505 Glen Vista, Houston, TX 77061, Contact: S.C. Strunk, Jr., Phone: (713) 641-1011.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/8/88).
Abatement Worker Refresher Course (contingent from 7/8/88).

(9)(a) *Training Provider:* Certified Asbestos Training Institute, Inc.

Address: 4202 Argentina Cir., Pasadena, TX 77504, Contact: Clyde O. Waters, Phone: (713) 487-3155.

(b) *Approved Course:*

Abatement Worker (contingent from 4/20/88).

(10)(a) *Training Provider:* Critical Environmental Training, Inc.

Address: 5815 Gulf Freeway, Houston, TX 77023, Contact: Ronald F. Dodson, Phone: (713) 921-8921.

(b) *Approved Courses:*

Abatement Worker (full from 4/14/88).
Abatement Worker Refresher Course (full from 10/27/88).
Contractor/Supervisor (full from 3/7/88).
Contractor/Supervisor Refresher Course (full from 10/27/88).
Inspector/Management Planner (contingent from 3/21/88).
Inspector/Management Planner (full from 4/15/88).
Inspector/Management Planner Refresher Course (full from 10/27/88).

(11)(a) *Training Provider:* Environmental Consultant Service.

Address: P.O. Box 596422, Dallas, TX 75257, Contact: Thomas Armstrong, Phone: (214) 638-3589.

(b) *Approved Courses:*

Abatement Worker (contingent from 4/20/89).
Contractor/Supervisor (contingent from 4/20/89).
Inspector/Management Planner (contingent from 4/20/89).

(12)(a) *Training Provider:* Environmental Institute.

Address: P.O. Box 270278, Dallas, TX 75227, Contact: E. H. Hurst, Phone: (214) 553-8868.

(b) *Approved Courses:*

Contractor/Supervisor (full from 1/11/88).
Inspector/Management Planner (full from 1/25/88).

(13)(a) *Training Provider:* Environmental Monitoring Service, Inc. (EMS).

Address: 13008 Amarillo Ave., Austin, TX 78729, Contact: Rick Pruett, Phone: (512) 335-9116.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/1/88).
Contractor/Supervisor (contingent from 3/1/88).
Inspector/Management Planner (contingent from 4/19/89).

(14)(a) *Training Provider:* Field Sciences Institute.

Address: P.O. Box 4673, Santa Fe, NM 87502, Contact: Robert L. Edgar, Phone: (505) 988-4143.

(b) *Approved Courses:*

Contractor/Supervisor (contingent from 4/22/88).
Inspector/Management Planner (contingent from 4/22/88).

(15)(a) *Training Provider:* Fort Worth Independent School District.

Address: 3210 West Lancaster, Fort Worth, TX 76107, Contact: H.D. Duncan, Phone: (817) 336-8311.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Abatement Worker Refresher Course (contingent from 7/27/88).

(16)(a) *Training Provider:* GEBCO Associates, Inc.

Address: 1501 Norwood, Suite 142, Hurst, TX 76054-3638, Contact: Ed Kirch, Phone: (817) 268-4006.

(b) *Approved Courses:*

Abatement Worker (interim from 4/15/87 to 8/19/87).
Abatement Worker (full from 8/20/87).
Abatement Worker Refresher Course (contingent from 5/16/88).
Contractor/Supervisor (contingent from 3/15/88).
Contractor/Supervisor Refresher Course (contingent from 7/27/88).
Inspector/Management Planner (full from 3/7/88).
Inspector/Management Planner Refresher Course (contingent from 7/27/88).

(17)(a) *Training Provider:* Gary LaFrance Abatement Workers Training Program.

Address: 4802 Prestwick, Tyler, TX 75703, Contact: Gary G. LaFrance, Phone: (214) 581-8852.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/14/88).
Abatement Worker (full from 4/12/89).

(18)(a) *Training Provider:* International Association of Heat & Frost Insulators & Asbestos Workers Local Union No. 22.

Address: 3219 Pasadena Blvd., Pasadena, TX 77503, Contact: Robert M. Chadwick, Phone: (713) 473-0888.

(b) *Approved Courses:*

Abatement Worker (interim from 10/1/87 to 10/4/87).
Abatement Worker (contingent from 10/5/87).
Abatement Worker (full from 3/22/88).
Abatement Worker Refresher Course (contingent from 10/5/87).
Contractor/Supervisor (full from 8/27/88).

(19)(a) *Training Provider:* K & T Safety Service, Inc.

Address: 9888 Bissonnett, Houston, TX 77036, Contact: Kevin Clothier, Phone: (713) 988-9021.

(b) *Approved Course:*

Abatement Worker (contingent from 3/28/89).

(20)(a) *Training Provider:* Keers Environmental, Inc.

Address: P.O. Box 6646, Albuquerque, NM 86197, Contact: Robert W. Keers, Phone: (505) 888-9525.

(b) *Approved Course:*

Contractor/Supervisor (contingent from 3/28/89).

(21)(a) *Training Provider:* Kiser Engineering, Inc.

Address: 211 North River St., Seguin, TX 78155, Contact: Nathan Kiser, Phone: (512) 372-2570.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/27/89).
Contractor/Supervisor (contingent from 3/29/89).

(22)(a) *Training Provider:* Lafayette Parish School Board Asbestos Training Program.

Address: P.O. Drawer 2158, Lafayette, LA 70502, Contact: Salvador E. Lango, Phone: (504) 687-3746.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/21/88).
Contractor/Supervisor (contingent from 7/21/88).

(23)(a) *Training Provider:* Lamar University, Hazardous Materials Program.

Address: P.O. Box 10008, Beaumont, TX 77710, Contact: Marion Foster, Phone: (409) 880-2369.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/19/88).
Abatement Worker (full from 4/26/89).
Contractor/Supervisor (contingent from 5/20/88).
Contractor/Supervisor Refresher Course (contingent from 10/24/88).

(24)(a) *Training Provider:* Law Engineering.

Address: 5500 Guhn Rd., Houston, TX 77040, Contact: Richard MacIntyre, Phone: (713) 939-7161.

(b) *Approved Course:*

Abatement Worker (contingent from 3/14/89).

(25)(a) *Training Provider:* Little-Tex Insulation Co., Inc.

Address: 911 North Frio St., San Antonio, TX 78207, Contact: Dan Juepe, Phone: (512) 222-8094.

(b) *Approved Courses:*

Abatement Worker (contingent from 8/1/88).
Contractor/Supervisor (contingent from 8/1/88).

(26)(a) *Training Provider:* Louisiana Laborers Union-AGC Training Fund.

Address: P.O. Box 376, Livonia, LA 70755-0376, Contact: Jamie Peers, Phone: (504) 637-2311.

(b) *Approved Course:*

Abatement Worker (contingent from 7/15/88).

(27)(a) *Training Provider:* Louisiana State University Agricultural & Mechanical College.

Address: 361 Pleasant Hall, Baton Rouge, LA 70803-1520, Contact: George Smith, Phone: (504) 388-6621.

(b) *Approved Courses:*

Abatement Worker (full from 1/1/88).
Abatement Worker Refresher Course (contingent from 11/16/88).
Abatement Worker Refresher Course (full from 3/8/89).
Contractor/Supervisor (contingent from 10/6/87).

Contractor/Supervisor (full from 4/7/88).
Contractor/Supervisor Refresher Course (contingent from 11/16/88).
Contractor/Supervisor Refresher Course (full from 3/6/89).
Inspector/Management Planner (full from 1/18/88).
Inspector/Management Planner Refresher Course (full from 3/7/89).

(28)(a) *Training Provider:* MARTECH International, Inc.

Address: P.O. Box 460, Broussard, LA 70518-0460, Contact: Gary Lawley, Phone: (318) 364-3880.

(b) *Approved Courses:*

Abatement Worker (contingent from 1/17/89).
Contractor/Supervisor (contingent from 1/17/89).

(29)(a) *Training Provider:* Maxim Engineers, Inc.

Address: 2342 Fabens, Dallas, TX 75229, Contact: Kyle B. Dotson, Phone: (214) 247-7575.

(b) *Approved Course:*

Abatement Worker (contingent from 1/6/89).

(30)(a) *Training Provider:* Meador-Wright & Associates, Inc.

Address: 5520 LBJ Freeway, Suite 204, Dallas, TX 75240, Contact: Paul Teel, Phone: (214) 788-1804.

(b) *Approved Course:*

Inspector (contingent from 7/27/88).

(31)(a) *Training Provider:* Moore-Norman Area Vocational Training School.

Address: 4701-12th Ave., NW, Norman, OK 73069, Contact: Frank Coulter, Phone: (405) 364-5763.

(b) *Approved Courses:*

Abatement Worker (full from 3/3/86).
Abatement Worker Refresher Course (contingent from 5/19/89).
Contractor/Supervisor (full from 3/3/86).
Contractor/Supervisor Refresher Course (contingent from 5/19/89).
Inspector/Management Planner (contingent from 1/25/88).
Inspector/Management Planner (full from 4/4/88).
Inspector/Management Planner Refresher Course (contingent from 5/19/89).

(32)(a) *Training Provider:* Nelson/Imel, Inc.

Address: 3900 Morrison Cir., Norman, OK 73072, Contact: Deborah Nelson, Phone: (405) 364-3278.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Abatement Worker Refresher Course (contingent from 11/16/88).

(33)(a) *Training Provider:* O'Connor McMahon, Inc.

Address: 1505 Luna Rd., Suite 114, Carrollton, TX 75006, Contact: James M. Walley, Phone: (214) 245-3300.

(b) *Approved Course:*

Abatement Worker (contingent from 7/27/88).

(34)(a) *Training Provider:* Occupational Safety Training Institute.

Address: 9000 West Bellfort, Suite 450, Houston, TX 77031, Contact: Eva Bonilla, Phone: (713) 270-6882.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Abatement Worker Refresher Course (contingent from 12/8/88).
Contractor/Supervisor (contingent from 7/27/88).
Contractor/Supervisor (full from 7/27/88).
Contractor/Supervisor Refresher Course (contingent from 12/8/88).
Inspector/Management Planner (contingent from 9/15/88).

(35)(a) *Training Provider:* Protechnics Environmental Services.

Address: 14760 Memorial Dr., Suite 105, Houston, TX 77079, Contact: Hugh Songster, Phone: (713) 496-9874.

(b) *Approved Courses:*

Abatement Worker (contingent from 1/5/89).
Contractor/Supervisor (contingent from 6/22/89).

(36)(a) *Training Provider:* R & H Associates, Inc.

Address: P.O. Box 8948, Albuquerque, NM 87198, Contact: Floyd Rubi, Phone: (505) 275-1045.

(b) *Approved Courses:*

Abatement Worker (contingent from 1/12/89).
Abatement Worker Refresher Course (contingent from 4/20/89).
Contractor/Supervisor (contingent from 1/12/89).
Contractor/Supervisor Refresher Course (contingent from 4/20/89).
Inspector/Management Planner (contingent from 1/12/89).
Inspector/Management Planner Refresher Course (contingent from 4/20/89).

(37)(a) *Training Provider:* Region 6 Environmental Training.

Address: P.O. Box 180435, Austin, TX 78718-0435, Contact: Rick Orr, Phone: (512) 251-3403.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Abatement Worker Refresher Course (contingent from 3/2/89).
Contractor/Supervisor (contingent from 7/27/88).
Contractor/Supervisor Refresher Course (contingent from 3/2/89).

(38)(a) *Training Provider:* Safety & Health Research Institute.

Address: 500 One Gallery Tower, 13355 Noel Rd., P.O. Box 612245, Dallas, TX 75261, Contact: Ted Davis, Phone: (214) 851-3536.

(b) *Approved Courses:*

Abatement Worker (contingent from 9/12/88).
Contractor/Supervisor (contingent from 9/12/88).
Inspector/Management Planner (contingent from 9/12/88).

(39)(a) *Training Provider:* Southeast Arkansas Education Services Cooperative.

Address: U.A.M. - Willard Hall, P.O. Box 3507, Monticello, AR 71655, Contact: Lloyd Crossley, Phone: (501) 367-6848.

(b) *Approved Course:*

Inspector/Management Planner Refresher Course (contingent from 4/11/89).

(40)(a) *Training Provider:* Southwest Environmental Institute.

Address: P.O. Box 295, Abileene, TX 79604, Contact: Tom Dye, Phone: (915) 691-0189.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Contractor/Supervisor (contingent from 10/20/88).

(41)(a) *Training Provider:* Texas Engineering Extension Service Building Codes Inspection Training Division.

Address: Texas A & M University System, College Station, TX 77843-8000, Contact: Richard Thompson, Phone: (409) 845-6682.

(b) *Approved Courses:*

Abatement Worker (full from 9/28/87).
Contractor/Supervisor (interim from 5/26/86 to 9/13/87).
Contractor/Supervisor (full from 9/14/87).
Contractor/Supervisor Refresher Course (full from 3/2/89).
Inspector/Management Planner (full from 10/19/87).
Inspector/Management Planner Refresher Course (full from 3/1/89).

(42)(a) *Training Provider:* Tulane University, School of Public Health & Tropical Medicine, Dept of Environmental Health Sciences.

Address: 1430 Tulane Ave., New Orleans, LA 70112, Contact: Shau-Wong-Chang, Phone: (504) 588-5374.

(b) *Approved Courses:*

Contractor/Supervisor (interim from 3/17/87 to 9/14/87).
Contractor/Supervisor (full from 9/15/87).
Inspector/Management Planner (contingent from 5/20/88).

(43)(a) *Training Provider:* U.S. Analytical, Inc.

Address: P.O. Box 801, Abilene, TX 79604, Contact: Keith Davis, Phone: (915) 698-3293.

(b) *Approved Courses:*

Abatement Worker (contingent from 2/13/89).
Contractor/Supervisor (contingent from 2/13/89).

(44)(a) *Training Provider:* University of Arkansas at Little Rock Biology Dept.

Address: 33rd & University, Little Rock, AR 72204, Contact: Phyllis Moore, Phone: (501) 569-3270.

(b) *Approved Course:*

Inspector/Management Planner (contingent from 4/20/88).

(45)(a) *Training Provider:* University of Arkansas at Little Rock, Labor Education Program.

Address: 2801 South University, Little Rock, AR 72204, Contact: James E. Nickles, Phone: (501) 569-8483.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 9/14/88).
Inspector/Management Planner Refresher Course (contingent from 9/12/88).

(46)(a) *Training Provider:* University of Houston/McClelland Management Services, Inc.

Address: Houston, TX 77204-3901, Contact: Patricia Robinson, Phone: (713) 749-7358.

(b) *Approved Course:*

Contractor/Supervisor (contingent from 5/5/89).

(47)(a) *Training Provider:* University of New Mexico The Environmental Training Center Division of Continuing Education.

Address: 1634 University Blvd. NE, Albuquerque, NM 87131, Contact: Rupert Trujillo, Phone: (505) 277-3751.

(b) *Approved Course:*

Contractor/Supervisor (contingent from 6/16/85).

(48)(a) *Training Provider:* University of Texas at Arlington Civil Engineering Dept.

Address: Box 19308, Arlington, TX 76019, Contact: Vic Argento, Phone: (817) 273-3694.

(b) *Approved Courses:*

Contractor/Supervisor (full from 7/14/86).
Contractor/Supervisor Refresher Course (full from 9/26/88).
Inspector/Management Planner (full from 10/19/87).
Inspector/Management Planner Refresher Course (full from 9/26/88).

(49)(a) *Training Provider:* Veltmann Engineering.

Address: 2802 Exeter, Midland, TX 79705, Contact: Clyde Veltmann, Phone: (915) 694-1145.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Contractor/Supervisor (contingent from 7/27/88).

(50)(a) *Training Provider:* Young Insulation Group of Amarillo, Inc.

Address: P.O. Box 5098, Amarillo, TX 79117, Contact: Dennis C. Clayton, Phone: (806) 372-4329.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/27/88).
Abatement Worker Refresher Course (contingent from 7/27/88).

EPA-Approved Training Courses

REGION VII – Kansas City, KS

Regional Asbestos Coordinator: Wolfgang Brandner, EPA, Region VII, 726 Minnesota Ave., Kansas City, KS 66101. (913) 236-2835, (FTS) 757-2835.

List of Approved Courses: The following training courses have been approved by EPA. The courses are listed under (b). This approval is subject to the level of certification indicated after the course name. Training Providers are listed in alphabetical order and do not reflect a prioritization. Approvals for Region VII training courses and contact points for each, are as follows:

(1)(a) *Training Provider:* Abatement Project Training.

Address: P.O. Box 4372, Kansas City, KS 66104, Contact: Virginia Ireton, Phone: (913) 798-3440.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/15/88).
Abatement Worker (full from 4/27/89).

Address: Box 1708, Fargo, ND 58107, Contact: Jerry Day, Phone: (701) 280-2286.

(b) *Approved Courses:*

Abatement Worker (contingent from 8/11/88).
Abatement Worker (full from 5/23/89).

(17)(a) *Training Provider:* Misers Inspection & Training, Inc.

Address: 1600 South Cherokee St., Denver, CO 80223, Contact: Michael E. DiRito, Phone: (303) 761-8860.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/17/88).
Abatement Worker (full from 7/5/88).
Abatement Worker Refresher Course (contingent from 11/14/88).
Abatement Worker Refresher Course (full from 1/27/89).
Contractor/Supervisor (contingent from 6/17/88).
Contractor/Supervisor (full from 7/5/88).
Contractor/Supervisor Refresher Course (contingent from 11/14/88).
Contractor/Supervisor Refresher Course (full from 1/27/89).

(18)(a) *Training Provider:* NATEC International, Inc.

Address: 2761 West Oxford Ave., No. 7, Englewood, CO 80110, Contact: Ron Sandlin, Phone: (303) 781-0422.

(b) *Approved Courses:*

Abatement Worker (contingent from 4/15/88).
Inspector/Management Planner (contingent from 6/2/89).

(19)(a) *Training Provider:* National Education Program for Asbestos (NEPA).

Address: 2863 West 8750 S, West Jordan, UT 84088, Contact: Mark A. Kirk, Phone: (801) 565-1400.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/6/89).
Contractor/Supervisor (contingent from 3/6/89).

(20)(a) *Training Provider:* Power Masters, Inc.

Address: 13205 South State St., Draper, UT 84020, Contact: Debora Bastian, Phone: (801) 571-9321.

(b) *Approved Course:*

Abatement Worker (contingent from 6/13/88).

(21)(a) *Training Provider:* Precision Safety & Services, Inc.

Address: 1245 Windemaker Ln., Colorado Springs, CO 80907, Contact: James R. Maples, Jr., Phone: (719) 593-8596.

(b) *Approved Courses:*

Abatement Worker (contingent from 8/11/88).
Abatement Worker (full from 11/2/88).

(22)(a) *Training Provider:* R.S. Christiansen Asbestos Consultant.

Address: 4980 Holladay Blvd., Salt Lake City, UT 84117, Contact: R.S. Christiansen, Phone: (801) 277-2323.

(b) *Approved Courses:*

Abatement Worker (contingent from 7/29/88).
Abatement Worker (full from 12/7/88).

(23)(a) *Training Provider:* South Dakota State University College of Engineering.

Address: Box 2218, Brookings, SD 57007-0597, Contact: James Ceglian, Phone: (605) 688-4101.

(b) *Approved Courses:*

Contractor/Supervisor (contingent from 5/18/88).
Inspector/Management Planner (contingent from 5/18/88).

(24)(a) *Training Provider:* Survey Management & Design (SMD).

Address: RR 2, Box 85-B, Fargo, ND 58102, Contact: David A. Sohm, Phone: (701) 234-9556.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/2/89).
Contractor/Supervisor (contingent from 3/2/89).
Contractor/Supervisor (full from 5/2/89).

(25)(a) *Training Provider:* University of Utah, Rocky Mountain Center for Occupational & Environmental Health.

Address: Dept. of Family & Preventive Medicine, Building 512, Salt Lake City, UT 84112, Contact: Jeffery S. Lee, Phone: (801) 581-8719.

(b) *Approved Courses:*

Abatement Worker (contingent from 9/27/88).
Contractor/Supervisor (contingent from 6/1/87).
Contractor/Supervisor (full from 6/1/87).
Contractor/Supervisor Refresher Course (contingent from 6/7/88).
Contractor/Supervisor Refresher Course (full from 11/13/88).
Inspector/Management Planner (contingent from 12/23/87).
Inspector/Management Planner (full from 2/8/88).

Inspector/Management Planner Refresher Course (contingent from 12/9/88).
Inspector/Management Planner Refresher Course (full from 12/14/88).

EPA-Approved Training Courses

REGION IX – San Francisco, CA

Regional Asbestos Coordinator: Jo Ann Semones, (A-4-2), EPA, Region IX, 215 Fremont St., San Francisco, CA 94105. (415) 974-7290, (FTS) 454-7290.

List of Asbestos Courses: The following training courses have been approved by EPA. The courses are listed under (b). This approval is subject to the level of certification indicated after the course name. Training Providers are listed in alphabetical order and do not reflect a prioritization. Approvals for Region IX training courses and contact points for each, are as follows:

(1)(a) *Training Provider:* Asbestos C.T.I.

Address: P.O. Box 228, Mokelumne Hill, CA 95245, Contact: Lee Hess, Phone: (209) 286-1249.

(b) *Approved Courses:*

Contractor/Supervisor (contingent from 10/31/88).
Inspector (contingent from 3/21/89).

(2)(a) *Training Provider:* Asbestos Workers Abatement Training Program of Southern California.

Address: 1669 East Lincoln Ave., Orange, CA 92655-1929, Contact: James Riley, Phone: (714) 921-8110.

(b) *Approved Courses:*

Abatement Worker (contingent from 5/27/88).
Contractor/Supervisor (contingent from 1/26/89).

(3)(a) *Training Provider:* Carpenters No. 46 Northern California Counties J.A.T.C. & T.B.

Address: 2350 Santa Rita Rd., Pleasanton, CA 94566-4190, Contact: Hugh Johnson, Phone: (415) 462-9640.

(b) *Approved Course:*

Contractor/Supervisor (contingent from 12/1/88).

(4)(a) *Training Provider:* Center for Accelerated Learning.

Address: 400 Buck Ave., Suite G, Vacaville, CA 95688, Contact: David Esparza, Phone: (707) 446-7996.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/1/88).
Abatement Worker Refresher Course (contingent from 12/15/88).
Contractor/Supervisor (contingent from 6/1/88).
Contractor/Supervisor Refresher Course (contingent from 12/15/88).
Inspector/Management Planner (contingent from 6/30/88).

(5)(a) *Training Provider:* DWC Consulting Co., Inc.

Address: 1250 Pine St., Suite 307, Walnut Creek, CA 94596, Contact: Dan Weathers, Phone: (415) 933-9066.

(b) *Approved Courses:*

Abatement Worker (contingent from 4/3/89).
Contractor/Supervisor (contingent from 4/3/89).
Inspector/Management Planner (contingent from 4/3/89).

(6)(a) *Training Provider:* Dan Napier & Associates.

Address: 15342 Hawthorne Blvd., Suite 207, P.O. Box 1540, Lawndale, CA 90260-6440, Contact: Dan Napier, Phone: (213) 644-1924.

(b) *Approved Courses:*

Abatement Worker (contingent from 1/18/88).
Abatement Worker Refresher Course (contingent from 1/18/89).
Contractor/Supervisor (contingent from 3/27/89).
Contractor/Supervisor Refresher Course (contingent from 1/16/89).
Inspector/Management Planner (contingent from 4/3/89).
Inspector/Management Planner Refresher Course (contingent from 3/30/89).
Project Designer Refresher Course (contingent from 3/30/89).

(7)(a) *Training Provider:* Diagnostic Engineering, Inc.

Address: 90 East Foothill Blvd., Arcadia, CA 91006, Contact: Alan M. Lamson, Phone: (818) 447-5218.

(b) *Approved Courses:*

Abatement Worker (contingent from 10/27/88).
Contractor/Supervisor (contingent from 6/27/88).
Inspector/Management Planner (contingent from 6/27/88).
Inspector/Management Planner Refresher Course (contingent from 4/18/89).
Project Designer (contingent from 12/1/88).

(8)(a) *Training Provider:* EnviroMD, Inc.

Address: 3443 East Fort Lowell Rd., Tucson, AZ 85716, Contact: Rose Rubio, Phone: (602) 881-1000.

(b) *Approved Courses:*

Contractor/Supervisor (contingent from 1/17/88).
Inspector/Management Planner (contingent from 11/14/88).

(9)(a) *Training Provider:* Environmental Control Industries.

Address: 5720 Shattuck Ave., Oakland, CA 94609, Contact: Richard McGlothlin, Phone: (415) 655-5855.

(b) *Approved Course:*

Abatement Worker (contingent from 12/1/88).

(10)(a) *Training Provider:* Environmental Sciences, Inc.

Address: 105 E. Speedway, Tucson, AZ 85705, Contact: Dale Keyes, Phone: (602) 792-0097.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 9/29/87).
Inspector/Management Planner (full from 10/5/87).
Inspector/Management Planner Refresher Course (contingent from 11/14/88).

(11)(a) *Training Provider:* Excel Environmental, Inc.

Address: 739 Allston Way, Berkeley, CA 94710, Contact: Otis Wong, Phone: (415) 548-4300.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/28/87).
Abatement Worker Refresher Course (contingent from 12/1/88).
Contractor/Supervisor (contingent from 6/3/88).
Contractor/Supervisor Refresher Course (contingent from 12/1/88).

(12)(a) *Training Provider:* Hawaii Laborers Training School.

Address: P.O. Box 457, Aiea, HI 96701, Contact: Norman Jimeno, Phone: (808) 486-6161.

(b) *Approved Course:*

Abatement Worker (contingent from 5/27/88).

(13)(a) *Training Provider:* Insulators & Asbestos Industry of Northern California & Local Union No. 16 Asbestos Training Fund.

Address: 2033 Clement Ave., Building 31, Room 112, Alameda, CA 94501, Contact: Hans D. Siebert, Phone: (415) 865-2292.

(b) *Approved Course:*

Abatement Worker (contingent from 5/27/88).

(14)(a) *Training Provider:* International Technology Corp.

Address: 336 West Anaheim St., Wilmington, CA 90748, Contact: Keith Soebe, Phone: (213) 830-1781.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/24/87).
Abatement Worker Refresher Course (contingent from 3/29/89).

Contractor/Supervisor (contingent from 4/15/88).
Contractor/Supervisor Refresher Course (contingent from 3/29/89).

(15)(a) *Training Provider:* KELLCO Training Institute.

Address: 44814 Osgood Rd., Fremont, CA 94539, Contact: Charles W. Kellogg, Phone: (415) 659-9751.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/1/88).
Contractor/Supervisor (contingent from 7/20/88).
Contractor/Supervisor Refresher Course (contingent from 10/31/88).
Inspector/Management Planner (contingent from 3/21/89).
Inspector/Management Planner Refresher Course (contingent from 3/16/89).

(16)(a) *Training Provider:* Laborers Training & Retraining Trust Fund for Northern California.

Address: 21321 San Ramon Valley Blvd., San Ramon, CA 94583, Contact: Monte R. Strother, Phone: (415) 828-2513.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/13/88).
Abatement Worker Refresher Course (contingent from 12/15/88).

(17)(a) *Training Provider:* Laborers Training & Retraining Trust Fund for Southern California.

Address: P.O. Box 76, Anza, CA 92306, Contact: Mary Lacy, Phone: (714) 763-4341.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/30/88).
Abatement Worker Refresher Course (contingent from 12/15/88).

(18)(a) *Training Provider:* Lehr Training Institute.

Address: 1431 Warner Ave., Tustin, CA 92680, Contact: Susan Patnode, Phone: (714) 259-1575.

(b) *Approved Courses:*

Abatement Worker (contingent from 2/16/88).
Abatement Worker Refresher Course (contingent from 2/21/89).
Contractor/Supervisor (contingent from 2/16/88).
Contractor/Supervisor Refresher Course (contingent from 2/21/89).
Inspector/Management Planner (contingent from 10/31/88).
Inspector/Management Planner Refresher Course (contingent from 2/21/89).

(19)(a) *Training Provider:* National Abatement Technology Employment Center (NATEC).

Address: 12552 Knott St., Suite 8, Garden Grove, CA 92643, Contact: Ronald Sandlin, Phone: (714) 894-7577.

(b) *Approved Courses:*

Abatement Worker (contingent from 12/30/87).
Abatement Worker Refresher Course (contingent from 11/14/88).
Contractor/Supervisor (contingent from 12/30/87).
Contractor/Supervisor Refresher Course (contingent from 11/14/88).

(20)(a) *Training Provider:* National Institute for Asbestos & Hazardous Waste Training.

Address: 1019 West Manchester Blvd., Inglewood, CA 90301, Contact: Jim McFarland, Phone: (213) 645-4516.

(b) *Approved Courses:*

Abatement Worker (full from 12/7/87).
Abatement Worker Refresher Course (contingent from 10/19/88).
Contractor/Supervisor (full from 12/7/87).
Contractor/Supervisor Refresher Course (contingent from 10/19/88).
Inspector/Management Planner (contingent from 6/30/88).
Inspector/Management Planner Refresher Course (contingent from 11/14/88).

(21)(a) *Training Provider:* Naval Civil Engineering Laboratory.

Address: Port Hueneme, CA 93043-5003, Contact: Susan C. Tianen, Phone: (805) 982-5409.

(b) *Approved Course:*

Inspector (contingent from 4/6/89).

(22)(a) *Training Provider:* Occupational Training Institute, Inc.

Address: 5 Civic Center, Suite 225, Newport Beach, CA 92660, Contact: David K. Herdman, Phone: (714) 721-9578.

(b) *Approved Courses:*

Abatement Worker (contingent from 2/21/89).
Abatement Worker Refresher Course (contingent from 2/21/89).
Contractor/Supervisor (contingent from 2/21/89).
Contractor/Supervisor Refresher Course (contingent from 2/21/89).
Inspector/Management Planner (contingent from 2/21/89).
Inspector/Management Planner Refresher Course (contingent from 2/21/89).

(23)(a) *Training Provider:* Pacific Asbestos Information Center U.C. Extension.

Address: 2223 Fulton St., Berkeley, CA 94720, Contact: Debra Dobbin, Phone: (415) 643-7143.

(b) *Approved Courses:*

Contractor/Supervisor (full from 2/2/87).
Contractor/Supervisor Refresher Course (contingent from 10/19/88).
Inspector/Management Planner (full from 11/16/87).
Inspector/Management Planner Refresher Course (contingent from 10/19/88).

(24)(a) *Training Provider:* Salem Kroeger, Inc.

Address: 106 Church St., Roseville, CA 95678, Contact: Owen C. Tilley, Phone: (916) 784-7222.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/30/89).
Abatement Worker Refresher Course (contingent from 4/3/89).
Contractor/Supervisor (contingent from 3/30/89).
Contractor/Supervisor Refresher Course (contingent from 4/3/89).
Inspector Refresher Course (contingent from 4/3/89).

(25)(a) *Training Provider:* San Diego County Construction Laborers Training & Retraining Trust.

Address: 4161 Home Ave., Second Fl., San Diego, CA 92105, Contact: Bob White, Phone: (619) 263-6941.

(b) *Approved Course:*

Abatement Worker (contingent from 3/21/89).

(26)(a) *Training Provider:* San Diego County District Council of Carpenters.

Address: 4665 Mercury St., San Diego, CA 92111, Contact: Otis Kunz, Phone: (619) 571-8977.

(b) *Approved Courses:*

Abatement Worker (contingent from 3/30/89).
Contractor/Supervisor (contingent from 10/31/88).

(27)(a) *Training Provider:* The Asbestos Institute.

Address: 2701 East Camelback, Suite 381, Phoenix, AZ 85016, Contact: William T. Cavness, Phone: (602) 381-0896.

(b) *Approved Courses:*

Abatement Worker (contingent from 6/30/88).
Abatement Worker Refresher Course (contingent from 10/31/88).
Contractor/Supervisor (contingent from 6/13/88).
Contractor/Supervisor Refresher Course (contingent from 3/9/89).
Inspector/Management Planner (contingent from 6/17/88).
Inspector/Management Planner Refresher Course (contingent from 6/16/88).

(28)(a) *Training Provider:* University Associates, Ltd.

Address: 2425-A North Huachuca Dr., Tucson, AZ 85745, Contact: Carolyn Coker, Phone: (602) 624-9366.

(b) *Approved Course:*

Inspector/Management Planner (contingent from 12/1/88).

(29)(a) *Training Provider:* University of Southern California Institute of Safety & Systems Management.

Address: University Gardens, 3500 South Figueroa St., Suite 202, Los Angeles, CA 90007, Contact: James O. Pierce, Phone: (213) 743-6523.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 8/2/88).
Inspector/Management Planner (full from 2/15/88).
Inspector/Management Planner Refresher Course (contingent from 2/23/89).

EPA-Approved Training Courses

REGION X – Seattle, WA

Regional Asbestos Coordinator: Walter Jasper, EPA, Region X, 1200 Sixth Ave. (8T-083), Seattle, WA 98101. (206) 442-4762, (FTS) 399-2870.

List of Approved Courses: The following training courses have been approved by EPA. The courses are listed under (b). This approval is subject to the level of certification indicated after the course name. Training Providers are listed in alphabetical order and do not reflect a prioritization. Approvals for Region X training courses and contact points for each, are as follows:

(1)(a) *Training Provider:* Asbestos Services International.

Address: 12360 Southwest Butner Rd., Portland, OR 97225-5818, Contact: Robert E. Hasting, Phone: (503) 644-0246.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 8/23/88).
Inspector/Management Planner (full from 7/17/89).
Inspector/Management Planner Refresher Course (contingent from 10/31/88).
Inspector/Management Planner Refresher Course (full from 1/20/89).
Project Designer (contingent from 10/31/88).
Project Designer (full from 1/17/89).

(2)(a) *Training Provider:* Certified Industrial Hygiene Services, Inc.

Address: 911 Western Ave., Suite 206, Seattle, WA 98104, Contact: Dorothy Stansel, Phone: (206) 622-1096.

(b) *Approved Course:*

Inspector (contingent from 3/25/88).

(3)(a) *Training Provider:* Engineering Continuing Education University of Washington.

Address: GG-13, Seattle, WA 98195, Contact: Susan G. Stone, Phone: (206) 543-5539.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 1/26/88).
Inspector/Management Planner (full from 2/8/88).

(4)(a) *Training Provider:* Environmental Health Sciences Lake Washington Vo-Tech.

Address: 11605 132nd Ave., NE, Kirkland, WA 98034, Contact: Dave Rodewald, Phone: (206) 828-5643.

(b) *Approved Courses:*

Inspector/Management Planner (full from 4/11/88).
Inspector/Management Planner Refresher Course (contingent from 1/14/89).
Inspector/Management Planner Refresher Course (full from 1/27/89).

(5)(a) *Training Provider:* Environmental Management, Inc.

Address: P.O. Box 91477, Anchorage, AK 99509, Contact: Kenneth Johnson, Phone: (907) 272-8056.

(b) *Approved Course:*

Inspector/Management Planner (full from 4/18/88).

(6)(a) *Training Provider:* Hazcon, Inc.

Address: 5950 6th Ave., S, Suite 216, Seattle, WA 98108, Contact: Mike Krause, Phone: (206) 763-7364.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 3/1/88).
Inspector/Management Planner (full from 4/4/88).
Inspector/Management Planner Refresher Course (contingent from 1/18/89).
Inspector/Management Planner Refresher Course (full from 1/30/89).

(7)(a) *Training Provider:* Heavey Engineers, Inc.

Address: 113 Russell St., P.O. Box 632, Stevenson, WA 98648-0632, Contact: Daniel Evans, Phone: (509) 427-8936.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 4/13/88).
Inspector/Management Planner (full from 5/2/88).
Inspector/Management Planner Refresher Course (contingent from 1/18/89).
Inspector/Management Planner Refresher Course (full from 3/10/89).

(8)(a) *Training Provider:* NAC Corporation/Northwest Asbestos Consultants.

Address: 1005 Northwest Galveston, Suite E, Bend, OR 97701, Contact: Dale Schmidt, Phone: (503) 389-9727.

(b) *Approved Courses:*

Inspector/Management Planner Refresher Course (contingent from 4/25/89).
Inspector/Management Planner Refresher Course (full from 7/24/89).

(9)(a) *Training Provider:* Northwest Envirocon, Inc.

Address: 4020 Southeast International Way, Suite C-106, Milwaukie, OR 97222, Contact: Shiela Wanta, Phone: (503) 659-8899.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 4/13/88).
Inspector/Management Planner (full from 5/2/88).

(10)(a) *Training Provider:* PBS Environmental Building Consultants, Inc.

Address: 1220 SouthWest Morrison, Portland, OR 97205, Contact: Stephen Smiley, Phone: (503) 248-1939.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 2/4/88).
Inspector/Management Planner (full from 3/14/88).
Inspector/Management Planner Refresher Course (contingent from 3/14/89).
Inspector/Management Planner Refresher Course (full from 6/30/89).
Project Designer (contingent from 6/9/89).
Project Designer (full from 6/19/89).

(11)(a) *Training Provider:* South East Regional Resource Center, Inc.

Address: 210 Ferry Way, Suite 200, Juneau, AK 99801, Contact: William Suss, Phone: (907) 586-6806.

(b) *Approved Course:*

Inspector/Management Planner Refresher Course (contingent from 4/18/89).

(12)(a) *Training Provider:* Specialized Environmental Consulting, Inc.

Address: P.O. Box 363, Wauna, WA 98395, Contact: Raymond Donahue, Phone: (206) 857-3222.

(b) *Approved Courses:*

Inspector/Management Planner Refresher Course (contingent from 3/7/89).
Inspector/Management Planner Refresher Course (full from 3/20/89).

(13)(a) *Training Provider:* University of Alaska, Mining & Petroleum Training Services.

Address: 155 Smith Way, Suite 104, Soldotna, AK 99669, Contact: Dennis D. Steffy, Phone: (907) 262-2789.

(b) *Approved Courses:*

Inspector/Management Planner (contingent from 2/16/88).
Inspector/Management Planner (full from 4/11/88).
Inspector/Management Planner Refresher Course (contingent from 1/14/89).

(14)(a) *Training Provider:* Washington Association of Maintenance & Operations Administrators, WAMOA.

Address: 12037 Northeast Fifth, Bellevue, WA 98005, Contact: Colin MacRae, Phone: (206) 455-6054.

(b) *Approved Courses:*

Inspector/Management Planner Refresher Course (contingent from 4/25/89).
Inspector/Management Planner Refresher Course (full from 7/24/89).

V. List of Accredited Polarized Light Microscopy (PLM) Laboratories

A. Background

Section 206(d) of Title II requires EPA to provide for the development of an accreditation program through the NIST for laboratories conducting analysis of bulk samples of ACMs. NIST began initial evaluations of enrolled laboratories in October 1988 and has accredited approximately 456 PLM laboratories. NIST will continue to accredit laboratories on a regular basis. To provide LEAs with a source of accredited laboratories until NIST completes its laboratory evaluations, EPA established the "Interim Asbestos Bulk Sample Analysis Quality Assurance Program." EPA announced the program in the Federal Register of September 30, 1987 (52 FR 33470).

The following listing includes *commercial* and *noncommercial* laboratories which have successfully participated in the April 1988 round of the EPA Interim Asbestos Bulk Sample Analysis Quality Assurance Program and have extended their interim EPA accreditation beyond its expiration date of January 12, 1989, by fully enrolling in the NIST program by the stated deadline of September 30, 1988. This listing also highlights laboratories accredited by NIST as of July 1989. These laboratories are denoted by "NIST" following the laboratory name. Since NIST continues to accredit laboratories on a regular basis, some new NIST-accredited laboratories may not be included in this listing. LEA's should contact NIST at (301) 975-4016 to verify the accredited status of the laboratory.

B. Transition from EPA to NIST Accredited Laboratories

The laboratories included in this listing have completed final application to NIST for enrollment in the National Voluntary Laboratory Accreditation Program (NVLAP) for PLM laboratories. These laboratories have extended their EPA-accredited status. NIST may at any point in the laboratory review determine that the laboratory is deficient and request EPA to remove the interim EPA accreditation based on a laboratory site visit and/or proficiency testing. If a laboratory is found to be deficient in any part of the evaluation, NIST will not accredit the laboratory until the corrections have been made. NIST will also notify EPA of the deficiencies, and EPA will withdraw interim EPA accreditation.

LEAs may determine the current *EPA accreditation* status of laboratories in this listing by contacting the laboratory and the local EPA Regional Asbestos Coordinator (RAC). This listing of laboratories may be consulted as a source of local laboratories; however, since NIST has begun its evaluations, the list could change prior to the next published listing of accredited laboratories. Additional copies of this listing are available by calling (202) 544-1404.

NOTE: This listing is amended to include two additional listings of noncommercial laboratories. The first includes noncommercial laboratories not included on EPA listings from August 31, 1988 through January 12, 1989. These laboratories maintained interim EPA accreditation from the April 1988 round of EPA testing through the expiration of the interim EPA accreditation on January 12, 1989. The second listing includes noncommercial laboratories with interim EPA accreditation extended beyond the expiration date of January 12, 1989.

EPA Accredited Commercial PLM Laboratories

REGION I – Boston, MA

Regional Asbestos Coordinator: Joe DeCola, EPA, Region I, Air and Management Division (APT-2311), JFK Federal Building, Boston, MA 02203. (617) 565-3835, (FTS) 835-3835.

(1) *Laboratory:* Aetna Life & Casualty (NIST), Engineering Department W1SE.

Address: 575 Pigeon Hill Rd., Windsor, CT 06095, Contact: Ethel Patricio, Phone: (203) 683-6384.

(2) *Laboratory:* Air Quality Consultants (NIST).

Address: 406 Libbey Pkwy., Weymouth, MA 02189, Contact: John E. O'Malley, Phone: (617) 337-7320.

(3) *Laboratory:* Allied Engineering, Inc. (NIST).

Address: 11 Columbia St., Augusta, ME 04330, Contact: Gary Bates, Phone: (207) 623-9299.

(4) *Laboratory:* Analytical Testing Services (NIST).

Address: 180 Weeden St., Pawtucket, RI 02860-1804, Contact: Robert F. Weisberg, Phone: (401) 723-7978.

(5) *Laboratory:* Applied Occupational Health Systems, (NIST).

Address: 29 River Rd., Suite 18, Concord, NH 03301, Contact: Richard R. Kretovich, Phone: (603) 228-3610.

(6) *Laboratory:* Balsam Environmental Consultants, Inc. (NIST).

Address: 225 Western Ave., Augusta, ME 04330, Contact: Weldon Bosworth, Phone: (603) 893-0616.

(7) *Laboratory:* Balsam Environmental Consultants, Inc., (NIST).

Address: 59 Stiles Rd., Salem, NH 03079, Contact: Tara E. Smith, Phone: (603) 893-0616.

(8) *Laboratory:* Barnes and Jarnis, Inc.

Address: 216 Tremont St., Boston, MA 02116, Contact: Stephen Venuti, Phone: (617) 542-8521.

(9) *Laboratory:* Briggs Associates, Inc. (NIST).

Address: 400 Hingham St., Rockland, MA 02370, Contact: James Litrides, Phone: (617) 871-6040.

(10) *Laboratory:* Brooks Laboratories, Inc. (NIST).

Address: 44 Codfish Ln., Weston, CT 06883, Contact: Margaret Y. Brooks, Phone: (203) 226-6970.

(11) *Laboratory:* CON-TEST, Inc. (NIST).

Address: 39 Spruce St., East Longmeadow, MA 01028, Contact: Thomas E. Veratti, Phone: (413) 525-1198.

(12) *Laboratory:* CT State Dept. of Health Lab (NIST).

Address: P.O. Box 1689, Hartford, CT 06101, Contact: Janet B. Kapish, Phone: (203) 566-5626.

(13) *Laboratory:* Certified Engineering & Testing Co., Inc. (NIST).

Address: 25 Mathewson Dr., Weymouth, MA 02189, Contact: Glenn Sylvester, Phone: (617) 337-7867.

(14) *Laboratory:* Certified Engineering & Testing Co., Inc. of Rhode Island (NIST).

Address: 490 Smith St., Providence, RI 02908, Contact: Maria Stoeckel, Phone: (401) 831-9090.

(15) *Laboratory:* Chem Scope, Inc. (NIST).

(9) *Laboratory:* American Testing

(22) *Laboratory:* Bulava

Address: 4 Westchester Plaza, Elmsford,

Address: P.O. Box 389, Fair Haven Station, New Haven, CT 06513, Contact: Ronald D. Arena, Phone: (203) 468-0055.

(16) *Laboratory:* Covino Environmental Consultants, Inc., (NIST).

Address: 12 Walnut Hill Pk., Woburn, MA 01801, Contact: Samuel J. Covino, Jr., Phone: (617) 933-2555.

(17) *Laboratory:* Dennison Environmental, Inc. (NIST).

Address: 35 Industrial Pkwy., Woburn, MA 01801, Contact: James E. Dennison, Phone: (617) 932-9400.

(18) *Laboratory:* EHL (NIST), Division of Cigna Corp.

Address: 94 Murphy Rd., Hartford, CT 06114, Contact: Jim Kenny, Phone: (203) 522-3814.

(19) *Laboratory:* ESA Laboratories (NIST).

Address: 43 Wiggins Ave., Bedford, MA 01730, Contact: Reg Griffin, Phone: (617) 275-0100.

(20) *Laboratory:* Eastern Analytical Laboratories, Inc.

Address: 149 Rangeway Rd., North Billerica, MA 01862, Contact: Drew Killius, Phone: (617) 272-5212.

(21) *Laboratory:* Enviro Research.

Address: 141 Prestige Park Rd., East Hartford, CT 06108, Contact: Arthur C. Cosmas, Phone: (203) 289-6493.

(22) *Laboratory:* Enviro-Lab, Inc. (NIST).

Address: 154 Grove St., Chicopee, MA 01020, Contact: Peter R. Tuttle, Phone: (413) 592-0030.

(23) *Laboratory:* Enviromed Services, Inc. (NIST).

Address: 25 Science Pk., New Haven, CT 06511, Contact: William G. Oldman, Phone: (203) 786-5580.

(24) *Laboratory:* Environmental Associates, Inc.

Address: 1222 Fairfield Ave., Bridgeport, CT 06605, Contact: Ralph B. Wiech, Phone: (203) 368-6064.

(25) *Laboratory:* Hub Testing Laboratory.

Address: 95 Beaver St., Waltham, MA 02154, Contact: Fred Boyle, Phone: (617) 893-8330.

(26) *Laboratory:* Hunter Environmental Sciences, Inc.

Address: P.O. Box 284, Lincoln, MA 01773, Contact: W. Bruce Hunter, Phone: (617) 259-0800.

(27) *Laboratory:* Hygeia, Inc. (NIST).

Address: 303 Bear Hill Rd., Waltham, MA 02154, Contact: John R. Pilling, Phone: (617) 647-9475.

(28) *Laboratory:* Hygenix, Inc.

Address: 40 Hoyt St., Stamford, CT 06905, Contact: Robert C. Brown, Phone: (203) 324-2222.

(29) *Laboratory:* Hygienetics Analytical Services, Inc., (NIST).

Address: 150 Causeway St., Boston, MA 02114, Contact: Jack Yee, Sr., Phone: (617) 723-4664.

(30) *Laboratory:* Industrial Hygiene/New England.

Address: P.O. Box 947, Kennebunk, ME 04043, Contact: Thomas F. Hatch, Phone: (207) 985-6110.

(31) *Laboratory:* MMR, Inc. (NIST).

Address: P.O. Box 810, 241 West Boylston St., West Boylston, MA 01583, Contact: Donald Pellegrino, Phone: (617) 835-6262.

(32) *Laboratory:* Massachusetts Institute of Technology, Industrial Hygiene Office.

Address: 77 Massachusetts Ave., Rm. 20C-204, Cambridge, MA 02139, Contact: Bonnie L. Weeks, Phone: (617) 253-2596.

(33) *Laboratory:* New Hampshire Div. of Public, Health (NIST), Public Health Laboratory.

Address: 6 Hazen Dr., Concord, NH 03301, Contact: Richard Krepovich, Phone: (603) 271-4657.

(34) *Laboratory:* Northeast Environmental Testing Lab., Inc.

Address: 51 Sockanossett Crossroads, Cranston, RI 02910, Contact: Carmine J. Spinella, Phone: (401) 785-1720.

(35) *Laboratory:* Northeast Test Consultants (NIST).

Address: 587 Spring St., Westbrook, ME 04092, Contact: Stephen Broadhead, Phone: (207) 854-3939.

(36) *Laboratory:* Norwich Laboratories, Inc. (NIST).

Address: 750 North Pleasant St., Amherst, MA 01002, Contact: Nina Inchardi, Phone: (413) 549-6884.

(37) *Laboratory:* R.I. Analytical Laboratories Inc., (NIST).

Address: 1040 Mineral Spring Ave., North Providence, RI 02904, Contact: Anthony E. Perrotti, Phone: (401) 725-4190.

(38) *Laboratory:* Shelburne Laboratories, Inc. (NIST).

Address: 74 Ethan Allen Dr., P.O. Box 9479, South Burlington, VT 05403, Contact: Robert J. Emerson, Phone: (802) 658-5798.

(39) *Laboratory:* TRC Environmental Consultants, Inc., (NIST).

Address: 800 Connecticut Blvd., East Hartford, CT 06108, Contact: Paul Hunt, Phone: (203) 289-8631.

(40) *Laboratory:* Testwell Craig Labs of Connecticut, Inc. (NIST).

Address: 25 Henry St., Bethel, CT 06801, Contact: Richard Speciale, Phone: (203) 743-7281.

(41) *Laboratory:* The Hartford Steam Boiler I & I Co., (NIST), Environmental Services Laboratory.

Address: One State St., Hartford, CT 06102, Contact: Floyd B. Parsons, Jr., Phone: (203) 722-5476.

(42) *Laboratory:* Travelers Insurance-Engr. Lab.

Address: 248 Constitution Plaza, Hartford, CT 06183, Contact: Amita Sanghvi, Phone: (203) 277-7533.

EPA Accredited Commercial PLM Laboratories

REGION II – Edison, NJ

Regional Asbestos Coordinator: Arnold Freiberger, EPA, Region II, Woodbridge Ave., Raritan Depot, Bldg. 5, (MS-500), Edison, NJ 08837. (201) 321-6671, (FTS) 340-6671.

(1) *Laboratory:* ASBESCO, Inc. (NIST).

Address: 961 Lydell Ave., Bldg. 2, Suite 8, Rochester, NY 14606, Contact: Dmitry Tsimberov, Phone: (716) 647-2530.

(2) *Laboratory:* ASTECO, Inc. (NIST).

Address: P.O. Box 2204, Niagara University, NY 14109, Contact: Fred Smith, Phone: (716) 297-5992.

(3) *Laboratory:* ATC Environmental, Inc. (NIST).

Address: 104 East 25th St., New York, NY 10010, Contact: Robert Adamson, Phone: (212) 353-8280.

(4) *Laboratory:* Adelaide Environmental Health, Associates.

Address: 61 Front St., Binghamton, NY 13905-4705, Contact: Brian Donnelly, Phone: (607) 722-6839.

(5) *Laboratory:* Adelaide Environmental Health, Associates.

Address: 845 North Broadway, Suite 200, White Plains, NY 10601, Contact: Ernest Coon, Phone: (914) 949-3109.

(6) *Laboratory:* Adirondack Environmental Services, (NIST).

Address: 298 Riverside Ave., P.O. Box 265, Rensselaer, NY 12144, Contact: Thomas Hare, Phone: (518) 434-4546.

(7) *Laboratory:* Alternative Ways, Inc./AEM, Inc.

Address: P.O. Box 1147, 100 Essex Rd., Bellmawr, NJ 08031, Contact: John Luxford, Phone: (609) 933-3300.

(8) *Laboratory:* Ambient Labs, Inc. (NIST).

Address: 119 West 23rd St., New York, NY 10011, Contact: William A. Esposito, Phone: (212) 962-4242.

(9) *Laboratory:* American Testing Labs, Inc. (NIST).

Address: P.O. Box 102, Bronx, NY 10471, Contact: George Kan, Phone: (212) 796-4761.

(10) *Laboratory:* Applied Environmental Technology, Inc., (NIST).

Address: 316 Cooper Center, Pennsauken, NJ 08109, Contact: Willard Kingsley, Phone: (609) 488-9200.

(11) *Laboratory:* Applied Geo Services, Inc. (NIST).

Address: 41 Union Square W, Suite 1125, New York, NY 10003, Contact: Jeffrey A. Forgang, Phone: (212) 633-1113.

(12) *Laboratory:* Asbesto-Tech.

Address: 140-30 Elgar Pl., Suite 30-B, Bronx, NY 10475, Contact: Solomon Mate, Phone: (212) 671-5266.

(13) *Laboratory:* Asbestos Consultancy Service, Inc., Holiday Bldg.

Address: 121 State Highway 36, West Long Branch, NJ 07764, Contact: George Forrest, Phone: (201) 571-1400.

(14) *Laboratory:* Assessment Technologies, Inc.

Address: 323 West 39th St., New York, NY 10018, Contact: Richard W. Holmes, Phone: (212) 564-8222.

(15) *Laboratory:* Astech, Inc.

Address: 317 West Milton Ave., Rahway, NJ 07065, Contact: Michael Matarazzo, Phone: (201) 396-4455.

(16) *Laboratory:* Atlantic Environmental, Inc. (NIST).

Address: 2 East Blackwell St., Suite 24, Dover, NJ 07801, Contact: Robert Sheriff, Phone: (201) 366-4660.

(17) *Laboratory:* Barnes & Jarnis, Inc.

Address: 373 Park Ave. S, 11th Fl., New York, NY 10016-8865, Contact: Jay Holmes, Phone: (212) 532-6433.

(18) *Laboratory:* Brad Associates (NIST).

Address: 1 Rosanne Ct., Lake Ronkonkoma, NY 11779, Contact: Benito P. San Pedro, Phone: (516) 467-4539.

(19) *Laboratory:* Briggs Associates, Inc. (NIST).

Address: 361 Hanover St., Portsmouth, NJ 03801, Contact: Janice Smith, Phone: (603) 431-2870.

(20) *Laboratory:* Buck Engineering & Environmental, Laboratory (NIST).

Address: 100 Tompkins St., Courtland, NY 13045, Contact: John H. Buck, Phone: (607) 753-3403.

(21) *Laboratory:* Buffalo Testing Labs., Inc. (NIST).

Address: 902 Kenmore Ave., Buffalo, NY 14216, Contact: Edward J. Kris, Phone: (716) 873-2302.

(22) *Laboratory:* Bulava Environmental, Inc. (NIST).

Address: 13 Hunt Club Rd., Belle Mead, NJ 08502, Contact: Edward J. Bulava, Phone: (201) 874-6207.

(23) *Laboratory:* CS Environmental Laboratory, Inc.

Address: 5854 Butternut Dr., East Syracuse, NY 13057, Contact: Ida J. Bennett, Phone: (315) 446-8795.

(24) *Laboratory:* Calibrations (NIST).

Address: P.O. Box 11266, Albany, NY 12211, Contact: Sascha Percent, Phone: (518) 786-1865.

(25) *Laboratory:* Certified Engineering & Testing Co. of, Upstate New York, Inc. (NIST).

Address: 284 Genesee St., Utica, NY 13502, Contact: Mark S. Evans, Phone: (315) 732-3626.

(26) *Laboratory:* Chenango Environmental Laboratory, Inc. (NIST).

Address: 350 State St., Binghamton, NY 13901, Contact: Tim Sayers, Phone: (607) 723-8175.

(27) *Laboratory:* Chopra-Lee Laboratory (NIST).

Address: 1741 Baseline Rd., Grand Island, NY 14072, Contact: Raj Chopra, Phone: (716) 733-6748.

(28) *Laboratory:* Clayton Environmental Consultants, Inc. (NIST).

Address: 160 Fieldcrest Ave., Raritan Center, Edison, NJ 08837, Contact: Kirit H. Vora, Phone: (201) 225-6040.

(29) *Laboratory:* Comprehensive Analytical Group (NIST).

Address: 147 Midler Park Dr., P.O. Box 254, Syracuse, NY 13206, Contact: Jeffrey Berry, Phone: (315) 432-0855.

(30) *Laboratory:* Corning Eng. Environmental Services, (NIST), Corning Glass Works.

Address: One Malcolm Ave., Teterboro, NJ 07608, Contact: John C. Walton, Phone: (201) 393-5647.

(31) *Laboratory:* Dames & Moore.

Address: 12 Commerce Dr., Cranford, NJ 07016-1101, Contact: Margaret Lynch, Phone: (201) 272-8300.

(32) *Laboratory:* Detail Associates, Inc. (NIST).

Address: 300 Grand Ave., Engelwood, NJ 07631, Contact: Stephen A. Jaraczewski, Phone: (201) 569-6708.

(33) *Laboratory:* ENTEK Environmental & Tech. Services, Rennselaer Technology Park.

Address: 125 DeFreest Dr., Troy, NY 12180, Contact: Arthur N. Rohl, Phone: (518) 283-9200.

(34) *Laboratory:* Eastern Analytical Services, Inc., (NIST).

Address: 4 Westchester Plaza, Elmsford, NY 10523-1601, Contact: Paul Stascavage, Phone: (914) 592-6360.

(35) *Laboratory:* Ecology & Environment, Inc.

Address: 4285 Genesee St., Buffalo, NY 14225, Contact: Gary Hahn, Phone: (716) 631-0360.

(36) *Laboratory:* Electron-Microscopy Service, Laboratories, Inc. (NIST).

Address: 106 Haddon Ave., Westmont, NJ 08108, Contact: Peter Frasca, Phone: (609) 858-4800.

(37) *Laboratory:* Enviro-Probe, Inc.

Address: 17 Heritage Dr., Edison, NJ 08820, Contact: Ved P. Kukreja, Phone: (201) 769-0274.

(38) *Laboratory:* Enviro-Probe, Inc.

Address: 2917 Bruckner Blvd., Bronx, NY 10461, Contact: Ved P. Kukreja, Phone: (212) 863-0045.

(39) *Laboratory:* Environmental Health Protection, Consultants, Inc.

Address: 601 East Chapel Ave., Cherry Hill, NJ 08034, Contact: Joseph E. Wilson, Phone: (609) 795-3890.

(40) *Laboratory:* Environmental Management Systems, Inc., (NIST).

Address: 14 Sarafian Rd., New Paltz, NY 12561, Contact: Martin S. Rutstein, Phone: (914) 255-1034.

(41) *Laboratory:* Environmental Monitoring & Consulting, Services.

Address: P.O. Box 872, Somerville, NJ 08876, Contact: Joel Russell, Phone: (201) 249-3005.

(42) *Laboratory:* Exxon Biomedical Sciences, Inc. (NIST), IH Analytical Laboratory.

Address: Mettlers Rd.: CN2350, East Millstone, NJ 08875-2350, Contact: John E. Stillman, Phone: (201) 873-6033.

(43) *Laboratory:* Friends Laboratory, Inc. (NIST).

Address: 446 Broad St., Waverly, NY 14892-1445, Contact: Douglas Friend, Phone: (607) 565-2893.

(44) *Laboratory:* Galson Technical Services (NIST).

Address: 6601 Kirkville Rd., East Syracuse, NY 13057, Contact: Eva Galson, Phone: (315) 432-0506.

(45) *Laboratory:* Glomar Corp.

Address: 29-09 Queens Plaza N., Long Island City, NY 11101, Contact: Richard J. Deliberto, Phone: (718) 786-6660.

(46) *Laboratory:* Hall-Kimbrell Environmental Services.

Address: 129-09 26th Ave., Flushing, NY 11354-1166, Contact: John F. Cesario, Phone: (718) 445-9090.

(47) *Laboratory:* Hazardous Waste Engineering, Consultants, Inc. (NIST).

Address: 47 Hudson St., Ossining, NY 10562, Contact: Marco Pedone, Phone: (914) 762-9000.

(48) *Laboratory:* Hillman Environmental Co.

Address: 1089 Cedar Ave., Union, NJ 07083, Contact: Joseph P. Hillman, Phone: (201) 686-3335.

(49) *Laboratory:* Hygeia, Inc. (NIST).

Address: 276 Fifth Ave., Suite 503, New York, NY 10001, Contact: Marianne Thorpe, Phone: (212) 545-7822.

(50) *Laboratory:* Independent Asbestos Labs, Inc. (NIST).

Address: 5900 Butternut Dr., East Syracuse, NY 13057, Contact: Fred Terracina, Phone: (315) 437-1122.

(51) *Laboratory:* Independent Testing & Consultation, Inc.

Address: P.O. Box 539, Holmdel, NJ 07733, Contact: Anthony Matthews, Phone: (201) 583-2538.

(52) *Laboratory:* Industrial Testing Laboratories (NIST).

Address: 50 Madison Ave., New York, NY 10010, Contact: Kenneth J. Kohlhof, Phone: (212) 685-6788.

(53) *Laboratory:* International Asbestos Testing, Laboratories (IATL) (NIST).

Address: 36 North Pine Ave., Maple Shade, NJ 08052, Contact: Emil M. Ondra, Phone: (609) 779-7792.

(54) *Laboratory:* Kaselaan & D'Angelo Associates, Inc.

Address: P.O. Box 165, Haddonfield, NJ 08033, Contact: James J. Weitzman, Phone: (609) 547-6500.

(55) *Laboratory:* Kemron Environmental Services (NIST).

Address: 755 New York Ave., Huntington, NY 11743, Contact: Joseph Mannetta, Phone: (516) 427-0950.

(56) *Laboratory:* Laboratories for Environmental Testing.

Address: P.O. Box 8361, Long Island City, NY 11101, Contact: Michael A. Martucci, Phone: (718) 786-5583.

(57) *Laboratory:* Laboratory Testing Services, Inc., (NIST).

Address: 75 Urban Ave., Westbury, NY 11590, Contact: Kevin Tunulty, Phone: (516) 334-7770.

(58) *Laboratory:* Lozier Laboratories (NIST).

Address: 23 North Main St., Fairport, NY 14450, Contact: Alan J. Laffin, Phone: (716) 223-7610.

(59) *Laboratory:* Microscopy Research Laboratories, Inc.

Address: 1187 Highway 28, P.O. Box 5115, North Branch, NJ 08876, Contact: Edwin R. Levin, Phone: (201) 526-9192.

(60) *Laboratory:* Moby II (NIST).

Address: 1615 9th Ave., Bohemia, NY 11716, Contact: John Pedneault, Phone: (516) 467-8477.

(61) *Laboratory:* Monroe Monitoring & Analysis (NIST).

Address: 215 Alexander St., Rochester, NY 14607, Contact: Herbert Dohr, Phone: (716) 546-8580.

(62) *Laboratory:* National Testing Laboratories, Inc., (NIST).

Address: 27-14 39th Ave., Long Island City, NY 11101, Contact: Allen Ross, Phone: (718) 784-2828.

(63) *Laboratory:* Northeastern Analytical Corp. (NIST).

Address: Evesham Corporation Center, 4 East Stow Rd., Unit 10, Marlton, NJ 08053, Contact: William Harris, Phone: (609) 651-1441.

(64) *Laboratory:* O'Brien & Gere Engineers, Inc. (NIST).

Address: Box 4873, 1304 Buckley Rd., Syracuse, NY 13221, Contact: Swiatoslav W. Kaczmar, Phone: (315) 451-4700.

(65) *Laboratory:* PMK Eng. & Testing, Inc. (NIST).

Address: 516 Bloy St., Hillside, NJ 07205, Contact: James Ferris, Phone: (201) 686-0044.

(66) *Laboratory:* Pedneault Associates, Inc. (NIST).

Address: 1615 9th Ave., Bohemia, NY 11716, Contact: John Pedneault, Phone: (516) 467-8477.

(67) *Laboratory:* Phoenix Safety Associates, Ltd.

Address: 35 West 31st St., New York, NY 10001, Contact: Nina Amarando, Phone: (212) 268-0800.

(68) *Laboratory:* Powell Environmental Services, Inc., (NIST).

Address: Suite 9A, Camp Meeting Grounds, Delanco, NJ 08075, Contact: Michael D. Moschella, Phone: (609) 764-8886.

(69) *Laboratory:* Princeton Testing Laboratory (NIST).

Address: P.O. Box 3108, Princeton, NJ 08540, Contact: David Kichula, Phone: (609) 452-9050.

(70) *Laboratory:* Professional Service Ind., Inc. (NIST).

Address: 423A New Karner Rd., Albany, NY 12205, Contact: Mark Wysin, Phone: (518) 452-6977.

(71) *Laboratory:* Public Service Testing Laboratories, Inc.

Address: 37-31 57th St., Woodside, NY 11377, Contact: Stephen DiMartino, Phone: (718) 476-9202.

(72) *Laboratory:* R-C-G BOCES Risk Management Services, Lab (NIST).

Address: Brookview Rd., P.O. Box 28, Brookview, NY 12026, Contact: Paul Bowles, Phone: (518) 732-7280.

(73) *Laboratory:* Suffolk County Public & Env. Health, Lab. (NIST).

Address: Veterans Memorial Hwy., Building 77, Hauppauge, NY 11788, Contact: Ronald Huttie, Phone: (516) 360-5528.

(74) *Laboratory:* TAKA Asbestos Analytical Services, (NIST).

Address: P.O. Box 298, Greenlawn, NY 11740, Contact: Thomas A. Kubic, Phone: (516) 261-2117.

(75) *Laboratory:* TAKA Asbestos Analytical Services, Inc. (NIST), Environmental Testing.

Address: 324 Larkfield Rd., East Northport, NY 11731, Contact: Thomas Kubic, Phone: (516) 261-2117.

(76) *Laboratory:* Testwell Craig Lab, Inc. (NIST).

Address: 47 Hudson St., Ossining, NY 15062, Contact: Marco J. Pedone, Phone: (914) 762-9600.

(77) *Laboratory:* Testwell Craig Laboratories of Albany, Inc. (NIST).

Address: 518 Clinton Ave., Albany, NY 12208, Contact: Stanley P. Purzycki, Phone: (518) 436-4114.

(78) *Laboratory:* Testwell Craig Laboratories, Inc., (NIST).

Address: 50 Passaic Ave., Fairfield, NJ 07006, Contact: Marco J. Pedone, Phone: (201) 882-8377.

(79) *Laboratory:* Testwell Craig Peters, Inc. (NIST).

Address: 127 Seeley Rd., Syracuse, NY 13224, Contact: Walter Peters, Phone: (315) 446-0008.

(80) *Laboratory:* Testwell Craig Testing Laboratories, (NIST).

Address: 565 East Jarding Hwy., Mays Landing, NJ 08330, Contact: Joseph Gigliotti, Phone: (609) 625-1700.

(81) *Laboratory:* U.S. Testing Company, Inc., Environmental Sciences Division (NIST).

Address: 1415 Park Ave., Hoboken, NJ 07030, Contact: Ellen McCabe Noyes, Phone: (201) 792-2400.

EPA Accredited Commercial PLM Laboratories

REGION III – Philadelphia, PA

Regional Asbestos Coordinator: Carole Dougherty, EPA, Region III (3HW-42), 841 Chestnut Bldg., Philadelphia, PA 19107. (215)597-3160, (FTS) 597-3160.

(1) *Laboratory:* A.F. Meyer & Associates, Inc. (NIST).

Address: 6849 Old Dominion Dr., Suite 228, McLean, VA 22101, Contact: John Shockley, Jr., Phone: (703) 734-9093.

(2) *Laboratory:* AGX, Inc. (NIST).

Address: Freedom Professional Bldg., 1341 Old Freedom Rd., Suite 3B, Mars, PA 16046, Contact: Kimberly Allison, Phone: (412) 776-1905.

(3) *Laboratory:* AMA Analytical Services (NIST).

Address: 4475 Forbes Blvd., Lanham, MD 20706, Contact: Bruce Lippy, Phone: (800) 459-2640.

(4) *Laboratory:* ASBESTECH Division.

Address: P.O. Box 98, Dunbar, WV 25064, Contact: John Richard Hart, Phone: (304) 766-6224.

(5) *Laboratory:* ATEC Associates, Inc. (NIST), Industrial Hygiene Division.

Address: 8989 Herrmann Dr., Columbia, MD 21045-8780, Contact: Paul A. Esposito, Phone: (301) 381-0232.

(6) *Laboratory:* ATEC Associates of Virginia, Inc., (NIST).

Address: 2551 Eltham Ave., Suite Z, Norfolk, VA 23513, Contact: Richard A. Vogel, Jr., Phone: (804) 857-6765.

(7) *Laboratory:* Academy of IRM, Inc.

Address: 1600 Winchester Rd., Annapolis, MD 21401, Contact: Bobby E. Leonard, Phone: (301) 757-6503.

(8) *Laboratory:* Accredited Environmental Technologies, Inc. (NIST).

Address: 28 North Pennell Rd., Lima, PA 19037, Contact: Jack Carney, Phone: (215) 891-0114.

(9) *Laboratory:* Advanced Analytical Laboratories, Inc.

Address: 30th & North Church St., Hazelton, PA 18201, Contact: Thomas Martinelli, Phone: (717) 455-5115.

(10) *Laboratory:* Air Quality Analysis Associates (NIST).

Address: 1337 Perry Ave., Morgantown, WV 26505, Contact: John T. Jankovic, Phone: (304) 599-0023.

(11) *Laboratory:* Allegheny Asbestos Analysis, Inc., (NIST).

Address: 300 Mt. Lebanon Blvd., Suite 2217, Pittsburgh, PA 15234, Contact: Tammy Nagel, Phone: (412) 563-3744.

(12) *Laboratory:* Allegheny Mountain Research (NIST), Occupational Health Division.

Address: RD 1, Box 243A, Berlin, PA 15530-9546, Contact: Victor Kawchak, Phone: (814) 267-4404.

(13) *Laboratory:* Altest Environmental Labs (NIST).

Address: 28 West Main St., Plymouth, PA 18651, Contact: Frank Egenski, Phone: (717) 779-5377.

(14) *Laboratory:* American Medical Laboratories, Inc., (NIST).

Address: 11091 Main St., Fairfax, VA 22030, Contact: Fred Grunder, Phone: (703) 691-9100.

(15) *Laboratory:* American Medical Laboratories, Inc., (NIST).

Address: 2000 Bremo Rd., Suite 204, Richmond, VA 23226, Contact: Robert Murphy, Phone: (703) 691-9100.

(16) *Laboratory:* Analytics (NIST).

Address: P.O. Box 25249, Richmond, VA 23260, Contact: James Calpin, Phone: (804) 353-8973.

(17) *Laboratory:* Analytics Laboratory, Inc. (NIST), Subs. of Roche Biomedical, Laboratories Inc.

Address: 205 South Whiting St., Suite 405, Alexandria, VA 22304, Contact: Eugene Buie, Phone: (703) 751-3803.

(18) *Laboratory:* Analytics Laboratory, Inc. (NIST), Subs. of Roche Biomedical, Laboratories, Inc.

Address: 4625 Pembroke Lake Cir., Virginia Beach, VA 23455, Contact: Christie Buie, Phone: (804) 499-5050.

(19) *Laboratory:* Apex Environmental, Inc. (NIST).

Address: 7652 Standish Pl., Rockville, MD 20855, Contact: Frank G. Fitzpatrick, Phone: (301) 217-9200.

(20) *Laboratory:* Applied Environmental Health & Safety, Inc.

Address: Reston International Center, 11800 Sunrise Valley Dr., Suite 1230, Reston, VA 22091, Contact: Jana Ambrose, Phone: (703) 648-0822.

(21) *Laboratory:* Asbestos Testing, Inc., Industrial Hygienist.

Address: 5207 Noyes Ave., Charleston, WV 25304, Contact: John S. Ferrell, Phone: (304) 925-6795.

(22) *Laboratory:* BCM Engineers, Inc. (NIST).

Address: 5777 Baum Blvd., Pittsburg, PA 15206, Contact: David Nicoles, Phone: (412) 361-6000.

(23) *Laboratory:* BCM Lab Division (NIST).

Address: One Plymouth Meeting, Plymouth Meeting, PA 19462, Contact: John J. Tobin, Phone: (215) 825-3800.

(24) *Laboratory:* Batta Environmental Associates (NIST).

Address: P.O. Box 9722, Newark, DE 19711-9722, Contact: Steve Cahill, Phone: (302) 737-3376.

(25) *Laboratory:* Biospherics, Inc. (NIST).

Address: 12051 Indian Creek Ct., Beltsville, MD 20705, Contact: Len Burelli, Phone: (301) 369-3900.

(26) *Laboratory:* Blue Ridge Analytical (NIST).

Address: 202 Bishop Rd., Blacksburg, VA 24060, Contact: David Violette, Phone: (703) 951-9283.

(27) *Laboratory:* Briggs Associates, Inc. (NIST).

Address: 8300 Guilford Rd., Suite E, Columbia, MD 21046, Contact: J. Ross Voorhees, Phone: (301) 381-4434.

(28) *Laboratory:* Brujos Scientific, Inc.

Address: 505 Drury Ln., Baltimore, MD 21229, Contact: Robert Olcerst, Phone: (301) 566-0859.

(29) *Laboratory:* Camtech, Inc.

Address: McKnight-Ivory Bldg., 4550 McKnight Rd., Suite 202, Pittsburgh, PA 15237, Contact: Michael A. Campbell, Phone: (412) 931-1210.

(30) *Laboratory:* Commonwealth Laboratory, Inc.

Address: 1761 Huffman St., P.O. Box 1428, Harrisonburg, VA 22801, Contact: Edwin Cox, III, Phone: (804) 648-8358.

(31) *Laboratory:* Cumberland Analytical Labs., Inc., (NIST).

Address: 56 North Second St., Chambersburg, PA 17201, Contact: D. R. Richner, Jr., Phone: (717) 263-5943.

(32) *Laboratory:* Eagle Industrial Hygiene Association, Incorporated (NIST).

Address: 405 Masons Mill Rd., Huntingdon, PA 19006, Contact: Keith Crawford, Phone: (215) 657-2261.

(33) *Laboratory:* Enviro Dynamics, Inc., Occupational & Environmental Health, Consultants.

Address: 520 North Washington, Suite 300, Falls Church, VA 22046, Contact: Margaret Klekner, Phone: (703) 237-4237.

(34) *Laboratory:* Environmental Laboratories, Inc.

Address: 9211 Burge Ave., Richmond, VA 23237, Contact: Terry W. Hall, Phone: (804) 271-3440.

(35) *Laboratory:* Environmental Management Group, Inc.

Address: 9841 Broken Land Pkwy., Suite 117, Columbia, MD 21046, Contact: Patrick Thomas Connor, Phone: (301) 290-7078.

(36) *Laboratory:* FREE-COL Laboratories (NIST).

Address: Cotton Rd., P.O. Box 557, Meadville, PA 16335-0557, Contact: J. Richard Wohler, Phone: (814) 724-8242.

(37) *Laboratory:* Galson Technical Services, Inc. (NIST).

Address: 5170 Campus Dr., Suite 200, Plymouth Meeting, PA 19462, Contact: Debbie Field, Phone: (215) 834-7288.

(38) *Laboratory:* Gannett Fleming, Environmental Laboratory (NIST).

Address: 208 Senate Ave., Camp Hill, PA 17011, Contact: David W. Lane, Phone: (717) 763-7211.

(39) *Laboratory:* Geo-Environmental Services, Inc., (NIST), Maryland Division.

Address: 444 North Frederick Ave., Suite L148, Gaithersburg, MD 20877-2432, Contact: John T. Razzolini, Phone: (301) 353-0338.

(40) *Laboratory:* I-TEM, Ltd. (NIST).

Address: North Lake Commerce Center, 12850 Middlebrook Rd., P.O. Box 1060, Germantown, MD 20874, Contact: Jorge Rangel, Phone: (301) 353-0585.

(41) *Laboratory:* Industrial Hygiene & Occup. Med Lab, A Division of American Medical Lab., Inc.

Address: 11081 Main St., Fairfax, VA 22030, Contact: Jan Turner or Fred Grunder, Phone: (703) 691-9100.

(42) *Laboratory:* Interscience Research.

Address: 2614 Wyoming Ave., Norfolk, VA 23513, Contact: Joseph H. Guth, Phone: (804) 853-8813.

(43) *Laboratory:* JACA Corporation.

Address: 550 Pinetown Rd., Fort Washington, PA 19034, Contact: Gary Lester, Phone: (215) 643-5466.

(44) *Laboratory:* Lancaster Laboratories, Inc. (NIST).

Address: 2425 New Holland Ave., Lancaster, PA 17601, Contact: Barbara J. Weaver, Phone: (717) 656-2301.

(45) *Laboratory:* Lehigh Valley Analytics, Inc. (NIST).

Address: 60 West Broad St., Bethlehem, PA 18018, Contact: Barbara J. Davies, Phone: (215) 866-4434.

(46) *Laboratory:* MDS Laboratories (NIST).

Address: 4418 Pottsville Pike, Reading, PA 19605, Contact: Fred Usbeck, Phone: (215) 921-9191.

(47) *Laboratory:* Marine Chemist Service, Inc. (NIST).

Address: 11850 Tug Boat Ln., Newport News, VA 23606, Contact: Colleen Becker, Phone: (804) 873-0933.

(48) *Laboratory:* Medlab, Inc. (NIST).

Address: P.O. Box 2045, Wilmington, DE 19899, Contact: Sevag Sinanian, Phone: (302) 984-5764.

(49) *Laboratory:* Microlore, Inc.

Address: 2201A 22nd St., Nitro, WV 25143, Contact: Jon C. Pauley, Phone: (304) 343-2382.

(50) *Laboratory:* Mountaineer Testing Labs., Inc.

Address: P.O. Box 767, 425 North Jefferson, Lewisburg, WV 24901, Contact: Rob Dillon, Phone: (304) 645-7114.

(51) *Laboratory:* Occupational Medical Center Lab (NIST).

Address: 4451 Parliament Pl., Lanham, MD 20706, Contact: Christopher Beza, Phone: (301) 306-0632.

(52) *Laboratory:* Oneil M. Banks, Inc.

Address: 330 South Main St., Bel Air, MD 21014, Contact: Michelle L. Evans, Phone: (301) 879-4676.

(53) *Laboratory:* Pacific Environmental Services, Inc., (NIST).

Address: 11440 Isaac Newton Sq., Suite 205, Reston, VA 22090, Contact: John Mazur, Phone: (703) 471-8383.

(54) *Laboratory:* Paleozoic Hydrocarbon Industries, Asbestos Lab Division of PHI (NIST).

Address: 132 Oakwood Rd., Charleston, WV 25314, Contact: S. M. Spencer, Jr., Phone: (304) 342-6424.

(55) *Laboratory:* Peach Laboratories.

Address: P.O. Box 338, 5465 Route 8, Gibsonia, PA 15044, Contact: John M. Lang, Phone: (412) 443-9244.

(56) *Laboratory:* Penn Environmental Health.

Address: 301 South Lang Ave., Pittsburgh, PA 15208, Contact: Abbas Labbauf, Phone: (412) 241-5130.

(57) *Laboratory:* Pennrun Corporation.

Address: 150 William Pitt Way, Pittsburgh, PA 15238, Contact: Valerie McDonald, Phone: (412) 826-5304.

(58) *Laboratory:* Professional Service Ind., Inc. (NIST), Pittsburgh Testing Lab Division.

Address: 850 Poplar St., Pittsburgh, PA 15220, Contact: Bruce Erdner, Phone: (412) 922-4000.

(59) *Laboratory:* R.J. Lee Group (NIST).

Address: 350 Hochberg Rd., Monroeville, PA 15146, Contact: Willian. H. Powers, Phone: (412) 325-1776.

(60) *Laboratory:* R.J. Lee Group (NIST).

Address: 10306 Battleview Pkwy., Manassas, VA 22110, Contact: Tom Dagenhart, Phone: (703) 368-7880.

(61) *Laboratory:* SSI Environmental Consultants (NIST).

Address: Expressway Pk., Gulf Lab Rd. - Harmarville, Pittsburgh, PA 15238, Contact: George M. Beck, Phone: (412) 828-9210.

(62) *Laboratory:* Schneider Laboratories, Inc. (NIST).

Address: 1427 West Main St., Richmond, VA 23220-4829, Contact: Richard F. Schneider, Phone: (804) 353-6778.

(63) *Laboratory:* Scientific & Environmental Analytical, Svcs, Inc. (SEAS) (NIST).

Address: 202 Bishop Rd., Blacksburg, VA 23220, Contact: David Violette, Phone: (703) 951-9283.

(64) *Laboratory:* Spotts, Stevens, & McCoy (NIST).

Address: 345 North Wyomissing Blvd., Wyomissing, PA 19610, Contact: Spencer R. Watts, Phone: (215) 376-6581.

(65) *Laboratory:* Structure Probe, Inc.

Address: 535 East Gay St., West Chester, PA 19380, Contact: Kim Royer, Phone: (215) 436-5400.

(66) *Laboratory:* Tracor Jitco, Inc. (NIST), Asbestos Technology Center.

Address: 1601 Research Blvd., Rockville, MD 20850, Contact: Michael L. Edwards, Phone: (301) 984-2722.

(67) *Laboratory:* Versar, Inc. (NIST).

Address: 6850 Versar Center, Springfield, VA 22151, Contact: Robert Maxfield, Phone: (703) 642-6755.

(68) *Laboratory:* Volz Environmental Services (NIST).

Address: 3610 William Pitt Way, Pittsburgh, PA 15238, Contact: George J. Skarupa, Phone: (412) 826-3150.

(69) *Laboratory:* Washington Analytical Lab of VA, Inc., (Mobile Unit).

Address: 4238 Lafayette Center Dr., Chantilly, VA 22021, Contact: Hugh Granger, Phone: (703) 631-6870.

(70) *Laboratory:* Washington Analytical Laboratory, Inc., (NIST).

Address: 4238 Lafayette Center Dr., Chantilly, VA 22021, Contact: R. Hugh Granger, Phone: (703) 631-6868.

(71) *Laboratory:* Wright Lab Services, Inc. (NIST).

Address: 34 Dogwood Ln., Middletown, PA 17057, Contact: Francine Walker, Phone: (717) 944-5541.

EPA Accredited Commercial PLM Laboratories

REGION IV—Atlanta, GA

Regional Asbestos Coordinator: Liz Wilde, EPA, Region IV, 345 Courtland St., NE, (4APT-PT), Atlanta, GA 30365. (404) 347-5014, (FTS) 257-5014.

Charles C. Evans, Phone: (305) 858-7458.

(41) *Laboratory:* Fiber Lab, Inc. (NIST).

Address: P.O. Box 36728, Birmingham, AL 35236, Contact: Suzanne Wdowiak, Phone: (205) 822-6544.

(42) *Laboratory:* GSC Environmental Laboratories, Inc., (NIST).

Address: 1824 Bi Wylds Rd., Augusta, GA 30909, Contact: William J. Horning, Phone: (404) 737-0185.

(43) *Laboratory:* Geo-Environmental Services, Inc., (NIST).

Address: 141 West Wieuca Rd., Suite 200A, Atlanta, GA 30342, Contact: Susan Harper, Phone: (404) 257-9303.

(44) *Laboratory:* Harmon Engineering Associates, Inc., (NIST).

Address: 1550 Pumphrey Ave., Auburn, AL 36830-4399, Contact: Roger Thompson, Phone: (205) 821-9250.

(45) *Laboratory:* Health & Hygiene, Inc. (NIST).

Address: 4605-E Dundas Dr., Greensboro, NC 27407, Contact: Sharon P. Lonon, Phone: (919) 854-2303.

(46) *Laboratory:* Hunter Services, Inc.

Address: P.O. Box 1703, Gainesville, FL 32602-1703, Contact: John J. Mousa, Phone: (904) 332-3318.

(47) *Laboratory:* International Abatement Management, Inc. (NIST).

Address: 550 North Reo St., Suite 300, Tampa, FL 33609, Contact: Robert B. Greene, Phone: (813) 287-5100.

(48) *Laboratory:* KNL Laboratory Services (NIST).

Address: P.O. Box 1633, Tampa, FL 33601, Contact: Garrett J. McGibbon, Phone: (813) 229-2879.

(49) *Laboratory:* Larron Laboratory.

Address: 711 Broadway, Mayfield, KY 42066, Contact: Daniel Roth, Phone: (502) 247-6982.

(50) *Laboratory:* Laseter and Associates, Inc.

Address: P.O. Box 176, Collierville, TN 38107, Contact: Kenneth Laseter, Phone: (901) 853-0400.

(51) *Laboratory:* Law Associates, Inc. (NIST).

Address: 1386 Mayson St., Atlanta, GA 30324, Contact: Greg Lewars, Phone: (404) 892-3200.

(52) *Laboratory:* Law Engineering (NIST).

Address: 4919 West Laurel St., P.O. Box 24183, Tampa, FL 33623, Contact: Susan K. Gossett, Phone: (813) 879-0750.

(53) *Laboratory:* Law Engineering Testing Co. (NIST).

Address: 501 Minuet Ln., P.O. Box 11297, Charlotte, NC 28220, Contact: R. Glenn Craig, Phone: (704) 523-2022.

(54) *Laboratory:* Law Engineering, Inc. (NIST).

Address: 3608 7th Ct., S, P.O. Box 10244, Birmingham, AL 35202, Contact: R. Michael Hamilton, Phone: (205) 252-9901.

(55) *Laboratory:* Materials Analytical Services, Inc., (NIST).

Address: 3597 Parkway Ln., Suite 250, Norcross, GA 30092, Contact: William Longo, Phone: (404) 448-3200.

(56) *Laboratory:* McCrone Environmental Services, Inc., (NIST).

Address: 1412 Oakbrook Dr., Suite 100, Norcross, GA 30093, Contact: Harriotte A. Hurley, Phone: (404) 368-9600.

(57) *Laboratory:* Metro Services Laboratory (NIST), Asbestos Control Division.

Address: 6309 Fern Valley Pass, Louisville, KY 40228, Contact: J. Daniel Cooper, Phone: (502) 964-0865.

(58) *Laboratory:* Micro Analytical Laboratories, Inc., (NIST).

Address: 3618 Northwest 97th Blvd., Gainesville, FL 32606, Contact: Robert Longo, Phone: (904) 332-1701.

(59) *Laboratory:* Micro-methods, Inc. (NIST).

Address: 6500 Sunplex, Ocean Springs, MS 39564, Contact: Thomas J. Wilson, Phone: (601) 875-6420.

(60) *Laboratory:* Northrop Services, Inc. (NIST).

Address: P.O. Box 12313, RTP, NC 27709-2313, Contact: James A. Jahnke, Phone: (919) 549-0611.

(61) *Laboratory:* Pace Laboratories, Inc. (NIST).

Address: 5460 Beaumont Center Blvd., Tampa, FL 33634, Contact: Timothy M. Odell, Phone: (813) 884-8268.

(62) *Laboratory:* Pensacola P.O.C. , Inc. (NIST).

Address: 109 South 2nd St., Pensacola, FL 32507, Contact: Barbara Sviglin, Phone: (904) 456-4406.

(63) *Laboratory:* Phoenix Environmental Labs, Division of P.D.R. Engineers, Inc.

Address: 2000 Lindell Ave., Nashville, TN 37203, Contact: A.K. Upadhyaya, Phone: (615) 298-2065.

(64) *Laboratory:* Professional Contract Services, Inc., (NIST).

Address: P.O. Box 2605, Opelika, AL 36803-2605, Contact: Marsha Schnurrenberger, Phone: (205) 749-2636.

(65) *Laboratory:* Professional Service Ind., Inc. (NIST), PTL/Arribas Division.

Address: 3901 Northwest 29th Ave., Miami, FL 33142, Contact: Mary E. Hamel, Phone: (305) 633-7555.

(66) *Laboratory:* Quality Analytical Services, Inc., (NIST).

Address: 703 West Johnson St., Raleigh, NC 27603, Contact: Eloise Sheats, Phone: (919) 839-0757.

(67) *Laboratory:* R3 Enterprises.

Address: 630 Edgewater Club Rd., Wilmington, NC 28405, Contact: Richard Spivey, Phone: (919) 686-0242.

(68) *Laboratory:* Roberts Environmental Services (NIST), MAKO Office Complex.

Address: Highway 24 E., Swansboro, NC 28584, Contact: H. Dan Roberts, Phone: (919) 393-6565.

(69) *Laboratory:* S&ME Industrial Technologies, Inc.

Address: 5909 Breckenridge Pkwy., Suite B, Tampa, FL 33610, Contact: John J. Henderson, Phone: (813) 623-2436.

(70) *Laboratory:* S&ME Industrial Technologies, Inc., (NIST).

Address: 3980 Dekalb Technology Pkwy., Suite 700, Atlanta, GA 30340, Contact: Clint Gilbert, Phone: (404) 452-1911.

(71) *Laboratory:* S&ME Industrial Technologies, Inc., (NIST).

Address: 840 Low Country Blvd., Mt. Pleasant, SC 29464, Contact: Nina G. Marshtein, Phone: (803) 884-0005.

(72) *Laboratory:* Safety Underwriters Laboratory (NIST).

Address: P.O. Box 20094, Birmingham, AL 35216, Contact: Rebecca Hicks, Phone: (205) 822-3727.

(73) *Laboratory:* Schweiger and Associates (NIST).

Address: 2022 Powers Ferry Rd., Suite 180, 4M, Marietta, GA 30339, Contact: Patrick J. Schweiger, Phone: (404) 988-9250.

(74) *Laboratory:* Soil & Material Engineers (NIST).

Address: 9800-D Southern Pines Blvd., P.O. Box 7668, Charlotte, NC 28217, Contact: Terry Liles, Phone: (704) 523-8910.

(75) *Laboratory:* Southeastern Marine Chemists, Inc., (NIST), Southeastern Chemists' Laboratories.

Address: P.O. Box 8917, Jacksonville, FL 32239, Contact: Joseph W. Newton, Phone: (904) 725-2040.

(76) *Laboratory:* Specialized Assays (NIST).

Address: 210 12th Ave., S., P.O. Box 25110, Nashville, TN 37202, Contact: Kay Williams-Smith, Phone: (615) 255-5786.

(77) *Laboratory:* TEI Environmental, Inc. (NIST).

Address: 308A Pomona Dr., Greensboro, NC 27407, Contact: James Buchanan, Phone: (919) 852-0318.

(78) *Laboratory:* TTL, Inc. (NIST).

Address: 3516 Greensboro Ave., P.O. Box 1094, Tuscaloosa, AL 35403, Contact: Jack E. Davis, Phone: (205) 345-0816.

(79) *Laboratory:* Testwell Craig Laboratories of, Florida, Inc. (NIST).

Address: 7104 Northwest 51st St., Miami, FL 33166, Contact: Robert Schuler, Phone: (305) 593-0561.

(80) *Laboratory:* Thornton Laboratories, Inc. (NIST).

Address: 1145 East Cass St., Tampa, FL 33602, Contact: Laure Taylor, Phone: (813) 223-9702.

(81) *Laboratory:* Weston-ATC, Inc. (NIST).

Address: 1635 Pumphrey Ave., Auburn, AL 36830-4303, Contact: Leonard Nelms, Phone: (205) 826-6100.

(82) *Laboratory:* Weston-ATC Mobile Facility (NIST).

Address: 1635 Pumphrey Ave., Auburn, AL 36830, Contact: Leonard H. Nelms, Phone: (205) 826-6100.

EPA Accredited Commercial PLM Laboratories

REGION V – Chicago, IL

Regional Asbestos Coordinator: Anthony Restaino, EPA, Region V, 230 S. Dearborn St., (5-SPT-7), Chicago, IL 60604. (312) 886-6003, (FTS) 886-6003.

(1) *Laboratory:* ABS Environmental Labs, Inc. (NIST).

Address: 605 Brookside, Frankfurt, IL 60423, Contact: Arlene B. Smith, Phone: (815) 469-4464.

(2) *Laboratory:* ALEX (NIST).

Address: 485 Frontage Rd., Burr Ridge, IL 60521, Contact: Erol Roth, Phone: (312) 789-6060.

(3) *Laboratory:* ATEC Associates, Inc. (NIST).

Address: 1501 East Main St., Griffith, IN 46319, Contact: Roger S. Berkowitz, Phone: (219) 924-6690.

(4) *Laboratory:* ATEC Associates, Inc. (NIST).

Address: 5150 East 65th St, Indianapolis, IN 46220-4871, Contact: Richard A. Gehlbach, Phone: (317) 849-4990.

(5) *Laboratory:* Affiliated Environmental Services, Inc. (NIST).

Address: 3806 Venice Rd., Sandusky, OH 44870, Contact: Don Dauch, Phone: (419) 627-1974.

(6) *Laboratory:* Air Quality Testing (NIST).

Address: 236 South Washington St., Naperville, IL 60540, Contact: J.D. Stubblefield, Phone: (312) 969-4010.

(7) *Laboratory:* Air Quality Testing, Inc. (NIST).

Address: 1630 Fifth Ave., Suite 541, Moline, IL 61265, Contact: Gerald Hofferth, Phone: (309) 762-1998.

(8) *Laboratory:* Aires Environmental Services.

Address: 1550 Hubbard, Batavia, IL 60510, Contact: Cynthia Darling, Phone: (312) 879-3006.

(9) *Laboratory:* AirTech Associates, Inc. (NIST).

Address: 4100 Madison, Lower Level, Suite 4, Hillside, IL 60162, Contact: Mark Watka or Anne Czechorski, Phone: (312) 547-8117.

(10) *Laboratory:* Alderink & Associates, Inc. (NIST).

Address: 3221 3 Mile Rd., Grand Rapids, MI 49504, Contact: Carol J. Paxhia, Phone: (616) 791-0730.

(11) *Laboratory:* Alloway Testing (NIST).

Address: 1325 North Cole St., Lima, OH 45801-3415, Contact: John R. Hoffman, Phone: (419) 223-1362.

(12) *Laboratory:* American Analytical Laboratories, (NIST).

Address: 100 Lincoln St., Akron, OH 44308, Contact: Richard E. Moore, Phone: (216) 535-1300.

(13) *Laboratory:* Anesbestics Co. (NIST).

Address: 7206 West 90th Pl., Bridgeview, IL 60455, Contact: Gary Kentgen, Phone: (312) 598-2921.

(14) *Laboratory:* Applied Environmental Sciences, Inc., (NIST).

Address: 511 11th Ave. S, Box 220, Minneapolis, MN 55415, Contact: Patrick DiBartolomeo, Phone: (612) 339-5559.

(15) *Laboratory:* Asbestos Compliance Technology, Inc., (NIST).

Address: 5353 Tacoma Ave., Indianapolis, IN 46220, Contact: Virgil J. Konopinski, Phone: (317) 257-5096.

(16) *Laboratory:* Asbestos Compliance Technology, Inc., (NIST).

Address: 4015 Cherry St., Cincinnati, OH 45223, Contact: Tina Schmalz, Phone: (513) 542-4040.

(17) *Laboratory:* Asbestos Control Methods, Inc. (NIST).

Address: 2010 South Carboy Rd., Mount Prospect, IL 60056, Contact: Jeffrey Camplin, Phone: (312) 437-7999.

(18) *Laboratory:* Asbestos Management, Inc. (NIST).

Address: 36700 South Huron St., Suite 104, New Boston, MI 48164, Contact: D. Rex Bleeker, Phone: (313) 961-6135.

(19) *Laboratory:* BCA Laboratory (NIST).

Address: 1102 South Main, Bloomington, IL 61701, Contact: Kurt Benckendorf, Phone: (309) 828-7772.

(20) *Laboratory:* BDN Industrial Hygiene Consultants.

Address: 8105 Valleywood Ln., Portage, MI 49002, Contact: Scott McFarland, Phone: (616) 329-1237.

(21) *Laboratory:* Badger Labs. & Eng. Co., Inc.

Address: 1110 South Oneida St., Appleton, WI 54915, Contact: Stephen C. Taylor, Phone: (414) 739-9213.

(22) *Laboratory:* Beling Consultants, Inc. (NIST).

Address: 1001-16th St., Moline, IL 61265, Contact: Jeffrey A. Wasson, Phone: (309) 757-9800.

(23) *Laboratory:* Bowser-Morner Testing Laboratories, Inc.

Address: 420 Davis Ave., P.O. Box 51, Dayton, OH 45403, Contact: Mark A. Bingman, Phone: (513) 253-8805.

(24) *Laboratory:* Braun Environmental Laboratories, (NIST).

Address: 6800 South Country Rd. 18, P.O. Box 35108, Minneapolis, MN 55435-0108, Contact: Lisa A. Fournelle-Smestad, Phone: (612) 941-5600.

(25) *Laboratory:* Bruce Menkel & Associates, Inc. (NIST).

Address: 235 Industrial Dr., P.O. Box 159, Franklin, OH 45005, Contact: Bruce Menkel, Phone: (513) 746-9300.

(26) *Laboratory:* C.G. Technologies, Inc. (NIST).

Address: 585 Science Dr., Suite B, Madison, WI 53711, Contact: Carol Gannon, Phone: (608) 238-7611.

(27) *Laboratory:* CAE Asbestos (NIST).

Address: 207 North Woodwork Ln., Palatine, IL 60067, Contact: Paul A. Evansky, Jr., Phone: (312) 991-3300.

(28) *Laboratory:* CENCON (CNA Insurance) (NIST).

Address: 333 South Wabash - 3W, Chicago, IL 60604, Contact: Ellen Janka, Phone: (312) 822-6093.

(29) *Laboratory:* Carnow, Conibear and Associates, Ltd., (NIST).

Address: 333 West Wacker Dr., 14th Fl., Chicago, IL 60606, Contact: Steve Wolf, Phone: (312) 782-4486.

(30) *Laboratory:* Chem-Bio Corporation (NIST).

Address: 140 East Ryan Rd., Oak Creek, WI 53154, Contact: Robert F. Lipo, Phone: (414) 764-7870.

(31) *Laboratory:* Clayton Environmental Consultants, Inc. (NIST).

Address: 22345 Roethel Dr., Novi, MI 48050, Contact: Bob Lieckfield, Phone: (313) 344-1770.

(32) *Laboratory:* Cole Associates, Inc. (NIST).

Address: 2211 East Jefferson Blvd., South Bend, IN 46615, Contact: Lawrence W. Grauvogel, Phone: (219) 236-4400.

(33) *Laboratory:* Daily Analytical Laboratories (NIST).

Address: 1621 West Candletree Dr., Peoria, IL 61614, Contact: Susan J. Naschert, Phone: (309) 692-5252.

(34) *Laboratory:* Daniel J. Hartwig Associates, Inc., Director, Industrial Hygiene Services.

Address: P.O. Box 31, Oregon, WI 53575, Contact: David T. Killough, Phone: (608) 835-5781.

(35) *Laboratory:* DataChem, Inc. (NIST).

Address: 4388 Glendale-Milford Rd., Cincinnati, OH 45242, Contact: Charles L. Geraci, Phone: (513) 733-5336.

(36) *Laboratory:* DeLisle Consulting & Laboratories, Inc. (NIST).

Address: 6946 East North Ave., Kalamazoo, MI 49001, Contact: Brad Shook, Phone: (616) 343-9698.

(37) *Laboratory:* DeYor Laboratories, Inc. (NIST).

Address: P.O. Box 3949, 7655 Market St., Suite 2500, Youngstown, OH 44512, Contact: Joseph K. Samuels, Phone: (216) 758-5788.

(38) *Laboratory:* EIS Environmental Engineers, Inc., (NIST).

Address: 1701 North Ironwood Dr., South Bend, IN 46635, Contact: H. Stephen Nye, Phone: (219) 277-5715.

(39) *Laboratory:* ERT Testing Services, Inc. (NIST).

Address: D.O.H. Professional Bldg., 211 Glendale, Suite 425, Highland Park, MI 48203, Contact: Rose M. Grier, Phone: (313) 865-0600.

(40) *Laboratory:* Electro Analytical, Inc. (NIST).

Address: 7118 Industrial Park Blvd., Mentor, OH 44060-5377, Contact: Mitchell E. Fadem, Phone: (216) 951-3514.

(41) *Laboratory:* Environmental Analytical Labs (NIST).

Address: 314 South State Ave., Indianapolis, IN 46201, Contact: David W. Hogue, Phone: (317) 269-3618.

(42) *Laboratory:* Environmental Consultants, Inc. (NIST).

Address: 1916 North 12th St., Toledo, OH 43624, Contact: Donald Dick, Phone: (419) 241-7127.

(43) *Laboratory:* Environmental Enterprises, Inc., (NIST).

Address: 10147 Springfield Pike, Cincinnati, OH 45215, Contact: Wayne L. Collier, Phone: (513) 772-2818.

(44) *Laboratory:* Environmental Evaluation & Laboratory, Services, Inc. (NIST).

Address: 225 Parsons St., P.O. Box 1665, Kalamazoo, MI 49005, Contact: A. Clark Kahn, III, Phone: (616) 388-8099.

(45) *Laboratory:* Environmental Services, Inc.

Address: 1403 Sunset Ter., Western Springs, IL 60558, Contact: Nicholas Malone, Phone: (312) 246-2040.

(46) *Laboratory:* Esstek, Inc. (NIST).

Address: 17960 Englewood Dr., Middleburg Heights, OH 44130, Contact: Scott F. Linville, Phone: (216) 826-4220.

(47) *Laboratory:* Fay Goldblatt Laboratories, Inc., (NIST).

Address: 2111 Parkview Ct., Wilmette, IL 60091, Contact: Fay Goldblatt, Phone: (800) 356-0269.

(48) *Laboratory:* Fibertec, Inc.

Address: 808 West Lake Lansing Rd., Suite 206, East Lansing, MI 48823, Contact: Matthew H. Frisch, Phone: (517) 351-0345.

(49) *Laboratory:* Gabriel Laboratories, Inc. (NIST).

Address: 1421 North Elston Ave., Chicago, IL 60622, Contact: Chris Rollins, Phone: (312) 486-2123.

(50) *Laboratory:* Gelles Laboratories (NIST).

Address: 2836 Fisher Rd., Columbus, OH 43204, Contact: S.H. Gelles, Phone: (614) 276-2957.

(51) *Laboratory:* Hayden Environmental Group, Inc., (NIST).

Address: 6015 Manning Rd., Miamisburg, OH 45342, Contact: Davia Robinson, Phone: (513) 866-5906.

(52) *Laboratory:* Hazardous Materials Management, Inc.

Address: 2517 Seiferth Rd., Madison, WI 53716, Contact: David Lawrence, Phone: (608) 221-4027.

(53) *Laboratory:* Howard Laboratories, Inc.

Address: 3601 South Dixie Dr., Dayton, OH 45439, Contact: Jackie Webster, Phone: (513) 294-6856.

(54) *Laboratory:* IHI Kemron Environmental Services, (NIST).

Address: 32740 North Western Hwy., Farmington Hills, MI 48018, Contact: Charles O'Bryan, Phone: (313) 626-2426.

(55) *Laboratory:* IIT Research Institute.

Address: 10 West 35th St., Chicago, IL 60616, Contact: Jean Graf, Phone: (312) 567-4286.

(56) *Laboratory:* ITL/Bascor (NIST).

Address: 5960 North Milwaukee Ave., Chicago, IL 60646, Contact: Joby H. Burman, Phone: (312) 792-2454.

(57) *Laboratory:* Industrial Environmental Consultants, (NIST).

Address: 1760 East Grand River, East Lansing, MI 48823, Contact: Teresa Kenyon, Phone: (517) 351-4002.

(58) *Laboratory:* Institute for Environmental Assessment, (NIST).

Address: 2829 Verndale Ave., Anoka, MN 55303, Contact: Richard T. Cox, Phone: (612) 427-5310.

(59) *Laboratory:* John Mathes & Assoc., Inc. (NIST).

Address: 210 West Sand Bank Rd., P.O. Box 330, Columbia, IL 62236-0330, Contact: David H. Ward, Phone: (618) 281-7173.

(60) *Laboratory:* Lyle Laboratories.

Address: 1327 King Ave., Columbus, OH 43212, Contact: Tom Eggers, Phone: (614) 488-1022.

(61) *Laboratory:* Martin Marietta Energy Systems, Inc.

Address: Portsmouth Gaseous Diffusion Plant, P.O. Box 628, Piketon, OH 45661, Contact: David Boyd, Phone: (614) 289-2331.

(62) *Laboratory:* Materials Testing Consultants, Inc.

Address: 693 Plymouth NE, Grand Rapids, MI 49505, Contact: Judson N. Sorensen, Phone: (616) 456-5469.

(63) *Laboratory:* Micro Air, Inc./Mobile Lab (NIST).

Address: 7132 Lakeview Pkwy. West Dr., Indianapolis, IN 46268, Contact: Harold Eitzen, Phone: (317) 293-1533.

(64) *Laboratory:* Microbac Laboratories, Inc., Seaway Industrial Laboratory, Subsidiary.

Address: 542-544 Conkey St., Hammond, IN 46324, Contact: Karen A. Erny, Phone: (219) 932-1770.

(65) *Laboratory:* Micro-Fiber Laboratories, Inc. (NIST).

Address: 635 Landwehr Rd., Northbrook, IL 60062, Contact: Phillip G. Pekron, Phone: (312) 498-4127.

(66) *Laboratory:* MicroView Consulting (NIST).

Address: 416 East Catawba Ave., Akron, OH 44301, Contact: Frank S. Karl, Phone: (216) 773-8330.

(67) *Laboratory:* Monarch Analytical Laboratories, Inc., (NIST).

Address: P.O. Box 2990, Toledo, OH 43606, Contact: Ronald J. Plenzler, Phone: (419) 535-1780.

(68) *Laboratory:* NATLSCO K-2.

Address: Rte. 22 & Kemper Dr., Long Grove, IL 60049, Contact: Joan Wronski, Phone: (312) 540-2488.

(69) *Laboratory:* National Petrographic Services, (NIST).

Address: 4484 Willowbrook Rd., Columbus, OH 43220, Contact: Bonnie Awan, Phone: (614) 459-7360.

(70) *Laboratory:* Northern Indiana Public Services, Company.

Address: 501 Bailly Station Rd., Performance Services- Central Lab, Chesterton, IN 46304, Contact: Steven L. Barnes, Phone: (219) 787-7205.

(71) *Laboratory:* Northland Environmental Services, Inc., (NIST).

Address: P.O. Box 909, Stevens Point, WI 54481, Contact: Robert C. Voborsky, Phone: (715) 341-9699.

(72) *Laboratory:* Nova Environmental Services, Inc., (NIST).

Address: 1107 Hazeltine Blvd., Suite 420, Hazeltine Gates, Chaska, MN 55318, Contact: Steven B. Cummings, Phone: (612) 448-9393.

(73) *Laboratory:* Ohio Department of Health, Division of Laboratories.

Address: 1571 Perry St., Box 2568, Columbus, OH 43266-0068, Contact: Elizabeth Clark, Phone: (614) 421-1078.

(74) *Laboratory:* P.A.T. Services (NIST).

Address: 508 NE Monroe, Peoria, IL 61603, Contact: Cheryl McGuinnis, Phone: (309) 673-5919.

(75) *Laboratory:* PEI Associates, Inc. (NIST).

Address: 11499 Chester Rd., Cincinnati, OH 45246, Contact: Craig Caldwell, Phone: (513) 782-4700.

(76) *Laboratory:* Pace Laboratories, Inc. (NIST).

Address: 1710 Douglas Dr., N., Minneapolis, MN 55422, Contact: Tom L. Haverson, Phone: (612) 544-5543.

(77) *Laboratory:* Parkland Labs (NIST).

Address: 2935 ClearLake Ave., Springfield, IL 62702, Contact: Harry Stowers, Phone: (217) 525-2935.

(78) *Laboratory:* Particle Data Laboratories, Ltd.

Address: 115 Hahn St., Elmhurst, IL 60126, Contact: Ron Sturm, Phone: (312) 832-5658.

(79) *Laboratory:* Pro-Ac Asbestos Services.

Address: 5736 Tri-County Hwy., Sardinia, OH 45171, Contact: Fred Schmalz, Phone: (513) 542-8708.

(80) *Laboratory:* RCM Laboratories (NIST).

Address: 4137 Blanchan, Brookfield, IL 60513, Contact: Collen Rifke, Phone: (312) 485-8600.

(81) *Laboratory:* Randolph & Associates, Inc. (NIST).

Address: 5440 North Cumberland Ave., Suite 111, Chicago, IL 60656, Contact: Bruce Stockmeier, Phone: (312) 693-6030.

(82) *Laboratory:* Randolph & Associates, Inc. (NIST).

Address: 6901 North Industrial Rd., Peoria, IL 61615, Contact: Kirk Sweetland, Phone: (309) 692-4422.

(83) *Laboratory:* Reed City Hopsital (NIST).

Address: 7665 Patterson Rd., P.O. Box 75, Reed City, MI 49677, Contact: James T. Reardon, Phone: (616) 832-3271.

(84) *Laboratory:* Ricerca, Inc. (NIST).

Address: 7528 Auburn Rd, P.O. Box 1000, Painesville, OH 44077-1000, Contact: William O. Butler, Phone: (216) 357-3300.

(85) *Laboratory:* S.E.A., Inc. (NIST).

Address: 7349 Worthington-Galena Rd., Columbus, OH 43085, Contact: Jami J. St. Clair, Phone: (614) 888-4160.

(86) *Laboratory:* Sea Earth & Air Environmental, Consultants, Inc. (NIST).

Address: 5787 North Lincoln Ave., Chicago, IL 60659, Contact: Barbera Carr, Phone: (312) 878-8337.

(87) *Laboratory:* Shaw Environmental Analytical, Laboratory.

Address: P.O. Box 608559, Chicago, IL 60660, Contact: Michael Shaw, Phone: (312) 973-4447.

(88) *Laboratory:* Sierra Analytical & Consulting, Services, Inc. (NIST).

Address: 307 N. 1st St., Ann Arbor, MI 48103, Contact: Dave Nelson, Phone: (313) 662-1155.

(89) *Laboratory:* Stat Analysis Corporation (NIST).

Address: 2201 West Campbell Park Dr., Chicago, IL 60612-3501, Contact: David E. Schwartz, Phone: (312) 733-0551.

(90) *Laboratory:* Stilson Laboratories, Inc. (NIST).

Address: 170 North High St., Columbus, OH 43215, Contact: W. Martin Bell, Phone: (614) 228-4385.

(91) *Laboratory:* Suburban Environmental Consultants, Ltd. (NIST).

Address: 18031 Dixie Hwy., Homewood, IL 60430, Contact: Henry G. Gooday, Jr., Phone: (312) 335-1808.

(92) *Laboratory:* TEM, Inc. (NIST).

Address: 443 Duane St., Glen Ellyn, IL 60137, Contact: James Tuinenga, Phone: (312) 790-0880.

(93) *Laboratory:* Testing Engineers & Consultants, Inc., (NIST).

Address: 933 West Jolly Rd., Lansing, MI 48909, Contact: James Hollenbeck, Phone: (517) 887-0628.

(94) *Laboratory:* Testing Engineers & Consultants, Inc., (NIST).

Address: 3816 Carpenter Rd., Pittsfield Township, MI 48197, Contact: Dawn Brennan, Phone: (313) 971-0030.

(95) *Laboratory:* Testing Engineers and Consultants, Inc. (NIST).

Address: P.O. Box 249, 1333 Rochester Rd., Troy, MI 48099, Contact: Scott Chandler, Phone: (313) 588-6200.

(96) *Laboratory:* Thermo Analytical, Inc. (NIST).

Address: 7314 West 90th St., Bridgeview, IL 60455, Contact: Frank P. DeFranza, Phone: (312) 430-1112.

(97) *Laboratory:* Tremco (NIST).

Address: 10701 Shaker Blvd., Cleveland, OH 44104, Contact: Charles J. Kalocz1, Phone: (216) 292-5000.

(98) *Laboratory:* Tri-State Laboratories, Dept. of Environmental Services, (NIST).

Address: 19 East Front St., Youngstown, OH 44503, Contact: Bari Lateef, Phone: (216) 746-8800.

(99) *Laboratory:* Twin City Testing Corporation (NIST).

Address: 662 Cromwell Ave., St. Paul, MN 55114, Contact: Wallace J. Nosek, Jr., Phone: (612) 645-3601.

(100) *Laboratory:* United Analytical Services, Inc., (NIST).

Address: 4410 West Roosevelt Rd., Suite 101, Hillside, IL 60162, Contact: Patrick Fosnacht, Phone: (312) 449-0070.

(101) *Laboratory:* Wadsworth/Alert Laboratories (NIST).

Address: P.O. Box 31454, Cleveland, OH 44131, Contact: Douglas R. Allenson, Phone: (216) 642-9151.

(102) *Laboratory:* Walker & Ward (NIST).

Address: 9119 Formington Dr., P.O. Box 12015, Evansville, IN 47712, Contact: Roger Ward, Phone: (812) 985-7677.

(103) *Laboratory:* Wausau Insurance Companies, Environmental Health Laboratory, (NIST).

Address: 2000 Westwood Dr., Wausau, WI 54401, Contact: Thomas Stavros, Phone: (715) 842-6810.

(104) *Laboratory:* Wisconsin Occupational Health Labs, (NIST).

Address: 979 Jonathon Dr., Madison, WI 53711, Contact: Richard Zimmerman, Phone: (608) 263-8807.

(105) *Laboratory:* Zimmerlin Consulting Group (NIST).

Address: 3420 East 96th St., Suite A, Indianapolis, IN 46240, Contact: Daniel J. Smith, Phone: (317) 574-0848.

(106) *Laboratory:* Zimmerlin Consulting Group (NIST).

Address: 3972 Brown Park Dr., Suite D, P.O. Box 357, Hilliard, OH 43026-0357, Contact: William Zimmerlin, Phone: (614) 876-1153.

EPA Accredited Commercial PLM Laboratories

REGION VI – Dallas, TX

Regional Asbestos Coordinator: John West, 6T-PT, EPA, Region VI, 1445 Ross Avenue, Dallas, TX 75202-2733. (214) 655-7244, (FTS) 255-7244.

(1) *Laboratory:* A & B Environmental Services, Inc.

Address: 15371 Woodforest Blvd., Channelview, TX 77530, Contact: Ram Ramakrishnan, Phone: (713) 457-6608.

(2) *Laboratory:* ACI & Associates (NIST).

Address: 2100 Road to Six Flags E., Arlington, TX 76011, Contact: Michael J. Lee, Phone: (817) 265-7535.

(3) *Laboratory:* ATEC Associates, Inc. (NIST).

Address: 11356 Mathis Ave., Dallas, TX 75299-3157, Contact: Stephen D. Brandt, Phone: (214) 556-2204.

(4) *Laboratory:* Acadiana Research Laboratories, University of Southwestern Louisiana.

Address: P.O. Box 44210, Lafayette, LA 70504, Contact: Davy L. Bernard, Phone: (318) 231-6184.

(5) *Laboratory:* Aegis Associates - El Paso (NIST).

Address: 1280 Hawkins, Suite 120, El Paso, TX 79925, Contact: Fred Oriti, Phone: (915) 592-6556.

(6) *Laboratory:* Aegis Associates, Inc. (NIST).

Address: 44 East Ave., Suite 100/Suite 202, Austin, TX 78701-4334, Contact: Dianne Herrera, Phone: (512) 474-8789.

(7) *Laboratory:* Aer-Aqua Lab, Inc./ Accredited, Industrial Hygienists, Inc. (NIST).

Address: P.O. Box 6152, Pasadena, TX 77506, Contact: Mary Heisel, Phone: (713) 477-6101.

(8) *Laboratory:* Allied Environmental Services, Inc.

Address: 16023 I-10 E., No. 9, Channelview, TX 77530, Contact: Subba V. Gogineni, Phone: (713) 452-5897.

(9) *Laboratory:* Analytical Labs.

Address: 1010 Los Lomas NE, Albuquerque, NM 87106, Contact: Bob Dye, Phone: (505) 242-3845.

(10) *Laboratory:* Analytical Labs.

Address: 218 Market St., Baird, TX 79504, Contact: Bob Dye, Phone: (915) 854-1284.

(11) *Laboratory:* Arkansas Department of Health (NIST).

Address: 4815 West Markham St., Little Rock, AR 72205, Contact: Stan Faulk, Phone: (501) 661-2389.

(12) *Laboratory:* Assaigai Analytical Laboratories, (NIST).

Address: 7300 Jefferson, NE, Albuquerque, NM 87109, Contact: Dean Dupree, Phone: (505) 345-8964.

(13) *Laboratory:* Building Environmental Systems, Inc., (NIST).

Address: 3501 North MacArthur, Suite 400B, Irving, TX 75062, Contact: Amy L. Smith, Phone: (214) 257-0787.

(14) *Laboratory:* Central Analytical Laboratories, Inc., (NIST).

Address: 2800 Marietta Ave., Kenner, LA 70062, Contact: David R. Lasater, Phone: (504) 469-3511.

(15) *Laboratory:* Chemtex Environmental Laboratory.

Address: 1747 7th Ave., Port Arthur, TX 77642, Contact: C.N. Reddy, Phone: (409) 983-4575.

(16) *Laboratory:* Continental Technical Services, Environmental Health Division.

Address: 9742 Skillman, Dallas, TX 75243, Contact: Carolyn Vercell, Phone: (214) 343-2025.

(17) *Laboratory:* Diversified Environmental, Technologies, Inc. (NIST).

Address: 132 West Main, Norman, OK 73069, Contact: Dan Tutt, Phone: (405) 360-7929.

(18) *Laboratory:* E.O.S. Environmental (NIST).

Address: 1450 Empire Central, Suite 116, Dallas, TX 75247, Contact: Thomas J. Palet, Phone: (214) 631-0682.

(19) *Laboratory:* EEG, Inc. (NIST).

Address: 220A North Knoxville, Russellville, AR 72801, Contact: Anne Woker, Phone: (501) 968-6767.

(20) *Laboratory:* EIRA, Inc.

Address: 161 James Dr. W., St. Rose, LA 70087, Contact: Margaret Metcalf, Phone: (504) 469-0333.

(21) *Laboratory:* ERG Consultants, Inc. (NIST).

Address: 3019 Alvin Devane, No. 220, Austin, TX 78741, Contact: Kevin Selby, Phone: (817) 444-5804.

(22) *Laboratory:* Earth Tech, Inc.

Address: R.R. 4, Box 4, Wagoner, OK 74467, Contact: Daryl L. Lessin, Phone: (918) 485-4910.

(23) *Laboratory:* East Texas Testing Laboratory, Inc., (NIST).

Address: 1717 East Erwin, Tyler, TX 75702, Contact: Gary G. LaFrance, Phone: (214) 595-4421.

(24) *Laboratory:* Environmental Analysis, Inc.

Address: Rte. 1, Box 12, Plainview, AR 72857, Contact: Jimmy Cunningham, Phone: (501) 272-4241.

(25) *Laboratory:* Environmental Analytical Consultants.

Address: 432 North Anthony St., New Orleans, LA 70119, Contact: Michael J. Landry, Phone: (504) 482-1717.

(26) *Laboratory:* Environmental Consultants, Inc.

Address: P.O. Box 17867, Shreveport, LA 71138-0867, Contact: Rhonda L. Dillingham, Phone: (318) 687-3771.

(27) *Laboratory:* Environmental Management.

Address: 414 West California, Ruston, LA 71270, Contact: Kevin Thigpen, Phone: (318) 251-9101.

(28) *Laboratory:* Environmental Monitoring Service, Inc.

Address: 13008 Amarillo Ave., Austin, TX 78729, Contact: Rick Pruet, Phone: (512) 335-9116.

(29) *Laboratory:* Environmental Research Institute, Inc., (NIST).

Address: P.O. Box 2024, Tyler, TX 75710, Contact: Thomas R. McKee, Phone: (214) 877-9314.

(30) *Laboratory:* Environmental Services Co., Inc., (NIST).

Address: 13715 West Markham, Little Rock, AR 72211, Contact: James Brown, Phone: (501) 221-2565.

(31) *Laboratory:* Envirotest, Inc. (NIST).

Address: P.O. Box 42812-414, Houston, TX 77042, Contact: Daniel J. Gerhardt, Phone: (713) 782-4101.

(32) *Laboratory:* Geo-Environmental Services, Inc., (NIST), Austin Office.

Address: 3801 North Lamar, Suite 185E, Austin, TX 78752, Contact: John Johnson, Phone: (512) 454-5222.

(33) *Laboratory:* Gerald Garrett & Associates, Inc.

Address: 2720 Stemmons Frwy., Suite 805 S., Dallas, TX 75207, Contact: J. W. Knuckles, Phone: (214) 688-4457.

(34) *Laboratory:* Hanby Analytical Laboratories, Inc./, Mobile Unit (NIST).

Address: 4400 South Wayside St., Suite 107, Houston, TX 77087, Contact: John D. Hanby, Phone: (713) 649-4500.

(35) *Laboratory:* Huey, Martin, & Associates.

Address: 5613 Bruyninckx Rd., Alexandria, LA 71303, Contact: Ben F. Martin, Phone: (318) 473-6431.

(36) *Laboratory:* IHST.

Address: 6709 Parkside Ct., Arlington, TX 76016, Contact: Larry Liukonen, Phone: (817) 572-6336.

(37) *Laboratory:* Kemron Environmental Services (NIST).

Address: 16550 Highland Rd., Baton Rouge, LA 70810, Contact: Thomas Bauckham, Phone: (504) 293-8650.

(38) *Laboratory:* Kiser Engineering, Inc. (NIST).

Address: 211 North River St., Sequin, TX 78155, Contact: Rick Kirkpatrick, Phone: (800) 426-2102.

(39) *Laboratory:* Law Engineering Testing Co. (NIST).

Address: 5500 Guhn Rd., Houston, TX 77040, Contact: C. H. Byrd, Phone: (713) 939-7161.

(40) *Laboratory:* Loflin Environmental Services, Inc.

Address: 701 Bradfield, Houston, TX 77060, Contact: James A. Murray, Phone: (713) 931-9316.

(41) *Laboratory:* Marshall Environmental Management, (NIST).

Address: 3801 Northwest 63rd St., Suite 162, Oklahoma City, OK 73116, Contact: Charles L. Marshall, Phone: (405) 842-3415.

(42) *Laboratory:* Martin Marietta Manned Space Systems, Quality Evaluation Laboratory.

Address: P.O. Box 29304, New Orleans, LA 70189, Contact: Reginald G. Salloum, Phone: (504) 257-1766.

(43) *Laboratory:* Maxim Engineers, Inc. (NIST).

Address: 11601 North Lamar, Austin, TX 78753, Contact: Fernando Yepez, Phone: (512) 837-8851.

(44) *Laboratory:* Maxim Engineers, Inc. (NIST).

Address: 2342 Fabens, P.O. Box 59902, Dallas, TX 75229, Contact: Steve Moody, Phone: (214) 247-7575.

(45) *Laboratory:* McClelland Management Services (NIST).

Address: 6100 Hillcroft, Suite 220, Houston, TX 77081, Contact: Jaye R. Stanley, Phone: (713) 995-9000.

(46) *Laboratory:* McKee Environmental Health Services.

Address: 11114 Sage Park, Houston, TX 77089, Contact: Ron McKee, Phone: (713) 481-3501.

(47) *Laboratory:* Microanalysis Laboratory, Inc. (NIST).

Address: 8499 Greenville Ave., Suite 201, Dallas, TX 75231, Contact: Carolyn Jones, Phone: (214) 340-0890.

(48) *Laboratory:* NUS Corporation (NIST).

Address: 900 Gemini, Houston, TX 77058, Contact: John W. McCormick, Phone: (713) 488-1810.

(49) *Laboratory:* National Asbestos Consultants Inc.

Address: 4619 North Santa Fe, Oklahoma City, OK 73118, Contact: Jerry Bowerman, Phone: (405) 528-6224.

(50) *Laboratory:* New Mexico State University (NIST), Electron Microscope Laboratory.

Address: Box 3EML, Las Cruces, NM 88003, Contact: Joseph LaPointe, Phone: (505) 646-3734.

(51) *Laboratory:* North American Analytical Labs (NIST).

Address: 4405 Crawford St., Abilene, TX 79605, Contact: Gene Walker, Phone: (915) 691-0172.

(52) *Laboratory:* Occupational Hygiene, (NIST).

Address: P.O. Box 181769, Dallas, TX 75218, Contact: Virginia Wheeler, Phone: (214) 324-3813.

(53) *Laboratory:* Occupational Safety & Health, Consultants, Inc. (NIST).

Address: 208 North Armstrong, Bixby, OK 74008, Contact: Jeffrey Jenkins, Phone: (918) 366-4834.

(54) *Laboratory:* Oklahoma State Department of Health, Special Hazard Division (NIST).

Address: P.O. Box 53551, Oklahoma City, OK 73152, Contact: John M. Feero, Phone: (405) 271-5221.

(55) *Laboratory:* Oxford Environmental Corp.

Address: 3224 26th St., Metairie, LA 70002, Contact: J. Robert Paterek, Phone: (504) 391-0795.

(56) *Laboratory:* P.E.I. Microanalysis Laboratory D/FW, (NIST).

Address: P.O. Box 612383 (Trailer No. 12), D/FW Airport, TX 75261, Contact: Neal Sizemore, Phone: (214) 574-1700.

(57) *Laboratory:* Precision Testing Labs, Inc. (NIST).

Address: 624 Northwest 5th St., Suite 2, Moore, OK 73160, Contact: Ferry Doyle, Phone: (405) 793-1468.

(58) *Laboratory:* Professional Laboratories.

Address: 1105 13th St., Lubbock, TX 79401, Contact: Craig Tannahill, Phone: (806) 747-5681.

(59) *Laboratory:* Raba-Kistner Consultants, Inc. (NIST).

Address: P.O. Box 690287, San Antonio, TX 78269-0287, Contact: Frank B. Schweitzer, Phone: (512) 699-9090.

(60) *Laboratory:* Regional Testing Lab, Inc. (NIST).

Address: 318 West Chestnut, Suite 204, Denison, TX 75020, Contact: Cliff Wood, Phone: (214) 463-6668.

(61) *Laboratory:* Southwestern Laboratories, Inc.

Address: 2575 Lone Star Dr., Dallas, TX 75212, Contact: Lawrence M. Thompson, Phone: (214) 631-2700.

(62) *Laboratory:* Southwestern Laboratories, Inc., EES Division.

Address: P.O. Box 8768, Houston, TX 77249, Contact: Phillip Yokley, Phone: (713) 692-9151.

(63) *Laboratory:* Southwestern Public Service Co. (NIST), Systems Laboratory.

Address: P.O. Box 1261, Amarillo, TX 79170, Contact: Ronald H. Dutton, Phone: (806) 378-2121.

(64) *Laboratory:* Standard Testing & Eng. Co.

Address: 660 Distributors Row, Harahan, LA 70123, Contact: Robert E. Jones, Phone: (504) 734-8378.

(65) *Laboratory:* Standard Testing and Engineering Co.

Address: 3400 North Lincoln Blvd., Oklahoma City, OK 73105, Contact: Cheri Marcham, Phone: (405) 528-0541.

(66) *Laboratory:* Stanley Engineering Inc. & Alpha, Analytical Labs, Inc.

Address: 2700 Northwest 39th St., Oklahoma City, OK 73112, Contact: Keith L. Stanley, Phone: (405) 948-6505.

(67) *Laboratory:* Sunbelt Associates, Inc. (NIST).

Address: 6961 Mayo Rd., New Orleans, LA 70126, Contact: Gary C. Allen, Phone: (504) 242-5026.

(68) *Laboratory:* Technology Serving People, Inc. (NIST).

Address: 5373 West Alabama, Suite 450, Houston, TX 77056, Contact: Bill Hurt, Phone: (713) 621-9067.

(69) *Laboratory:* Texas Department of Health (NIST), Asbestos Abatement Branch.

Address: 1100 West 49th St., Austin, TX 78756-3199, Contact: Joel H. Smith, Phone: (512) 458-7255.

(70) *Laboratory:* Texas Research Institute (NIST), Environmental Division.

Address: 9063 Bee Cave Rd., Austin, TX 78733, Contact: Gary Rolls, Phone: (512) 263-2101.

(71) *Laboratory:* The Hartford Steam Boiler Laboratory, (NIST), Inspection & Insurance Co.

Address: 1100 North Post Oak No. 30, Suite 300, Houston, TX 77055, Contact: Diana Spence, Phone: (713) 578-7300.

(72) *Laboratory:* University of Texas, Health Center, (NIST) Dept. of Cell Biology &, Environmental Sciences.

Address: P.O. Box 2003, Tyler, TX 75710, Contact: Ronald Dodson, Phone: (214) 877-7554.

(73) *Laboratory:* Waldemar S. Nelso & Co., Inc. (NIST).

Address: 1200 St. Charles Ave., New Orleans, LA 70130, Contact: Laura E. Yager, Phone: (504) 523-5281.

(74) *Laboratory:* Weintritt Testing Laboratories, Inc., (NIST).

Address: 305 Andrew Guidry Rd., P.O. Box 30162, Lafayette, LA 70593, Contact: Richard G. Tietz, Phone: (318) 981-1500.

(75) *Laboratory:* West-Paine Laboratories, Inc.

Address: 7979 G.S.R.I. Ave., Baton Rouge, LA 70820, Contact: Jonny H. Vickers, Phone: (504) 769-4900.

EPA Accredited Commercial PLM Laboratories

REGION VII – Kansas City, KS

Regional Asbestos Coordinator: Wolfgang Brandner, EPA, Region VII, 726 Minnesota Ave., Kansas City, KS 66101. (913) 236-2835, (FTS) 757-2835.

(1) *Laboratory:* ACM Labs, Inc.

Address: 304 North Main, P.O. Box 2073, Fairfield, IA 52556, Contact: David Fleshman, Phone: (515) 472-7402.

(2) *Laboratory:* ALERT Analytical Laboratories (NIST).

Address: 1900 West 47th Pl., No. 302, Westwood, KS 66205, Contact: Kevin Santee, Phone: (913) 831-4795.

(3) *Laboratory:* Ames Environmental (NIST).

Address: 3910 Lincoln Way, Ames, IA 50010, Contact: David Fairchild, Phone: (515) 292-3400.

(4) *Laboratory:* Asbestos Consulting & Testing (NIST).

Address: 15001 West 101st Ter., Lenexa, KS 66215, Contact: Jim A. Pickel, Phone: (913) 492-1337.

(5) *Laboratory:* Baird Scientific (NIST).

Address: P.O. Box 842, Carthage, MO 64836, Contact: Gary Baird, Phone: (417) 358-5567.

(6) *Laboratory:* CHART Services, Ltd. (NIST).

Address: 4725 Merle Hay Rd., Suite 214, Des Moines, IA 50322, Contact: Mary A. Finn, Phone: (515) 276-3642.

(7) *Laboratory:* CHART Services, Ltd. (NIST)

Address: 12816 West 92nd Ter., Suite 118, P.O. Box 16, Shawnee, KS 66216, Contact: Bernie Hemlick, Phone: (913) 268-0715.

(8) *Laboratory:* CHART Services, Ltd. (NIST).

Address: 7912 Davenport St., Omaha, NE 68114, Contact: Carmen Riegel, Phone: (402) 393-0155.

(9) *Laboratory:* Certified Environmental Management, Inc. (NIST).

Address: P.O. Box 504, Salina, KS 67402-0504, Contact: Brenda A. Tolson, Phone: (913) 536-8315.

(10) *Laboratory:* Hall-Kimbrell Environmental Services, Inc. (NIST).

Address: 4840 West 15th St., Lawrence, KS 66046, Contact: W. David Kimbrell, Phone: (913) 749-2381.

(11) *Laboratory:* IPRSS Asbestos Analysis Labs, Inc., (NIST).

Address: 503 Main St., Belton, MO 64012, Contact: George S. McDowell, Phone: (816) 331-0002.

(12) *Laboratory:* Industrial Testing Laboratories, Inc., (NIST).

Address: 2350 7th Blvd., St. Louis, MO 63104, Contact: William J. Lowry, Phone: (314) 771-7111.

(13) *Laboratory:* Larron Laboratory.

Address: 529 Broadway, Cape Girardeau, MO 63701, Contact: David J. Roth, Phone: (314) 334-8910.

(14) *Laboratory:* Mayhew Environmental Training Assoc., (META).

Address: 901 Kentucky, Suite 305A, Lawrence, KS 66044, Contact: Robert G. Williams, Phone: (913) 842-6382.

(15) *Laboratory:* Microscopic Analysis, Inc. (NIST).

Address: 989 Gardenview Office Pkwy., St. Louis, MO 63141, Contact: Douglas N. Nimmo, Phone: (314) 993-2212.

(16) *Laboratory:* Midwestern Testing Labs, Inc. (NIST).

Address: P.O. Box 1657, Fairfield, IA 52556, Contact: Dennis Greenley, Phone: (515) 472-1861.

(17) *Laboratory:* Nebraska Testing Laboratories, Inc.

Address: 4123 South 67th St., Omaha, NE 68117-1066, Contact: Lynn A. Knudtson, Phone: (402) 331-4453.

(18) *Laboratory:* Net Midwest Inc., Cedar Falls Division, (NIST).

Address: 704 Enterprise Dr., Cedar Falls, IA 50613, Contact: Michael McGee, Phone: (319) 277-2401.

(19) *Laboratory:* Pace Laboratories, Inc. (NIST).

Address: 2005 West 103rd Ter. (B), Leawood, KS 66206, Contact: Don Wright, Phone: (913) 341-7800.

(20) *Laboratory:* The University of Iowa (NIST), University Hygienic Laboratory.

Address: Iowa City, IA 52242, Contact: I. A. Schwabbauer, Phone: (319) 335-4500.

(21) *Laboratory:* University of Missouri - Kansas City, (NIST).

Address: Chemistry Dept., Kansas City, MO 64110, Contact: Dr. Peter F. Lott, Phone: (816) 276-2289.

EPA Accredited Commercial PLM Laboratories

REGION VIII – Denver, CO

Regional Asbestos Coordinator: David Combs, (8AT-TS), EPA, Region VIII, 1 Denver Place, 999-18th St., Suite 500, Denver, CO 80202-2413. (303) 293-1744, (FTS) 564-1744.

(1) *Laboratory:* ATC Environmental, Inc. (NIST).

Address: 1515 East Tenth St., Sioux Falls, SD 57103, Contact: Donald Bock, Phone: (605) 338-0555.

(2) *Laboratory:* Amoco Oil Company Mandan Refinery, (NIST).

Address: Mandan Avenue & Old Red Trail, Mandan, ND 58554, Contact: Jerifer Romsaas, Phone: (701) 667-2463.

(3) *Laboratory:* Analytica, Inc. (NIST).

Address: 5930 McIntyre St., Golden, CO 80403, Contact: Daniel M. Benecke, Phone: (303) 279-2583.

(4) *Laboratory:* Bison Engineering/Research (NIST).

Address: P.O. Box 1703, Helena, MT 59624, Contact: Patricia E. Groll, Phone: (406) 442-5768.

(5) *Laboratory:* Colorado State University Department, of Environmental Health (NIST).

Address: B120 Microbiology Bldg., Fort Collins, CO 80523, Contact: Roy C. Warbington, Phone: (303) 491-6729.

(6) *Laboratory:* DCM Science Laboratory (NIST).

Address: 12975 West 24th Pl., Golden, CO 80401, Contact: Donna C. Mefford, Phone: (303) 237-0110.

(7) *Laboratory:* Datachem, Inc. (NIST).

Address: 960 West LeVoy Dr., Salt Lake City, UT 84123, Contact: Lance Eggenberger, Phone: (801) 266-7700.

(8) *Laboratory:* Dixon Information, Inc. (NIST).

Address: 78 West 2400 S., Salt Lake City, UT 84115, Contact: Willard C. Dixon, Phone: (801) 486-0800.

(9) *Laboratory:* Esstek, Inc. (NIST).

Address: 11435 West 46th Ave., Wheat Ridge, CO 80033-2101, Contact: Robert Cordova, Phone: (303) 425-7098.

(10) *Laboratory:* HTI Laboratories & Industrial, Consultants.

Address: 1806 Main Ave., Fargo, ND 58103, Contact: Constance S. Hodny, Phone: (701) 232-1399.

(11) *Laboratory:* HTI Laboratories & Industrial, Consultants, Inc.

Address: 6436 South Recline Cir., Engelwood, CO 80111, Contact: Constance S. Hodny, Phone: (303) 773-9616.

(12) *Laboratory:* HTI Laboratories & Industrial, Consultants, Inc. (Mobile Lab).

Address: Box 6192, Fargo, ND 58109, Contact: Constance S. Hodny, Phone: (701) 237-9750.

(13) *Laboratory:* Hager Laboratories, Inc.

Address: 11234 East Caley Ave., Englewood, CO 80111, Contact: Patricia Manning, Phone: (303) 790-2727.

(14) *Laboratory:* Northern Engineering & Testing, Inc., (NIST).

Address: 600 South 25th St., Billings, MT 59107, Contact: Kathleen Smit, Phone: (406) 248-9161.

(15) *Laboratory:* Occupational Health Technologies, Inc.

Address: 171 University Cir., Pueblo, CO 81005, Contact: Thomas F. Antonson, Phone: (719) 566-0422.

(16) *Laboratory:* Professional Service Ind., Inc. (NIST), Pittsburgh Testing Lab. Div.

Address: 2955 Southwest Temple St., Salt Lake City, UT 84115, Contact: Herb Ritzman, Phone: (801) 484-6627.

(17) *Laboratory:* Sathe Analytical Lab., Inc.

Address: P.O. Box 1527, Williston, ND 58801, Contact: Neal Falk, Phone: (701) 572-3632.

(18) *Laboratory:* Survey, Management, and Design.

Address: P.O. Box 6021, Fargo, ND 58109, Contact: Peter L. Mehl, Phone: (701) 234-9556.

EPA Accredited Commercial PLM Laboratories

REGION IX – San Francisco, CA

Regional Asbestos Coordinator: Jo Ann Semones, (A-4-2), EPA, Region IX, 215 Fremont St., San Francisco, CA 94105. (415) 974-7290, (FTS) 454-7290.

(1) *Laboratory:* ACCULAB Environmental Services (NIST).

Address: 3700 Lakeville Hwy., Petaluma, CA 94952, Contact: Olivia Alejandro, Phone: (707) 778-4160.

(2) *Laboratory:* ASBESTECH (NIST).

Address: 6801 Fair Oaks Blvd., Suite H, Carmichael, CA 95608, Contact: Tommy G. Conlon, Phone: (916) 481-8902.

(3) *Laboratory:* Analytical Research Laboratories, Inc.

Address: 160 Taylor St., P.O. Box 2360, Monrovia, CA 91016, Contact: D.W. Kohlenberger, Phone: (818) 357-3247.

(4) *Laboratory:* Applied Petrography, Inc. (NIST).

Address: 8520 Sorenson Ave., Suite E, Santa Fe Springs, CA 90670, Contact: Joanna Deane, Phone: (213) 945-3468.

(5) *Laboratory:* Asbestest, Inc.

Address: 1550 Dell Ave., Suite E, Campbell, CA 95008, Contact: Robert M. Kumagai, Phone: (408) 374-3360.

(6) *Laboratory:* Asbestos Detection Co., Inc. (NIST).

Address: 12755 Brookhurst St., Suite 206, Garden Grove, CA 92640, Contact: Richard L. Frauenberger, Phone: (714) 530-1922.

(7) *Laboratory:* Asbestos Management Services, Inc.

Address: 14829 Proctor Ave., Industry, CA 91746, Contact: Joseph Johnson, Phone: (818) 961-4303.

(8) *Laboratory:* Associated Safety Consultants (NIST).

Address: 13363 Saticoy St., No. 204, North Hollywood, CA 91605, Contact: Dan Flaherty, Phone: (818) 503-0471.

(9) *Laboratory:* BSE Labs, Inc. (NIST).

Address: 50 East Foothill Blvd., Arcadia, CA 91006, Contact: Gustavo Delgado, Phone: (818) 445-4127.

(10) *Laboratory:* California Water Labs (NIST).

Address: 1430 Carpenter Ln., Modesto, CA 95352, Contact: Gloria Poling, Phone: (209) 527-4050.

(11) *Laboratory:* Cam Lab (NIST).

Address: 9525 Slauson Ave., Pico Rivera, CA 90660, Contact: Michael R. Tiffany, Phone: (213) 942-8666.

(12) *Laboratory:* Certified Engineering & Testing Co., Inc. (NIST).

Address: 725 Greenwich St., No. 204, San Francisco, CA 94133, Contact: Cabe Silverhame, Phone: (415) 986-6872.

(13) *Laboratory:* Certified Testing Laboratories, Inc.

Address: 2905 East Century Blvd., South Gate, CA 90280, Contact: Stuart E. Salot, Phone: (213) 564-2641.

(14) *Laboratory:* Clark Geological Services (NIST).

Address: 3479 Edison Way, Fremont, CA 94538, Contact: Joyce Lucas-Clark, Phone: (415) 659-1784.

(15) *Laboratory:* Clayton Environmental Consultants, Inc. (NIST).

Address: 1252 Quarry Ln., Pleasanton, CA 94566, Contact: Warren C. Steele, Phone: (415) 426-2600.

(16) *Laboratory:* Dan Napier & Associates (NIST).

Address: 15342 Hawthorne Blvd., Suite 207, P.O. Box 1540, Lawndale, CA 90260-6440, Contact: Dan Napier, Phone: (213) 644-1924.

(17) *Laboratory:* Dyer Laboratories, Inc. (NIST).

Address: 2531 West 237th St., No. 121, Torrance, CA 90505, Contact: D.L. Dyer, Phone: (213) 530-3322.

(18) *Laboratory:* E & A Env'l Service, Inc. (NIST).

Address: 15943 Clark Ave., Bellflower, CA 90706, Contact: Ebbiteanga Abili, Phone: (213) 925-5060.

(19) *Laboratory:* EMS Laboratories (NIST).

Address: 211 Pasadena Ave., South Pasadena, CA 91030-2919, Contact: Bernadine M. Kolk, Phone: (213) 257-2002.

(20) *Laboratory:* EnvironMETeo Services, Inc. (EMET), (NIST).

Address: 94-463 Ukee St., Suite A, Waipahu, HI 96797, Contact: Clifford How, Phone: (808) 671-8383.

(21) *Laboratory:* Environmental Innorations (NIST).

Address: 675 Hegenberger Rd., Suite 110, Oakland, CA 94621, Contact: Kip Fout, Phone: (415) 632-0104.

(22) *Laboratory:* Esstek (NIST).

Address: 3045 Teagarden St., San Lenadro, CA 94577, Contact: Bob Cordova, Phone: (303) 425-0013.

(23) *Laboratory:* Esstek, Inc. (NIST).

Address: 9041-17 Dice Rd., Santa Fe Springs, CA 90670, Contact: Al Fahrenbruch, Phone: (213) 944-2520.

(24) *Laboratory:* Eureka Laboratories, Inc. (NIST).

Address: 3401 La Grande Blvd., Sacramento, CA 95823, Contact: Steven K. Leung, Phone: (916) 428-1193.

(25) *Laboratory:* Fiberquant, Inc. (NIST).

Address: 4624-B South 35th St., Phoenix, AZ 85040, Contact: Larry Pierce, Phone: (602) 276-6138.

(26) *Laboratory:* Forensic Analytical Specialities, Inc., (NIST).

Address: 3777 Depot Rd., Suite 408, Hayward, CA 94545, Contact: Stephen A. Shaffer, Phone: (415) 887-8828.

(27) *Laboratory:* Gemeni Petrographic Investigations.

Address: P.O. Box 2127, Novato, CA 94948, Contact: Peter A. Almendinger, Phone: (415) 892-9016.

(28) *Laboratory:* HECO Safety Division (NIST), Industrial Hygiene Section.

Address: 820 Ward Ave., Honolulu, HI 96813, Contact: Joana Teba, Phone: (808) 548-7386.

(29) *Laboratory:* Hall-Kimbrell Environmental Services.

Address: 2615 South King St., Suite 2A, Honolulu, HI 96826, Contact: S. Gil Cobb, Phone: (913) 749-2381.

(30) *Laboratory:* Hall-Kimbrell Environmental Services, (NIST).

Address: 646 South Brea Canyon Rd., Walnut, CA 91789, Contact: Joel K. Davidson, Phone: (714) 594-3232.

(31) *Laboratory:* Hanlon Laboratories (NIST).

Address: 8801 Folsom Blvd., Suite 145, Sacramento, CA 95826, Contact: Victoria Nabavi, Phone: (916) 386-2153.

(32) *Laboratory:* Health Sciences Associates (NIST).

Address: 10771 Noel St., Los Alamitos, CA 90720, Contact: Kathy S. Jones, Phone: (714) 220-3922.

(33) *Laboratory:* IT Corporation-Cerritos (NIST).

Address: 17605 Fabrica Way, Cerritos, CA 90701, Contact: Mary Hammons, Phone: (213) 921-9831.

(34) *Laboratory:* J.M. Cohen, Inc. (NIST).

Address: 155 Bovet Rd., Suite 300, San Mateo, CA 94402, Contact: Joel Cohen, Phone: (415) 349-9737.

(35) *Laboratory:* Kellco Asbestos Analytical Services, (NIST).

Address: P.O. Box 1339, Freemont, CA 94538, Contact: Bonnie Lee Kellogg, Phone: (415) 659-9751.

(36) *Laboratory:* Kellco Services, Inc. (NIST).

Address: 8421 Auburn Ave., Citrus Heights, CA 95610, Contact: Duane Graves, Phone: (916) 722-7997.

(37) *Laboratory:* Kemron Environmental Services (NIST).

Address: 14340 Bolsa Chica, Suite C, Westminster, CA 92683, Contact: Humphrey Laurent, Phone: (714) 373-1194.

(38) *Laboratory:* McClara Laboratory, Asbestos Control Division.

Address: 1231 Gary Way, Carmichael, CA 95608, Contact: Michael McClara, Phone: (916) 489-9202.

(39) *Laboratory:* McCrone Environmental Services, Inc., (NIST).

Address: 120 Newport Center Dr., Suite 240, Newport Beach, CA 92660, Contact: William Millar, Phone: (714) 759-6619.

(40) *Laboratory:* Med-Tox Associates, Inc. (NIST).

Address: 1229 Morena Blvd., San Diego, CA 92110, Contact: Thomas Vernon Dagenhart, Phone: (619) 276-6843.

(41) *Laboratory:* Microanalytical Services, Inc. (NIST).

Address: 201 South Lake Ave., Suite 402, Pasadena, CA 91101, Contact: Nancy Carraway, Phone: (818) 356-7400.

(42) *Laboratory:* Microprobe (NIST).

Address: 5104 East Burns, Tucson, AZ 85711, Contact: James R. Kessler, Phone: (602) 745-1189.

(43) *Laboratory:* National Asbestos Labs, Inc. (NIST).

Address: 2235 Polvorosa Ave., Suite 220, San Leandro, CA 94577, Contact: Kevin Smith, Phone: (415) 357-9555.

(44) *Laboratory:* PACE Laboratories (NIST).

Address: 11 Digital Dr., Novato, CA 94949, Contact: Keith Hunter, Phone: (415) 883-6100.

(45) *Laboratory:* Particle Diagnostics, Inc. (NIST).

Address: 1274 Morena Blvd., San Diego, CA 92109, Contact: Dan Baxter, Phone: (619) 276-2200.

(46) *Laboratory:* Precision Micro-Analysis (NIST).

Address: 5665 Power Inn Rd., Suite 102, Sacramento, CA 95824, Contact: J. Benjamin Smith, Phone: (916) 381-0694.

(47) *Laboratory:* R.J. Lee Group, Inc. (NIST).

Address: 2424 6th St., Berkeley, CA 94710, Contact: Jesse E. Fisher, Phone: (415) 486-8319.

(48) *Laboratory:* Radiation Detection Co.

Address: 162 Wolfe Rd., P.O. Box 1414, Sunnyvale, CA 94088, Contact: Susan Gagner, Phone: (408) 735-8700.

(49) *Laboratory:* Salt River Project (NIST).

Address: 600 East Curry Rd., Tempe, AZ 85281, Contact: William Powell, Phone: (602) 236-8024.

(50) *Laboratory:* Santa Rita Analytical.

Address: 5055 East Broadway, Suite D-208, Tucson, AZ 85711, Contact: James C. Faas, Phone: (602) 790-4491.

(51) *Laboratory:* Schwein/Christensen Eng., Ltd. (NIST).

Address: 3397 Mt. Diablo Blvd., Suite E, Lafayette, CA 94549, Contact: Conrad Christensen, Phone: (415) 284-3311:

(52) *Laboratory:* Smith-Emery Co., Environmental/Chemical Dept.

Address: 781 East Washington Blvd., Los Angeles, CA 90021, Contact: Jack C. Carmody, Phone: (213) 749-3411.

(53) *Laboratory:* Southwest Hazard Control, Inc. (NIST).

Address: 5400 West Massingdle Rd., Tucson, AZ 85743, Contact: Gerald J. Karches, Phone: (602) 744-1060.

(54) *Laboratory:* Sunshine Environmental Laboratory.

Address: 2681 Lincoln Rd., Las Vegas, NV 89115, Contact: Nathan M. Lencioni, Phone: (702) 452-3952.

(55) *Laboratory:* TEM Analytics, Inc.

Address: 3433 East Fort Lowell, Suite 105, Tucson, AZ 85716, Contact: Sandra Beyarano, Phone: (602) 795-7000.

(56) *Laboratory:* TMA/NORCAL Corporation (NIST).

Address: 2030 Wright Ave., Richmond, CA 94804, Contact: Rosemary Sliney, Phone: (415) 235-2633.

(57) *Laboratory:* Toxscan (NIST), Control Lab.

Address: 42 Hangar Way, Watsonville, CA 95076, Contact: Frank Shields, Phone: (408) 724-4522.

(58) *Laboratory:* Truesdale Laboratories, Inc.

Address: 14201 Franklin Ave., Tustin, CA 92680, Contact: Karl Schiller, Phone: (714) 730-6239.

(59) *Laboratory:* United States Testing, Inc. EST-West.

Address: 3491 Kurtz St., P.O. Box 80985, San Diego, CA 92110, Contact: Craig Sobotka, Phone: (619) 222-0544.

(60) *Laboratory:* Unitek Environmental Consultants, Inc., (NIST).

Address: 2889 Mokumoa St., Honolulu, HI 96819, Contact: Irene Enoki, Phone: (808) 834-1444.

(61) *Laboratory:* University Associates, Ltd. (NIST).

Address: 2425-A North Huachuaca Dr., Tucson, AZ 85745, Contact: Frank Mendoza, Phone: (602) 624-9366.

(62) *Laboratory:* University Associates, Ltd. (NIST).

Address: 2725 Congress St., Suite 2A, San Diego, CA 92110, Contact: Frank Mendoza, Phone: (619) 294-7200

(63) *Laboratory:* Van Houten Consultants, Inc.

Address: P.O. Box 2659, Novato, CA 94948, Contact: Gregory P. Arnold, Phone: (415) 897-6805.

(64) *Laboratory:* Western Technologies, Inc.

Address: 3737 East Broadway Rd., P.O. Box 21387, Phoenix, AZ 85036, Contact: Denice Miller, Phone: (602) 437-3737.

EPA Accredited Commercial PLM Laboratories

REGION X -- Seattle, WA

Regional Asbestos Coordinator: Walter Jasper, EPA, Region X, 1200 Sixth Ave. (8T-083), Seattle, WA 98101. (206) 442-4762, (FTS) 399-2870.

(1) *Laboratory:* AM TEST, Inc. (NIST).

Address: 14603 Northeast 87th St., Redmond, WA 98052, Contact: John T. Dailey, Phone: (206) 885-1664.

(2) *Laboratory:* Asbestos Microscopy, Inc.

Address: 10463 Northeast Fourth Plain Rd., Vancouver, WA 98662, Contact: Paul Carlson, Phone: (206) 256-6455.

(3) *Laboratory:* Cascade Analytical Service.

Address: 3640 South Cedar St., Suite O, Tacoma, WA 98409, Contact: Juin B. J. TeVrucht, Phone: (206) 472-6909.

(4) *Laboratory:* Coffey Laboratories, Inc.

Address: 4914 Northeast 122nd Ave., Portland, OR 97230, Contact: Fredrick C. Colley, Phone: (503) 254-1794.

(5) *Laboratory:* Eastwood Testing Laboratory, Inc.

Address: 7325 Southeast 133rd Pl., Portland, OR 97236, Contact: Misko Maynard, Phone: (503) 761-0922.

(6) *Laboratory:* Environmental Consulting Services, Inc. (NIST).

Address: 1259 Willamette St., Eugene, OR 97401, Contact: Richard W. Carlin, Phone: (503) 345-6790.

(7) *Laboratory:* Environmental Consulting Services, Inc. (NIST).

Address: 3601 Northwest Yeon, Suite 134, Portland, OR 97210, Contact: Sheila Monroe, Phone: (503) 227-7210.

(8) *Laboratory:* Eastek, Inc. (NIST).

Address: 12822 Gateway Dr., Seattle, WA 98168, Contact: Richard C. Thompson, Phone: (303) 425-0013.

(9) *Laboratory:* Frandon Enterprises, Inc.

Address: 511-North 48th, Seattle, WA 98103, Contact: Donald M. Wallace, Phone: (206) 633-2341.

(10) *Laboratory:* HAZCON, Inc. (NIST).

Address: 9500 Southwest Barbur Rd., Suite 100, Portland, OR 97219, Contact: Gerald Liddell, Phone: (503) 244-0045.

(11) *Laboratory:* HAZCON, Inc. (NIST).

Address: 5950 6th Ave. S, Suite 216, Seattle, WA 98108, Contact: Masood Hashmi, Phone: (206) 763-7364.

(12) *Laboratory:* HAZTOX, Inc. (NIST).

Address: 820 North Linder Rd., Meridian, ID 83642, Contact: Wayne Dorband or Robin Schmidt, Phone: (208) 888-7121.

(13) *Laboratory:* Hanford Environmental Health, Foundation NHS, Inc. (NIST).

Address: 2950 C George Washington Way, Richland, WA 99352, Contact: Maureen Hamilton, Phone: (509) 376-6980.

(14) *Laboratory:* Hanford Environmental Health, Foundation NHS, Inc. (NIST).

Address: 805 Goethals Dr., Richland, WA 99352, Contact: Maureen Hamilton, Phone: (509) 376-6980.

(15) *Laboratory:* Hunter Services, Inc. (NIST).

Address: 1205 East Int'l. Airport Rd., Suite 100, Anchorage, AK 99518, Contact: Doug Jones, Phone: (907) 561-3055.

(16) *Laboratory:* M & M Environmental, Inc. (NIST).

Address: 3902 North 34th St., Tacoma, WA 98407, Contact: Mike Reid, Phone: (206) 572-2772.

(17) *Laboratory:* Marine & Environmental Testing, Inc., (NIST).

Address: P.O. Box 1142, Beaverton, OR 97075, Contact: Martin H. Finkel, Phone: (503) 286-2955.

(18) *Laboratory:* Microlab Northwest (NIST).

Address: 7609 140th Pl., NE, Redmond, WA 98052, Contact: Russel Crutcher, Phone: (206) 885-9419.

(19) *Laboratory:* Northern Testing Laboratories, Inc.

Address: 600 University Plaza W, Suite A, Fairbanks, AK 99709, Contact: Linda J. Hendershot, Phone: (907) 479-3115.

(20) *Laboratory:* Northwest Asbestos Consultants (NIST).

Address: 1005 Northwest Galveston, Suite E, Bend, OR 97701, Contact: Dale A. Schmidt, Phone: (503) 389-9727.

(21) *Laboratory:* Oregon Analytical Laboratory (NIST).

Address: 14655 Southwest Old Schools Ferry Rd., Beaverton, OR 97007, Contact: Howard Boorse, Phone: (503) 644-5300.

(22) *Laboratory:* Professional Service Ind., Inc. (NIST).

Address: 700 West 58th St., Anchorage, AK 99518-1632, Contact: John Buzdor, Phone: (907) 561-2400.

(23) *Laboratory:* Professional Service Ind., Inc. (NIST).

Address: 611 Southeast Harrison St., Portland, OR 97214, Contact: Judy Grant, Phone: (503) 232-2183.

(24) *Laboratory:* Quest Environmental Inc.

Address: 709 West Int'l. Airport Rd., Suite 100, Anchorage, AK 99518, Contact: John Johnston, Phone: (907) 563-0050.

(25) *Laboratory:* Taylor Laboratories, Inc.

Address: 724A Siginaka Way, Sitka, AK 99835, Contact: Lawrence Taylor, Jr., Phone: (907) 747-6364.

(26) *Laboratory:* Terra Test Analytical Labs, Inc.

Address: 1003 Main St., Suite 2, Summer, WA 98390, Contact: Pedro G. Armenta, Phone: (206) 863-5404.

(27) *Laboratory:* Weyerhaeuser Co., Safety & Health Service Laboratory.

Address: 32901 32nd Dr., S., Federal Way, WA 98003, Contact: Christopher Kirk, Phone: (206) 924-6639.

EPA Accredited Commercial PLM Laboratories

Non-Domestic PLM Laboratories

(1) *Laboratory:* Pinchin Harris Holland Associates, Ltd. (NIST).

Address: No. 200-1285 West Pender St., Vancouver, BC, V6E 4B1, Canada, Contact: Geoffrey A. Clark, Phone: (604) 669-5979.

(2) *Laboratory:* Chatfield Technical Consulting, Ltd., (NIST).

Address: 2071 Dickson Rd., Mississauga, Ontario, Canada L5B 1YB, Contact: Eric Chatfield, Phone: (416) 896-7611.

(3) *Laboratory:* McMaster Laboratory (NIST), Occupational Health Laboratory.

Address: 1200 Main St., W., Hamilton, Ontario, Canada L8N 3Z5, Contact: Dave K. Varma, Phone: (416) 525-9140.

(4) *Laboratory:* Ontario Research Foundation, Sheridan Park Research Comm.

Address: Mississauga, Ontario, Canada L5K 1B3, Contact: Irina Sherman, Phone: (416) 822-4111.

(5) *Laboratory:* Okinawa Eng. Analysis Ctr. Co., Ltd.

Address: 777 Ojana, Ginowan, Okinawa, Japan 901-22, Contact: Fuminori Nishime, Phone: (098) 897-0810.

EPA Accredited Non-Commercial PLM Laboratories

REGION I -- Boston, MA

Regional Asbestos Coordinator: Joe DeCola, EPA, Region I, Air and Management Division (APT-2311), JFK

Federal Building, Boston, MA 02203. (617) 565-3835, (FTS) 835-3835.

(1) *Laboratory:* Division of Occupational Hygiene, Asbestos Commission.

Address: 1001 Watertown St., West Newton, MA 02165, Contact: Frank Kramarz, Phone: (617) 727-3983.

(2) *Laboratory:* Environmental Health and Safety, Harvard University.

Address: 46 Oxford St., Cambridge, MA 02138, Contact: Quality Control Manager, Phone: (617) 495-2090.

(3) *Laboratory:* Olin Corp. (NIST), Environmental Hygiene Laboratory.

Address: 91 Shelton Ave., P.O. Box 30-9643, New Haven, CT 06511, Contact: James P. Dawson, Phone: (203) 789-5613.

(4) *Laboratory:* State of Maine, Department of Human, Services, Public Health Laboratory.

Address: 221 State St., Augusta, ME 04333, Contact: Thomas Dwyer, Phone: (207) 289-2727.

EPA Accredited Non-Commercial PLM Laboratories

REGION II – Edison, NJ

Regional Asbestos Coordinator: Arnold Freiberger, EPA, Region II, Woodbridge Ave., Raritan Depot, Bldg. 5, (MS-500), Edison, NJ 08837. (201) 321-6671, (FTS) 340-6671.

(1) *Laboratory:* Hess Oil Virgin Islands Corp. (NIST).

Address: P.O. Box 127, Kingshill, St. Croix, VI 00850, Contact: John L. Edgley, Phone: (809) 778-4314.

EPA Accredited Non-Commercial PLM Laboratories

REGION III – Philadelphia, PA

Regional Asbestos Coordinator: Carole Dougherty, EPA, Region III (3HW-42), 841 Chestnut Bldg., Philadelphia, PA 19107. (215)597-3160, (FTS) 597-3160.

(1) *Laboratory:* Aluminum Company of America, Environmental Health Laboratory (NIST).

Address: ALCOA Technical Center, ALCOA Center, PA 15069, Contact: Richard A. Milito, Phone: (412) 339-0651.

(2) *Laboratory:* Maryland Dept. of Health, Laboratories Adm. - AQL (NIST).

Address: 201 West Preston St., Room 6D1, Baltimore, MD 21203, Contact: Delores E. Willis, Phone: (301) 225-6212.

(3) *Laboratory:* National Institute of Health, Safety Support Section.

Address: Building 13, Room 3K04, Bethesda, MD 20205, Contact: Randolph K. Larsen, Phone: (301) 496-3457.

(4) *Laboratory:* Pennsylvania Department of, Environmental Resources (NIST).

Address: Bureau of Laboratories, P.O. Box 1467, 3rd & Reily St., Harrisburg, PA 17120, Contact: Paul E. Baker, Phone: (717) 787-4669.

(5) *Laboratory:* U.S. Army Environmental Hygiene Agency, RICD MAB.

Address: Building E2100, Aberdeen Proving Ground, Edgewood, MD 21010-5422, Contact: John W. Courts, Phone: (301) 671-2819.

EPA Accredited Non-Commercial PLM Laboratories

REGION IV – Atlanta, GA

Regional Asbestos Coordinator: Liz Wilde, EPA, Region IV, 345 Courtland St., NE, (4APT-PT), Atlanta, GA 30365. (404) 347-5014, (FTS) 257-5014.

(1) *Laboratory:* Alabama Power Company.

Address: P.O. Box 2641, Birmingham, AL 35291, Contact: W. Steve Hill, Phone: (205) 664-6061.

(2) *Laboratory:* EG&G Florida, Occupational Medicine & Environmental, Health Services.

Address: P.O. Box 21296, Kennedy Space Center, FL 32815, Contact: Patricia L. Colomore, Phone: (407) 867-3629.

(3) *Laboratory:* GTRI Microscopy Research Lab (NIST).

Address: 151 Sixth St., O'Keefe Bldg., Atlanta, GA 30057, Contact: Toni Hurley, Phone: (404) 894-3606.

(4) *Laboratory:* The University of Alabama, Office of Health & Safety.

Address: 12 Thomas Cir., P.O. Box 6095, University, AL 35486, Contact: Hal Barrett, Phone: (205) 348-5905.

(5) *Laboratory:* Western Kentucky University, Electron Microscopy Facility.

Address: Dept. of Biology, Bowling Green, KY 42101, Contact: J. Rodney McCurry, Phone: (502) 745-5993.

EPA Accredited Non-Commercial PLM Laboratories

REGION V – Chicago, IL

Regional Asbestos Coordinator: Anthony Restaino, EPA, Region V, 230 S. Dearborn St., (5-SPT-7), Chicago, IL 60604. (312) 886-6003, (FTS) 886-6003.

(1) *Laboratory:* Chicago Board of Education.

Address: 6600 South Komensky, Chicago, IL 60652, Contact: Henry G. Gooday, Jr., Phone: (312) 890-7865.

(2) *Laboratory:* Commonwealth Edison/SMAD.

Address: 1319 South First Ave., Maywood, IL 60153, Contact: Richard R. Dlesk, Phone: (312) 450-5435.

(3) *Laboratory:* General Motors, GM Technical Center.

Address: Res. Adm. Bldg. 3-229, Warren, MI 48090, Contact: Donald J. Hart, Phone: (313) 986-1056.

(4) *Laboratory:* Illinois Dept. of Public Health, Springfield Laboratory.

Address: 134 9th St., Springfield, IL 62701, Contact: James B. Hundley, Phone: (217) 782-6562.

(5) *Laboratory:* Indiana State Board of Health, Industrial Hygiene Laboratory.

Address: 1330 West Michigan St., Indianapolis, IN 46206, Contact: John Ruyack, Phone: (317) 633-0692.

(6) *Laboratory:* State of Illinois Department of Public, Health, Toxicology Laboratory.

Address: 2121 West Taylor St., Chicago, IL 60612-4285, Contact: Dietmar Grohlich, Phone: (312) 693-4766.

(7) *Laboratory:* West Allis Memorial Hospital (NIST), Industrial Toxicology Laboratory.

Address: 8901 West Lincoln Ave., West Allis, WI 53227, Contact: Leon A. Saryan, Phone: (414) 546-6313.

EPA Accredited Non-Commercial PLM Laboratories

REGION VI – Dallas, TX

Regional Asbestos Coordinator: John West, 6T-PT, EPA, Region VI, 1445 Ross Avenue, Dallas, TX 75202-2733. (214) 655-7244, (FTS) 255-7244.

(1) *Laboratory:* Duncan Public Schools (NIST).

Address: 1706 Spruce, P.O. Box 1546, Duncan, OK 73533, Contact: Ron Murray, Phone: (405) 255-4725.

(2) *Laboratory:* Jimmie Ann Bolton (NIST).

Address: P.O. Box 49079, Austin, TX 78765, Contact: Jimmie Ann Bolton, Phone: (512) 471-3511.

(3) *Laboratory:* Texaco Chemical Co. (NIST), Neches Plant.

Address: P.O. Box 847, Port Neches, TX 77651, Contact: Janet E. Wiiki, Phone: (409) 722-8381.

(4) *Laboratory:* U.S. Air Force.

Address: OEHL/SA, Brooks AFB, TX 73235, Contact: Jerry F. Thomas, Phone: (512) 536-2158.

(5) *Laboratory:* Univ. of Texas Health Center at Tyler, Dept. of Cell Biology &, Environmental Science.

Address: P.O. Box 2003, Tyler, TX 75710, Contact: Ronald F. Dodson, Phone: (214) 877-3541.

EPA Accredited Non-Commercial PLM Laboratories

REGION VIII – Denver, CO

Regional Asbestos Coordinator: David Combs, (8AT-TS), EPA, Region VIII, 1 Denver Place, 999-18th St., Suite 500, Denver, CO 80202-2413. (303) 293-1744, (FTS) 564-1744.

(1) *Laboratory:* AMOCO Oil Co. (NIST), Mandan Refinery.

Address: Mandan Ave., P.O. Box 5000, Mandan, ND 58554, Contact: Donald K. Litchfield, Phone: (701) 667-2463.

(2) *Laboratory:* EPA-NEIC.

Address: P.O. Box 25227, Bldg. 53, DFC, Denver, CO 80225, Contact: Douglas Kendall, Phone: (303) 236-5132.

(3) *Laboratory:* Public Service Co. of Colorado (NIST).

Address: Hampden Park West, Bldg. 5H, 1500 West Hampden, Englewood, CO 80110, Contact: Richard K. Price, Phone: (303) 797-4226.

EPA Accredited Non-Commercial PLM Laboratories

REGION IX – San Francisco, CA

Regional Asbestos Coordinator: Jo Ann Semones, (A-4-2), EPA, Region IX, 215 Fremont St., San Francisco, CA 94105. (415) 974-7290, (FTS) 454-7290.

(1) *Laboratory:* Clark County School District, Safety & Health Specialist.

Address: 4260 Eucalylptus Annex, Las Vegas, NV 89121, Contact: Nathan M. Lencioni, Phone: (702) 799-5011.

(2) *Laboratory:* Pacific Gas & Electric Co., Dept. of Engineering Research.

Address: 3400 Crow Canyon Rd., San Ramon, CA 94583, Contact: Lansing W. Wong, Phone: (415) 820-2000.

(3) *Laboratory:* Riverside County Health Department, Laboratory.

Address: 5888 Mission Blvd., Rubidoux, CA 92509, Contact: Andrew Morita, Phone: (714) 784-1860.

(4) *Laboratory:* SCAQMD Laboratory (NIST).

Address: 9150 Flair Dr., El Monte, CA 91731, Contact: Joan Niertit, Phone: (818) 572-6200.

EPA Accredited Through 1/12/89 Only Amended Non-Commercial Laboratories

REGION II – Edison, NJ

Regional Asbestos Coordinator: Arnold Freiberger, EPA, Region II, Woodbridge Ave., Raritan Depot, Bldg. 5, (MS-500), Edison, NJ 08837. (201) 321-6671, (FTS) 340-6671.

(1) *Laboratory:* Albert Einstein College of Medicine, of Yeshiva University.

Address: 1300 Morris Park Ave., Bronx, NY 10461, Contact: Ralph Ciano, IH, Phone: (212) 430-4150.

(2) *Laboratory:* Astoria Chemical Laboratory.

Address: Con Edison, Bldg., 20th Ave. & 31st St., Astoria, NY 11105, Contact: Hubert Gordon, Phone: (718) 204-4137.

(3) *Laboratory:* City of New York, Dept. of Health, Bureau of Laboratories.

Address: 455 First Ave., New York, NY 10016, Contact: Gabriel Carbone, Phone: (212) 340-4571.

(4) *Laboratory:* Columbia Univ. in the City of NY, Environmental Health & Safety.

Address: 744 Southwest Mudd Bldg., 520 West 120th St., New York, NY 10027, Contact: Edward Olmsted, Phone: (914) 424-4077.

(5) *Laboratory:* Exxon Company, U.S.A.

Address: P.O. Box 222, Linden, NJ 07036, Contact: Michael P. Gerrity, Phone: (201) 474-7344.

(6) *Laboratory:* Merck & Company, Inc.

Address: P.O. Box 2000, Rahway, NJ 07065, Contact: Mansor A. Khan, Phone: (201) 594-4000.

(7) *Laboratory:* Monroe County Environmental Health.

Address: 435 East Henrietta Rd., Rochester, NY 14620, Contact: Richard Burton, Phone: (716) 271-4617.

(8) *Laboratory:* New Jersey State Health Dept., Div. of Environmental Laboratories, CN360.

Address: Trenton, NJ 08625, Contact: Dr. S. Shahied, Phone: (201) 594-4000.

(9) *Laboratory:* New York State Dept. of Health, Div. of Laboratories & Research.

Address: Empire State Plaza, Albany, NY 12201, Contact: James S. Webber, Phone: (518) 474-7958.

(10) *Laboratory:* New York Telephone, Environmental Health Group.

Address: 1095 Avenue of the Americas 2533, Room 1104, New York, NY 10036, Contact: V. Hardman, Phone: (212) 395-1660.

(11) *Laboratory:* The City of NY Dept. of Sanitation.

Address: 51 Chambers St., Suite 1113, New York, NY 10007, Contact: Thomas McMahon, Phone: (212) 566-0242.

(12) *Laboratory:* USAF Regional Medical Center.

Address: Wiesbaden/SGB, USAF, APO New York, NY 09220-5300, Contact: R.B. Graham, Phone: Not Available.

EPA Accredited Through 1/12/89 Only Amended Non-Commercial Laboratories

REGION III – Philadelphia, PA

Regional Asbestos Coordinator: Carole Dougherty, EPA, Region III (3HW-42), 841 Chestnut Bldg., Philadelphia, PA 19107. (215)597-3160, (FTS) 597-3160.

(1) *Laboratory:* Central Operating Company.

Address: Philip Sporn Plant, P.O. Box 389, New Haven, WV 25265-0389, Contact: Robert G. Workman, Phone: (304) 882-3213.

(2) *Laboratory:* Dept. of Health & Human Services, PHS CDC NIOSH DROS EIB.

Address: 944 Chestnut Ridge Rd., Morgantown, WV 26505, Contact: Jerry L. Clere, Phone: (304) 291-4205.

(3) *Laboratory:* NEPMU No. 2.

Address: Naval Station, Bldg. X336, Norfolk, VA 23511-6288, Contact: Officer in Charge, Phone: (804) 444-1547.

(4) *Laboratory:* US Army MEDDAC.

Address: HSXH-PVNTMED-IHS, Fort Eustis, VA 23604-5548, Contact: Commander, Phone: (804) 878-2231.

(5) *Laboratory:* Union Camp Corporation, Fine Paper Division.

Address: P.O. Box 178, Franklin, VA 23851, Contact: John D. Wood, Phone: (804) 569-4830.

EPA Accredited Through 1/12/89 Only Amended Non-Commercial Laboratories

REGION IV – Atlanta, GA

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-62080; FRL-3638-1]

Asbestos in Public and Commercial Buildings; Public Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meetings.

SUMMARY: EPA will hold two public meetings in September 1989 on the issue of asbestos in public and commercial buildings. The purpose of these meetings will be to inform interested individuals about the progress of ongoing policy dialogue meetings on asbestos in public and commercial buildings and to provide an opportunity for these individuals to comment on the issues and recommendations being considered by the policy dialogue group.

DATES: The meetings are scheduled as follows:

1. September 6, 1989, 9 a.m. to 12:30 p.m., Kansas City, Missouri.
2. September 7, 1989, 9 a.m. to 12:30 p.m., San Francisco, California.

ADDRESSES: The meetings will be held at the following locations:

1. Kansas City—Hyatt Regency at Crown Center, 2345 McGee St., Kansas City, Missouri.
2. San Francisco—Holiday Inn Golden Gateway, 1500 Van Ness Ave., San Francisco, California.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E545, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION:

I. Background

To help determine the most appropriate response to take with respect to the issue of asbestos in public and commercial buildings, EPA has begun a policy dialogue with representatives from all groups which have a major interest in this issue. These groups include building owners, building workers, mortgage bankers, asbestos contractors and consultants, asbestos manufacturers, real estate interests, and insurance companies. Also included among the dialogue participants are representatives from the various Federal, State, and local organizations which have responsibility for the development and implementation of asbestos policies. In all, the dialogue group is comprised of approximately 35 invited participants and 12 invited observers. The Conservation Foundation is convening and facilitating this policy dialogue at EPA's request.

After an initial public meeting on May 3, 1989, three policy dialogue meetings have been held this summer in Washington, DC. The dates of these meetings were July 17, July 27–28, and August 22–23. Two additional dialogue meetings have been scheduled for October 3–4 and October 31, 1989. To date, the meetings have addressed the following four issue areas identified in the public meeting on May 3:

1. *Right-to-know* (i.e., the obligation of building owners to inspect their buildings for asbestos and notify their occupants of the results).
2. *Asbestos management options* (i.e., deciding how to manage building materials that are identified as asbestos-containing).
3. *Accreditation/training* (i.e., how to upgrade the quality of asbestos abatement personnel).
4. *Improperly performed removals* (i.e., how to ensure that asbestos removal work is performed properly).

In addition to the policy dialogue meetings described above, EPA plans to gain broader public involvement in the dialogue process by holding two additional public meetings in September 1989 (see above **DATES** unit) on the issue of asbestos in public and commercial buildings. The meetings in Kansas City and San Francisco on September 6 and September 7, respectively, are scheduled between the third and fourth policy dialogue meetings. The purpose of these two public meetings will be to inform interested individuals about the progress of the dialogue process and to provide them with an opportunity to comment on the issues being considered in the dialogue meetings. EPA believes that the comments made at these two meetings will be very useful to the dialogue group as it prepares for its final meetings.

II. Participants

All interested individuals and groups are invited to attend and to participate in the public meetings noted above in the **DATES** section.

Dated: August 25, 1989.

Charles L. Elkins,

Director, Office of Toxic Substances.

Department of Energy

Office of Conservation and Renewable Energy

10 CFR Part 430

Energy Conservation Program for Consumer Products; Test Procedures for Refrigerators, Refrigerator-Freezers and Freezers; Final Rule

BEST COPY AVAILABLE

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Part 430

[Docket No. CAS–RM–80–118]

Energy Conservation Program for Consumer Products; Test Procedures for Refrigerators, Refrigerator-Freezers and Freezers

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) hereby amends the test procedures for refrigerators, refrigerator-freezers, and freezers. Test procedures are one part of the energy conservation program for consumer products established pursuant to the Energy Policy and Conservation Act (EPCA), as amended by the National Energy Conservation Policy Act (NECPA), the National Appliance Energy Conservation Act of 1987 (NAECA), and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988). Among other program elements, the legislation requires that standard methods of testing be prescribed for covered products.

The purpose of today's final rule is to amend the test procedures for rating refrigerators, refrigerator-freezers and freezers with innovative features, such as variable defrost controls (VDC), dual compressor systems, and the quick freeze control.

EFFECTIVE DATE: February 27, 1990.

FOR FURTHER INFORMATION CONTACT:

Douglass S. Abramson, U.S. Department of Energy, Office of Conservation and Renewable Energy, Forrestal Building, Mail Station, CE–132, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Forrestal Building, Mail Station, GC–12, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Energy published a notice of proposed rulemaking in the **Federal Register** on September 26, 1988, to amend the test procedures for refrigerators, refrigerator-freezers, and freezers. 53 FR 37416. DOE proposed to establish test methods for these products that have innovative design features such as variable defrost controls, dual compressor systems, and quick freezing controls. The proposal presented the various developments in the manufacture of refrigerators, refrigerator-freezers and freezers which have occurred since DOE last amended the test procedures on August 10, 1982. 47 FR 34517. The Department held a public hearing in Washington, DC, on November 7, 1988, and provided a 60 day comment period ending November 25, 1988.

Today's rule expands the coverage of the test procedures by establishing test procedures for variable defrost control refrigerator-freezers and freezers; dual compressor refrigerator-freezers; and freezers with the quick freeze option. The waivers granted to manufacturers by DOE for variable defrost controls will terminate on the effective date of today's rule.

II. Discussion

In response to the September 26, 1988, proposal, DOE received comments from manufacturers of refrigerators, refrigerator-freezers, and freezers. The issues raised by the comments are discussed below:

1. Variable Defrost Controls

The Whirlpool Corporation (Whirlpool) offered alternative values for the proposed limits for compressor "on" times CT_L and CT_M (CT_L is the least compressor "on" time between defrosts and CT_M is the maximum compressor "on" time between defrosts). Whirlpool stated that CT_L at 12 hours is too optimistic and that a value of eight hours would be more appropriate. Furthermore, Whirlpool maintained that the limit of CT_M at 84 hours is too pessimistic and should be raised to 144 hours. (Whirlpool, No. 10, at 2 and Testimony, at 10)[1]. The Admiral Company (Admiral) supported the DOE method for calculating the compressor "on" time (CT). Admiral recommended that DOE also establish $CT_L = 12$ and $CT_M = 84$, as the default values [2] for demand defrost systems which do not have set values assigned in the algorithm [3] used to determine the CT value between defrosts. (Admiral, No. 12, at 1).

The National Institute of Standards and Technology (NIST) analyzed the comments on appropriate levels for CT_L and CT_M. The results of this effort were presented to DOE in a letter report dated December 20, 1988. NIST recommended that changes in the language establishing CT_L and CT_M be made as follows:

CT_L be less than or equal to 12 hours

CT_M be less than or equal to 84 hours

This new language would allow manufacturers to use any value of CT_L as long as it was less than 12 hours. However, it still would limit CT_M to being no longer than 84 hours.

The Department proposed values (12, 84) as the least or quickest and the longest times between defrosts, respectively, provide a calculated CT value of 38.18 hours. Whirlpool's suggested limits (8, 144) provide a CT of 32.72 hours. Using only the lowest limit (8, 84) equals 28.96 hours. Using the highest maximum limits (12, 144) provides a CT of 45 hours. Although these values appear to differ by large amounts, it is important to note that the defrost energy is only seven percent of the annual energy consumption and the difference in CT values results in only a one percent change in annual energy consumption.

DOE believes that the one percent variance in energy consumption should allow for the adjustibility of CT_L, the lower limit, and CT_M, the maximum limit for determining CT values. In evaluating the limits for CT_L and CT_M DOE has also considered the consumer benefit of variable defrost controls, i.e., the energy savings from eliminating unnecessary defrosts. Therefore, DOE is adopting a range for CT_L, such that CT_L is greater than or equal to six hours and less than or equal to twelve hours ($6 < CT_L < 12$ hours). Although, an upper limit for CT can shift, DOE considers Whirlpool's recommendation of 144 hours for CT_L, or a defrost once every 12 days as excessive. To provide a better maximum value, DOE has increased CT_M from 84 to 96 hours, making CT_M less than or equal to 96 hours ($CT_L < CT_M < 96$).

In response to the comments from Admiral, DOE is including in today's final rule the default values of $CT_L = CT_M = 84$ hours for use by manufacturers that have demand defrost systems with no assigned values for CT_L and CT_M.

Whirlpool also commented on the stringency of the confidence limits for the optional test for variable defrost controls, stating that even an error of 10 percent would only result in a 0.7 percent change in the energy consumption. (Whirlpool, No. 10, at 2). Admiral agreed with the optional test method but urged that DOE adopt the Association of Home Appliance Manufacturers (AHAM) definition of a basic model to reduce the burden of testing.

DOE agrees with Whirlpool's statement and has, therefore, reduced the stringency limit from 95 percent confidence to 90 percent. The concept of a basic model is well-defined in the Act and the Code of Federal Regulations. Therefore, DOE is not revising the definition of a basic model.

2. Dual Compressor System Refrigerator-Freezers

The Sub Zero Company (Sub Zero) provided comments concerning the test procedures for dual compressor refrigerator-freezers. Sub Zero manufactures dual compressor system refrigerator-freezers equipped with only one automatic defrost system, for the freezer section. Sub Zero argued that the test procedures only evaluate refrigerator-freezers with dual compressors and dual automatic defrost systems. (Sub Zero, No.11, at 1; and Testimony, at 18).

Admiral expressed concern that the calculation of dual compressor system energy consumption as proposed would result in incorrect estimates. Admiral agreed with using the two-part method in section 4.1.2.1. However, Admiral believed that part 1 (normal operation without a defrost) should measure total energy and individual system energy consumption. Also, Admiral maintained that components such as fan motors, anti-sweat heaters, etc., should be assigned to a particular system and be included in the energy consumption for that system. (Admiral, No. 12, at 2). Admiral stated further that the second part of the test (defrost energy consumption) be performed separately for each system. Admiral recommended that DOE provide clearly for testing dual compressor systems equipped with a variable defrost control, recommending that the same method used to determine CT for single compressor systems be used for dual compressor systems with VDC. (Admiral, No. 12, at 4).

DOE has adopted language in today's final rule so that the test procedures distinguish between dual compressor refrigerator-freezers with dual or single automatic defrost systems. Furthermore, DOE has reviewed the calculation method for dual compressor systems and incorporated Admiral's suggestion to identify system components for split testing. The Department however, disagrees with Admiral on the need to measure the systems separately for the first part of the test procedures. Since the first part of the test measures all energy consumed for normal operation, without defrost, it is DOE's opinion that the test measurements desired by Admiral would be burdensome and unnecessary. The measurement of the individual system components is of interest to the manufacturer and DOE for the evaluation of design options and system performance but the requirements of the test procedures are met without these measurements.

III. Environmental Review

Pursuant to section 7(c)(2) of the Federal Energy Administration Act of 1974, a copy of the September 26, 1988, notice of proposed rulemaking was submitted to the Administrator of the Environmental Protection Agency (EPA) for his comments concerning the impact of the proposal on the quality of the environment. The EPA, in its letter of January 18, 1989, supported the goals of this rulemaking and had no comments to offer concerning the specific test procedures.

Since test procedures under the energy conservation program for consumer products will be used only to standardize the measurement of energy usage and will not affect the quality or distribution of energy usage, prescribing test procedures will not result in any environmental impacts. DOE, therefore, has determined that prescribing test procedures under the energy conservation program for consumer products clearly is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. Consequently, neither an Environmental Statement nor an Environmental Assessment is required for the final rule.

IV. Review Under Executive Order 12291

The final rule has been reviewed in accordance with Executive Order 12291 which directs that all regulations achieve their intended goals without imposing unnecessary burdens on the economy, on individuals, on public or private organizations, or on State and local governments. The Executive Order also requires that regulatory impact analyses be prepared for "major rules." The Executive Order defines "major rule" as any regulation that is likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The final rule amends already existing test procedures based in part on AHAM HRF–1–1979 for refrigerators, refrigerator-freezers, and freezers. DOE has determined that any burden imposed on any person, industry, or government entity by the amendment of extant procedures, based in part on commercial standards, is not sufficient to bring the final rule within the definition of "major rule."

V. Regulatory Flexibility Act

The Regulatory Flexibility Act, Public Law 96–354 (5 U.S.C. 601–612), requires that an agency prepare an initial regulatory flexibility analysis to be published at the time the proposed rule is published. This requirement (which appears in section 603) does not apply if the agency "certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." DOE certified in the notice of proposed rulemaking, and does so again, that the rule, which affects manufacturers of refrigerators, refrigerator-freezers, and freezers, will not have significant economic impact, but rather simply improves the test procedures. Therefore, DOE certifies that the final rule, as promulgated, will not have a "significant economic impact on a substantial number of small entities."

VI. "Takings" Assessment Review

Executive Order 12630 (53 FR 8859, March 18, 1988) directs that, in proposing a regulation, an agency conduct a "takings" review. Such a review is intended to assist agencies in avoiding unnecessary takings and help such agencies account for those takings that are necessitated by statutory mandate.

For purposes of the Order:

"Policies that have takings implications" refers to Federal regulations, proposed Federal regulations, proposed Federal legislation, comments on proposed Federal legislation, or other Federal policy statements that, if implemented or enacted, could effect a taking, such as rules and regulations that propose or implement licensing, permitting, or other condition requirements or limitations on private property use, or that required

---

[1] Comments on the September 26, 1988, proposal were assigned docket numbers and are numbered consecutively beginning with No. 10. Comments presented at the November 7, 1988, public hearing are identified as Testimony.

[2] Default values are those values used in an equation or procedure when no specified value has been selected.

dedications or exactions from owners of private property.

It appears that there are three parts of the appliance standards program that could conceivably be viewed as having "takings implications." These are testing (certification) requirements, the impacts of standard levels, and possible DOE testing of products for validation.

This rulemaking is concerned with the first part, namely testing. The Department believes that such a requirement does not constitute a "taking" of private property. The establishment of test procedures involves no exchange of property. Manufacturers maintain control of the property for all intents and purposes.

Therefore, the Department believes that the requirement of testing and the establishment of test procedures as part of the appliance standards program do not represent a "taking" under the provision of E.O. 12630.

VII. Federalism Assessment Review

Executive Order 12612 requires that regulations or rules be reviewed for any substantial direct effects on States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among various levels of government. If there are sufficient substantial direct effects, then E.O. 12612 requires preparation of a federalism assessment to be used in all decisions involved in promulgating and implementing a regulation or a rule.

The Department has concluded that the provisions of this final rule do not require a Federalism assessment for the purpose of E.O. 12612. The amendment of existing test procedures to incorporate methods of rating innovative designs for refrigerators, refrigerator-freezers, and freezers has no substantial direct effect on states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among various levels of government.

List of Subjects in 10 CFR 430

Administrative practice and procedure, Energy conservation, Household appliances.

In consideration of the foregoing, The Department of Energy amends part 430 of chapter II of title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, DC, August 18, 1989.

John R. Berg,

Assistant Secretary, Conservation and Renewable Energy.

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

1. The authority citation for Part 430 continues to read as follows:

Authority: Energy Policy and Conservation Act, Title III, part B, as amended by National Energy Conservation Policy Act, title IV, part 2, and National Appliance Energy Conservation Act of 1987, and by the National Appliance Energy Conservation Amendments of 1988, (42 U.S.C. 6291–6309).

2. Subpart B of part 430 is amended by adding sections 1.11, 3.3, 4.1.2.2, 4.1.2.3, 4.1.2.4, 5.2.1.3, 5.2.1.4, and 5.2.1.5 and adding a sentence at the end of sections 2.1, 3.2, 4.1.2, and 5.1.2 to Appendix A1 as follows:

Appendix A1 to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Electric Refrigerators and Electric Refrigerator-Freezers

* * * * *

1.11 "Variable defrost control" means a long-time automatic defrost system (except the 14-hour defrost qualification does not apply) where successive defrost cycles are determined by an operating condition variable or variables other than solely compressor operating time. This includes any electrical or mechanical device. Demand defrost is a type of variable defrost control.

* * * * *

2.1 * * * The ambient temperature shall be 80±2°F dry bulb and 67±1°F wet bulb during the stabilization period and during the test period when the unit is tested in accordance with section 3.3.

* * * * *

3.2 * * * Variable defrost control models: 5°F (−15°C) freezer compartment temperature and 38±2°F fresh food compartment temperature during steady-state conditions with no door-openings. If both settings cannot be obtained, then test with the fresh food compartment temperature at 38±2°F and the freezer compartment as close to 5°F as possible.

3.3 Variable defrost control optional test. After a steady-state condition is achieved, the optional test requires door-openings for 12±2 seconds every 60 minutes on the fresh food compartment door and a simultaneous 12±2 second freezer compartment door-opening occurring every 4th time, to obtain 24 fresh food and six freezer compartment door-openings per 24-hour period. The first freezer door-opening shall be simultaneous with the fourth fresh food door-opening. The doors are to be opened 60° to 90° with an average velocity for the leading edge of the door of approximately 2 ft./sec. Prior to the initiation of the door-opening sequence, the refrigerator defrost control mechanism may be re-initiated in order to minimize the test duration.

* * * * *

4.1.2 * * * If the model being tested has a variable defrost control, the provisions of section 4.1.2.2 or 4.1.2.3 shall apply. If the model has a dual compressor system the provisions of 4.1.2.4 shall apply.

* * * * *

4.1.2.2 Variable defrost control. If the model being tested has a variable defrost control system, the test shall consist of three parts. Two parts shall be the same as the test for long-time automatic defrost (section 4.1.2.1). The third part is the optional test to determine the time between defrosts (section 5.2.1.3). The third part is used by manufacturers that choose not to accept the default value of F of 0.20, to calculate CT.

4.1.2.3 Variable defrost control optional test. After steady-state conditions with no door openings are achieved in accordance with section 3.3 above, the test is continued using the above daily door-opening sequence until stabilized operation is achieved. Stabilization is defined as a minimum of three consecutive defrost cycles with times between defrosts that will allow the calculation of a Mean Time Between Defrosts (MTBD1) that satisfies the statistical relationship of 90 percent confidence. The test is repeated on at least one more unit of the model and until the Mean Time Between Defrosts for the multiple unit tests (MTBD2) satisfies the statistical relationship. If the time between defrosts is greater than 96 hours (compressor "on" time) and this defrost period can be repeated on a second unit, the test may be terminated at 96 hours (CT) and the absolute time value used for MTBD for each unit.

4.1.2.4 Dual compressor systems with automatic defrost. If the model being tested has separate compressor systems for the refrigerator and freezer sections, each with its own automatic defrost system, then the two-part method in 4.1.2.1 shall be used. The second part of the method will be conducted separately for each automatic defrost system. The auxiliary components (fan motors, anti-sweat heaters, etc.) will be identified for each system and the energy consumption measured during each test.

* * * * *

5.1.2 * * * For models equipped with variable defrost controls, compartment temperatures shall be those measured in the first part of the test period specified in 4.1.2.2 above.

5.2.1.3 Variable defrost control. The energy consumption in kilowatt-hours per day shall be calculated equivalent to:

ET=(1440×EP1/T1)+(EP2−(EP1×T2/T1))×(12/CT) where 1440 is defined in 5.2.1.1 and EP1, EP2, T1, T2 and 12 are defined in 5.2.1.2.

$CT=CT_L \times CT_M/(F \times (CT_M-CT_L)+CT_L)$

CT_L=least or shortest time between defrosts in tenths of an hour (greater than or equal to six but less than or equal to 12 hours)

CT_M=maximum time between defrost cycles in tenths of an hour (greater than CT_L but not more than 96 hours)

F=ratio of per day energy consumption in excess of the least energy and the maximum difference in per day energy consumption and is equal to

$F = (1/CT - 1/CT_M)/(1/CT_L - 1/CT_M = (ET-ET_L)/ET_M - ET_L)$ or 0.20 in lieu of testing to find CT.

ET_L = least electrical energy used (kilowatt hours)

ET_M=maximum electrical energy used (kilowatt hours). For demand defrost models with no values for CT_L and CT_M in the algorithm the default values of 12 and 84 shall be used, respectively.

5.2.1.4 Optional test method for variable defrost controls.

CT = MTBD×0.5

where:

MTBD = mean time between defrosts

$$MTBD = \frac{\Sigma X}{N}$$

where:

X=in time between defrost cycles

N=number of defrost cycles

5.2.1.5 Dual compressor systems with dual automatic defrost. The two-part test method in section 4.1.2.2 must be used, the energy consumption in kilowatt per day shall be calculated equivalent to:

$ET=(1440 \times EP1/T1) + (EP2_F - (EP_F \times T2/T1)) \times 12/CT_F + (EP2_R - (EP_R \times T3/T1)) \times 12/CT_R$

Where 1440, EP1, T1, EP2, 12, and CT are defined in 5.2.1.2

EP_F = energy expended in kilowatt-hours during the second part of the test for the freezer system by the freezer system.

$EP2_F$ = total energy expended during the second part of the test for the freezer system.

EP_R = energy expended in kilowatt-hours during the second part of the test for the refrigerator system by the refrigerator system.

$EP2_R$ = total energy expended during the second part of the test for the refrigerator system.

T2 and T3 = length of time in minutes of the second test part for the freezer and refrigerator systems respectively.

CT_F = compressor "on" time between freezer defrosts (tenths of an hour).

CT_R = compressor "on" time between refrigerator defrosts (tenths of an hour).

* * * * *

3. Subpart B of part 430 is amended by adding sections 1.10, 1.11, 3.3, 4.1.2.2, 4.1.2.3, 5.2.1.3, and 5.2.1.4 and adding a sentence to the end of sections 2.1, 2.2, 3.1, 3.2, 4.1.2, and 5.1.2 to Appendix B1 as follows:

Appendix B1 to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Freezers

* * * * *

1.10 "Variable defrost control" means a long-time automatic defrost system (except the 14-hour defrost qualification does not apply) where successive defrost cycles are determined by an operating condition variable or variables other than solely compressor operating time. This includes any electrical or mechanical device. Demand defrost is a type of variable defrost control.

1.11 "Quick freeze" means an optional feature on freezers which is initiated manually and shut off manually. It bypasses the thermostat control and places the compressor in a steady-state operating condition until it is shut off.

* * * * *

2.1 * * * The ambient temperature shall be 80±2°F dry bulb and 67°F wet bulb during the stabilization period and during the test period when the unit is tested in accordance with section 3.3.

2.2 * * * The quick freeze option shall be switched off unless specified.

* * * * *

3.1 * * * If the model has the quick freeze option, it is to be used to bypass the temperature control.

3.2 * * * Variable defrost control models shall achieve 0±2°F during the steady-state conditions prior to the optional test with no door openings.

3.3 Variable defrost control optional test. After a steady-state condition is achieved, the door-opening sequence is initiated with an 18±2 second freezer door-opening occurring every eight hours to obtain three door-openings per 24-hour period. The first freezer door-opening shall occur at the initiation of the test period. The door(s) are to be opened 60 to 90° with an average velocity for the leading edge of the door of approximately two feet per second. Prior to the initiation of the door-opening sequence, the freezer defrost control mechanism may be re-initiated in order to minimize the test duration.

* * * * *

4.1.2 * * * If the model being tested has a variable defrost control the provisions of 4.1.2.2. shall apply.

* * * * *

4.1.2.2 Variable defrost control. If the model being tested has a variable defrost control system, the test shall consist of three parts. Two parts shall be the same as the test for long-time automatic defrost in accordance with section 4.1.2.1 above. The third part is the optional test to determine the time between defrosts (5.2.1.3). The third part is used by manufacturers that choose not to accept the default value of F of 0.20, to calculate CT.

4.1.2.3 Variable defrost control optional test. After steady-state conditions with no door-openings are achieved in accordance with section 3.3 above, the test is continued using the above daily door-opening sequence until stabilized operation is achieved. Stabilization is defined as a minimum of three consecutive defrost cycles with times between defrost that will allow the calculation of a Mean Time Between Defrosts (MTBD1) that satisfies the statistical relationship of 90 percent confidence. The test is repeated on at least one more unit of the model and until the Mean Time Between Defrosts for the multiple unit test (MTBD2) satisfies the statistical relationship. If the time between defrosts is greater than 96 hours (compressor "on" time) and this defrost period can be repeated on a second unit, the test may be terminated at 96 hours (CT) and the absolute time value used for MTBD for each unit.

* * * * *

5.1.2 * * * For models equipped with variable defrost controls, compartment temperatures shall be those measured in the first part of the test period specified in 4.1.2.2.

5.2.1.3 Variable defrost control. The energy consumption in kilowatt-hours per day shall be calculated equivalent to:

ET=(1440 x EP1/T1) + (EP2 − (EP1 x T2/T1) x (12/CT) where 1440 is defined in 5.2.1.1 and EP1, EP2, T1, T2 and 12 are defined in 5.2.1.2.

$CT=(CT_L \times CT_M)/(F\times (CT_M - CT_L) + CT_L)$

where:

CT_L=least or shortest time between defrost in tenths of an hour (greater than or equal to 6 hours but less than or equal to 12 hours, $6 < {}_L < 12$)

CT_M=maximum time between defrost cycles in tenths of an hour (greater than CT_L but not more than 96 hours, $CT_L < CT_M < 96$)

F=ratio of per day energy consumption in excess of the least energy and the maximum difference in per day energy consumption and is equal to

$F=(1/CT - 1/CT_M)/(1/CT_L - 1/CT_M) = (ET - ET_L)/(ET_M - ET_L)$ or 0.20 in lieu of testing to find CT

ET_L=least electrical energy consumed, in kilowatt hours

ET_M=maximum electrical energy consumed, in kilowatt hours

For demand defrost models with no values for CT_L and CT_M in the algorithm the default values of 12 and 84 shall be used, respectively.

5.2.1.4 Variable defrost control optional test. Perform the optional test for variable defrost control models to find CT.

CT=MTBD x 0.5

MTBD=mean time between defrost

$$MTBD = \frac{\Sigma X}{N}$$

X=time between defrost cycles

N=number of defrost cycles

Part VIII

Department of the Interior

Minerals Management Service

30 CFR Part 250

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Proposed Rule

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 250

RIN 1010–AB23

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends rules governing oil and gas and sulphur operations in the Outer Continental Shelf (OCS) to address sulphur exploration, development, and production operations with more specificity. Sulphur operations are currently addressed through rules applicable to oil, gas, and sulphur and through OCS Order No. 10, Sulphur Drilling Procedures, issued by the Gulf of Mexico (GOM) OCS Region. The proposed rule applies to all OCS Regions and creates a new Subpart P entitled "Sulphur Operations."

DATES: Comments must be hand delivered or postmarked no later than October 30, 1989.

ADDRESSES: Written comments must be mailed or hand delivered to the Department of the Interior; Minerals Management Service; 381 Elden Street; Mail Stop 646; Herndon, Virginia 22070; Attention: Gerald D. Rhodes.

FOR FURTHER INFORMATION CONTACT: Gerald D. Rhodes, telephone (703) 787–1600 or (FTS) 393–1600.

SUPPLEMENTARY INFORMATION: The Minerals Management Service (MMS) issued a notice of proposed rulemaking on March 18, 1986 (51 FR 9316), to consolidate, update, and restructure rules governing oil, gas, and sulphur operations in the OCS. Two of the comments received in response to the proposed rule suggested a need for requirements which would specifically address sulphur operations in the OCS. One of the commenters suggested specific provisions which should be included in rules governing sulphur operations, and the other recommended that rules governing sulphur operations be subject to public comment prior to publication of the final rule.

Sulphur leasehold activities in the OCS are currently managed by requiring compliance with the regulations in 30 CFR part 250, OCS Order No. 10 for the GOM Region, and review of Exploration and Development and Production Plans on a case-by-case basis. While this approach has been an effective means of providing for safety in operations and protection of the environment, MMS now proposes to issue rules which address sulphur operations with more specificity. The proposed rule, published March 1986, would have rescinded OCS Order No. 10 and relied entirely on the revised provisions of 30 CFR Part 250. It was subsequently determined that OCS Order No. 10 should remain in effect during the development of a revised Subpart P of 30 CFR Part 250 to address sulphur exploration, development, and production operations with more specificity.

Description of Proposed Rule

The following summarizes the main changes being proposed:

1. The definition of exploration in § 250.2, Definitions, in subpart A, would be modified to incorporate sulphur exploration.
2. The requirements in § 250.10, Suspension of production or other operations, in subpart A, would be changed to add criteria for the suspension of sulphur production.
3. A provision would be added in § 250.14, Reinjection and subsurface storage of gas, in subpart A, to insure that gas is not reinjected or stored in a cap rock of a salt dome that is known to contain sulphur.
4. In subpart C, two sections, Oil spill contingency plans (§ 25.42) and Training and drills (§ 250.43), would be amended to specify that sulphur operations are included in the scope of these requirements.
5. In subpart M, a new paragraph would be added to § 250.194, Model unit agreements, to provide for modification of the model unit agreements to cover the authorization of sulphur operations.
6. A new subpart P, Sulphur Operations, would be added to 30 CFR part 250. The requirements of that subpart would be applicable to all activities conducted under a sulphur lease. The requirements of subpart P of 30 CFR part 250 would include development and production of other minerals used in the exploration for or production of sulphur. The proposed regulations would not authorize a lessee to produce other minerals (e.g., salt) if the lessee is not otherwise authorized to do so.
7. General provisions are included in subpart P to provide a performance standard, specific definitions pertaining to sulphur operations, and requirements for equipment movement, operations in a hydrogen sulfide (H_2S) environment, welding and burning, electrical equipment, structures on fixed platforms, diesel engine shutdown devices, traveling block safety devices, and field rules.
8. The sulphur operators would continue to be required to comply with subparts A, B, C, G, I, J, M, N, and O. Sulphur operators would also be required to comply with those provisions of subparts D, E, F, H, K, and L that are referenced in subpart P.
9. Subpart P includes requirements pertaining to sulphur drilling operations (§§ 250.260 through 250.274). These requirements generally are similar to requirements for oil and gas operations and have been included in subpart P to the extent necessary to recognize the difference between oil and gas drilling operations and sulphur drilling operations.
10. Subpart P includes requirements pertaining to well-completion and well-workover operations (§§ 250.280 through 250.286). These requirements generally parallel the requirements pertaining to oil and gas in subparts E and F and have been included in subpart P to the extent necessary to recognize the difference between oil and gas well-completion and well-workover operations and sulphur well-completion and well-workover operations.
11. Subpart P includes requirements for production of sulphur (§§ 250.290 through 250.297). These requirements address safety in sulphur production as well as production rates, accurate production measurement, and site security. The subject of production measurement would be addressed on a case-by-case basis by requiring the lessee to submit a proposed measurement system to the Regional Supervisor for approval.

Comments are requested concerning the rules being proposed to address sulphur operations. Comments are specifically requested with regard to the provisions which would require workers involved in drilling operations to receive the same training as for oil and gas operations while workers engaged in well-completions, well-workovers, and production operations would be required to be trained to meet more general training requirements (e.g., proposed §§ 250.281 and 250.294). Are more specific requirements needed for training of well-completion, well-workover, and production workers?

Comments and recommendations are also invited that discuss:

1. Specific differences between sulphur well-drilling operations and oil and gas well-drilling operations and the way in which MMS's regulations should handle those differences;
2. The fact that H_2S is present in sulphur-bearing formations and the procedures that the sulphur industry has developed to protect its personnel from H_2S; and
3. The differences between the use of casing strings in sulphur wells and the use of casing strings in oil and gas wells, together with a discussion of the casing requirements appropriate for wells used in the production of sulphur.

Portions of proposed subpart P are specifically applicable to drilling operations or to well-completion and well-workover operations. One commenter had stated that the break between these operations is not as distinct as for oil and gas. Should drilling requirements and well-completion and well-workover requirements be combined and have fewer differences?

The main effect of the creation of subpart P is to more clearly identify requirements for sulphur operations. In the absence of the creation of subpart P, the requirements are already in place but require interpretation to see how requirements used primarily for oil and gas operations apply to sulphur operations. Accordingly, this proposed rule is not expected to cause an increase in costs or prices to consumers, other industries, or Government entities.

Executive Order 12291

The Department of the Interior (DOI) has determined that this document does not constitute a major rule under Executive Order 12291 because it will not result in a cost impact of more than $100 million annually. A decision to relocate and establish sulphur regulations in this new subpart P resulted from the recent revision and consolidation of all offshore operating rules. Most of the provisions of this rule were previously located in other subparts of part 250 pertaining to oil, gas, and sulphur operations and do not represent new or added requirements. Therefore, a Regulatory Impact Analysis is not required.

Executive Order 12630

The DOI certifies that the proposed rule does not represent a governmental action capable of interference with constitutionally protected property rights. Thus, a Taking Implication Assessment need not be prepared pursuant to Executive Order 12630, "Government Action and Interference with Constitutionally Protected Property Rights."

National Environmental Policy Act

The MMS has determined that this action does not constitute a major Federal action affecting the quality of the human environment; therefore, preparation of an Environmental Impact Statement is not required.

Regulatory Flexibility Act

The DOI has also determined that this document will not have a significant economic effect on a substantial number of small entities because, in general, the entities that engage in activities offshore are not considered small due to the technical complexities and financial resources necessary to conduct such activities.

Paperwork Reduction

The collections of information contained in this rule have been submitted to the Office of Management and Budget (OMB) for approval under 44 U.S.C. 3501 *et seq.* The collection of this information will continue to be required under existing authorizations for collections of information required by other subparts of 30 CFR Part 250 until its collection under Subpart P has been approved by OMB.

Public reporting burden for this collection of information is estimated to average 6.9 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Bureau Clearance Officer, Minerals Management Service, Mail Stop 632, 381 Elden Street, Herndon, Virginia 22070, and the Office of Management and Budget, Paperwork Reduction Project (1010–xxxx), Washington, DC 20503.

Authors

The principal authors of this proposed rule are John D. Borne, John V. Mirabella and Mary B. McDonald.

List of Subjects in 30 CFR Part 250

Continental shelf, Environmental impact statements, Environmental protection, Government contracts, Incorporated by reference, Investigations, Mineral royalties, Oil and gas development and production, Oil and gas exploration, Oil and gas reserves, Penalties, Pipelines, Public lands-mineral resources, Public lands-right-of-way, Reporting and recordkeeping requirements, Sulphur development and production, Sulphur exploration, Surety bonds.

Dated: March 15, 1989.

Thomas Gernhofer,

Acting Director, Minerals Management Service.

For the reasons set forth in the preamble, it is proposed that OCS Order No. 10, Sulphur Drilling Procedures, issued by the GOM Region be rescinded and that part 250 of title 30 of the Code of Federal Regulations be amended as follows:

1. OCS Order No. 10, Sulphur Drilling Procedures, issued by the Gulf of Mexico OCS Region, is rescinded.

PART 250—[AMENDED]

2. The authority citation for Part 250 continues to read as follows:

Authority: Sec. 204, Public Law 95–372, 92 Stat. 629 (43 U.S.C. 1334).

3. Section 250.0 is amended by adding paragraph (x) to read as follows:

§ 250.0 Authority for information collection.

* * * * *

(x) The information collection requirements in Subpart P, Sulphur Operations, have been approved by OMB under 44 U.S.C. 3501 *et seq.* and assigned clearance no. ______ The information is collected to inform MMS about sulphur exploration and development operations in the OCS. The information concerns activities to discover, define, develop, produce, store, measure, and transport sulphur and is used to assure that leasehold operations comply with statutory requirements provided for operational safety and environmental protection and will result in proper and timely operations on OCS sulphur leases. The requirement to respond is mandatory in accordance with 43 U.S.C. 1334.

4. Section 250.2 is amended to revise the definition of exploration as follows:

§ 250.2 Definitions.

* * * * *

Exploration means the process of searching for minerals, including:

(1) Geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such minerals;

(2) Any drilling, whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas in paying quantities is made and the drilling of any additional delineation well after such discovery that is needed to delineate any reservoir and to enable the lessee to determine whether to proceed with development and production; and

(3) Any drilling for sulphur, including the drilling of a well which indicates that a sulphur deposit is present and the drilling of additional delineation wells needed to outline the sulphur deposit and enable the lessee to determine whether to proceed with development and production operations.

* * * * *

5. Section 250.10 is amended to redesignate paragraph (d) as paragraph (d)(1) and to add a new paragraph (d)(2) to read as follows:

§ 250.10 Suspension of production or other operations.

* * * * *

(d) * * *

(2) For sulphur operations, a suspension of production pursuant to paragraph (a)(1), (a)(2), or (a)(3) of this section may not be issued unless a deposit on the lease for which the suspension is requested has been drilled and determined to be producible in paying quantities in accordance with 30 CFR 250.253.

6. Section 250.14 is amended to add a new paragraph (f) to read as follows:

§ 250.14 Reinjection and subsurface storage of gas.

* * * * *

(f) Reinjection or storage of gas will not be approved when the gas is to be injected into the cap rock of a salt dome known to contain a sulphur deposit.

7. Section 250.32(a) is revised to read as follows:

§ 250.32 Well location and spacing.

(a) The Regional Supervisor is authorized to approve well location and spacing programs necessary for exploration and development of a leased sulphur deposit or fluid hydrocarbon reservoir giving consideration to, among other factors, the location of drilling units and platforms, area extent and thickness of the sulphur deposit, geological and other reservoir characteristics, number of wells that can be economically drilled, protection of correlative rights, minimization of risk to the environment, and unreasonable interference with other uses of the OCS. Well location and spacing programs shall be determined independently for each leased sulphur deposit or reservoir in a manner which will locate wells in the optimum position for the most effective production of sulphur or reservoir fluids and avoid the drilling of unnecessary wells.

* * * * *

8. In § 250.34, paragraph (b)(5) and (b)(8)(i)(B) are revised; paragraphs (b)(9) through (b)(15) are redesignated as paragraphs (b)(11) through (b)(17); and new paragraphs (b)(9) and (b)(10) are added to read as follows:

§ 250.34 Development and production plan.

* * * * *

(b) * * *

(5)(i) A description of technology and reservoir engineering practices intended to increase the ultimate recovery of oil and gas; i.e., secondary, tertiary, or other enhanced recovery practices, or

(ii) A description of technology and recovery practices and procedures intended to assure optimum recovery of sulphur,

* * * * *

(8) * * *

(i) * * *

(B) The means proposed for transportation of oil, gas, and sulphur to shore; the routes to be followed by each mode of transportation; and the estimated quantities of oil, gas, and sulphur to be moved along such routes.

* * * * *

(9) For sulphur operations, the degree of subsidence that is expected at various stages of production, and measures that will be taken to assure safety and protection of the environment. Special attention shall be given to the effects of subsidence on fixed structures and pipelines.

(10) For sulphur operations, a discussion of the potential toxic or thermal effects on the environment caused by the discharge of bleed water, including a description of the measures that will be taken into account to mitigate these impacts.

* * * * *

10. In § 250.40 the introductory text of paragraph (a) is revised to read as follows:

§ 250.40 Pollution prevention.

(a) During the exploration, development, production, and transportation of oil and gas or sulphur, the lessee shall take measures to prevent unauthorized discharge of pollutants into the offshore waters. The lessee shall not create conditions which will pose unreasonable risk to public health, life, property, aquatic life, wildlife, recreation, navigation, commercial fishing, or other uses of the ocean.

* * * * *

11. In § 250.42, the first sentence in the introductory paragraph is revised to read as follows:

§ 250.42 Oil spill contingency plans.

Lessees conducting oil, gas, oil and gas, or sulphur operations in the OCS shall submit an Oil Spill Contingency Plan (OSCP) for approval by the Regional Supervisor with or prior to submitting an Exploration Plan or a Development and Production Plan. * * *

* * * * *

12. In § 250.43, the first sentence in paragraph (a) is revised to read as follows:

§ 250.43 Training and drills.

(a) Lessees conducting oil, gas, oil and gas, or sulphur operations in the OCS shall ensure that the oil spill response team is provided with hands-on training classes at least annually in the deployment and operation of the pollution control equipment to which they are assigned. * * *

* * * * *

13. The titles to subparts D, E, F, H, K, and L of Part 250 are revised to read as follows:

Subpart D—Oil and Gas Drilling Operations

Subpart E—Oil and Gas Well-Completion Operations

Subpart F—Oil and Gas Well-Workover Operations

Subpart H—Oil and Gas Production Safety Systems

Subpart K—Oil and Gas Production Rates

Subpart L—Oil and Gas Production Measurement, Surface Commingling, and Security

14. In § 250.154 paragraph (b)(1) is redesignated as paragraph (b)(1)(i) and republished, and a new paragraph (b)(1)(ii) is added to read as follows:

§ 250.154 Safety equipment requirements for DOI pipelines.

* * * * *

(b)(1)(i) Incoming pipelines to a platform shall be equipped with a flow safety valve (FSV).

(ii) For sulphur operations, incoming pipelines delivering gas to the power plant platform may be equipped with high- and low-pressure sensors (PSHL) which activate audible and visual alarms in lieu of requirements in paragraph (b)(1)(i) of this section. The PSHL shall be set at 15 percent above and below the normal operating pressure range.

* * * * *

15. In § 250.190 paragraph (c) is revised to read as follows:

§ 250.190 Authority and requirements for unitization.

* * * * *

(c) A unit area shall include the minimum number of leases or portion of leases required to permit one or more mineral reservoirs or potential hydrocarbon accumulations to be served by a minimum number of platforms, facility installations, and wells necessary for the efficient exploration for, or development and production of oil, gas, sulphur, and salt.

* * * * *

16. Section 250.194 is amended to add a paragraph (c) to read as follows:

§ 250.194 Model unit agreements.

* * * * *

(c) Model unit agreement for sulphur operations. Lessees conducting sulphur operations shall modify the model unit agreements found in paragraphs (a) and (b) of this section as appropriate for use with sulphur operations. Proposed unit agreements shall be submitted to MMS in accordance with § 250.192 or § 250.193 of this part.

17. Subpart P of Part 250 is revised to read as follows:

Subpart P—Sulphur Operations

Sec.	
250.250	Performance standard.
250.251	Definitions.
250.252	Applicability.
250.253	Determination of sulphur deposit.
250.254	General requirements.
250.260	Drilling requirements.
250.261	Control of wells.
250.262	Field rules.
250.263	Well casing and cementing.
250.264	Pressure testing of casing.
250.265	Blowout preventer systems and system components.
250.266	Blowout preventer systems tests, actuations, inspections, and maintenance.
250.267	Well-control drills.
250.268	Diverter systems.
250.269	Mud program.
250.270	Security of wells.
250.271	Supervision, surveillance, and training.
250.272	Applications for permit to drill.
250.273	Sundry notices and reports on wells.
250.274	Well records.
250.280	Well-completion and well-workover requirements.
250.281	Crew instructions.
250.282	Approvals and reporting of well-completion and well-workover operations.
250.283	Well-control fluids, equipment, and operations.
250.284	Blowout prevention equipment.
250.285	Blowout preventer system testing, records, and drills.
250.286	Tubing and wellhead equipment.
250.290	Production requirements.
250.291	Design, installation, and operation of surface production safety systems.
Sec.	
250.292	Additional production system requirements.
250.293	Safety-system testing and records.
250.294	Safety device training.
250.295	Production rates.
250.296	Production measurement.
250.297	Site security.

Subpart P—Sulphur Operations

§ 250.250 Performance standard.

Operations to discover, develop, and produce sulphur in the OCS shall be in accordance with an approved Exploration Plan or Development and Production Plan and shall be conducted in a manner to protect against harm or damage to life (including fish and other aquatic life), property, natural resources of the OCS including any mineral deposits (in areas leased or not leased), the national security or defense, and the marine, coastal, or human environment.

§ 250.251 Definitions.

Terms used in this subpart shall have the meanings as defined below:

Bleedwater means a mixture of mine water or booster water and connate water that is produced by a bleedwell.

Bleedwell means a well drilled into a producing sulphur deposit that is used to control the mine pressure generated by the injection of mine water.

Brine means the water containing dissolved salt obtained from a brine well by circulating water into and out of a cavity in the salt core of a salt dome.

Brine well means a well drilled through cap rock into the core at a salt dome for the purpose of producing brine.

Cap rock means the rock formation, a body of limestone, anhydride, and/or gypsum, overlying a salt dome.

Sulphur deposit means a formation of rock which contains elemental sulphur.

Sulphur production rate means the number of long tons of sulphur produced during a certain period of time, usually per day.

§ 250.252 Applicability.

(a) The requirements of this subpart P are applicable to all exploration, development, and production operations under an OCS sulphur lease. Sulphur operations include all activities conducted under a lease for the purpose of discovery or delineation of a sulphur deposit and for the development and production of elemental sulphur. Sulphur operations also include activities conducted for related purposes. Activities conducted for related purposes include, but are not limited to, production of other minerals for use in the exploration for or the development and production of sulphur. The lessee must have obtained the right to produce and use these other minerals in its sulphur operations.

(b) Lessees conducting sulphur operations in the OCS shall comply with the requirements of the applicable provisions of subparts A, B, C, G, I, J, M, N, and O of this part.

(c) Lessees conducting sulphur operations in the OCS are also required to comply with the requirement in the applicable provisions of subparts D, E, F, H, K, and L of this part where such provisions specifically are referenced in this subpart.

§ 250.253 Determination of sulphur deposit.

(a) Upon receipt of a written request from the lessee, the District Supervisor will determine whether a sulphur deposit exists in paying quantities (sulphur quantities sufficient to yield a return in excess of the costs, after completion of the wells, of producing minerals at the wellheads).

(b) The following shall be considered collectively as reliable evidence that a sulphur deposit is capable of producing in paying quantities:

(1) Core analyses which indicate the presence of a producible sulphur deposit (including an assay of elemental sulphur);

(2) An estimate of the amount of recoverable sulphur in long tons over a specified period of time; and

(3) Contour map of the cap rock together with isopach map showing the areal extent and estimated thickness of the sulphur deposit.

§ 250.254 General requirements.

Sulphur lessees shall comply with requirements of this section when conducting well-drilling, well-completion, well-workover, or production operations.

(a) *Equipment movement.* The movement of well-drilling, well-completion, or well-workover rigs and related equipment on and off an offshore platform, or from one well to another well on the same offshore platform, including rigging up and rigging down, shall be conducted in a safe manner.

(b) *Hydrogen sulfide (H_2S).* When drilling, well-completion, well-workover, or production operation is being conducted on a well in zones known to contain H_2S or in zones where the presence of H_2S is unknown (as defined in 30 CFR 250.67 of this part), the lessee shall take appropriate precautions to protect life and property especially during operations such as dismantling wellhead equipment and flow lines and circulating the well. The lessee shall comply with the requirements in § 250.67

of this part as well as the requirements of this subpart.

(c) *Welding and burning practices and procedures.* All welding, burning, and hot-tapping activities involved in drilling, well-completion, or well-workover operations shall be conducted with well-maintained equipment, trained personnel, and appropriate procedures in order to minimize the danger to life and property according to the specific requirements in § 250.52 of this part.

(d) *Electrical requirements.* All electrical equipment and systems involved in drilling, well-completion, well-workover, and production operations shall be designed, installed, equipped, protected, operated, and maintained so as to minimize the danger to life and property in accordance with the requirements of § 250.53 of this part.

(e) *Structures on fixed OCS platforms.* Derricks, masts, substructures and related equipment shall be selected, designed, installed, used, and maintained so as to be adequate for the potential loads and conditions of loading that may be encountered during the operations. Prior to moving a well-drilling, well-completion, or well-workover rig or associated equipment onto a platform, the lessee shall determine the structural capability of the platform to safely support the equipment and operations taking into consideration the corrosion protection, platform age, and previous stresses.

(f) *Traveling-block safety device.* After 1 year following the effective date of these regulations, all units being used for drilling, well-completion, or well-workover operations that have both a traveling block and a crown block shall be equipped with a safety device which is designed to prevent the traveling block from striking the crown block. The device shall be checked for proper operation weekly and after each drill-line slipping operation. The results of the operational check shall be entered in the operations log.

§ 250.260 Drilling requirements.

(a) Lessees of OCS sulphur leases shall conduct drilling operations in accordance with §§ 250.260 through 250.274 of this subpart and with other requirements of this part as appropriate.

(b) *Fitness of drilling unit.*

(1) Drilling units shall be capable of withstanding the oceanographic and meteorological conditions for the proposed season and location of operations.

(2) Prior to commencing operation, drilling units shall be made available for a complete inspection by the District Supervisor.

(3) The lessee shall provide information and data on the fitness of the drilling unit to perform the proposed drilling operation. The information shall be submitted with, or prior to, the submission of Form MMS–331C, Application for Permit to Drill (APD), in accordance with § 250.272 of this subpart. After a drilling unit has been approved by an MMS district office, the information required in this paragraph need not be resubmitted unless required by the District Supervisor or there are changes in the equipment that affect the rated capacity of the unit.

(c) *Oceanographic, meteorological, and drilling unit performance data.* Where oceanographic, meteorological, and drilling unit performance data are not otherwise readily available, lessees shall collect and report such data upon request to the District Supervisor. The type of information to be collected and reported will be determined by the District Supervisor in the interests of safety in the conduct of operations and the structural integrity of the drilling unit.

(d) *Foundation requirements.* When the lessee fails to provide sufficient information pursuant to §§ 250.33 and 250.34 of this part to support a determination that the seafloor is capable of supporting a specific bottom-founded drilling unit under the site-specific soil and oceanographic conditions, the District Supervisor may require that additional surveys and soil borings be performed and the results be submitted for review and evaluation by the District Supervisor before approval is granted for commencing drilling operations.

(e) *Tests, surveys, and samples.* (1) Lessees shall drill and take cores through the objective interval to determine the presence, quality, and quantity of sulphur in the cap rock and the outline of the commercial sulphur deposit.

(2) Inclinational surveys shall be obtained on all vertical wells at intervals not exceeding 1,000 feet during the normal course of drilling. Directional surveys giving both inclination and azimuth shall be obtained on all directionally drilled wells at intervals not exceeding 500 feet during the normal course of drilling and at intervals not exceeding 200 feet in all planned angle-change portions of the borehole.

(3) Directional surveys giving both inclination and azimuth shall be obtained on both vertically and directionally drilled wells at intervals not exceeding 500 feet prior to or upon setting a string of casing, or production liner, and at total depth. Composite directional surveys shall be prepared with the interval shown from the bottom of the conductor casing. In calculating all surveys, a correction from the true north to Universal-Transverse-Mercator-Grid-north or Lambert-Grid-north shall be made after making the magnetic-to-true-north correction. A composite dipmeter directional survey or a composite measurement-while-drilling (MWD) directional survey will be acceptable as fulfilling the applicable requirements of this paragraph.

(4) Wells are classified as vertical if the calculated average of inclination readings weighted by the respective interval lengths between readings from surface to drilled depth does not exceed 3 degrees from the vertical. When the calculated average inclination readings weighted by the length of the respective interval between readings from the surface to drilled depth exceeds 3 degrees, the well is classified as directional.

(5) At the request of a holder of an adjoining lease, the Regional Supervisor may, for the protection of correlative rights, furnish a copy of the directional survey to that leaseholder.

(f) *Fixed drilling platforms.* Applications for installation of fixed drilling platforms or structures including artificial islands shall be submitted in accordance with the provisions of subpart I, Platforms and Structures, of this part. Mobile drilling units which have their jacking equipment removed or have been otherwise immobilized are classified as fixed drilling platforms.

(g) *Crane Operations.* Cranes installed on fixed drilling platforms shall be operated and maintained in accordance with the provisions of American Petroleum Institute (API) Recommended Practice (RP) for Operation and Maintenance of Offshore Cranes (API RP 2D) to ensure the safety of facility operations. Records of inspection, testing, maintenance, and crane operators qualified in accordance with the provisions of API RP 2D shall be kept by the lessee at the lessee's field office nearest the OCS facility for a period of 2 years.

(h) *Diesel engine air intakes.* No later than 1 year from the effective date of these regulations, diesel-engine air intakes shall be equipped with a device to shut down the diesel engine in the event of runaway. Diesel engines which are continuously attended shall be equipped with either remote-operated manual or automatic shutdown devices. Diesel engines which are not continuously attended shall be equipped with automatic shutdown devices.

§ 250.261 Control of wells.

The lessee shall take necessary precautions to keep its wells under control at all times. Operations shall be conducted in a safe and workmanlike manner. The lessee shall utilize the best available and safest drilling technology and state-of-the-art methods to evaluate and minimize the potential for the well to flow and kick if gas is present in the upper formations above cap rock. The lessee shall utilize personnel who are trained and competent and shall utilize and maintain equipment and materials necessary to assure the safety and protection of personnel, equipment, natural resources, and the environment.

§ 250.262 Field rules.

When geological and engineering information in a field enables a District Supervisor to determine specific operating requirements, field rules may be established for drilling, well-completion, or well-workover on the District Supervisor's initiative or in response to a request from a lessee, such rules may modify the specific requirements of this subpart. After field rules have been established, operations in the field shall be conducted in accordance with such rules and other requirements of this subpart. Field rules may be amended or canceled for cause at any time upon the initiative of the District Supervisor or upon the request of a lessee.

§ 250.263 Well casing and cementing.

(a) *General requirements.*

(1) For the purpose of this subpart, the several casing strings in order of normal installation are:

(i) Drive or structural,

(ii) Conductor,

(iii) Cap rock casing,

(iv) Bobtail cap rock casing (required when the cap rock casing does not penetrate into the cap rock),

(v) Second cap rock casing (brine wells), and

(vi) Production liner.

(2) The lessee shall case and cement all wells with a sufficient number of strings of casing in a manner necessary to prevent release of fluids from any stratum through the wellbore (directly or indirectly) into the sea; protect freshwater aquifers from contamination; support unconsolidated sediments; and otherwise provide a means of control of the formation pressures and fluids. Cement composition, placement techniques, and waiting time shall be designed and conducted so that the cement in place behind the bottom 500 feet of casing or total length of annular cement fill, if less, attains a minimum compressive strength of 100 pounds per square inch (psi).

(3) The lessee shall install casing designed to withstand the anticipated stresses imposed by tensile, compressive, and buckling loads; burst and collapse pressures; thermal effects; and combinations thereof. Safety factors in the casing program design shall be of sufficient magnitude to provide well control during drilling and to assure safe operations for the life of the well.

(4) In cases where cement has filled the annular space back to the mud line, the cement may be washed out or displaced to a depth not exceeding the depth of the structural casing shoe to facilitate casing removal upon well abandonment if the District Supervisor determines that subsurface protection against damage to freshwater aquifers and against damage caused by adverse loads, pressures, and fluid flows is not jeopardized.

(5) If there are indications of inadequate cementing (such as lost returns, cement channeling, or mechanical failure of equipment), the lessee shall evaluate the adequacy of the cementing operations by pressure testing the casing shoe. If the test indicates inadequate cementing, the lessee shall initiate remedial action as approved by the District Supervisor. For cap rock casing, the test for adequacy of cementing shall be the pressure testing of the annulus between the cap rock and the conductor casings. The pressure shall not exceed 70 percent of the burst pressure of the conductor casing or 70 percent of the collapse pressure of the cap rock casing.

(b) *Drive of structural casing.* This casing shall be set by driving, jetting, or drilling to a minimum depth of 100 feet below the mud line or such other depth, as may be required or approved by the District Supervisor, in order to support unconsolidated deposits and to provide hole stability for initial drilling operations. If this portion of the hole is drilled, a quantity of cement sufficient to fill the annular space back to the mud line shall be used.

(c) *Conductor and cap rock casing setting and cementing requirements.* (1) Conductor and cap rock casing setting depths. Conductor and cap rock casing design and setting depths shall be based upon relevant engineering and geologic factors including the presence or absence of hydrocarbons, potential hazards, and water depths. The proposed casing setting depths may be varied, subject to District Supervisor approval, to permit the casing to be set in a competent formation or through formations determined desirable to be insolated from the wellbore by casing for safer drilling operations. However, the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas or, if unknown, upon encountering such formations. Upon encountering unexpected formation pressures, the lessee shall submit a revised casing program to the District Supervisor for approval.

(2) Conductor casing cementing requirements. Conductor casing shall be cemented with a quantity of cement that fills the calculated annular space back to the mud line. Cement fill shall be verified by the observation of cement returns. In the event that observation of cement returns is not feasible, additional quantities of cement shall be used to assure fill to the mud line.

(3) Cap rock casing cementing requirements. Cap rock casing shall be cemented with a quantity of cement that fills the calculated annular space to at least 200 feet inside the conductor casing. When geologic conditions such as near surface fractures and faulting exist, cap rock casing shall be cemented with a quantity of cement that fills the calculated annular space to the mud line, unless otherwise approved by the District Supervisor. In brine wells, the second cap rock casing shall be cemented with a quantity of cement that fills the calculated annular space to at least 200 feet above the setting depth of the first cap rock casing.

(d) *Bobtail cap rock casing setting and cementing requirements.* (1) Bobtail cap rock casing shall be set on or just in cap rock and lapped a minimum of 100 feet into the previous casing string.

(2) Sufficient cement shall be used to fill the annular space to the top of the bobtail cap rock casing.

(e) *Production liner setting and cementing requirements.* (1) Production liners for sulphur wells and bleedwells shall be set in cap rock at or above the bottom of the open hole (hole that is open in cap rock, below the bottom of the cap rock casing) and lapped into the previous casing string or to the surface. For brine wells, the liner shall be set in salt and lapped into the previous casing string or to the surface.

(2) The production liner is not required to be cemented.

§ 250.264 Pressure testing of casing.

(a) Prior to drilling the plug after cementing, all casing strings, except the drive or structural casing and production liner, shall be pressure tested. The conductor casing shall be tested to at least 200 psi. All casing strings below the conductor casing (except the production liner) shall be tested to 500 psi or 0.22 psi/ft, whichever is greater. If the pressure declines more than 10 percent in 30 minutes or if there is another indication of a leak, the casing shall be recemented, repaired, or an additional casing string run and the casing tested again. The above procedures shall be repeated until a satisfactory test is obtained. All casing pressure tests shall be recorded in the driller's report.

(b) After cementing any string of casing other than structural, drilling shall not be resumed until there has been a time lapse of at least 8 hours under pressure for the conductor casing string or 12 hours under pressure for all other casing strings. Cement is considered under pressure if one or more float valves are shown to be holding the cement in place or when other means of holding pressure are used.

§ 250.265 Blowout preventer systems and system components.

(a) *General.* The blowout preventer (BOP) systems and system components shall be designed, installed, used, maintained, and tested to assure well control.

(b) *BOP stacks.* The BOP stacks shall consist of an annular preventer and the number of ram-type preventers as specified under paragraphs (e) and (f) of this section. The pipe rams shall be of proper size to fit the drill pipe in use.

(c) *Working pressure.* The working-pressure rating of any BOP shall exceed the surface pressure to which it may be anticipated to be subjected.

(d) *BOP equipment.* All BOP systems shall be equipped and provided with the following:

(1) An accumulator system that provides sufficient capacity to supply 1.5 times the volume necessary to close and hold closed all BOP equipment units with a minimum pressure of 200 psi above the precharge pressure, without assistance from a charging system. No later than 6 months from the effective date of these regulations, accumulator regulators supplied by rig air and without a secondary source of pneumatic supply shall be equipped with manual overrides or alternately other devices provided to ensure capability of hydraulic operations if rig air is lost.

(2) An automatic backup to the accumulator system. The backup shall be supplied by a power source independent from the power source to the primary accumulator system and possess sufficient capability to close the BOP and hold it closed.

(3) At least one operable remote BOP control station in addition to the one on the drilling floor. This control station shall be in a readily accessible location away from the drilling floor.

(4) A drilling spool with side outlets, if side outlets are not provided in the body of the BOP stack, to provide for separate kill and choke lines.

(5) A choke line and a kill line each equipped with two full-opening valves. At least one of the valves on the choke line and one valve on the kill line shall be remotely controlled, except that a check valve may be installed on the kill line in lieu of the remotely controlled valve provided that two readily accessible manual valves are in place, and the check valve is placed between the manual valve and the pump.

(6) A fill-up line above the uppermost preventer.

(7) A choke manifold designed with consideration of anticipated pressures to which it may be subjected, method of well control to be employed, surrounding environment, and corrosiveness, volume, and abrasiveness of fluids. The choke manifold shall also meet the following requirements:

(i) Manifold and choke equipment subject to well and/or pump pressure shall have a rated working pressure at least as great as the rated working pressure of the ram-type BOP's or as otherwise approved by the District Supervisor;

(ii) All components of the choke manifold system shall be protected from freezing by heating, draining, or filling with proper fluids; and

(iii) When buffer tanks are installed downstream of the choke assemblies for the purpose of manifolding the bleed lines together, isolation valves shall be installed on each line.

(8) Valves, pipes, flexible steel hoses, and other fittings upstream of, and including, the choke manifold with a pressure rating at least as great as the rated working pressure of the ram-type BOP's unless otherwise approved by the District Supervisor.

(9) A wellhead assembly with a rated working pressure that exceeds the pressure to which it might be subjected.

(10) The following system components:

(i) A kelly cock (an essentially full-opening valve) installed below the swivel and a similar valve of such design that it can be run through the BOP stack installed at the bottom of the kelly. A wrench to fit each valve shall be stored in a location readily accessible to the drilling crew;

(ii) An inside BOP and an essentially full-opening, drill-string safety valve in the open position on the rig floor at all times while drilling operations are being conducted. These valves shall be maintained on the rig floor to fit all connections that are in the drill string. A wrench to fit the drill-string safety value shall be stored in a location readily accessible to the drilling crew;

(iii) A safety valve available on the rig floor assembled with the proper connection to fit the casing string being run in the hole; and

(iv) Locking devices installed on the ram-type preventers.

(e) *BOP requirements.* Prior to drilling below cap rock casing, a BOP system shall be installed consisting of at least three remote-controlled, hydraulically operated BOP's including at least one equipped with pipe rams, one with blind rams, and one annular type.

(f) *Tapered drill-string operations.* Prior to commencing tapered drill-string operations, the BOP stack shall be equipped with conventional and/or variable-bore pipe rams to provide either of the following:

(1) One set of variable bore rams capable of sealing around both sizes in the string and one set of blind rams, or

(2) One set of pipe rams capable of sealing around the larger size string, provided that blind-shear ram capability is present, and crossover subs to the larger size pipe are readily available on the rig floor.

§ 250.266 Blowout preventer systems tests, actuations, inspections, and maintenance.

(a) Prior to conducting high-pressure tests, all BOP systems shall be tested to a low pressure of 200 to 300 psi.

(b) Ram-type BOP's and the choke manifold shall be pressure tested with water to rated working pressure or as otherwise approved by the District Supervisor. Annular type BOP's shall be pressure tested with water to 70 percent of rated working pressure or as otherwise approved by the District Supervisor.

(c) In conjunction with the weekly pressure test of BOP systems required in paragraph (d) of this section, the choke manifold valves, upper and lower kelly cocks, and drill-string safety valves shall be pressure tested to pipe-ram test pressures. Safety valves with proper casing connections shall be actuated prior to running casing.

(d) BOP system shall be pressure tested as follows:

(1) When installed;

(2) Before drilling out each string of casing or before continuing operations in cases where cement is not drilled out;

(3) At least once each week, but not exceeding 7 days between pressure tests, alternating between control stations. If either control system is not functional, further drilling operations shall be suspended until that system becomes operable. A period of more than 7 days between BOP tests is allowed when there is a stuck drill pipe or there are pressure control operations and remedial efforts are being performed, provided that the pressure tests are conducted as soon as possible and before normal operations resume. The reason for postponing pressure testing shall be entered into the driller's report. Pressure testing shall be performed at intervals to allow each drilling crew to operate the equipment. The weekly pressure test is not required for blind and blind-shear rams;

(4) Blind and blind-shear rams shall be actuated at least once every 7 days. Closing pressure on the blind and blind-shear rams greater than necessary to indicate proper operation of the rams is not required;

(5) Variable bore-pipe rams shall be pressure tested against all sizes of pipe in use, excluding drill collars and bottom-hole tools; and

(6) Following the disconnection or repair of any well-pressure containment seal in the wellhead/BOP stack assembly but limited to the affected component.

(e) All BOP systems shall be inspected and maintained to assure that the equipment will function properly. The BOP systems shall be visually inspected at least once each day. The manufacturer's recommended inspection and maintenance procedures are acceptable as guidelines in complying with this requirement.

(f) The results of all pressure tests, actuations, and inspections of the BOP system and system components shall be recorded in the driller's report.

§ 250.267 Well-control drills.

Well-control drills shall be conducted for each drilling crew in accordance with the requirements set forth in § 250.58 of this part or as approved by the District Supervisor.

250.268 Diverter systems.

(a) When drilling a conductor hole and cap rock hole, all drilling units shall be equipped with a diverter system consisting of a diverter sealing element, diverter lines, and control systems. The diverter system shall be designed, installed, and maintained so as to divert gases, water, mud, and other materials away from the facilities and personnel.

(b) No later than 1 year from the effective date of these regulations, diverter systems shall be in compliance with the requirements of this section. The requirements applicable to diverters which were in effect immediately prior to the effective date of these regulations shall remain in effect until the diverter systems are in compliance with the requirements of this section.

(c) The diverter system shall be equipped with remote-control valves in the flow lines that can be operated from at least one remote-control station in addition to the one on the drilling floor. Any valve used in a diverter system shall be full-opening. No manual or butterfly valves shall be installed in any part of a diverter system. There shall be a minimum number of turns in the vent line(s) downstream of the spool outlet flange, and the radius of curvature of turns shall be as larger as practicable. Flexible hose may be used for diversion lines instead of rigid pipe if the flexible hose has integral end couplings. The entire diverter system shall be firmly anchored and supported to prevent whipping and vibrations. All diverter control instruments and lines shall be protected from physical damage from thrown and falling objects.

(d) For drilling operations conducted with a surface wellhead configuration, the following shall apply:

(1) If the diverter system utilizes only one spool outlet, branch lines shall be installed to provide downwind diversion capability, and

(2) No spool outlet or diverter line internal diameter shall be less than 10 inches, except that dual spool outlets are acceptable if each outlet has a minimum internal diameter of 8 inches and that both outlets are piped to overboard lines and that each line downstream of the changeover nipple at the spool has a minimum internal diameter of 10 inches.

(e) The diverter sealing element and diverter valves shall be pressure tested to a minimum of 200 psi when nippled upon conduction casing. No more than 7 days shall elapse between subsequent pressure tests. The diverter sealing element, diverter valves, and diverter control systems (including the remote) shall be actuation tested, and the diverter lines shall be tested for flow prior to spudding and thereafter at least once each 24-hour period alternating between control stations. All test results shall be recorded in the driller's report.

§ 250.269 Mud program.

(a) The quantities, characteristics, use, and testing of drilling mud and the related drilling procedures shall be designed and implemented to prevent the loss of well control.

(b) The lessee shall comply with requirements concerning mud control, mud test and monitoring equipment, mud quantities, and safety precautions in enclosed mud handling areas as prescribed in § 250.60(b), (c) (d), and (e) of this part, except that the installation of an operable degasser in the mud system as required in § 250.60(b)(8) is not required for sulphur operations.

§ 250.270 Security of wells.

A downhole-safety device such as a cement plug, bridge plug, or packer shall be timely installed when drilling operations are interrupted by events such as those which force evacuation of the drilling crew, prevent station keeping, or require repairs to major drilling unit or well-control equipment. The use of blind-sheer rams or pipe rams and an inside BOP may be approved by the District Supervisor in lieu of the above requirements if cap rock casing has been set.

§ 250.271 Supervision, surveillance, and training.

(a) The lessee shall provide onsite supervision of drilling operations at all times.

(b) From the time drilling operations are initiated and until the well is completed or abandoned, a member of the drilling crew or the toolpusher shall maintain rig-floor surveillance continuously, unless the well is secured with BOP's, bridge plugs, packers, or cement plugs.

(c) Lessee and drilling contractor personnel shall be trained and qualified in accordance with the provisions of Subpart O of this part, and MMS Training Standard MMSS-OCS-T 1, Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations. Records of specific training which lessee and drilling contractor personnel have successfully completed, the dates of completion, and the names and dates of the courses shall be maintained at the drill site.

§ 250.272 Applications for permit to drill.

(a) Prior to commencing the drilling of a well under an approved Exploration Plan, Development and Production Plan, or Development Operations Coordination Document, the lessee shall file a Form MMS-331C, APD, with the District Supervisor for approval. Prior to commencing operations, written approval from the District Supervisor must be received by the lessee unless oral approval has been given.

(b) An APD shall include rated capacities of the proposed drilling unit and of major drilling equipment. After a drilling unit has been approved for use in an MMS district, the information need not be resubmitted unless required by the District Supervisor or there are changes in the equipment that affect the rated capacity of the unit.

(c) An APD shall include a fully completed Form MMS–331C and the following:

(1) A plat, drawn to a scale of 2,000 feet to the inch, showing the surface and subsurface location of the well to be drilled and of all the wells previously drilled in the vicinity from which information is available. For development wells on a lease, the previously drilled wells in the vicinity need not be shown on the plat. Locations shall be indicated in feet from the nearest block line;

(2) The design criteria considered for the well and for well control, including the following:

(i) Pore pressure;

(ii) Formation fracture gradients;

(iii) Potential lost circulation zones;

(iv) Mud weights;

(v) Casing setting depths;

(vi) Anticipated surface pressure (which for purposes of this section are defined as the pressure which can reasonably be expected to be exerted upon a casing string and its related wellhead equipment). In the calculation of anticipated surface pressure, the lessee shall take into account the drilling, completion, and producing conditions. The lessee shall consider mud densities to be used below various casing strings, fracture gradients of the exposed formations, casing setting depths, total well depth, formation fluid type, and other pertinent conditions. Considerations for calculating anticipated surface pressure may vary for each segment of the well. The lessee shall include as a part of the statement of anticipated surface pressure the calculations used to determine this pressure during the drilling phase and the completion phase, including the anticipated surface pressure used for production string design; and

(vii) If a shallow hazards site survey is conducted, the lessee shall submit with or prior to the submittal of the APD, two copies of a summary report describing the geological and manmade conditions present. The lessee shall also submit two copies of the site maps and data records identified in the survey strategy.

(3) A BOP equipment program including the following:

(i) The pressure rating of BOP equipment,

(ii) A schematic drawing of the diverter system to be used (plan and elevation views) showing spool outlet internal diameter(s); diverter line lengths and diameters, burst strengths, and radius of curvature at each turn; valve type, size, working-pressure rating, and location; the control instrumentation logic; and the operating procedure to be used by personnel, and

(iii) A schematic drawing of the BOP stack showing the inside diameter of the BOP stack and the number of annular, pipe ram, variable-bore pipe ram, blind ram, and blind-shear ram preventers.

(4) A casing program including the following:

(i) Casing size, weight, grade, type of connection and setting depth, and

(ii) Casing design safety factors for tension, collapse, and burst with the assumptions made to arrive at these values.

(5) The drilling prognosis including the following:

(i) Estimated coring intervals,

(ii) Estimated depths to the top of significant marker formations, and

(iii) Estimated depths at which encounters with fresh water, sulphur, oil, gas, or abnormally pressured water are expected.

(6) A cementing program including type and amount of cement in cubic feet to be used for each casing string;

(7) A mud program including the minimum quantities of mud and mud materials, including weight materials, to be kept at the site;

(8) A directional survey program for directionally drilled wells;

(9) An H_2S Contingency Plan, if applicable, and not submitted previously; and

(10) Such other information as may be required by the District Supervisor.

(d) Public information copies of the APD shall be submitted in accordance with § 250.17 of this part.

§ 250.273 Sundry notices and reports on wells.

(a) Notices of the lessee's intention to change plans, make changes in major drilling equipment, deepen or plug back a well, or engage in similar activities and subsequent reports pertaining to such operations shall be submitted to the District Supervisor on Form MMS–331, Sundry Notices and Reports on Wells. Prior to commencing operations, written approval must be received from the District Supervisor unless oral approval is obtained pursuant to § 250.6 of this part.

(b) The Form MMS–331 submittal shall contain a detailed statement of the proposed work that will materially change the approved APD. Information submitted shall include the present state of the well including the production liner and last string of casing, the well depth and production zone, and the well's capability to produce. Within 30 days after completion of the work, a subsequent detailed report of all the work done and the results obtained shall be submitted.

(c) Public information copies of Form MMS–331 shall be submitted in accordance with § 250.17 of this part.

§ 250.274 Well records.

(a) Complete and accurate records for each well and all well operations shall be retained for a period of 2 years at the lessee's field office nearest the OCS facility or at other locations conveniently available to the District Supervisor. The records shall contain a description of any significant malfunction or problem; all the formations penetrated; the content and character of sulphur in each formation if cored and analyzed; the kind, weight, size, grade, and setting depth of casing; all well logs and surveys run in the wellbore; and all other information required by the District Supervisor in the interests of resource evaluation, prevention of waste, conservation of natural resources, protection of correlative rights, safety, and environmental protection.

(b) When drilling operations are suspended, or temporarily prohibited, under the provisions of § 250.10 of this part, the lessee shall, within 30 days after termination of the suspension or temporary prohibition or within 30 days after the completion of any activities related to the suspension or prohibition, transmit to the District Supervisor duplicate copies of the records of all activities related to and conducted during the suspension or temporary prohibition on, or attached to, Form MMS–330, Well (Re)Completion Report, or Form MMS–331, Sundry Notices and Reports on Wells, as appropriate.

(c) Upon request by the Regional or District Supervisor, the lessee shall furnish the following:

(1) Copies of the records of any of the well operations specified in paragraph (a) of this section;

(2) Copies of the driller's daily report at a frequency as determined by the District Supervisor. Items to be reported include spud dates, casing setting depths, cement quantities, casing characteristics, mud weights, lost returns, and any unusual activities; and

(3) Legible, exact copies of reports on cementing, acidizing, analyses of cores, testing, or other similar services.

(d) As soon as available, the lessee shall transmit copies of logs and charts developed by well-logging operations, directional-well surveys, and core analyses. Composite logs of multiple runs and directional-well surveys shall be transmitted to the District Supervisor

in duplicate as soon as available but not later than 30 days after completion of such operations for each well.

(e) If the District Supervisor determines that circumstances warrant, the lessee shall submit any other reports and records of operations in the manner and form prescribed by the District Supervisor.

§ 250.280 Well-completion and well-workover requirements.

(a) Lessees shall conduct well-completion and well-workover operations in sulphur wells, bleedwells, and brine wells in accordance with §§ 250.280 through 250.286 of this part and other provisions of this part as appropriate (see §§ 250.71 and 250.91 of this part for the definition of well-completion and well-workover operations).

(b) Well-completion and well-workover operations shall be conducted in a manner to protect against harm or damage to life (including fish and other aquatic life), property, natural resources of the OCS including any mineral deposits (in areas leased and not leased), the national security or defense, or the marine, coastal, or human environment.

§ 250.281 Crew instructions.

Prior to engaging in well-completion or well-workover operations, crew member's shall be instructed in the safety requirements of the operations to be performed, possible hazards to be encountered, and general safety considerations to protect personnel, equipment, and the environment. Date and time of safety meetings shall be recorded and available for MMS review.

§ 250.282 Approvals and reporting of well-completion and well-workover operations.

(a) No well-completion or well-workover operation shall begin until the lessee receives written approval from the District Supervisor. Approval for such operations shall be requested on Form MMS–331. Approvals by the District Supervisor shall be based upon a determination that the operations will be conducted in a manner to protect against harm or damage to life, property, natural resources of the OCS, including any mineral deposits, the national security or defense, or the marine, coastal, or human environment.

(b) The following information shall be submitted with Form MMS–331 (or with Form MMS–331C):

(1) A brief description of the well-completion or well-workover procedures to be followed;

(2) When changes in existing subsurface equipment are proposed, a well schematic drawing showing the equipment; and

(3) Where the well is in zones known to contain H_2S or zones where the presence of H_2S is unknown, a description of the safety precautions to be implemented.

(c)(1) Within 30 days after completion, Form MMS–330, including a schematic of the tubing and the results of any well tests, shall be submitted to the District Supervisor.

(2) Within 30 days after completing the well-workover operation, except routine operations, Form MMS–331 shall be submitted to the District Supervisor and shall include the results of any well tests and a new schematic if any subsurface equipment has been changed.

§ 250.283 Well-control fluids, equipment, and operations.

(a) Well-control fluids, equipment, and operations shall be designed, utilized, maintained, and/or tested as necessary to control the well in foreseeable conditions and circumstances, including subfreezing conditions. The well shall be continuously monitored during well-completion and well-workover operations and shall not be left unattended at any time unless the well is shut in and secured;

(b) The following well-control fluid equipment shall be installed, maintained, and utilized:

(1) A fill-up line above the uppermost BOP,

(2) A well-control fluid-volume measuring device for determining fluid volumes when filling the hole on trips, and

(3) A recording mud-pit-level indicator to determine mud-pit-volume gains and losses. This indicator shall include both a visual and an audible warning device.

(c) When coming out of the hole with drill pipe or a workover string, the annulus shall be filled with well-control fluid before the change in fluid level decreases the hydrostatic pressure 75 psi or every stands of drill pipe or workover string, whichever gives a lower decrease in hydrostatic pressure. The number of stands of drill pipe or workover string and drill collars that may be pulled prior to filling the hole and the equivalent well-control fluid volume shall be calculated and posted near the operator's station. A mechanical, volumetric, or electronic device for measuring the amount of well-control fluid required to fill the hole shall be utilized.

§ 250.284 Blowout prevention equipment.

(a) The BOP system and system components and related well-control equipment shall be designed, used, maintained, and tested in a manner necessary to assure well control in foreseeable conditions and circumstances, including subfreezing conditions. The working pressure of the BOP system and system components shall equal or exceed the expected surface pressure to which they may be subjected.

(b) The minimum BOP stack for well-completion operations or for well-workover operations with the tree removed shall consist of the following:

(1) Three remote-controlled, hydraulically operated preventers including at least one equipped with pipe rams, one with blind rams, and one annular type.

(2) When a tapered string is used, the minimum BOP stack shall consist of either of the following:

(i) An annular preventer, one set of variable bore rams capable of sealing around both sides in the string, and one set of blind rams; or

(ii) An annular preventer, one set of pipe rams capable of sealing around the larger size string, a preventer equipped with blind-shear rams, and a crossover sub to the larger size pipe that shall be readily available on the rig floor.

(c) The BOP systems for well-completion operations, or for well-workover operations with the tree removed, shall be equipped with the following:

(1) An accumulator system that provides sufficient capacity to supply 1.5 times the volume necessary to close and hold closed all BOP equipment units with a minimum pressure of 200 psi above the precharge pressure without assistance from a charging system. No later than 6 months from the effective date of these regulations, accumulator regulators supplied by rig air and without a secondary source of pneumatic supply shall be equipped with manual overrides or alternately other devices provided to ensure capability of hydraulic operations if rig air is lost;

(2) An automatic backup to the accumulator system. The backup shall be supplied by a power source independent from the power source to the primary accumulator system and possess sufficient capacity to close all BOP's and hold them closed;

(3) Locking devices for the pipe-ram preventers;

(4) At least one remote BOP-control station and one BOP-control station on the rig floor; and

(3) A choke line and a kill line each equipped with two full-opening valves and a choke manifold. One of the choke-line valves and one of the kill line valves shall be remotely controlled except that a check valve may be installed on the kill line in lieu of the remotely controlled valve provided that two readily accessible manual valves are in place, and the check valve is placed between the manual valve and the pump.

(d) The minimum BOP-stack components for well-workover operations with the tree in place and performed through the wellhead inside of the sulphur line using small diameter jointed pipe (usually ¾ inch to 1¼ inch) as a work string; i.e., small-tubing operations, shall consist of the following:

(1) Two sets of pipe rams, and

(2) One set of blind rams.

(e) An essentially full-opening, work-string safety valve shall be maintained on the rig floor at all times during well-completion operations. A wrench to fit the work-string safety valve shall be readily available. Proper connections shall be readily available for inserting a safety valve in the work string.

§ 250.285 Blowout preventer system testing, records, and drills.

(a) Prior to conducting high-pressure tests, all BOP systems shall be tested to a low pressure of 200 to 300 psi.

(b) Ram-type BOP's and the choke manifold shall be pressure tested with water to a rated working pressure or as otherwise approved by the District Supervisor. Annular type BOP's shall be pressure tested with water to 70 percent of rated working pressure or as otherwise approved by the District Supervisor.

(c) In conjunction with the weekly pressure test of BOP systems required in paragraph (d) of this section, the choke manifold valves, upper and lower kelly cocks, and drill-string safety valves shall be pressure tested to pipe-ram test pressures. Safety valves with proper casing connections shall be actuated prior to running casing.

(d) BOP system shall be pressure tested as follows:

(1) When installed;

(2) Before drilling out each string of casing or before continuing operations in cases where cement is not drilled out;

(3) At least once each week, but not exceeding 7 days between pressure tests, alternating between control stations. If either control system is not functional, further drilling operations shall be suspended until that system becomes operable. A period of more than 7 days between BOP tests is allowed when there is a stuck drill pipe or there are pressure control operations, and remedial efforts are being performed, provided that the pressure tests are conducted as soon as possible and before normal operations resume. The reason for postponing pressure testing shall be entered into the driller's report. Pressure testing shall be performed at intervals to allow each drilling crew to operate the equipment. The weekly pressure test is not required for blind and blind-shear rams;

(4) Blind and blind-shear rams shall be actuated at least once every 7 days. Closing pressure on the blind and blind-shear rams greater than necessary to indicate proper operation of the rams is not required;

(5) Variable bore-pipe rams shall be pressure tested against all sizes of pipe in use, excluding drill collars and bottom-hole tools; and

(6) Following the disconnection or repair of any well-pressure containment seal in the wellhead/BOP stack assembly but limited to the affected component.

(e) All personnel engaged in well-completion operations shall participate in a weekly BOP drill to familiarize crew members with appropriate safety measures.

(f) The times, dates, and results of BOP tests, actuations, and crew drills shall be recorded in the operations log.

§ 250.286 Tubing and wellhead equipment.

(a) No tubing string shall be placed into service or continue to be used unless such tubing string has the necessary strength and pressure integrity and is otherwise suitable for its intended use.

(b) Wellhead, tree, and related equipment shall be designed, installed, tested, used, and maintained so as to achieve and maintain pressure control.

§ 250.290 Production requirements.

(a) Lessee shall conduct sulphur production operations in compliance with the approved Development and Production Plan, requirements of §§ 250.290 through 250.297 of this subpart, and requirements of this part, as appropriate.

(b) Production safety equipment shall be designed, installed, used, maintained, and tested in a manner to assure the safety and protection of the human, marine, and coastal environments.

§ 250.291 Design, installation, and operation of surface production safety systems.

(a) *General.* All production facilities shall be designed, installed, and maintained in a manner which provides for efficiency and safety of operations and protection of the environment.

(b) Hydrocarbon handling vessels shall be protected with a basic and ancillary surface safety system designed, analyzed, installed, tested, and maintained in operating condition in accordance with the provisions of API Recommended Practice for Analysis, Design, Installation and Testing of Basic Surface Safety Systems for Offshore Production Platforms (API RP 14C). If processing components are to be utilized, other than those for which Safety Analysis Checklists are included in API RP 14C, the analysis technique and documentation specified therein shall be utilized to determine the effects and requirements of these components upon the safety system.

(c) *Approval of safety-systems design and installation features.* Prior to installation, the lessee shall submit a production safety system application, in duplicate, to the District Supervisor for approval. The application shall include information relative to the proposed design and installation features. Information concerning approved design and installation features shall be maintained by the lessee at the lessee's offshore field office nearest the OCS facility or other location conveniently available to the District Supervisor. All approvals are subject to field verification. The application shall include the following:

(1) A schematic flow diagram showing size, capacity, design, working pressure of separators, storage tanks, compressor pumps, metering devices, and other sulphur or hydrocarbon-handling vessels;

(2) A schematic flow diagram (API RP 14C, Figure E1) and the related Safety Analysis Function Evaluation chart (API RP 14C, subsection 4.3c);

(3) A schematic piping diagram showing the size and maximum allowable working pressures as determined in accordance with API RP 14E, Design and Installation of Offshore Production Platform Piping Systems;

(4) Electrical system information including the following:

(i) A plan of each platform deck, outlining all hazardous areas classified in accordance with API RP 500B, Recommended Practice for Classification of Locations for Electrical Installations at Drilling Rigs and Production Facilities on Land and on Marine Fixed and Mobile Platforms, and outlining areas in which potential ignition sources are to be installed;

(ii) All significant hydrocarbon sources and a description of the type of decking, ceiling, walls (e.g., grating or solid), and firewalls; and

(iii) Elementary electrical schematic of any platform safety shutdown system with a functional legend.

(5) Certification that the design for the mechanical and electrical systems to be installed were approved by registered professional engineers. After these systems are installed, the lessee shall submit a statement to the District Supervisor certifying that new installations conform to the approved designs of this subpart; and

(6) Design and schematics of the installation and maintenance of all fire- and gas-detection systems including the following:

(i) Type, location, and number of detection heads;

(ii) Type and kind of alarm, including emergency equipment to be activated;

(iii) Method used for detection;

(iv) Method and frequency of calibration; and

(v) A functional block diagram of the detection system, including the electric power supply.

§ 250.292 Additional production system requirements.

(a) *General.* Lessees shall comply with the following fuel gas handling safety system requirements (some of which are in addition to these contained in API RP 14C, incorporated by reference in § 250.122(b)).

(b) *Design, installation, and operation of additional fuel gas handling safety systems.* (1) Pressure and fired vessels shall be designed, fabricated, code stamped, and maintained in accordance with applicable provisions of Section I, IV, and VIII of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code.

(i) Pressure relief valves shall be designed, installed, and maintained in accordance with applicable provisions of Sections I, IV, and VIII of the ASME Boiler and Pressure Vessel Code. The relief valves shall conform to the valve-sizing and pressure-relieving requirements specified in these documents; however, the relief valves shall be set no higher than the maximum-allowable working pressure of the vessel. All relief valves and vents shall be piped in such a way as to prevent fluid from striking personnel or ignition sources.

(ii) The lessee shall use pressure recorders to establish the operating pressure ranges of pressure vessels in order to establish the pressure-sensor settings. Pressure-recording charts used to determine operating pressure ranges shall be maintained by the lessee for a period of 2 years at the lessee's field office nearest the OCS facility or at another location conveniently available to the District Supervisor. The high-pressure sensor shall be set no higher than 15 percent or 5 psi, whichever is greater, above the highest operating pressure of the vessel. This setting shall also be set sufficiently below (5 percent or 5 psi, whichever is greater) the relief valve's set pressure to assure that the high-pressure sensor sounds an alarm before the relief valve starts relieving. The low-pressure sensor shall sound an alarm no lower than 15 percent or 5 psi, whichever is greater, below the lowest pressure in the operating range.

(2) *Engine exhaust.* Engine exhausts shall be equipped to comply with the insulation and personnel protection requirements of API RP 14C, section 4.2c(4). Exhaust piping from diesel engines shall be equipped with spark arresters.

(3) *Firefighting systems.* Firefighting systems shall conform to subsection 5.2, Fire Water Systems, of API RP 14G, Fire Prevention and Control on Open Type Offshore Production Platforms, and shall be subject to the approval of the District Supervisor. Additional requirements shall apply as follows:

(i) A firewater system consisting of rigid pipe with firehose stations shall be installed. The firewater system shall be installed to provide needed protection, especially in areas where fuel handling equipment is located. A fixed waterspray system shall be installed in enclosed well-bay areas where hydrocarbon vapors may accumulate;

(ii) Fuel or power for firewater pump drivers shall be available for at least 30 minutes of run time during platform shut-in time. If necessary, an alternate fuel or power supply shall be installed to provide for this pump-operating time unless an alternate firefighting system has been approved by the District Supervisor;

(iii) A firefighting system using chemicals may be used in lieu of a water system if the District Supervisor determines that the use of a chemical system provides equivalent fire-protection control; and

(iv) A diagram of the firefighting system showing the location of all firefighting equipment shall be posted in a prominent place on the facility or structure.

(4) *Fire- and gas-detection system.* (i) Fire (flame, heat, or smoke) sensors shall be installed in all enclosed classified areas. Gas sensors shall be installed in all inadequately ventilated, enclosed classified areas. Adequate ventilation is defined as ventilation which is sufficient to prevent accumulation of a significant quantities of vapor-air mixture in concentrations over 25 percent of the lower explosive limit. One approved method of providing adequate ventilation is a change of air volume each 5 minutes or 1 cubic foot of air-volume flow per minute per square foot of solid floor area, whichever is greater. Enclosed areas (e.g., buildings, living quarters, or doghouses) are defined as those areas confined on more than four of their six possible sides by walls, floors, or ceilings more restrictive to air flow than grating or fixed open louvers and of sufficient size to allow entry of personnel. A classified area is any area classified Class I, Group D, Division 1 or 2, following the guidelines of API Recommended Practice 500B.

(ii) All detection systems shall be capable of continuous monitoring. Fire-detection systems and portions of combustible gas-detection systems related to the higher gas concentration levels shall be of the manual-reset type. Combustible gas-detection systems related to the lower gas-concentration level may be of the automatic-reset type.

(iii) A fuel-gas odorant or an automatic gas-detection and alarm system is required in enclosed, continuously manned areas of the facility which are provided with fuel gas. Living quarters and doghouses not containing a gas source and not located in a classified area do not require a gas detection system.

(iv) The District Supervisor may require the installation and maintenance of a gas detector or alarm in any potentially hazardous area.

(v) Fire- and gas-detection systems shall be an approved type, designed and installed in accordance with API RP 14C, API RP 14G, and API RP 14F, Design and Installation of Electrical Systems for Offshore Production Platforms.

(c) *General platform operations.* Safety devices shall not be bypassed or blocked out of service unless they are temporarily out of service for startup, maintenance, or testing procedures. Only the minimum number of safety devices shall be taken out of service. Personnel shall monitor the bypassed or blocked out functions until the safety devices are placed back in service. Any safety device which is temporarily out of service shall be flagged by the person taking such device out of service.

§ 250.293 Safety-system testing and records.

(a) *Inspection and testing.* The safety-system devices shall be successfully inspected and tested by the lessee at the interval specified below or more frequently if operating conditions warrant. Testing shall be in accordance with API RP 14C, Appendix D, and the following:

(1) Relief valves on the natural gas feed system for power plant operations such as pressure safety valves shall be inspected and tested for operation at least once every 12 months. These valves shall be either bench tested or equipped to permit testing with an external pressure source.

(2) The following safety devices shall be inspected and tested at least once each calendar month but at no time shall more than 6 weeks elapse between tests:

(i) All pressure safety high or pressure safety low, and

(ii) All level safety high and level safety low controls.

(3) All pumps for firewater systems shall be inspected and operated weekly.

(4) All fire- (flame, heat, or smoke) and gas-detection systems shall be inspected and tested for operation and recalibrated every 3 months provided that testing can be performed in a nondestructive manner.

(5) Prior to the commencement of production, the lessee shall notify the District Supervisor when the lessee is ready to conduct a preproduction test and inspection of the safety system. The lessee shall also notify the District Supervisor upon commencement of production in order that a complete inspection may be conducted.

(b) *Records.* The lessee shall maintain records for a period of 2 years for each safety device installed. These records shall be maintained by the lessee at the lessee's field office nearest the OCS facility or other locations conveniently available to the District Supervisor. These records shall be available for MMS review. The records shall show the present status and history of each safety device, including dates and details of installation, removal, inspection, testing, repairing, adjustments, and reinstallation.

§ 250.294 Safety device training.

Prior to engaging in production operations on a lease and periodically thereafter, personnel installing, inspecting, testing, and maintaining safety devices shall be instructed in the safety requirements of the operations to be performed; possible hazards to be encountered; and general safety considerations to be taken to protect personnel, equipment, and the environment. Date and time of safety meetings shall be recorded and available for MMS review.

§ 250.295 Production rates.

Each sulphur deposit shall be produced at rates that will provide economic development and depletion of the deposit in a manner that would maximize the ultimate recovery of sulphur.

§ 250.296 Production measurement.

(a) *General.* Measurement equipment and security procedures shall be designed, installed, used, maintained, and tested so as to accurately and completely measure the sulphur produced on a lease for purposes of royalty determination.

(b) *Application and approval.* The lessee shall not commence production of sulphur until the Regional Supervisor has approved the method of measurement. The request for approval of the method of measurement shall contain sufficient information to demonstrate to the satisfaction of the Regional Supervisor that the method of measurement meets the requirements of paragraph (a) of this section.

§ 250.297 Site security.

(a) All locations where sulphur is produced, measured, or stored shall be operated and maintained to ensure against the loss or theft of produced sulphur and to assure accurate and complete measurement of produced sulphur for royalty purposes.

(b) Evidence of mishandling of produced sulphur from an offshore lease, or tampering or falsifying any measurement of production for an offshore lease, shall be reported to the Regional Supervisor as soon as possible but no later than the next business day after discovery of the mishandling.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 201

[Docket No. R-89-1397; FR-2370]

RIN 2502-AE15

Title I Property Improvement and Manufactured Home Loans; Miscellaneous Amendments

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends various sections in the regulations governing the property improvement and manufactured home loan insurance programs under title I, section 2 of the National Housing Act. This rule makes substantive changes in provisions relating to the financing of furniture in connection with manufactured home loans, the manner in which the Department assesses and collects insurance premiums on manufactured home loans, the maximum amount of an unsecured property improvement loan, and the certification requirements for manufactured home sites. The rule also clarifies some provisions in the title I regulations, corrects typographical errors, and makes necessary editorial changes.

EFFECTIVE DATE: October 9, 1989.

FOR FURTHER INFORMATION CONTACT: Robert J. Coyle, Director, Title I Insurance Division, Room 9158, 451 Seventh Street SW., Washington, DC 20410. Telephone number (202) 755-6880. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: A proposed rule was published at 53 FR 30697 on August 15, 1988, and interested persons were invited to submit comments regarding the rule. The original deadline for the receipt of comments was September 29, 1988; it was extended to October 31, 1988 at the request of several interested parties. Comments were received, either directly or through attorneys and U.S. Senators and Representatives, from more than 50 respondents, including financial institutions, manufactured home manufacturers and dealers, manufactured home insurers and insurance agents, and industry trade associations. In addition, title I program officials and Department legal counsel met with representatives of an insurance company at their request, to discuss casualty and single-interest insurance policies for manufactured homes. The written and oral comments from these respondents have been carefully considered and evaluated, and some of the respondents' recommendations have been adopted, either in whole or in part, in the final rule.

The proposed rule contained substantive changes in the title I regulations to prohibit title I manufactured home loan proceeds from being used for the purchase of furniture; to reduce the number of years of hazard insurance coverage that may be financed with title I manufactured home loan proceeds and to change the amount of hazard insurance coverage required for manufactured homes financed with loans insured under title I; to change the manner in which the Department assesses and collects insurance premium charges in connection with manufactured home loans, allowing the Department to collect a greater portion of the insurance premium charge for each loan in the early years of the loan, and eliminating such charge in the later years of the loan; to increase the maximum amount of an unsecured property improvement loan from $2,500 to $5,000; and to simplify manufactured home site certification requirements.

The Department also proposed to make changes in the title I regulations to clarify that: (a) Late charges prescribed in the title I regulations may be assessed by the lender unless applicable State law prescribes standards more beneficial to the borrower, but may not be assessed if interest on the loan is charged on a daily basis; (b) appurtenances to the manufactured home may be financed with the proceeds of a manufactured home purchase loan only with the approval of the Secretary, and subject to the lender obtaining a first lien on such appurtenances as well as on the manufactured home, its furnishings, equipment, and accessories; (c) certain fees and charges that cannot he financed would be permitted to be paid by the lender; (d) proofs of claim would not have to be filed by lenders in certain bankruptcy or probate proceedings, and lenders would be required to take all steps necessary to protect the interest of the note holder in any such proceeding until a title I insurance claim is paid by the Department; (e) appraisals of repossessed manufactured homes would be required to reflect the retail value of comparable homes in the geographic area where the repossession occurred; and (f) premiums for hazard insurance on a foreclosed or repossessed manufactured home financed with a combination home and lot loan would be eligible for inclusion as part of the lender's title I insurance claim.

The Department further proposed to correct some typographical and grammatical errors.

Financing of Furniture

Section 201.10 of the title I regulations limits the amount of furniture that may be financed with the proceeds of a manufactured home loan, as follows: Loan proceeds may include an amount equal to the wholesale (base) price of any furniture package supplied by the manufacturer, subject to a maximum amount not to exceed the lesser of $2,000 or 10 percent of the wholesale (base) price of the home.

The Department proposed to amend the title I regulations so that the proceeds of manufactured home loans may no longer be used for the purchase of furniture. This change was proposed because, as noted in the preamble to the proposed rule, the Department estimates that furniture adds 7 to 13 percent ($1,500) to $2,500) to the retail price of the average manufactured home financed with a loan insured under title I. In most instances of borrower default, the furniture is in poor condition or has been removed before the lender repossesses the home. In such cases, the furniture, which is part of the loan security, has little or no value and both lenders and the Department lose a great deal of money. Faced with these losses, the Department has concluded that the proceeds of manufactured home loans should no longer be used for the purchase of furniture.

Twenty comments specifically addressed the Department's proposal to eliminate the financing of furniture with the proceeds of manufactured home loans. All 20 respondents expressed opposition to the proposal. Although several stated that they understood the Department's reasons for proposing this change, they expressed the opinion that the benefits of allowing first-time buyers to purchase furniture with loan proceeds outweighed the effects on HUD as a credit insurer.

The main theme of the comments was that promulgation of this change in the regulations will adversely affect many first-time home buyers, because it will require them to obtain furniture elsewhere and pay for it over a two- or three-year period, thus greatly increasing their monthly payments during the early years of the loan when the risks of default are highest. Some respondents also expressed the view that this proposal would, if promulgated, make the title I program less competitive, since lenders will continue

to finance furniture in their conventional loans. However, another commenter stated that the ability to finance furniture may be a key reason why borrowers have used the title I program; this suggests that perhaps the title I program has been insuring a disproportionate share of the homes financed with furniture.

Several commenters pointed out that the purchase of furniture with a manufactured home is not a universal practice; it seems to be the prevailing pattern with single-section homed sold in the East and South, from Virginia to Texas, but is not the usual practice in the West. Multisection homes in all parts of the country are typically sold without furniture, and in the last seven years there has been a very rapid increase in the percentage of multisection homes being produced (from 22 percent of all homes in 1982 to more than 42 percent currently). Thus, it appears that the financing or furniture with the proceeds of manufactured home loans is not as widespread a practice as most of the commenters have asserted.

One commenter furnished the Department with the results of a nationwide survey of manufactured home owners conducted in 1987. The survey showed that, of the 18,442 owners of manufactured homes who responded, 49 percent had previously lived in site-built homes, 20 percent had lived in a different manufactured home, and 18 percent had rented an apartment or townhouse, while only 13 percent had lived with parents or relatives or had other living arrangements where they might not have needed to purchase furniture. The survey also showed that, of 1,335 recent purchasers of manufactured homes, 92 percent had previously lived in situations that would indicate that they owned furniture when they purchased their homes. Moreover, when asked about the advantages of manufactured home living, only eight percent of those surveyed viewed the ability to purchase a furnished home as an advantage. The Department's conclusion from these survey results is that a high percentage of manufactured home owners had furniture before moving into their present homes and had no real need to purchase (and finance) furniture supplied by the home manufacturers.

The Department believes that prohibiting the financing of furniture with title I manufactured home loan proceeds will not have a deleterious effect on sales of manufactured homes or on the use of the title I program, but it will help to reduce the size of claim losses being sustained by both lenders and the Department. The Department recognizes that some borrowers who need furniture will obtain separate financing to purchase it, generally at higher interest rates and for much shorter loan terms; however, this situation is no different from purchasing an automobile or making any other major installment purchase after the manufactured home loan is obtained. Any major installment purchase has the potential for increasing the risk of default on the manufactured home loan obligation.

In recognition of this potential for increased risk, the Department expects that lenders will take steps to ascertain whether the borrower is planning to purchase furniture and, if so, whether the purchase is to be financed. When the financing of furniture is anticipated, estimated monthly installment payments for furniture should be included as "Other Recurring Charges" in accordance with § 201.22(b) of the regulations in calculating whether the borrower's income will be adequate to meet the manufactured home loan payments.

Accordingly, the Department hereby amends the title I regulations to eliminate the financing of furniture with the proceeds of title I manufactured home loans as follows: In §§ 201.2(p), (kk)(2), and (*11*), 201.10(b)(1), and 201.26(b)(4)(iii)(C), (b)(6)(i) and (b)(7)(ii), all references to furniture as part of the loan transaction are deleted, and in § 201.21(b)(3), a statement that the proceeds of a manufactured home loan shall not be used to purchase furniture is added. The definition of "furniture" in § 201.2(k) is retained to inform program participants as to which items are eligible and which are not eligible for financing with the proceeds of the loan.

Hazard Insurance and Secured Interest Protection Insurance

Section 201.25(b)(2)(ii) of the title I regulations allows manufactured home purchase loans and combination loans to include the cost of premiums paid by the borrower for comprehensive and extended hazard insurance and vendor's single-interest insurance coverage for three years. The Department proposed to reduce the number of years of hazard insurance coverage that could be financed with the proceeds of a title I manufactured home loan from three years to one year.

Twenty-six comments on this proposal were received. Almost all were against the proposed change, but there was some recognition of the Department's view that security for the entire loan is diminished by financing hazard insurance proceeds for multiple years.

Although the Department continues to believe that the financing of more than one year of hazard insurance coverage is not warranted, this matter will be given further study, and therefore the Department will not amend § 201.25(b)(2)(ii) to reduce the number of years of hazard insurance premiums that may be financed with title I loan proceeds at this time. If the Department decides to make this change at some future date, it will be accomplished by subsequent rulemaking.

The Department had also proposed to amend § 201.25(b)(2)(ii) as it relates to vendor's single-interest insurance premiums, in the belief that these are one-time charges. The Department has since learned that, unlike such insurance for other types of consumer loans, this coverage is provided as part of the hazard insurance policy, and the premium is paid by the borrower in the same manner as the hazard insurance premium. There was only one comment on this issue, which indicated that the Department seemed to be discouraging the purchase of this type of insurance. This is not the case, and in light of the information obtained by the Department with regard to this type of insurance, the Department will not change the substance of § 201.25(b)(2)(ii) concerning vendor's single-interest insurance at this time.

The Department further proposed to amend § 201.25(b)(2)(ii) by changing the term "vendor's single-interest insurance" to "single-interest insurance" in the belief that "vendor's single-interest insurance" is a misnomer, as this insurance protects the secured creditor rather than the vendor. A copy of an owner's policy given to the Department describes such insurance as secured interest protection coverage, and shows the lineholder as the beneficiary. The term "secured interest protection" appears to be a more accurate term than either "vendor's single-interest insurance" or "single-interest insurance," and therefore § 201.25(b)(2)(ii) is amended by substituting "secured interest protection" for "vendor's single-interest".

A proposed amendment to § 201.55(b)(1)(ii) would include benefits of secured interest protection insurance as a post-default receipt to be deducted from the unpaid loan balance in calculating title I claims. The one comment received by the Department concerning secured interest protection insurance did not object, and therefore

§ 201.55(b)(1)(ii) is amended accordingly.

Another proposal relating to hazard insurance was to amend § 201.28(b) of the title I regulations by changing the requirement that the borrower obtain and maintain hazard insurance on a manufactured home financed with a title I insured loan "in an amount at least equal to the unpaid balance of the loan or the actual cash value of the home, or home and lot in combination, whichever is lesser" to "an amount equal to the unpaid loan balance." The only comment on this proposal was from a manufactured home lender, who stated that borrowers may not be able to obtain stated value insurance on the home in some States. The commenter suggested that hazard insurance be required in an amount equal to the unpaid balance of the loan, or to the actual cash value of the home in those States in which stated value insurance is not otherwise obtainable. The Department agrees with that suggestion, and § 201.28(b) is amended to require that hazard insurance coverage on a manufactured home be maintained in an amount at least equal to the unpaid loan balance, except that the amount of coverage shall be not less than the actual cash value of the home where State law precludes a higher amount.

Loan Insurance Charges

The Department proposed to amend § 201.31 to (a) reduce the rate of the annual insurance charge for a manufactured home loan from 0.54 percent to 0.50 percent of the loan amount for the term of the loan; (b) change the system of collecting the loan insurance charge for a manufactured home loan so as to collect more of the charge in the early years of the loan and less in the later years, as distinguished from the present method of collecting the insurance charge in equal annual installments; and (c) clarify that the late charges that can be assessed are in fact penalty charges and interest due from the lender when loan insurance charges are not paid in a timely manner.

Thirteen respondents commented on this proposal. None of them were in favor of that part of the proposal relating to accelerated collection of the insurance charge. Their principal objection, collectively, was that the proposal would increase the lender's cost for loan insurance, which would mean that title I loans would be less profitable, or they would have to increase their interest rates to cover increased insurance charges. However, several respondents acknowledged that some acceleration in the collection of loan insurance charges was warranted in light of the claim losses in recent years.

Several commenters expressed concern that the Department's actuarial study seemed to rely heavily upon claims data that reflected the economic depression in the "oil patch" states of Texas, Oklahoma, and Louisiana, rather than considering the long-term performance of the title I manufactured home loan portfolio. Another commenter incorrectly stated that the actuarial study was based upon "a sample of loans originated between late 1982 and 1986." In fact, the actuarial study utilized data on loan survivorship, claims, and non-claim terminations for 15-year loans originated between 1973 and 1986. While information on loans that had terminated prior to September 1982 had been lost, the analysis did consider all 15-year loans for which insurance was still in force as of that time, as well as all 15-year loans from then until the end of 1986. Thus, the actuarial study did take into account the performance of loans in the title I portfolio over a long span of time, using the best data available. The Department believes that the data base was adequate to justify the proposed changes in the way that insurance charges will be collected; an independent actuarial consultant who reviewed the Department's study confirmed this.

One commenter expressed the opinion that the actuarial study had failed to make appropriate adjustments for the proposals to eliminate the financing of furniture and multi-year hazard insurance policies. Although the study report might have been clearer on this point, the authors of the study did take these proposals into account by revising the loss ratio used in the study downward from 25 percent to 22.5 percent. As a result of this change, the insurance charges to be collected on a 15-year loan were reduced by 0.25 percent of the loan amount in years 5, 6, and 8.

Another commenter questioned whether the $104 million underwriting loss for the 1984–1986 period that is mentioned in the preamble to the proposed rule included any debt recovery by HUD from defaulted borrowers. As the preamble to the proposed rule states, $104 million was the amount by which manufactured home claims exceeded loan insurance charges during those years. If debt recovery had been included, total losses for this period would still have been $92.5 million. It is important to point out that debt recovery was taken into account in the actuarial study.

Two respondents commented that the average life of a 15-year manufactured home loan is about seven years, and that accelerated collection of the loan insurance charges will mean that a lender will pay a total charge of 6.25 percent on this "average" loan, compared with 3.78 percent under the current method of collecting a level insurance charge of 0.54 percent of the loan amount for each year that the insurance is in force. While this statement is true, it does not seem to be relevant to the issue at hand, other than to point out that loans which terminate early will pay higher insurance charges than at present. Conversely, on 15-year loans that reach maturity, total charges will be slightly less (7.5 percent under the proposal; 8.1 percent under the current regulation).

One of these respondents also suggested that the Department consider a sliding scale of insurance charges, based on the loss experience of each lender. The Department has considered the possibility of relating insurance charges to lender performance, but has concluded that it would be very difficult to administer in an equitable manner. In addition, the use of the loan insurance charge to penalize certain lenders would limit the availability of title I loans in some areas of the country. The Department believes that lender performance is more effectively controlled through better claims review and increased monitoring.

Another respondent suggested that lenders be allowed to include the first year's loan insurance charge in the loan amount, with subsequent annual installments to be met through monthly payments by the borrowers into escrow accounts. The respondent indicated that, with this approach, interest rates on title I loans could be reduced by 0.50 to 0.75 percent. Even though borrowers would be paying loan insurance premiums as separate charges, lower interest would reduce the borrowers' monthly payments for principal and interest over the terms of their loans.

Section 201.31(f) of the regulations now permits the lender to pass the loan insurance charge on to the borrower, provided that it is fully disclosed to the borrower. The regulations do not currently provide for any portion of the loan insurance charge to be financed; however, the Department believes that the respondent's suggestion has some merit and will consider, as part of a future rulemaking, amending § 201.25(b) to permit the first year's insurance charge to be included in the loan amount, provided that the insurance charges for the second and subsequent

years are fully disclosed to the borrower and collected from the borrower on a monthly basis.

One commenter objected to the provision in § 201.31(b)(3) of the proposed rule, which enunciates the Department's longstanding policy that all loan insurance charges are considered earned when paid. The commenter stated that it is unfair to charge an insurance premium for any time period after a loan is prepaid, since there is no further insurance risk to the Department. In response, it is noted that the lender presently has no obligation to report to the Department when a loan is prepaid. Instead, the lender waits until the next annual billing for insurance charges before notifying the Department that the loan was prepaid. The Department accepts the lender's certification that the loan was prepaid, and no further insurance charges for the loan are billed. The Department has determined that instituting a separate reporting procedure for prepaid loans would not be cost-beneficial for either lenders or HUD, and therefore finds no reason to change the present policy.

Finally, one respondent expressed concern about the limited time available for lenders to manually reconcile their monthly statements of loan insurance charges before incurring a penalty charge under § 201.31(c). The respondent suggested that this problem would be eliminated if a computer tape billing could be furnished to lenders. Given the large number of lenders with limited title I loan activity, computer tape billing does not appear to be cost-effective; however, the Department is exploring ways to expedite the mailing of the monthly statements so as to give lenders more time to reconcile their statements and make timely insurance charge payments.

In summary, the Department believes that the proposed changes to the manner in which manufactured home loan insurance charges are collected are very important to the success of the program, notwithstanding the objections, and therefore § 201.31 is amended as set forth in the proposed rule.

Maximum Amount of an Unsecured Property Improvement Loan

The Department proposed to amend § 201.24(a) (1) and (2) so as to permit an increase in the amount of an unsecured property improvement loan from $2,500 to $5,000. The Department received six comments on this proposal; two comments were favorable and four were not. The primary objection to the change was a collective belief that defaults would increase if loans up to $5,000 are not secured. Another reason for objection was an inability to sell unsecured loans in the secondary market.

Section 201.24 specifies the maximum amount for a property improvement loan that may be insured under title I without security. The Department has never prohibited lenders from obtaining security on loans less than the amount set forth in § 201.24, and under this proposal there would still be no prohibition on obtaining security for loans that are below the ceiling. One lender stated that this proposal would require it to offer unsecured loans up to $5,000 because of the competition, even if it desired to obtain security on loans of lesser amounts. While this may be the case, competition is a function of the market, rather than of Government regulation.

One commenter pointed out that interest on a secured loan is generally tax-deductible, whereas interest on an unsecured loan may or may not be. The tax deductibility of interest on a loan secured by a mortgage or deed of trust is a selling point that lenders may use to obtain security on loans that are less than the ceiling on unsecured loans.

For the reasons set forth in the preamble to the proposed rule, § 201.24(a) (1) and (2) are amended by changing $2,500 to $5,000.

Manufactured Home Site Certification Requirements

The Department proposed to amend § 201.21(e)(3) of the title I regulations to require certifications of site suitability for leased home sites in manufactured home parks from the appropriate State or local government officials, such as local planning or building officials or public health officials, rather than from State or local authorities which license manufactured home parks. The Department proposed to amend this provision further by eliminating the requirement that the park comply with minimum standards on site location, storm drainage and landscaping.

The Department also proposed to amend § 201.21(e)(4) to change the required certification that the site is zoned to permit the placement of a manufactured home to a more general statement that the site complies with local zoning ordinances and regulations, if any. In addition, the Department proposed to eliminate the requirement that minimum storm drainage standards be met and substitute a more general certification that any other minimum local standards and requirements for site suitability are met. A certification from a registered civil engineer would be required only when local standards for water supply and sewage disposal are not established or enforced.

Three comments were received with regard to these proposed changes. All were favorable, but indicated that the Department was not going far enough in simplifying the site certification requirements. Two commenters recommended that the regulations permit the use of a photocopy of a State or local license that requires periodic inspections by government officials, if the required certifications cannot be obtained from State or local authorities. The Department has determined that the language in §§ 201.21(e) (3) and (4), as set forth in the proposed rule, would permit the lender to accept a State or local license, building permit, or occupancy permit that is based upon a site inspection to assure compliance with minimum site development standards, without requiring a separate certification.

Another commenter recommended that the borrower be permitted to certify that the site complies with zoning requirements, or that a representative of the lender be allowed to review the site placement and sign the site certifications. However, the Department believes that borrowers and lenders' representatives are not qualified to make the necessary certifications. Accordingly, §§ 201.21(e) (3) and (4) are amended as indicated in the proposed rule.

Clarifying and editorial changes made by this rule relate to the following matters:

Late Charges

The Department proposed to amend § 201.15 to clarify both the requirements for the billing of late charges and the application of State law in regard to late charges, as well as by adding a requirement that late charges, if imposed, must be paid by the borrower and may not be deducted from the borrower's monthly payment for principal and interest. Two respondents commented on this proposal.

One respondent stated that if HUD is requiring that lenders must have been paid all late charges as a prerequisite to filing claims, rather than merely having billed borrowers and attempted to collect such charges, the changes are misguided. The Department's intention was to require only that evidence be provided of those late charges that have been paid, since the lender cannot compel the borrower to pay these charges. Therefore, the Department is revising the third sentence of § 201.15(a) to make this clear.

The second respondent stated a belief that prohibiting late charges on a daily interest loan would be a mistake, as late charges have more impact in encouraging timely payment by borrowers. In addition, the respondent stated that late charges help defray the additional collection expenses that occur with late payments. The Department believes that the accrual of additional interest on the unpaid principal after the due date for a payment provides a sufficient incentive for borrowers to avoid late payment; thus, late charges are not warranted when daily interest notes are used. Accordingly, § 201.15 is amended to read as set forth in the proposed rule, except for the change noted in the previous paragraph.

Appurtenances to Manufactured Homes

The Department proposed to amend §§ 201.10(b), 201.21(b)(4), and 201.24(b) to provide, respectively, that (a) the cost of appurtenances may be included in the maximum amount of a manufactured home purchase loan under the conditions set forth in a Notice published at 51 FR 9785 and 9780, March 21, 1986; (b) manufactured home purchase loan proceeds may be used for the purchase, construction or installation of appurtenances; and (c) any appurtenance that is financed with the proceeds of a manufactured home purchase loan must be secured by a first lien.

Two comments were received concerning this proposal. Both respondents agreed with the proposal, one of them indicating that HUD was simply placing into regulatory form its current practice on the financing of appurtenances, as stated in the Notice published on March 21, 1986. Accordingly, §§ 201.10(b), 201.21(b)(4), and 201.24(b) are amended as set forth in the proposed rule.

Fees and Charges Which Cannot Be Financed

The Department proposed to amend § 201.25(c) to clarify that certain fees and charges that are incurred by the lender but cannot be financed with loan proceeds may be paid by the lender as a cost of doing business and do not have to be collected from the borrower. Two comments were received concerning this proposal. Both commenters objected to the proposal, expressing the opinion that the borrower should continue to pay these costs in cash at the time of loan closing.

The Department wants to make it clear that this amendment would not mandate that lenders pay such fees as a cost of doing business; it would merely permit them to do so at their option. The Department is clarifying this section further by deleting the phrase "Except for any discount points to be paid by a dealer to a lender under § 201.13," as § 201.23 already excludes such discount points from the borrower's initial payment. Section 201.25(c) is therefore amended as set forth in the proposed rule and in the preceding sentence.

Proofs of Claim in Bankruptcy and Probate

The Department proposed to amend § 201.42 to require lenders to take all steps necessary to protect the interests of the creditor with regard to loans assigned to the United States until the Secretary has paid the claims. The Department further proposed to amend this section to exempt "no-asset" bankruptcy cases from the requirement for filing proofs of claim.

One comment was received concerning the amendment of § 201.42. The respondent objected to the proposed requirement that the lender continue to be responsible for a bankruptcy or probate proceeding after filing an insurance claim with HUD, as the lender has no further interest in the loan after the assignment is recorded. The Department disagrees with this position. Section 201.54(d) of the title I regulations requires that, when filing a title I claim, the lender must assign its entire interest in the note and in any security held. However, this assignment of the note and security instrument is, in a sense, a conditional assignment, as there is no consideration for the assignment until the claim is paid. There is also the possibility that the claim will be denied and the note and security interest reassigned to the lender. Furthermore, from a logistical standpoint, until a claim is paid, the Department has no way to keep track of documents not included in the claim file, such as those that might relate to a bankruptcy or probate proceeding.

The Department does not believe it is an onerous requirement for lenders to continue to monitor such cases, and even file necessary papers, subsequent to assignment of the note to HUD but prior to payment of the claim. Accordingly, § 201.42 is amended as set forth in the proposed rule.

Appraisals of Repossessed Manufactured Homes

The Department proposed to amend the second sentence of § 201.51(b)(3) to explicitly state that the appraisal must be based upon the retail value of comparable manufactured homes in the same geographic area where the repossession occurred. One comment was received objecting to this proposal. The respondent claimed that the proposal was misguided if it would permit only an appraisal in the same geographic area where the repossession occurs. In response, the Department wants to make it clear that the amendment to § 201.51(b)(3) requires only that the lender obtain an appraisal in the same area as the repossession. It does not prevent the lender from moving the home to another location and obtaining another appraisal, if that would result in a better resale price. However, as stated in the preamble to the proposed rule, our concern is with homes being moved for the purpose of obtaining a lower appraisal, thereby increasing the Department's claim exposure.

One means of minimizing this type of program abuse is to require that an appraisal be obtained in the same geographic area where the home was repossessed before moving it to another geographic area. Accordingly, the Department amends § 201.51(b)(3) as set forth in the proposed rule, except that the first word has been changed from "the" to "this" to avoid any implication that a lender is precluded from obtaining additional appraisals when warranted.

Hazard Insurance in Combination Loan Claims

The Department proposed to amend § 201.55(b) by redesignating § 201.55(b)(5)(iii) as § 201.55(b)(5)(iv) and adding a new § 201.55(b)(5)(iii) to allow an insurance claim on a combination home and lot loan to include the cost of hazard insurance on the home, prorated to the date of disposition of the property. No comments were received concerning this proposed amendment, and the Department amends § 201.55(b)(5) as stated herein.

Corrections

The proposed rule noted that the Department proposed to make corrections to §§ 201.13 and 201.51(a)(2). The corrections to § 201.13, changing an "of" to "for", and § 201.51(a)(2)(iv), changing a reference from "§ 201.55(b)" to "§ 201.55(a)", have been made in a separate rule containing other technical changes, which was published at 54 FR 10536 on March 14, 1989. This rule does, however, amend § 201.51(a)(2) with regard to default on the Title I obligation and any senior obligation as discussed in the preamble to the proposed rule.

Applicability of Amendments

Amendments in this rule that are applicable to all loans, regardless of when they have been or will be reported for insurance, are the changes to §§ 201.10 (item #4), 201.15 (item #5), 201.21(b)(4) (item #6), 201.24(b) (item #7), 201.25(c) (item #8), 201.31(c) (item #11), 201.42 (item #12), 201.51 (item #13), 201.55 (items #14 and #15). Amendments that are applicable to loans for which loan applications are approved on or after the effective date of this rule are the changes to §§ 201.2 (item #2), 201.10 (item #3), 201.21(b)(3) and (e)(3) and (4) (item #6), 201.24(a) (item #7), 201.25(b)(2) (item #8), 201.26 (item #9), 201.28 (item #10). Amendments to §§ 201.31(a) and (b) (item #11) are applicable to loans for which the date of disbursement is on or after the effective date of the rule.

Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours (7:30 a.m. to 5:30 p.m. weekdays) in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street SW., Washington, DC 20410.

Regulatory Impact

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulations. Analysis of the rule indicates that it would not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The proposed rule contained a certification, pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this rule would not have a significant economic impact on a substantial number of small entities because the majority of financial institutions participating in the title I program are larger depository institutions and none of the proposed changes pose undue burdens for small entities seeking to conduct title I loan transactions. Several commenters, most of whom are manufactured home dealers claiming to be small businessmen, disagreed with this certification.

These commenters all objected to the Department's claim that the rule will not have an impact on small businesses because they believe that they will lose sales as a result of the changes concerning the financing of furniture and hazard insurance premiums. The Department believes that any impact of lost sales resulting from these changes will not be significant for a substantial number of entities. In *Mid-Tex Electric Cooperative, Inc.* v. *Federal Energy Regulatory Comm.*, 773 F. 2d 327 (D. C. Cir., 1985), the court held that Congress did not intend to require that agencies consider every indirect effect that regulation might have on small businesses in any stratum of the national economy. In addition, the thrust of the Regulatory Flexibility Act is a requirement upon agencies to consider alternative regulatory schemes for regulating small businesses vis-a-vis those for regulating large businesses. This rule does not contain regulatory provisions susceptible to alternative regulatory schemes.

Accordingly, the undersigned hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Regulatory Agenda

This rule was listed as item number 949 in the Department's Semiannual Agenda of Regulations published on April 24, 1989 (54 FR 16708) under Executive Order 12291 and the Regulatory Flexibility Act.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order.

Specifically, the requirements of this rule are directed to lenders, and do not impinge upon the relationship between the Federal government and State and local governments.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule involves requirements for property improvement and manufactured home loans insured by the Department. Any effect on the family would likely be indirect and insignificant.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance program numbers are:

14.110 Manufactured Home Loan Insurance—Financing Purchase of Manufactured Homes as Principal Residences of Borrowers;
14.142 Property Improvement Loan Insurance for Improving All Existing Structures and Building of New Nonresidential Structures; and
14.162 Mortgage Insurance—Combination and Manufactured Home Lot Loans

List of Subjects in 24 CFR Part 201

Health facilities, Historic preservation, Home improvement, Mobile homes, Manufactured homes and lots, Reporting and recordkeeping requirements.

Accordingly, 24 CFR Part 201 is amended as follows:

PART 201—TITLE I PROPERTY IMPROVEMENT AND MANUFACTURED HOME LOANS

1. The authority citation for 24 CFR Part 201 continues to read as follows:

Authority: Sec. 2, National Housing Act (12 U.S.C. 1703); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. Section 201.2 is amended by revising paragraphs (p), (kk)(2), and (*ll*) to read as follows:

§ 201.2 Definitions.

* * * * *

(p) "Manufacturer's invoice" means a document issued by a manufacturer and provided with a manufactured home to a retail dealer which separately details the wholesale (base) prices at the factory for specific models or series of manufactured homes, itemized options (large appliances, built-in items and equipment), and specific specialty items, plus actual itemized charges for freight (including any rental of wheels and axles) from the factory to the dealer's lot or the homesite and for any sales taxes to be paid by the dealer. The invoice may recite such prices and charges on an itemized basis or by stating an aggregate price or charge, as appropriate, for each category. The manufacturer shall certify in the invoice as follows:

> The undersigned certifies under applicable criminal and civil penalties for fraud and misrepresentation that: (1) the wholesale (base) prices for the manufactured home, itemized options, and specialty items as detailed, the charges for freight and dealer-paid sales taxes, and all other statements in this invoice are true and accurate; (2) all such prices reflect the actual dealer costs at the factory, as quoted in the applicable current manufacturer's wholesale (base) price list; and (3) except for any payments of volume incentives or special benefits related to this transaction, all such prices and charges exclude any costs of—and the manufacturer will make no payments to or for the benefit of the dealer and/or home purchaser concerning—trade association fees or charges, discounts, bonuses, refunds, rebates, prizes, loan discount points or other financing charges, or anything else of more than a nominal value of $10 which will inure to the benefit of the dealer and/or home purchaser at any date.

* * * * *

(kk) * * *

(2) Whether or not available on an optional basis do not increase or decrease the wholesale (base) prices for the sale of a specific home, itemized options, or specialty items, or the charges for freight and dealer-paid sales taxes as detailed in the manufacturer's invoice for a specific sale to a retail dealer;

* * * * *

(ll) "Wholesale (base) price list" means the price list(s), as periodically amended, which are published and distributed by a home manufacturer to all retail dealers in a given marketing area, quoting the actual wholesale (base) prices at the factory for specific models or series of manufactured homes, itemized options, and specialty items offered for sale to such dealers during a specified period of time. The wholesale (base) prices may include the manufacturer's projected costs of providing volume incentives and special benefits related to sales to dealers during the period. All such wholesale (base) prices shall exclude any costs of trade association fees or charges, discounts, bonuses, refunds, rebates, prizes, loan discount points or other financing charges, or anything else of more than a nominal value of $10 which will inure to the benefit of a dealer and/or home purchaser at any date. Each price list and amendment shall be retained by the manufacturer for a minimum period of six years from the date of publication so as to be available to HUD and other Federal agencies upon request.

* * * * *

§ 201.10 [Amended]

3. Section 201.10 is amended by removing paragraph (b)(1)(ii) and redesignating paragraphs (b)(1)(iii) through (vi) as paragraphs (b)(1)(ii) through (v).

4. Section 201.10 is amended further by adding a new paragraph (b)(1)(vi) to read as follows:

§ 201.10 Loan amounts.

* * * * *

(b) * * *

(1) * * *

(vi) The actual cost of the borrower of a garage, carport, patio or other comparable appurtenance to the manufactured home, as stated in the retail purchase contract and as approved by the Secretary;

* * * * *

5. Section 201.15 is revised to read as follows:

§ 201.15 Late charges to borrowers.

(a) *Imposition of late charge.* The note may provide for imposition of a late charge unless precluded by State law. The late charge may be imposed only for installments of principal and interest which are in arrears for the greater of 15 calendar days or the number of days required by applicable State law before such a charge may be imposed. Late charges must be billed to the borrower or reflected in the payment coupon, and evidence of any late charges that have been paid must be in the loan file if an insurance claim is made.

(b) *Amount of late charge.* The late charge shall not exceed the lesser of five percent of each installment of principal and interest, up to a maximum of $10 per installment for any property improvement loan and $15 per installment for any manufactured home loan, or the maximum amount permitted by applicable State law.

(c) *Method of payment.* Payment of any late charge cannot be deducted from the monthly payment for principal and interest, but must be an additional charge to the borrower.

(d) *Daily interest in lieu of late charges.* In lieu of late charges, the note may provide for interest to accrue on installments in arrears on a daily basis at the interest rate in the note.

6. Section 201.21 is amended by revising paragraphs (b)(3) and (4) and paragraphs (e)(3) and (4) to read as follows:

§ 201.21 Manufactured home loan eligibility.

* * * * *

(b) * * *

(3) The proceeds of a manufactured home loan shall not be used to purchase furniture.

(4) The proceeds of a manufactured home purchase loan may be used for the purchase, construction or installation of a garage, carport, patio or other comparable appurtenance to the manufactured home, as stated in the retail purchase contract and as approved by the Secretary. The proceeds of a combination loan may be used for the purchase, construction or installation of a permanent foundation, garage, carport, patio or other comparable appurtenance to the manufactured home.

* * * * *

(e) * * *

(3) When the manufactured home is to be placed on a leased site in a manufactured home park, the lender shall obtain certifications from the appropriate State or local government officials that the park complies with minimum standards relating to vehicular access, water supply, sewage disposal, utility connections, and other aspects of park development. Where minimum State and local standards for park development are not established or enforced, the lender shall obtain a certification from a registered civil engineer that the park meets minimum standards for park development prescribed by the Secretary.

(4) When the manufactured home is to be placed on an individual manufactured home lot or other site owned or leased by the borrower (or on an Indian land site under paragraph (e)(1) of this section), the lender shall obtain certifications from the appropriate local government officials that:

(i) The site complies with local zoning ordinances and regulations, if any;

(ii) Adequate vehicular access from a public right-of-way is available to the site;

(iii) Adequate water supply and sewage disposal facilities are available to or on the site; and

(iv) Any other minimum local standards and requirements for site suitability are met. Where minimum local standards for water supply and sewage disposal are not established or enforced, the lender shall obtain a certification from a registered civil engineer that the site meets minimum standards for water supply and sewage disposal prescribed by the Secretary.

7. Section 201.24 is amended by revising the first sentence of paragraph (a)(1), paragraph (a)(2), and the first sentence of paragraph (b) to read as follows:

§ 201.24 Security requirements.

(a) *Property improvement loans.* (1) Any property improvement loan in excess of $5,000 shall be secured by a recorded lien on the improved property. * * *

(2) Any property improvement loan for $5,000 or less (other than a manufactured home improvement loan) shall be similarly secured if, including such loan, the total amount of all title I property improvement loans obtained by the borrower is more than $5,000.

(b) *Manufactured home loans.* Any manufactured home loan shall be secured by a recorded lien on the home (or lot or home and lot, as appropriate), its furnishings, equipment, accessories, and appurtenances. * * *

* * * * *

8. Section 201.25 is amended by revising paragraph (b)(2)(ii) and the introductory text of paragraph (c) to read as follows:

§ 201.25 Charges to borrower to obtain loan.

* * * * *

(b) * * *

(2) * * *

(ii) Premiums paid by the borrower for comprehensive and extended hazard insurance and secured interest protection coverage for the first three years, including premiums for flood insurance, where applicable;

* * * * *

(c) *Fees and charges which may not be financed.* The following fees and charges incurred by the lender in connection with a loan insured under this part may be collected from the borrower in the initial payment, but may not be included in the loan amount or otherwise financed or advanced by the dealer, the manufacturer, if any, or any other party to the loan transaction:

* * * * *

9. Section 201.26 is amended by revising paragraph (b)(4)(iii)(C), the first sentence of paragraph (b)(6)(i), and paragraph (b)(7)(ii) to read as follows:

§ 201.26 Conditions for loan disbursement.

* * * * *

(b) * * *

(4) * * *

(iii) * * *

(C) The dealer has performed the inspection and tests required under § 201.21(c)(3) and, as installed or erected on the homesite, the manufactured home has sustained no structural damage or other defects, and all plumbing, mechanical and electrical systems are fully operational; and

* * * * *

(6) * * *

(i) In the absence of information to the contrary, the lender may accept and rely upon a certification by the dealer or seller under applicable criminal and civil penalties for fraud and misrepresentation that the manufactured home, any options (large applicances, built-in items and equipment), and any specialty items included in the purchase price of the home or to be financed with loan proceeds have been delivered to and properly installed or erected on the site, and any other work to be accomplished at the site and financed with loan proceeds has been completed. * * *

* * * * *

(7) * * *

(ii) The manufactured home, any options, and any specialty items included in the purchase price of the home or to be financed with loan proceeds have been delivered and completed;

* * * * *

10. Section 201.28 is amended by revising the second sentence of paragraph (b) to read as follows:

§ 201.28 Flood and hazard insurance, and Coastal Barriers properties.

* * * * *

(b) *Hazard insurance.* * * * Such insurance shall be maintained by the borrower for the full term of the loan or until the property is repossessed or foreclosed by the lender, and in an amount at least equal to the unpaid balance of the loan, except that the amount of insurance coverage shall be not less that the actual cash value of the home where State law precludes a higher amount. * * *

* * * * *

11. Section 201.31 is amended by revising paragraphs (a), (b), and (c) to read as follows:

§ 201.31 Insurance charge.

(a) *Insurance charge.* For each eligible property improvement loan and manufactured home loan reported and acknowledged for insurance, the lender shall pay to the Secretary an insurance charge equal to 0.50 percent of the loan amount, multiplied by the number of years of the loan term. The insurance charge shall be paid in the manner prescribed in paragraph (b) of this section; however, no charge shall be made for a period of 14 days or less, and a charge for a full month shall be made for a period of more than 14 days. There shall be no abatement or refund of an insurance charge except as provided in paragraph (e) of this section.

(b) *Payment of insurance charge.* (1) For any loan having a maturity of 25 months or less, payment of the entire insurance charge prescribed in paragraph (a) of this section is due on the 25th calendar day after the date the Secretary acknowledges the loan report.

(2) For any loan having a maturity in excess of 25 months, payment of the insurance charge shall be made in annual installments, with the first installment due on the 25th calendar day after the date the Secretary acknowledges the loan report, and the second and succeeding installments due on the 25th calendar day after the date of billing by the Secretary. Annual installments shall be paid according to the following schedule:

(i) For any property improvement loan having a maturity in excess of 25 months, payment shall be made in annual installments of 0.50 percent of the loan amount until the insurance charge is paid.

(ii) For any manufactured home loan having a maturity in excess of 25 months but not more than 144 months, payment shall be made in annual installments of 1.00 percent of the loan amount for the first three years of the loan term, 0.75 percent of the loan amount for the next two years, and 0.50 percent of the loan amount for all succeeding years until the insurance charge is paid.

(iii) For any manufactured home loan having a maturity in excess of 144 months but not more than 192 months, payment shall be made in annual installments of 1.00 percent of the loan amount for the first four years of the loan term, 0.75 percent of the loan amount for the next three years, and 0.50 percent of the loan amount for all succeeding years until the insurance charge is paid.

(iv) For any manufactured home loan having a maturity in excess of 192 months, payment shall be made in annual installments of 1.00 percent of the loan amount for the first five years of the loan term, 0.75 percent of the loan amount for the next four years, and 0.50 percent of the loan amount for all succeeding years until the insurance charge is paid.

(3) All insurance charges are considered earned when paid.

(c) *Penalty charge and interest.* Insurance charges not received from the lender by the due date specified in paragraph (b) of this section shall be assessed a penalty charge of four percent of the amount of the payment. Insurance charges received from the lender more than 30 days after the due date specified in paragraph (b) of this section shall also be assessed daily interest at the current United States Treasury value of funds rate, as published periodically in the Federal Register. However, no penalty charge or daily interest shall be assessed if the Secretary fails to acknowledge receipt of the loan report or fails to issue a proper billing to the lender for the insurance charges.

* * * * *

12. Section 201.42 is revised to read as follows:

§ 201.42 Bankruptcy, insolvency or death of borrower.

(a) *Bankruptcy or insolvency.* The lender shall file a proof of claim with the court having jurisdiction when the lender has timely information that a borrower is involved in bankruptcy or insolvency proceedings, except that a proof of claim need not be filed if the court notifies the lender that the borrower has no assets and a proof of claim should not be filed. The notice of bankruptcy and a copy of the proof of claim (or the notice from the court that a proof of claim is not required) shall be retained in the loan file.

(b) *Death of a borrower.* The lender shall file a proof of claim with the court having jurisdiction when the lender has timely information that a borrower is deceased, unless the lender determines that there will not be a probate proceeding. A copy of the proof of claim (or documentation as to why a proof of claim was not filed) shall be retained in the loan file.

(c) *Responsibility of the lender after insurance claim is filed.* After the Secretary pays an insurance claim, the Secretary will notify the bankruptcy or probate court, as appropriate, that the loan has been assigned to the United States and will request substitution as the party to whom the claim is owed. Until the insurance claim is paid, the lender shall take all steps necessary to protect the interests of the holder of the note in any bankruptcy or probate proceeding.

13. Section 201.51 is amended by revising the introductory text of paragraph (a)(2) and the second sentence of paragraph (b)(3) to read as follows:

§ 201.51 Proceeding against the loan security.

(a) * * *

(2) If a lender holds one or more mortgages or other security instruments senior to a secured property improvement loan, and the borrower defaults on both the senior security instrument and the property improvement loan, the lender may proceed against the secured property under the senior security instrument and later submit a claim under its title I contract of insurance only if:

* * * * *

(b) * * *

(3) * * * This appraisal should reflect the retail value of comparable manufactured homes in similar condition and in the same geographic area where the repossession occurred, as listed in a current value rating publication accepted to the Secretary. * * *

14. Section 201.55 is amended by removing "and" from paragraph (b)(5)(ii) and by redesignating paragraph (b)(5)(iii) as paragraph (b)(5)(iv).

15. Section 201.55 is further amended by revising paragraph (b)(1)(ii) and by adding a new paragraph (b)(5)(iii) to read as follows:

§ 201.55 Calculation of insurance claim payment.

* * * * *

(b) * * *

(1) * * *

(ii) All amounts to which the lender is entitled after the date of default from any source relating to the property, including but not limited to such items as rent, other income, recourse recovery against the dealer, hazard insurance benefits, secured interest protection insurance benefits, and rebates on prepaid insurance premiums; and

* * * * *

(5) * * *

(iii) Premiums for hazard insurance on the manufactured home, prorated to the date of disposition of the property; and

* * * * *

Dated: August 25, 1989.

Ronald A. Rosenfeld,

Acting Assistant Secretary for Housing–Federal Housing Commissioner.

The President

Proclamation 6014—World War II Remembrance Week, 1989

Federal Register
Vol. 54, No. 168
Thursday, August 31, 1989

Presidential Documents

Title 3—

The President

Proclamation 6014 of August 29, 1989

World War II Remembrance Week, 1989

By the President of the United States of America

A Proclamation

Fifty years ago, on September 1, 1939, the proud nation of Poland was invaded by forces from Nazi Germany, marking the end of its independence and the beginning of World War II. Poland suffered a second devastating blow 16 days later, when Soviet forces invaded from the East. In a secret protocol to the Molotov-Ribbentrop Pact signed the previous month, Nazi Germany and the Soviet Union had plotted the conquest and partition of Poland and the Baltic States.

While many of the events that took place during the fateful month of September 1939 and the 6 turbulent years that followed might seem remote today, it is our duty—to future generations and to those who bravely defended the cause of freedom—to remember them. By recalling these events, we remind ourselves that real and lasting peace can be won only when the rights and dignity of all human beings are cherished and protected.

During World War II, the United States and its allies were engaged in nothing less than a life-and-death struggle for the fate of millions of people. Totalitarian regimes in Germany, Italy, and Japan—intent on regional hegemony and even world domination—posed a threat to all free and sovereign nations. The imperialist aims and racist policies of the government of Nazi Germany and some of its allies resulted in the deaths of millions of innocent men, women, and children—including six million Jews. By the end of the 6-year-long war, more than 15 million combatants and 24 million noncombatants had been killed. Many of these casualties occurred among the people of the U.S.S.R., whose sacrifices were instrumental in securing the Allied victory. The enormous costs of this fight against tyranny can never be forgotten.

Today, the principles that motivated the Western Allies during World War II continue to demonstrate their undeniable appeal. The history of the Federal Republic of Germany is now a moving testament to the power of democratic ideas, the wisdom of West Germany's post-war leaders, and the talent and resilience of the German people. Today the Federal Republic is among America's closest allies, and a champion of human rights, democracy, and freedom.

The people of Eastern Europe have continued to struggle for freedom and their right to self-determination. With courage and persistence the Polish and Hungarian people have begun a democratic transition in their countries.

The United States welcomes positive changes in Poland and Hungary—and in the Soviet Union itself. Nevertheless, we realize that the goals fought for during World War II have not been fully won. We stand with those peoples who continue to struggle for representative government and complete and lasting guarantees of their God-given rights. We look to a Europe whole and free.

Today, as we recall the grave events of September 1, 1939, and the years of bitter conflict that followed, let us pause to salute our Nation's veterans, the hundreds of thousands of Americans who gave their lives, and the millions of civilians who rallied to support the cause of freedom. Their courage and selflessness—reflected day after day in acts of great personal sacrifice—led the way to victory. Let us also rededicate ourselves to promoting freedom and respect for human rights around the world, for they are the only sure foundation for lasting peace.

To commemorate the 50th anniversary of the outbreak of World War II, the Congress, by House Joint Resolution 221, has designated the week beginning September 1, 1989, as "World War II Remembrance Week" and has authorized and requested the President to issue a proclamation in observance of this occasion.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby designate the week beginning September 1, 1989, as World War II Remembrance Week. I ask all Americans to join in remembering and reflecting upon this conflict, which changed forever the history of mankind. I also call upon government officials and private organizations to observe this week with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of August, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

Gy Bush

Part XI

Department of the Treasury

Office of Foreign Assets Control

31 CFR Part 565
Panamanian Transactions Regulations; Final Rule

DEPARTMENT OF THE TREASURY

issued with respect to a foreign affairs

Name	Position

Name	Agency	Name	Agency	Name	Agency

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 565

Panamanian Transactions Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Treasury Department is amending the Panamanian Transactions Regulations to add a new appendix B to the end thereof containing the names of individuals who the Director of the Office of Foreign Assets Control has determined are acting or purporting to act directly or indirectly on behalf of the Noriega/Solis regime in Panama.

EFFECTIVE DATE: August 31, 1989.

FOR FURTHER INFORMATION: Contact William B. Hoffman, Chief Counsel, Tel.: (202) 376–0408, or Steven I. Pinter, Chief of Licensing, Tel.: (202) 376–0236, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: The Panamanian Transactions Regulations, 31 CFR part 565 (the "Regulations"), were issued by the Treasury Department to implement Executive Order No. 12635 of April 8, 1988 (53 FR 12134, April 12, 1988), in which the President declared a national emergency with respect to Panama, invoking the authority, *inter alia,* of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), and ordered specific measures against the Noriega/Solis regime in Panama.

This rule adds appendix B to part 565 to establish a list of individuals whom the Director of the Office of Foreign Assets Control has determined to be acting or purporting to act on behalf of the Noriega/Solis regime in Pamana, pursuant to § 565.304(a)(4) of the Regulations. The individual regime officials included in appendix B are subject to the prohibitions on transfers to the Noriega/Solis regime from the United States (Regulations, § 565.202) and from U.S. persons and their controlled Panamanian entities in Panama (Regulations, § 565.203).

Since the Regulations involve a foreign affairs function, the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, does not apply. Because the Regulations are issued with respect to a foreign affairs function of the United States, they are not subject to Executive Order 12291 of February 17, 1981, dealing with Federal regulations.

List of Subjects in 31 CFR Part 565

Panama, Transfers of assets, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 31 CFR part 565 is amended as follows:

PART 565—PANAMANIAN TRANSACTIONS REGULATIONS

1. The "Authority" citation for part 565 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; E.O. 12635, 53 FR 12134 (April 12, 1988).

2. The last sentence of paragraph (a)(4) of § 565.304 is revised to read as follows: "Such determinations shall be published from time to time in an appendix B to this part, but shall be binding prior to such publication upon any person receiving actual notice thereof.

3. Appendix B to part 565—Persons and organizations acting on behalf of the Noriega/Solis Regime is added to the end of part 565 to read as follows:

Appendix B—Persons and Organizations Acting on Behalf of the Noriega/Solis Regime

I. Officials of the Panamanian Defense Forces and Other Officials of the Noriega/Solis Regime

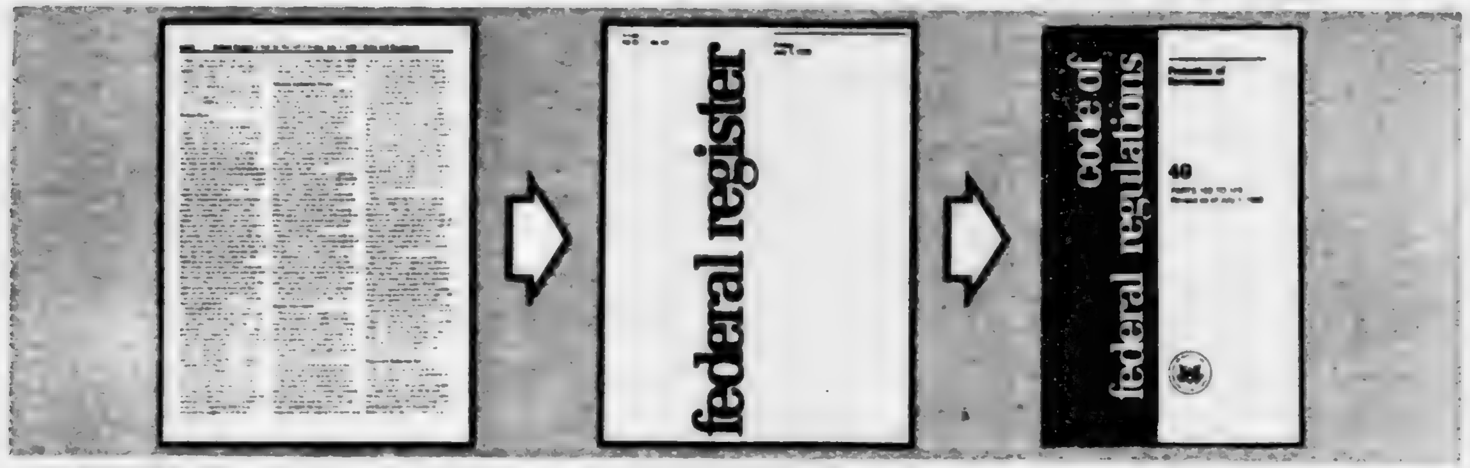
LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List August 23, 1989

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 193 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current **CFR** volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of **CFR** Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

Superintendent of Documents Subscription Order Form

Order Processing Code:
***6463**

Charge your order. It's easy!

Charge orders may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday–Friday (except holidays)

☐ **YES,** please send me the following indicated subscriptions:

- **Federal Register**
  - **Paper:**
    - ____$340 for one year
    - ____$170 for six-months
  - **24 x Microfiche Format:**
    - ____$195 for one year
    - ____$97.50 for six-months
  - **Magnetic tape:**
    - ____$37,500 for one year
    - ____$18,750 for six-months
- **Code of Federal Regulations**
  - **Paper**
    - ____$620 for one year
  - **24 x Microfiche Format:**
    - ____$188 Current year (as issued)
    - ____$115 previous year's full set (single shipment)
  - **Magnetic tape:**
    - ____$21,750 for one year

1. The total cost of my order is $______. All prices include regular domestic postage and handling and are subject to change. International customers please add 25%.

Please Type or Print

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

WHEN: September 20; at 9:00 a.m.
WHERE: Room 808, 75 Spring Street, SW.
Richard B. Russell Federal Building
Atlanta, GA
RESERVATIONS: Call the Federal Information Center

Rules and Regulations

Federal Register
Vol. 54, No. 169
Friday, September 1, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 210a

[INS No. 1201-89]

RIN 1115-AB05

Admission or Adjustment of Status of Replenishment Agricultural Workers

AGENCY: Immigration and Naturalization Service; Justice.

ACTION: Interim rule with request for comments and extension of comment date.

SUMMARY: This interim rule amends portions of the existing Part 210a of 8 CFR and sets forth the criteria and procedures to be used to register aliens as a condition precedent to admission or adjustment of the status of replenishment agricultural workers (RAW) for temporary residence under this section. This interim rule also sets forth procedures for expedited interviews of aliens, selected at random, to file petitions for RAW status early in fiscal year 1990. This rule is necessary to ensure that there is a sufficient and timely supply of labor to harvest perishable crops in the United States. The comment date on the interim rule published earlier on this subject is also extended.

DATES: Effective date: This rule is effective September 1, 1989. Comments on this interim rule and the previous interim rule published at 54 FR 29875 (July 17, 1989) must be received on or before October 2, 1989.

ADDRESSES: Written comments should be mailed in triplicate to the deputy Assistant Commissioner, Special Agricultural Worker Programs (SAW), Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536, or delivered to room 5250 at the same address.

FOR FURTHER INFORMATION CONTACT: Aaron Bodin, Deputy Assistant Commissioner, Special Agricultural Worker Programs (SAW), 202-786-3658.

SUPPLEMENTARY INFORMATION: On July 17, 1989, an interim rule with request for comments was published in the Federal Register at 54 FR 29875. This enabled the Service to take action to implement the RAW program while affording the public an opportunity to provide further comment on changes which were incorporated into the interim rule. The comment period expired on August 16, 1989. The Service received 11 comments, representing the views of employer and farmworker advocacy organizations, members of Congress, and individuals.

The Service is hereby amending the July 17, 1989 interim final rule in response to comments received and to clarify certain provisions which pertain only to policies and procedures in effect during the registration period. The reason for this procedure is to promptly make significant changes to the registration process which begins September 1, 1989, while allowing more time for the Service to consider other suggested changes and for additional public comment.

Comments Received

Disqualification for Illegal Entry After November 30, 1988

One commentor stated that by eliminating anyone who has entered the United States after November 30, 1988, we are creating many hardships and proposed a more current illegal entry cut-off date. Another commentor opposes the change in the cut-off date from November 6, 1986 to November 30, 1988 since any attempt to allow an alien who entered after the earlier date to file for RAW status distorts the Congressional intent to limit those eligible for amnesty as part of the overall scheme to stop illegal immigration. The Service will not change this provision. The November 30, 1988 cut off date was proposed to coincide with the deadline for filing an application as a Special Agricultural Worker (SAW) and the institution of employer sanctions on agricultural employers and is a reasonable date based on the intent of IRCA.

Priority Consideration

One commentor stated that priority consideration should not be given to registrants who are currently in the United States since this provision rewards aliens who are illegally in the United States and punishes those aliens who have complied with the law and returned home. Some commentors recommended that registration of aliens overseas be conducted only in the event there are not sufficient registrants living in the United States. Other commentors supported the existing regulations. The Service believes that if overseas registration were not concurrent with registration in the United States, some aliens might seek to enter the United States illegally solely to register. This provision will not be changed.

Family Preference

Section 210a.2(c)(1) provides preference in selection to immediate family members of aliens who have filed an application under IRCA which has been approved. Many commentors stated that since there are significant numbers of applications filed under sections 210 and 245A of IRCA which have not been decided by the Service, it would be fairer if preference in selection was extended to registrants whose relatives' applications were still pending a decision. The Service has adopted this recommendation and has amended § 210a.2(c)(1) and related §§ 210a.1(d) and 210a.7(c) accordingly. The petition of a registrant selected on this basis will be processed, but a final decision will not be made until the relative's IRCA application is adjudicated.

Bilingual Forms

One commentor noting the prohibitive cost of printing forms and instructions in many languages suggested that they be printed only in English, reasoning that printing forms in only English and Spanish unfairly discriminates against other applicants. During the SAW program, 84% of all applications were received from Spanish speaking applicants. While the Service recognizes it cannot print forms in all languages, it is reasonable to provide instructions in the primary language of a larger portion of the expected RAW registrants. The instruction booklets for both the registration and petition forms will be in

BEST COPY AVAILABLE

both English and Spanish. The forms themselves will be in English.

Minimum Age for Registration

It has been pointed out that the July 17 interim final rule was not clear as to whether persons who did not meet the minimum eligibility criteria because they were too young were returned to the pool of registrants or held in suspense until their birth date. Section 210a.3(a) has been clarified on this point. Registrants must be eighteen (18) years of age to be selected. Registrants who are under age must remain in the pool of registrants until they have turned eighteen (18) years of age. Another commentor supports the Service's decision to maintain the minimum age of eligible workers at 18 since it will ensure the protection of minors.

Registration Process

Several commentors suggested that because of the potentially large numbers of registrants and the uncertainty about a shortage number, there be a staggered registration process to avoid the frustration of registrants who might never be selected. The Service has no way to know how many people will register or what the shortage number will be in this and future years. In the proposed rule of March 3, 1989 the Service had proposed a registration process for fiscal year 1990 only with varying eligibility criteria, based on the size of the shortage number. The Service was persuaded by commentors who urged that a single registration be held for all eligible registrants. Furthermore, conducting more than one registration involves additional costs and expenditure of time and resources that would not otherwise be necessary. This provision will not change.

One commenter agreed that there should be no appeal in the registration process.

Registration Period

Section 210a.3(b) provides for a registration to be held during the period beginning September 1, 1989 and ending October 31, 1989. Most commentors are concerned that the sixty (60) day registration period does not allow enough time for aliens to register, especially since the opportunity to petition for RAW status during the life of the program is limited to aliens who register during this period. The Service agrees and wishes to afford aliens a longer period of time in which to register. Accordingly, the Service will extend the registration period for an additional month to end on November 30, 1989.

Overseas Registration by Qualified Designated Entities (QDE's)

Two commentors criticized the process of using QDE's for overseas registration, believing it discriminates against non-Mexican applicants, since there is no QDE in any other country. As an alternative, commentors propose that registration be conducted through United States Consulates. There is at present no QDE operating outside the United States. Several QDE's have indicated interest in operating in different countries and at least one is planning to locate in Mexico and one in Jamaica. It is not necessary for a QDE to have a physical presence in a country since it can distribute registration cards by mail. Also, requests for registration cards from aliens overseas received by the Service will be referred to QDE's. The Service continues to believe that overseas registration through QDE's will offer a fair opportunity for eligible aliens to register.

One commentor brought to the Service's attention that although the preamble to the July 17, 1989, interim rule stated that aliens residing outside the United States could obtain registration forms and information only through participating QDEs, the body of the regulation did not provide this authority. Section 210a.3(c) has been modified to add this provision.

Several QDEs expressed concern for the return of registration cards to the Service because of problems with mail service in some countries and asked that the Service consider alternative methods for return of registration cards by participating QDEs conducting overseas registration. Section 210a.3(d)(1) has been amended to permit modification of these provisions on a case by case basis upon approval of a written request submitted to the Service by a QDE.

Obtaining I–807 Registration Cards

Several commentors urged the Service to make registration cards available through as many outlets as possible, including QDE's and the post office. The Service had adopted this suggestion and will make cards available through nonparticipating QDE's, farmworker and grower organizations, non-profit organizations and public agencies.

Registration Fee

One commentor supports the requirement of a registration fee and urges an increase in the fee to cover the cost of the new toll-free services that the INS will provide. Since the fee was proposed to cover the costs of registration, including the toll-free services, the fee will remain the same.

Expedited Filing of Petition for RAW Status

Section 210a.5(i). The expedited petition process requires that, upon receipt of the invitation to petition, selected registrants must appear for interview with the petition fee and certain documents immediately and must file the remainder of the petition package within 60 days. Commentors were concerned that the expedited procedure described in the July 17 interim rule did not compel the prompt appearance of an alien and might, therefore, be ineffective in achieving its stated purpose of expediting issuance of employment authorization to apparently eligible petitioners. The Service agrees and has re-written this provision to require that expedited petitioners must, like all other petitioners, return a completed petition to the Service within 60 days of receiving the invitation to petition. The invitation to petition will advise the alien to appear at a Service office as soon as possible with the necessary documents and $175.00 petition fee. If the expedited petitioner fails to appear for interview within 60 days, the invitation to petition is withdrawn and another registrant will be selected and invited to petition. If the interview is conducted and fee taken within the 60 days, but the petitioner fails to complete the petition within that period, a Notice of Intent to Deny will be issued.

The Service wishes to note that the Statute requires the adjustment or admission of RAWs during the fiscal year for which a shortage number is established. Because of this, all processing on all petitions, including appeals, must be completed during that fiscal year. It is essential, therefore, for the Service to prescribe reasonable filing deadlines for petitions and related materials.

Confidentiality

Section 201a.6(g). In the confidentiality provision, as written, information in RAW records may be used to prosecute or deport a person who is the subject of an outstanding arrest warrant. By outstanding arrest warrant, the Service means that a warrant for the arrest of a person has been issued by a court of law in a criminal case. Therefore, the interim rule has been clarified to reflect that records related to a RAW may be released if the person is the subject of an outstanding criminal arrest warrant.

One commentor recommended that certain alien farmworkers presently incarcerated should be released and allowed to apply under section 210a if they wish. The Service wishes to note that all eligible aliens, including those presently in custody can register for RAW status.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule does not have a significant adverse economic impact on a substantial number of small entities. This rule is not a major rule within the meaning of 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with Executive Order 12612.

The information collection requirements contained in this rule have been cleared by Office of Management and Budget under the provisions of the Paperwork Reduction Act.

List of Subjects in 8 CFR Part 210a

Aliens, Temporary resident status, Reporting and recordkeeping requirements, Permanent resident status.

Accordingly, part 210a of chapter I of title 8 of the Code of Federal Regulations is amended to read as follows:

PART 210A—[AMENDED]

1. The authority citation for part 210a continues to read as follows:

Authority: 8 U.S.C. 1103; 8 CFR part 2.

§ 210a.1 [Amended]

2. In § 210a.1, paragraph (d) is amended by removing the term "which has been approved" where it appears at the end of the paragraph.

§ 210a.2 [Amended]

3. In § 210a.2, paragraph (c)(1) is amended to add the phrase "or is pending" immediately following the word "approved" where it appears at the end of the first sentence.

§ 210a.3 [Amended]

4. In § 210a.3, paragraph (a) is amended by removing the word "invited" from the last sentence and inserting in its place, the word "selected".

5. In § 210a.3, paragraph (b) is amended by removing the date "October 31, 1989" and inserting in its place, the date "November 30, 1989".

6. In § 210a.3, paragraph (c) is amended to add two new sentences at the end of the paragraph to read as follows: "Persons residing outside the United States can obtain a registration card only from a participating QDE. Non-participating QDEs, farmworker and grower organizations, non-profit community groups and public agencies may also receive cards for distribution to aliens within the United States upon approval of a request to the Regional Commissioner of the Service having jurisdiction over the area of the proposed distribution."

7. In § 210a.3, paragraph (d)(1) is amended to add two new sentences at the end of the paragraph to read as follows: "Participating QDEs operating overseas may be exempted from the requirement to use regular mail when forwarding cards of aliens registered overseas. An alternate means of delivery may be approved by the Service upon written request from the QDE."

§ 210a.5 [Revised]

8. In § 210a.5, paragraph (i) (1), (3), (4), (5), and (6) are revised to read as follows:

§ 210a.5 Petition for temporary resident status.

* * * * *

(i) * * *

(1) The Service will mail a petition package to the address supplied on the registration form, accompanied by a letter which invites the registrant to petition and to appear as soon as possible at any Service office listed on an attachment to the letter. The registrant must appear with the invitation letter, completed I–905 petition, two ADIT photographs, correct fee, proof of identity, age, and proof of family relationship to an IRCA legalized alien, if claimed at registration.

* * * * *

(3) The petitioner must return the fingerprint card, 1 ADIT photograph, any waiver(s) of ground(s) of excludability required, and the results of the required medical examination on Form I–693, to the Service in the envelope provided with the petition package within sixty (60) days from the date of the invitation to petition. Petition materials received by the Service after sixty (60) days will be returned to the petitioner unprocessed.

(4) If all required documentation and evidence is provided to the Service within the sixty (60) day period beginning with the date of the invitation to petition, the petitioner will be informed in writing of the Service's decision regarding the petition. If the petition is approved, the petitioner will be instructed to return to a Service office to exchange Form I–688A for a Temporary Resident Card (Form I–688). If the petition is denied, the petitioner will be informed in writing of his or her appeal rights and procedures to be followed in accordance with § 210a.7(g) of this part.

(5) An alien who fails to appear for the interview within 60 days of the date of the invitation to petition will lose this opportunity to petition, but may be selected at random again. Petition materials received by the Service after sixty (60) days will be returned to the petitioner unprocessed.

(6) Petitioners who timely file their petitions, but who fail to return requested documentation within the sixty (60) days allowed, will be issued a Notice of Intent to Deny for failure to pursue their petition for temporary residence.

§ 210a.6 [Amended]

9. In § 210a.6, paragraph (g) is amended by inserting the word "criminal" after the word "outstanding" and before the word "arrest".

§ 210a.7 [Amended]

10. In § 210a.7, paragraph (c), is amended in the first sentence by inserting the phrase "or a claim to IRCA family preference is made and the relative's IRCA application is pending," after the word "processing," and before the word "may".

Dated: August 25, 1989.

James L. Buck,

Acting Commissioner, Immigration and Naturalization Service.

[FR Doc. 89-20573 Filed 8-31-89; 8:45 am]

BILLING CODE 4410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-CE-15-AD; Amdt. 39-6312]

Airworthiness Directives; Beech 65, 70, 80, 90, 99, 100, 200, 300 and 1900 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises and reissues Airworthiness Directive (AD) 87-22-01, Amendment 39-5748 applicable to certain Beech 65, 70, 80, 90, 99, 100, 200, 300, and 1900 Series airplanes, which requires inspection of the nose landing gear fork assembly. The FAA has determined that an improved replacement part is available. This revision deletes these inspections if this new, improved part is installed on the airplane.

EFFECTIVE DATE: September 30, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Beech Service Bulletin No. 2102, Revision I, dated April 1987, Revision II, dated April 1988, or Revision III, dated Juna 1989, applicable to this AD may be obtained from the Beech Aircraft Corporation, Commercial Services, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085. This information also may be examined at the Rules Docket, FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Don Campbell, Aerospace Engineer, Airframe Branch, ACE–120W, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION: AD 87–22–01, Amendment 39–5748 (52 FR 45449; November 30, 1987), requires repetitive inspections for fatigue cracks in the nose landing gear fork on certain Beech 65, 70, 80, 90, 99, 100, 200, 300, and 1900 Series airplanes. Forks of welded tubular construction have been found cracked beyond acceptable limits and the replacement parts have also been susceptible to cracking. An improved fork, of forged solid construction, has been developed by Beech and has been satisfactorily fatigue tested. The improved fork is less susceptible to fatigue cracking than the welded tubular fork and the improved fork is currently being installed on production airplanes. This AD revision permits the installation of the improved fork and also eliminates the required recurring inspections if the improved fork is installed. Since the condition addressed by AD 87–22–01 is likely to exist in Beech 65, 70, 80, 90, 99, 100, 200, 300, and 1900 Series airplanes not incorporating the new design nose gear fork, the revision retains the existing requirement for repetitive inspection for cracks in the nose gear fork of all affected airplanes which do not have the new design fork installed. Without this revision to the AD, numerous grants of equivalent means of compliance would continue to be necessary, at expense to the FAA and public alike. Therefore, the FAA has determined that this revision should immediately be made available to the public. Also, the improved part enhances safety, compared to repetitive inspections of the old style fork. In view of the above, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days. The regulations adopted herein do not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979.) If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of 14 CFR part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising and reissuing AD 87–22–01, Amendment 39–5748 (52 FR 45449; November 30, 1987) to read as follows:

Beech: Applies to Models 65, 65–80, A65, A65–8200, 70, 65–A80, 65–A80–8800, 65–B80, 65–88, 65–90, 65–A90, 65–A90–1, 65–A90–2, 65–A90–3, 65–A90–4 and B90 (all serial numbers (S/N)); C90 and C90A (S/N LJ–502 through LJ–1190); E90, H90, F90, 100, A100, B100, 99, 99A, A99A, B99 and C99 (all S/N); 200 and B200 (S/N BB–2 through BB–1314); 200C, 200CT, 200T, A200, A200C, A200CT, B200C, B200CT and B200T (all S/N); 300 (S/N FA–1 through FA–166 and FF–1 through FF–19); 1900 (all S/N); 1900C (S/N UB–1 through UB–74 and UC–1 through UC–78) airplanes certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent failure of the nose landing gear (NLG) fork due to undetected fatigue cracking, accomplish the following:

(a) Within the next 200 hours time-in-service (TIS) after the effective date of this AD, and thereafter at intervals not to exceed 100 hours TIS for airplanes in the 65 Series, 70 Series, 80 Series, 99 Series and 1900 Series, and 150 hours TIS for airplanes in the 90 Series, 100 Series, 200 Series and 300 Series, inspect the NLG fork using fluorescent penetrant method in accordance with the instructions in part II of Beech Service Bulletin No. 2102, revision I, dated May 1987, or Revision II dated April 1988, or revision III, dated June 1989.

Note 1: Inspection for slippage of the NLG fork collar on the strut tube per part I of the Service Bulletin is recommended but not required by this AD.

(1) If no cracks are found, the airplane may be returned to service.

(2) If a crack is detected at the tip of the weld, is not more than 0.75 inches in length, and does not branch out into the unwelded tube wall (See figure 1 or figure 2 as applicable), thereafter at intervals not to exceed 25 hours TIS, inspect the NLG fork per paragraph (a) above until replacement with a serviceable part. The replacement part is immediately subject to the conditions of this AD, except as provided by paragraph (b), below.

(3) If a crack is detected that exceeds the limits of paragraph (a)(2), prior to further flight replace the NLG fork with a serviceable part. The replacement part is immediately subject to the conditions of this AD, except as provided by paragraph (b) below.

(b) The repetitive inspections of this AD are no longer required if an improved nose landing gear fork Kit No. 101–830–1S (except 1900 Series) or Kit No. 144–8015–1S (for 1900 Series) is installed.

(c) Airplanes may be flown in accordance with FAR 21.187 to a location where this AD can be accomplished.

(d) An alternate method of compliance or adjustment of the initial or repetitive compliance times, which provides an equivalent level of safety, may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone 316–946–4400.

Note 2: The request should be forwarded through an FAA Maintenance Inspector, who

may add comments and then send it to the Manager, Wichita Aircraft Certification Office, at the above address. All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas, 67201–0085; or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment revises AD 87–22–01, Amendment 39–5748.

This amendment becomes effective on September 30, 1989.

Issued in Kansas City, Missouri, on August 23, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89-CE-09-AD; Amdt. 39-6316]

Airworthiness Directives; Beech 200 and 300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Beech 200 and 300 Series airplanes, which supersedes AD 87-17-05R1, Amendment No. 39-5847, and mandates repetitive inspections and repair as required of wing fuel bay upper skin panels. The FAA has determined that the repairs and replacement panels specified in AD 87-17-05R1 are ineffective. The actions adopted herein will preclude structural weakening of these panels due to corrosion.

DATES: *Effective Date:* October 3, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Beech Service Bulletin No. 2040, Rev II, dated December, 1988, and Beech Service Instructions No. C-12-0094, Rev II, dated January, 1989, applicable to this AD, may be obtained from the Beech Aircraft Corporation, Commercial Services, Department 52, P.O. Box 85, Wichita, Kansas 67201-0085; Telephone (316) 681-7111. This information may also be examined at the Rules Docket, FAA, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89-CE-09-AD, Room 1558, 601 East 12 Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Don Campbell, Aerospace Engineer, Airframe Branch, ACE-120W, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4409.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD requiring inspection of the wing fuel bay upper skin panels for debonding, and repair or replacement as necessary on certain Beech 200 and 300 Series airplanes was published in the **Federal Register** on April 19, 1989 (54 FR 15772). The proposal resulted from the determination that the actions specified in AD 87-17-05R1 are inadequate. AD 87-17-01R1, Amendment No. 39-5847, was published in the **Federal Register** on February 17, 1988 (53 FR 4604). AD 87-17-05R1 requires repetitive inspections and repair if necessary, of a debond condition of the wing upper skin panels in the area bounded by the fuselage, nacelle, front spar, and rear spar on certain Beech 200 and 300 series airplanes. The area in question is a one piece, all aluminum, bonded honeycomb sandwich, which serves as the fuel bay upper cover as well as a load carrying structural member. The debonding results when moisture leaks into the honeycomb via blind fasteners (rivets) in the outer face sheet of the panel. The moisture in turn, causes corrosion to form inside the honeycomb, which attacks the face sheet bonds. Without corrective maintenance, the debonding can progress to a point where safe flight is jeopardized. If no debonding is detected, AD 87-17-05R1 requires sealing of all blind fasteners (rivets) per Beech Service Bulletin No. 2040, Rev I (or Service Instructions No. C-12-0094, Rev I, for military airplanes) which involves an external application of a sealant. If debonding is detected, the AD specifies repair by Beech Kit No. 101-4032-1S or -3S, after which the inspections continue and as an alternative, the debonded panel may be replaced by a new panel, part number (P/N) 101-120108-603 or -604, after which the inspections are no longer required.

In the 16 months since AD 87-17-05R1 was issued, the FAA has determined that the present method of sealing is not always effective in keeping moisture out of the honeycomb core, and that Beech Kits No. 101-4032-1S and -3S have been discontinued by the manufacturer. The FAA has also been advised that at least seven of the replacement panels, P/N 101-120108-603 or -604, have been debonded in service. As a result, Beech revised the service information to provide an improved method, Kit No. 101-4048-1S, for sealing the blind rivets, and expanded the inspections to include the new replacement panels.

Temporary Repair Procedure No. SRV.001 is also described in Revision II to the service bulletin. This repair method is specified for use for up to one year from the time of modification in cases where immediate panel replacement is not feasible or desirable. However, a panel which has been previously rebonded using Kit No. 101-4032-1S or -3S may not be repaired again using Kit No. 101-4048-1S. Partial replacement panels, which may be used in lieu of the complete panels, P/N 101-120108-603 or -604, are also referenced in the revised service information as follows:

Description	Number	Wing
Kit	01-4045-1S	Left
Repair procedure	SRV.002	Left
Repair procedure	SRV.018	Right

Regardless of whether a debonded panel is replaced or repaired, the manufacturer recommends that the repetitive inspections continue. In view of the above, the FAA has determined that AD 87-17-05R1 is no longer adequate and should be superseded.

Since the condition described is likely to exist or develop in other Beech 200 and 300 series airplanes of the same design, the FAA proposed a superseding AD which would require repetitive inspections and, if necessary, temporary repair or replacement of all wing fuel bay upper skin panels in accordance with Beech Service Bulletin No. 2040, Rev II, dated December, 1988, or Beech Service Instructions No. C-12-0094, Rev II, dated January, 1989, as appropriate. Interested persons have been afforded an opportunity to comment on the proposal. No comments or objections were received on the proposal or the FAA determination of the related cost to the public. Accordingly, the proposal is adopted without change, except for minor editorial changes and corrections. The FAA has determined that this regulation involves 995 airplanes at an approximate initial and annual cost of $416 and $234, respectively, for each airplane, or a total fleet cost of $415,000 initially plus $233,000 annually. Warranty reimbursement is offered by Beech for a limited time for the cost of rivet sealing (Kit 101-4048-1S) and any repairs or panel replacements needed. The total cost of complying with the AD is less than $100 million, the threshold amount for a significant rule. The cost of compliance with the AD is so small that the expense of compliance will not be a significant impact on any small entities operating these airplanes.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this AD does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44

FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the Regional Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of 14 CFR part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 87–17–05R1, Amendment 39–5847, with the following new AD:

Beech: Applies to Models 200, B200, 200C, B200C, 200CT, B200CT, 200T, B200T, A200, A200C, A200CT, and 300 (all serial numbers) airplanes equipped with wing fuel bay upper skin panels made with bonded (honeycomb sandwich) construction, certificated in any category.

Compliance: Required as indicated unless previously accomplished.

To assure the continued structural integrity of the wing fuel bay upper skin panels, accomplish the following:

(a) Within the next 30 days after the effective date of this AD, check the airplane records or inspect the wing fuel bay upper skin panels (hereafter called "skin panels") for possible bonded (honeycomb sandwich) construction. Airplanes in the serial number range of BB–2 thru BB–613 were manufactured with a skin-and-stringer construction and are not affected by this AD unless bonded wing fuel bay upper skin panels were installed after manufacture. If the airplane has bonded skin panels, accomplish the following in accordance with Beech Service Bulletin No. 2040, Rev II, dated December, 1988 (for civil registered airplanes), or Beech Service Instructions No. C–12–0094, Rev II, dated January, 1989 (for military airplanes), as applicable:

(1) If the skin panels are bonded and have blind rivets as shown in the shaded portions of Fig. 1 in the service bulletin, inspect the skin panels for debonding within the next 150 hours time-in-service (TIS) or 6 calendar months, whichever occurs first.

(i) If the skin panel has been previously repaired, per Beech Kit No. 101–4032–1S or 101–4032–3S,

(a) and there is debonding, prior to further flight remove and replace the skin panel and reinspect for debonding at 18 month intervals thereafter.

(b) and there is no debonding, prior to further flight reseal the blind rivets per instructions in Beech Kit 101–4048–1S and reinspect the skin panel for debonding within 6 calendar months, again within another 12 calendar months, and at 18 calendar month intervals thereafter.

(ii) If the skin panel has not been previously repaired,

(a) and there is debonding, either:

(1) prior to further flight remove and replace the skin panel and reinspect for debonding at 18 calendar month intervals thereafter, or

(2) prior to further flight install a temporary repair per Beech Repair Procedure No. SRV.001 which can be used for no longer than 12 calendar months from the time of modification, at which time remove the temporarily repaired panel and replace with a serviceable panel. Reinspect for debonding at 18 calendar month intervals thereafter.

(b) and there is no debonding, prior to further flight reseal the blind rivets and reinspect the skin panel for debonding within 6 calendar months, again within another 12 calendar months, and at 18 calendar month intervals thereafter.

(2) If the skin panels are bonded and do not have blind rivets as shown in the shaded portion of Fig. 1 in the service bulletin, inspect for debonding within the next 600 hours TIS or 18 calendar months, whichever occurs first.

Note 1: The following airplanes were manufactured with bonded skin panels without rivets: Models B200 (above serial number BB–1238), B200C (above serial numbers BL–127), B200CT (above serial numbers BN–4), B200T (above serial numbers BT–30), 300 (above serial numbers FA–81 and all FF–serial numbers).

(i) If there is debonding, either:

(a) prior to further flight remove and replace the skin panel and reinspect for debonding at 18 calendar month intervals thereafter, or

(b) prior to further flight install a temporary repair per Beech Repair Procedure No. SRV.001, which can be used for no longer than 12 calendar months from the time of modification, at which time remove the temporarily repaired panel and replace with a serviceable panel. Reinspect for debonding at 18 calendar month intervals thereafter.

(ii) If there is no debonding, reinspect for debonding at 18 calendar month intervals thereafter.

(3) The following are approved replacement skin panels:

Note 2: These panels are bonded and do not have rivets.

(i) Complete replacement panels are Part Nos. 101–120108–603 (L.H.) and 101–120108–004 (R.H.).

(ii) Kit No. 101–4045–1S and Repair Procedure No. SRV.002 each define a partial replacement panel (L.H. only).

(iii) Repair Procedure No. SRV.018 defines a partial replacement panel (R.H. only).

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where the AD may be accomplished.

(c) An alternate method of compliance or adjustment of the initial or repetitive compliance times which provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946–4400.

Note 3: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office, at the above address.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Beech Aircraft Corporation, Commercial Service, Department 52, Wichita, Kansas 67201–0085; or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment supersedes AD 87–17–05R1, Amendment 39–5847.

This amendment becomes effective on October 3, 1989.

Issued in Kansas City, Missouri, on August 24, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89–20612 Filed 8–31–89; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 89–NM–164–AD; Amdt. 39–6315]

Airworthiness Directives: Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes equipped with a cabin partition wall-mounted flight attendant seat, which requires replacement of the partition upper mounting bolts. This amendment is prompted by reports of loose or missing upper mounting bolts, which are required to structurally secure the partition. This condition, if not corrected, could result in the partition falling over, injuring the flight attendant, and/or blocking an emergency exit and preventing its use during an emergency evacuation.

DATE EFFECTIVE: September 19, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Pliny Brestel, Airframe Branch, ANM–120S; telephone (206) 431–1931. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seatle, Washington 98168.

SUPPLEMENTARY INFORMATION: The manufacturer advised the FAA of an incident involving a Model 767 series airplane in which a cabin partition with a wall-mounted flight attendant seat, which was occupied, came loose at the upper attachment and fell over. The flight attendant was not injured. Investigation revealed that three of the four upper mounting bolts were missing and the fourth bolt had stripped out. Further, the bolts were too short to engage the self-locking feature of the mating hardware. The upper attachment requires the presence of these bolts to structurally secure the partition. Failure of the bolts to hold the petition could result in injury to a flight attendant, and/or blocking of an emergency exit.

The FAA has reviewed and approved Boeing Alert Service Bulletin 767–25A0135, dated July 6, 1989, which describes the procedures for the replacement of the upper mounting bolts in cabin partitions having a wall-mounted flight attendant seat.

Since this condition is likely to exist on other airplanes of this same type design, this AD requires replacement of the upper mounting bolts in cabin partitions having a wall-mounted flight attendant seat, in accordance with the service bulletin previously described.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air Transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 767 series airplanes, as listed in Boeing Alert Service Bulletin 767–25A0135, dated July 6, 1989, certificated in any category. Compliance required within 30 days after the effective date of this AD, unless previously accomplished.

To ensure structural integrity of cabin partitions with a wall-mounted flight attendant seat, accomplish the following:

A. Replace the upper mounting bolts of cabin partitions, in accordance with Boeing Alert Service Bulletin 767–25A0135, dated July 6, 1989.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 23, 1989.

This amendment becomes effective on September 19, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89–NM–153–AD; Amdt. 39–6314]

Airworthiness Directives; Boeing of Canada, Ltd., de Havilland Division, Model DHC–8–100 and –300 series airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to de Havilland Model DHC–8–100 series airplanes, which currently requires an inspection of the fire bottle squib wiring on the engine fire extinguishing system to determine proper installation, and correction of the installation, if necessary. That action was prompted by reports of the connectors on fire bottle squibs found incorrectly installed on airplanes in service. This condition, if not corrected, could result in a fire bottle being discharged into the wrong nacelle. This amendment expands the applicability of the existing AD to include additional airplanes, and requires the installation of a modification that will prevent displacement and improper connection of the wiring.

EFFECTIVE DATE: September 19, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing of Canada, Ltd., de Havilland Division, Garatt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the New York Aircraft Certification Office, Engine and Propeller Directorate, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Richard P. Fiesel, Propulsion Branch, New York Aircraft Certification Office, ANE–174, Engine and Propeller Directorate, 181 South Franklin Avenue, Room 202, Valley Stream New York 11581; telephone (516) 791–7421.

SUPPLEMENTARY INFORMATION: On February 28, 1989, the FAA issued telegraphic AD T89–05–51, applicable to de Havilland Model DHC–8–100 series airplanes, to require a one-time inspection of the fire bottle squib wiring on the engine fire extinguishing system to determine proper installation, and correction of the installation, if necessary. That action was prompted by reports of the connectors on fire bottle squibs found incorrectly installed on airplanes in service. This condition, if not corrected, could result in a fire bottle being discharged into the wrong nacelle.

Since issuance of that telegraphic AD, the FAA has received eight reports of connectors on the fire bottle squibs of the engine fire extinguishing system found incorrectly installed (cross connected). An additional report indicated that, during a wiring check conducted on apparently properly identified and installed fire extinguisher bottles, wires were found that had been mis-terminated within the connector.

De Havilland has developed a modification consisting of the installation of a lanyard between each fire extinguisher squib connector and adjacent structure to minimize the potential for displacement and prevent improper connection. De Havilland Service Bulletin 8–26–9, dated March 23, 1989, describes procedures for installation of this modification, Modification Number 8/1336, "Fire Protection—Fire Extinguisher Squib Electrical Connector Positioning." Transport Canada, which is the airworthiness authority for Canada, has issued an airworthiness directive requiring installation of this modification.

De Havilland has also issued Alert Service Bulletin A8–26–8, dated March 20, 1989, which describes procedures for an inspection to verify proper fire bottle squib wiring in the engine fire extinguishing system. This service bulletin clarifies the inspection procedures described in Alert Service Bulletin A8–26–7, dated February 20, 1989, which was referenced in the existing AD.

Additionally, since issuance of the telegraphic AD, the FAA has type certificated the de Havilland Model DHC–8–300 series airplane for operation in the United States. The design of the engine fire extinguishing system wiring on airplane Serial Numbers 001 through 149 of that model is similar to that of the Model DHC–8–100 series airplanes; therefore, those airplanes would be subject to the same unsafe condition addressed by the existing AD. Beginning with Serial Number 150, Model DHC–8–300 series airplanes were modified in production to include Modification Number 8/1336, described above. (Currently, there are no Model DHC–8–300 series airplanes registered in the United States.)

These airplane models are manufactured in Canada and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this situation is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD supersedes telegraphic AD T89–05–51 to require a wiring continuity check of the fire bottle squib wiring on all affected airplanes, regardless of connector identification, and correction of the installation, if necessary; expand the applicability to include Model DHC–8–300 series airplanes; and require installation of Modification Number 8/1336, in accordance with the service bulletin previously described.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it it not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepered and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 countinues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by superseding telegraphic AD T89–05–51, issued February 28, 1989, with the following new airworthiness directive:

Boeing of Canada, Ltd., de Havilland Division: Applies to Model DHC–8–100 series airplanes, and Model DHC–8–300 series airplanes, serial numbers 001 through 149, certificated in any category. Compliance required as indicated, unless previouly accomplished.

To ensure that the engine fire extinguishing system bottle squibs are connected to the proper actuating switch, accomplish the following:

A. Within the next 70 hours time-in-service after the effective date of this AD, perform an inspection to verify proper installation of the fire bottle squib wiring in the engine fire extinguishing system, in accordance with the Accomplishment Instructions of de Havilland Alert Service Bulletin A8–26–8, dated March 20, 1989. If the connector identification

sleeves are difficult to read or are damaged, or if it has not been confirmed that the installation is correct, prior to further flight, correct the wiring installation and verify proper wiring in accordance with the service bulletin.

Note: Airplanes on which this inspection and/or repair has previously been performed, as required by paragraphs A. and B. of Telegraphic AD T89–05–51, in accordance with Items 1 through 26 of de Havilland Alert Service Bulletin A8–26–7, dated February 24, 1989, are considered to have complied with the requirements of this paragraph.

B. Within the next 120 hours time-in-service or 30 days after the effective date of this AD, whichever occurs first, install de Havilland Modification Number 8/1336, "Fire Protection—Fire Extinguisher Squib Electrical Connector Positioning," in accordance with the Accomplishment Instructions of de Havilland Service Bulletin 8–26–9, dated March 23, 1989.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office, FAA, Engine and Propeller Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then sent it to the Manager, New York Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Boeing of Canada, Ltd., de Havilland Division, Garatt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the New York Aircraft Certification Office, Engine and Propeller Directorate, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

The amendment supersedes Telegraphic AD T89–05–51, issued February 28, 1989.

This amendment becomes effective September 19, 1989.

Issued in Seattle, Washington, on August, 23, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

[FR Doc. 89–20614 Filed 8–31–89; 8:45am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87–ASW–39; Amdt. 39–6313]

Airworthiness Directives; Messerschmitt-Bolkow-Blohm GmbH (MBB) Model BO–105 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires inspection and repair or replacement, as necessary, of main rotor pitch links on MBB Model BO–105 series helicopters. This amendment is needed to clarify that the daily check of the main rotor pitch link control rods for binding in the bearings may be conducted by either a mechanic or a pilot.

DATES: *Effective Date:* September 28, 1989.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service information (Alert Service Bulletin No. ASB–BO–105–10–103) may be obtained from the MBB Helicopter Corporation, P.O. Box 2349, West Chester, Pennsylvania 19380. These documents may also be examined at the Office of the Assistant Chief Counsel, Federal Aviation Administration, Southwest Region, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. John Varoli, Manager, Aircraft Certification Service Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, Brussels, Belgium, APO NY 09667, telephone number 513.38.30; or Mr. J.H. Major, Rotorcraft Directorate, FAA, Rotorcraft Standards Staff, ASW–110, Fort Worth, Texas 76193–0111, telephone (817) 624–5117.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39–5795 (52 FR 46991; December 11, 1987), AD 87–26–02, which currently requires inspection of the main rotor pitch links for freedom of bearing operation and for cracks, and repair or replacement, as necessary, on MBB Model BO–105 series helicopters. Amendment 39–5795 does not expressly allow pilots to conduct the daily checks of the main rotor pitch links for binding in the bearings. That was not intended by the FAA in issuing the rule. Therefore, the FAA is amending Amendment 39–5795 to make it clear that pilots, as well as mechanics, may conduct the checks of the main rotor pitch links for binding as described in paragraph (a)(1) of AD 87–26–02 on MBB Model B–105 series helicopters. Individual operators have petitioned and received approval under paragraph (f) to allow pilots to conduct the checks. This change to the rule will permit other operators to exercise the same privilege.

Since this amendment provides a clarification only, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is clarifying in nature and imposes no further cost. Therefore, I certify that this action: (1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Regional Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Safety.

Adoption of the Amendment

PART 39—AIRWORTHINESS DIRECTIVE

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of 14 CFR part 39 of the FAR as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 3154(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by amending Amendment 30–5795 (52 FR 46991; December 11, 1987), AD 87–26–02, by revising paragraph (a)(1) to read as follows:

Messerschmitt-Bolkow-Blohm (MMB): Applies to Model BO–105 series helicopters, certificated in any category, equipped with main rotor blade rotating control rod ends, P/N's 105–13141.01 and 105–13142.01.

* * * * *

(a) * * *

(1) Check the bearings on each control rod by rotating the rod about its longitudinal axis by hand. This check may be conducted by the pilot and must be recorded in accordance with § 43.9.

Note: The pilot, when complying, must make appropriate entries and the record must be maintained per § 91.173 or § 135.439.

* * * * *

This amendment becomes effective September 26, 1989.

This amendment amends Amendment 39–5795 (52 FR 46991; December 11, 1987), AD 87–26–02.

Issued in Fort Worth, Texas, on August 22, 1989.

James D. Erickson,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 88–ANE–45; Amdt. 39–6275]

Airworthiness Directives; Pratt & Whitney Canada (PWC) PW115/118/118A and PW120/120A/121 Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain PW115/118/118A and PW120/120A/121 turboprop engines by individual telegrams. The AD establishes a reduced low cycle fatigue (LCF) life limit on certain high pressure turbine (HPT) components. The AD is needed to prevent LCF cracking of the affected components which could lead to an uncontained engine failure.

DATES: *Effective:* September 22, 1989, as to all persons except those persons to whom it was made immediately effective by telegraphic AD (TAD) No. T88–26–51, issued December 28, 1988, which contained this amendment.

Compliance: As indicated in the body of the AD.

Incorporation by Reference—Approved by the Director of the Federal Register as of September 22, 1989.

ADDRESSES: The applicable engine manufacturer's service bulletins (SB) may be obtained from Pratt & Whitney Canada, 1000 Marie Victorin, Longueuil, Quebec, Canada J4G 1A1, or may be examined at the Regional Rules Docket, Room 311, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Diane M. Cook, Engine Certification Branch, ANE–142, Engine Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7082.

SUPPLEMENTARY INFORMATION: On December 28, 1988, TAD T88–26–51 was issued and made effective immediately to all known U.S. owners and operators of certain PW115/118/118A and PW120/120A/121 turboprop engines.

The TAD reduced the LCF life limit for the HPT front cover, Part Numbers (P/N's) 3035181 and 3104285–01; the HPT rear cover, P/N's 3035182 and 3104285–01; and the HPT disk, P/N 3035711, installed in certain PW115/118/118A and PW120/120A/121 turboprop engines. The FAA has determined that these HPT components accumulate fatigue damage at a faster rate than originally predicted.

An investigation of a cracked HPT disk revealed higher than predicted thermal stresses. Re-evaluation of the LCF life analysis with recalibrated cooling air data surrounding the HPT rotor indicated that engines incorporating the cooling air nozzle housing assembly (ANH), P/N 3106642–01, and the HPT stubshaft, P/N 3104413–01, have a lower cyclic life on certain HPT components than engines incorporating ANH, P/N 3106642–02, and HPT stubshaft, P/N 3104413–03. The allowable cyclic life on certain HPT components installed in engines incorporating ANH, P/N 3106642–01, and HPT stubshaft, P/N 3104413–01, must be reduced by a factor of one-third. The hourly life limit is unchanged. PWC SB 20002, Revision 4, dated November 21, 1988, has reduced the cyclic life of these HPT components installed in engines incorporating ANH, P/N 3106642–01, and the HPT stubshaft, P/N 3104413–01, by adjusting the flight count factor (FCF) from 1.0 to 1.5. However, when these HPT components are installed in an engine incorporating ANH, P/N 3106642–02, and the HPT stubshaft, P/N 3104413–03, in accordance with PWC SB 20133, dated September 14, 1987, the FCF is 1.0. For those HPT components which have accumulated cycles with both engine nozzle configurations, the new total accumulated cycles are determined by applying the appropriate FCF in accordance with the procedures defined in PWC SB 20002, Revision 4, dated November 21, 1988.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual telegrams, issued December 28, 1988, to all known U.S. owners and operators of certain PW115/118/118A, and PW120/120A/121 turboprop engines. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

The regulations adopted herein do not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator,

the Federal Aviation Administration (FAA) amends 14 CFR Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

Pratt & Whitney Canada: Applies to Pratt & Whitney Canada (PWC) PW115/118/118A turboprop engines prior to Serial Number (S/N) PCE 115033, and PW120/120A/121 turboprop engines prior to S/N PCE 120174.

Compliance is required as indicated, unless already accomplished.

To prevent an uncontained engine failure resulting from low cycle fatigue failure of certain high pressure turbine (HPT) components, accomplish the following:

(a) Determine upon receipt of this AD the cyclic life accumulated on the HPT front cover, HPT rear cover, and HPT disk, in accordance with PWC Service Bulletin (SB) 20002, Revision 4, dated November 21, 1988, paragraph 2.D.(1), as follows:

(1) For engines which have not incorporated PWC SB 20133, dated September 14, 1987, calculate the total cyclic life accumulated using a flight count factor (FCF) of 1.5 in accordance with the formula found in PWC SB 20002, Revision 4, paragraph 2.D.(1)

(2) For engines which have not incorporated PWC SB 20133, dated September 14, 1987, calculate the total cyclic life accumulated prior to the incorporation of PWC SB 20133 using an FCF of 1.5, plus the total cycles accumulated after the incorporation of PWC SB 20133 using an FCF of 1.0, in accordance with the note in PWC SB 20002, Revision 4, paragraph 2.D.(1)

(b) Remove from service and replace with a serviceable part within 25 cycles in service (CIS) from the receipt of this AD, those HPT front covers, HPT rear covers, or HPT disks which have accumulated 14,975 CIS or greater upon recepit of this AD, as calculated in accordance with paragraph (a)(1) or (a)(2) of this AD.

(c) Remove from service and replace with a serviceable part at or prior to accumulating 15,000 CIS, those HPT front covers, HPT rear covers, or HPT disks which have accumulated less than 14,975 CIS upon receipt of this AD, as calculated in accordance with paragraph (a)(1) or (a)(2) of this AD.

(d) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(e) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, an alternate method of compliance with the requirements of this AD or adjustment to the compliance times specified in this AD may be approved by the Manager, Engine Certification Office, ANE–140, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

The determination of the cyclic life accumulated on the HPT front cover, HPT rear cover, and HPT disk shall be accomplished in accordance with PWC SB 20002, Revision 4, dated November 21, 1988. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Pratt & Whitney Canada, 1000 Marie-Victorin, Longueuil, Quebec, Canada J4G 1A1. Copies may be inspected at the Regional Rules Docket, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Room 311, Burlington, Massachusetts 01803, or at the Office of the Federal Register, 1100 L Street, Room 8301, Washington, DC 20591.

This amendment becomes effective September 22, 1989, as to all persons except those persons to whom it was made immediately effective by TAD T88–26–51, issued December 28, 1988, which contained this amendment.

Issued in Burlington, Massachusetts, on July 13, 1989.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 89–ANE–23; Amdt. 39–6308]

Airworthiness Directives; Teledyne Continental Motors (TCM) Model TSIO–520BE Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain TCM Model TSIO–520BE engines by individual priority letter AD 89–14–01. The AD requires repetitive checks of the crankshaft end play, a one-time check of the thru-bolt torque, and repetitive inspections of the number two crankshaft bearing. The AD is needed to prevent possible shifting of the crankshaft bearing which could result in total loss of engine power.

DATES: *Effective:* September 22, 1989, as to all persons except those to whom it was made immediately effective by priority letter AD 89–14–01, issued June 30, 1989, which contained this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 22, 1989.

Compliance: As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin (SB) may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, Alabama 36601, or may be examined in the Regional Rules Docket, Room 311, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Jerry Robinette, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, Small Airplane Directorate, Aircraft Certification Service, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349; telephone (404) 991–3810.

SUPPLEMENTARY INFORMATION: On June 30, 1989, priority letter AD 89–14–01 was issued and made effective immediately as to all known U.S. owners and operators of certain TCM Model TSIO–520–BE engines. The AD requires repetitive checks of the end play, a one-time check of the thru-bolt torque, and repetitive inspections of the number two crankshaft bearing. There have been several occurrences where the crankshaft bearings have shifted on the subject engines and contacted the crankshaft fillet radius. This may result in crankshaft failures if not detected by TCM prescribed inspections. One such failure has occurred since the issuance of AD 87–26–08. The reason for this bearing shift is not completely understood. It is suspected that the bearing shift occurs because of inadequate crush of the bearings in the crankcase halves during the original torquing of the thru-bolts using a suspect lubricant. Believing that bearing shift could be detected, AD 87–26–08 was issued requiring a one-time thru-bolt torque check. There have been service difficulties since issuance of AD 87–26–08 and TCM issued SB M89–11 requiring another thru-bolt torque check. The FAA did not issue an AD for TCM SB M89–11 because there was no technical proof that the additional thru-bolt torque check would correct the problem. There

BEST COPY AVAILABLE

have been 75 torque checks conducted in accordance with TCM SB M89–11 and 5 suspect engines have been removed from service. A recent check of a TSIO–520–BE engine installed in a PA46–310P airplane at the Piper facility confirmed that the thru-bolt torque check is not adequate. This airplane/engine had 75 hours time-in-service since SB M89–11 had been successfully completed when it was discovered that the bearing had shifted. Subsequent investigation has confirmed that SB M89–11 is not adequate. A visual inspection is the only positive way to insure there is no bearing shift. The investigation also showed that the bearing shift had occurred at the number two main bearing position in all known cases. AD action was necessary to prevent possible shifting of the crankshaft bearing which can result in total loss of engine power.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority letters issued June 30, 1989, as to all known U.S. owners and operators of certain TCM Model TSIO–520BE engines. These conditions still exist, and the AD is hereby published in the Federal Register as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations (FAR) to make it effective as to all persons.

The regulations adopted herein do not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, and Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) amends 14 CFR Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

Teledyne Continental Motors (TCM): Applies to TCM Model TSIO–520BE engines (Serial Numbers 528001 through 528037) certificated in any category. Engines which have had the crankcase split and inspected and new bearings installed, since the accomplishment of AD 87–26–08, are exempt from the requirements of this AD.

Compliance required as indicated, unless already accomplished.

To prevent the possible loss of engine power, accomplish the following:

(a) Prior to further flight and at intervals not to exceed 25 hours time-in-service, accomplish the crankshaft end play check in accordance with Section A of TCM Service Bulletin (SB) M89–14, dated June 29, 1989. If the crankshaft has no end play, the engine must be removed from service.

(b) Prior to further flight, accomplish the thru-bolt torque check in accordance with Section B of TCM SB M89–14, dated June 29, 1989. If the force required to rotate the propeller is not within the range specified or if the force required to rotate the propeller after retorquing has changed from the previous value by more than 3 pounds or if the crankshaft has no end play, the engine must be removed from service.

(c) Prior to further flight and at intervals not to exceed 200 hours time-in-service, accomplish the visual inspection of the number two crankcase main bearing in accordance with Section C of TCM SB M89–14, dated June 29, 1989. If there is any indication of bearing shift within the crankcase or crankshaft fillet/bearing contact or mismatch of bearing halves at the case split line, the engine must be removed from service.

(d) The repetitive checks and inspections required by paragraphs (a) and (c) of this priority letter AD may be discontinued when the crankcase has been split and inspected and new bearings are installed.

(e) Make appropriate log book entry showing compliance with this AD and record results of crankshaft end play and pounds required to rotate propeller.

(f) Aircraft may be ferried in accordance with the provisions of Federal Aviation Regulations 21.197 and 21.199 to a base where this AD can be accomplished.

(g) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, the Manager, Atlanta Aircraft Certification Office, Small Airplane Directorate, Aircraft Certification Service, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349, may approve an equivalent means of compliance or an adjustment of the compliance time schedule specified in this AD, which provides an equivalent level of safety.

The checks and inspections shall be done in accordance with TCM SB M89–14, dated June 29, 1989. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, Alabama 36601. Copies may be inspected at the Regional Rules Docket, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Room 311, Burlington, Massachusetts 01803, or at the Office of the Federal Register, 1100 L Street, Room 8301, Washington, DC 20591.

This amendment becomes effective on September 22, 1989, as to all persons except those persons to whom it was made immediately effective by priority letter AD No. 89–14–01, issued June 30, 1989, which contained this amendment.

Issued in Burlington, Massachusetts, on August 10, 1989.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

RIN 2105–AB00

Electronic Filing of Tariffs

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Amendment to preamble of final rule and Dismissal of Petition for reconsideration.

SUMMARY: The Department is providing notice of a change in its internal procedures relating to the "downloading" of electronic records submitted daily to the "Official DOT Tariff Database" under its rule on Electronic Filing of Tariffs. The Department is also dismissing a Petition for Reconsideration filed by ABC International in response to that rule.

EFFECTIVE DATE: September 1, 1989.

FOR FURTHER INFORMATION CONTACT: Thomas G. Moore, Chief, Tariffs Division, Office of International Aviation, P–44, Department of Transportation, 400 7th Street SW., Washington, DC 20590, (202) 366–2414.

SUPPLEMENTARY INFORMATION:

Change in the Downloading Function

On January 19, 1989, we published a final rule (54 FR 2067), permitting the international airlines to file their passenger fare tariffs with DOT electronically. In discussing the various measures we were undertaking to ensure the integrity of the data, we noted our intent to record (download) onto Departmental computers *all* daily data transactions submitted by the filers. We would then compare these downloaded records with the daily records furnished by the filer on a machine-readable tape or other mutually acceptable electronic media to the Department under the rule.

On July 17, 1989, we began receiving electronic passenger fare filings on an experimental basis. We have now determined that we can successfully ensure the integrity of the submitted tariff data without daily downloading of all filings. On the basis of our experiment, we have determined that by downloading five percent of the daily filings on a systematic sample, with a random start each day, *i.e.,* based on a table of random filing advice numbers, we can ensure the integrity and accuracy of the "Official DOT Tariff Database" to a degree of reliability substantially equivalent to that which we had contemplated in formulating the final rule. This five percent random sample constitutes a sufficient base for comparison purposes and will allow us to quickly detect any discrepancies in the data being submitted. In the event there are any discrepancies we will take immediate corrective measures. We will implement this change in internal procedures upon the effective data of this notice. Of course, should the need arise, we could institute daily downloading of all filings.

Petition for Reconsideration

On February 8, 1989, ABC International filed a petition for reconsideration of our final rule. ABC's petition essentially restates its comment submitted in response to our Notice of Proposed Rulemaking (53 FR 25615, July 8, 1988), *i.e.,* that the filer should be required to make available to any user or any other interested person, on a reasonable, non-discriminatory basis keyed to added costs, the "raw tariff data" used to produce the tariff information appearing on a video display screen. It claims that the rule is inconsistent because it requires that subscription prices for remote access to the on-line tariff database not exceed the reasonable added cost of providing that service, but does not apply the same requirement to copies of machine-readable raw tariff data.

On February 13, 1989, the Airline Tariff Publishing Company (ATPCO) submitted a letter to Mr. Neil Eisner, the Department's Assistant General Counsel for Regulation and Enforcement, requesting rejection of ABC's petition on the grounds that the Department's Rules of Practice do not provide for the relief sought by ABC. We agree. ABC in its petition relies on 14 CFR sections 302.18 and 302.37 in support of its request. Our review of these sections discloses that ABC's reliance on them is misplaced. We note in any event that ABC's petition has raised no issues not already before us at the time we adopted our final rule, and that in the final rule we fully responded to ABC's concerns.

Accordingly, we dismiss the Petition for Reconsideration filed by ABC International in Docket 43343.

This notice is being issued under the authority delegated to the Assistant Secretary for Policy and International Affairs contained in 49 CFR 1.56(j)(2)(ii).

Issued in Washington, DC, on August 28, 1989.

Patrick V. Murphy, Jr.,

Deputy Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

INTERNATIONAL TRADE COMMISSION

19 CFR Part 207

Panel Review Under Article 1904 of the United States-Canada Free-Trade Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Revised interim rules and request for comment.

SUMMARY: Title IV of the United States-Canada Free-Trade Agreement Implementation Act of 1988, Public Law No. 100–449 (September 28, 1988) ("FTA Act") addresses binational panel review of United States antidumping and countervailing duty final determinations involving Canadian products and for requests for panel review of Canadian antidumping and countervailing duty final determinations involving products from the United States. Title IV implements chapter 19 of the United States-Canada Free-Trade Agreement ("Agreement"). As authorized by section 405(d) of the FTA Act, these regulations are intended to implement certain administrative procedures required by Article 1904 of the Agreement and the FTA Act.

DATES: These revised interim rules take effect on September 1, 1989. Written comments must be received not later than October 31, 1989.

ADDRESS: A signed original and fourteen (14) copies of each set of comments, along with a cover letter addressed to Kenneth R. Mason, Secretary, should be sent to the U.S. International Trade Commission, Office of the Secretary, 500 E Street SW., Room 112, Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: Andrea C. Casson, Esq., 202–252–1105, Elizabeth C. Hafner, Esq., 202–252–1113 or Laurie B. Horvitz, Esq., 202–252–1107. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

SUPPLEMENTARY INFORMATION:

Background

Chapter 19 of the Agreement establishes a mechanism resolving disputes between the United States and Canada with respect to antidumping and countervailing duty cases. The central feature of the mechanism is the replacement of domestic judicial review of determinations in antidumping and countervailing duty cases involving imports from the other country with review by binational panels. The United States and Canada will continue to apply their own national antidumping and countervailing duty laws to goods imported from the other country. In such cases, binational panels acting in place of national courts will expeditiously review final determinations under these laws to decide whether they are consistent with the antidumping or countervailing duty law of the country that made the determination. These determinations include final determinations by the Department of Commerce ("Commerce") and the U.S. International Trade Commission ("Commission") under title VII of the Tariff Act of 1930, as amended.

The Agreement provides that only the two governments may invoke the panel review process; however, the government of the United States will automatically trigger panel review in response to a timely request from any person who otherwise could have challenged the determination in court. Counsel for the participants will argue their positions before the panel, as they would before a court. Each panel will consist of two panelists chosen from a United States roster, two panelists chosen from a Canadian roster, and a fifth United States or Canadian panelist chosen by agreement or by lot. The Agreement also requires that the United States and Canada protect sensitive business information against unlawful disclosure in the panel review process.

The Agreement further provides for review of a panel decision by an extraordinary challenge committee ("committee") when either the United States government or the Canadian government alleges that a panelist materially violated the rules of conduct, or that the panel seriously departed from a fundamental procedural rule or exceeded its powers, authority or jurisdiction. The Committee will consist of three members, all of whom will be sitting or retired United States or Canadian judges, with at least one member from each country.

The administrative operations of panel and extraordinary challenge committee proceedings will be carried out by a Secretariat. The Secretariat will consist of a United States Secretary, located in Washington, DC and a Canadian Secretary located in the National Capital Region of Canada. By Executive Order, the United States Secretary will be located in the Department of Commerce.

Section 405 of the FTA Act establishes an interagency group, chaired by the United States Trade Representative, which will be responsible for preparing the United States rosters of potential panelists and potential committee members, and for evaluating whether the United States should seek extraordinary challenge committee reviews.

Title IV of the FTA Act amends U.S. law to implement chapter 19 of the Agreement by limiting judicial review in cases involving Canadian merchandise, establishing procedures whereby private parties may appeal for binational panel review, providing organizational structure for administering U.S. responsibilities under chapter 19, and making other conforming amendments to U.S. law. Section 405(d) of the FTA Act authorizes the Commission to issue regulations to implement chapter 19 of the Agreement.

The procedures for binational panels have been implemented through Rules of Procedure issued jointly by the United States and Canada (53 FR 53212, Dec. 30, 1988). These regulations are intended to implement certain administrative procedures required by chapter 19 of the Agreement involving administrative responsibilities of the Commission that continue during and after panel review. Specifically, the regulations address release of business proprietary and privileged information under protective order during a panel review, and sanctions for violations of the provisions of such protective orders. The regulations complement and should be used in conjunction with, the Rules of Procedure.

The Commission published its original interim-final rules on December 30, 1988 (53 FR 53248). Those rules became effective on January 1, 1989. The comment period ended on March 1, 1989. No public comments were received. The rules were, however, reexamined internally, and changes have been made to reflect concerns that arose during this internal review. Significant changes are discussed in the explanation that follows.

This revised interim rule is exempt from the requirements of section 553 of the Administrative Procedure Act (5 U.S.C. 553), because it implements chapter 19 of the Agreement and thus relates to a foreign affairs function of the United States.

The Commission has determined that this rule does not constitute a major rule for the purposes of Executive Order 12291 (46 FR 13193, Feb. 17, 1981), because it does not meet the criteria described in section 1(b) of the EO. Moreover, because this rule concerns a foreign affairs function of the United States, it is not a rule within the meaning of section 1(a) of the EO.

The Regulatory Flexibility Act does not apply to this rule because it does not affect a large number of small entities, and because the rule was not required by section 553 of the Administrative Procedure Act or by any other law to be promulgated as a revised interim rule before issuance as a final rule. Nonetheless, the Commission, in its discretion, has decided to issue a revised interim rule, in order to solicit comments that the Commission believes may be helpful in determining the content of the final rules.

Explanation of Revised Interim Rules

Section 207.90

This section provides the scope of Subpart G, which is to implement Article 1904 of the Agreement.

Section 207.91

This section provides definitions of terms used in Subpart G. Three definitions have been added by these rules. For purposes of § 207.93, the terms "clerical person", "counsel" and "professional" have been defined. These definitions simplify references in that section to counsel and professionals. In addition, they clarify who may apply for our retain access to proprietary information during panel review.

Section 207.92

There are two types of documents that put the Commission on notice that an antidumping or countervailing duty final determination involving Canadian products may be subject to review. These documents are a Notice to Commence Judicial Review ("Notice") and a Request for Panel Review ("Request"). The Tariff Act of 1930 ("Tariff Act"), as amended by section 401 of the FTA Act, provides that Commerce, in consultation with the Commission, shall by regulation prescribe the form, manner and style of Notices and Requests. 19 U.S.C. 1516a(g)(3)(B) and (8)(A). The relevant regulations will be contained in part 358 of Title 19 of the Code of Federal Regulations, which part will contain Commerce's regulations for implementation of Article 1904 of the Agreement. Section 207.92 of the Commission's regulations refers to Commerce's regulations for the requirements for Notices and Requests.

Section 207.93

The Tariff Act, as amended by section 403 of the FTA Act, provides for certain persons to have access to business proprietary information contained in the Commission's administrative record before the panel, but only if these persons obtain a protective order issued by the Commission. Section 207.93

implements this provision. The persons who are eligible for access upon the filing of an application for protective order and the issuance of such an order are: The panelists and committee members, and any non-clerical staff whom they employ; counsel for participants in the panel review and for interested persons who plan to become participants, and their non-clerical staff; professionals under the direction and control of counsel; the Secretaries of the Canadian and United States sections of the Secretariat and their staffs; and United States government officials, or their delegates, who are members of the interagency group designated to consider whether the United States should seek to convene an extraordinary challenge committee. The persons who have access to proprietary information without protective orders are: The participant that submitted the information; that participant's counsel; and officials and employees of the Commission who are directly involved in the panel review or were involved in the underlying administrative proceeding.

Subsection (b) outlines the procedures for applying for a protective order. Panelists, committee members, non-clerical staff of panelists and committee members, counsel, professionals under the direction and control of counsel, the Secretaries and their staffs, and designated U.S. government employees must apply for a protective order in order to receive access. Clericals, such as law clerks, paralegals, and secretaries, who are employed by panelists, committee members, counsel, professionals, or designated U.S. government employees, will not need to submit protective order applications but, under paragraph (b)(5), will have access to the proprietary information at issue under the terms of a protective order issued to the person who employs them.

Paragraph (b)(6) explains that a counsel or a professional who was granted access to proprietary information pursuant to an administrative protective order issued during the underlying Commission proceedings that permits him or her to retain the information during panel review will become subject to additional terms applicable during panel review if he or she retains the information for more than 15 days after a First Request for Panel Review is filed with the Secretariat. Thus, such persons may retain the proprietary information, but under the same terms and subject to the same sanctions as those who have been issued a new protective order following the commencement of the panel review process. This provision in the revised interim rule changes the original interim rule by subjecting persons to the additional requirements of this Subrule at an earlier stage in the panel process. Paragraph (b)(6) also provides for the service of the original protective order and application on persons on the service list maintained by the Commission Secretary during the administrative proceedings, the Commission, the Secretariat, and such other persons as are required to be served with protective orders for proprietary information by the Rules of Procedure.

Subsection (c) requires that, upon the application for a protective order by a panelist, a committee member, the non-clerical staff of a panelist or committee member, a Secretary, any member of the Secretariat staff, or a designated member of the interagency group, the Commission shall issue a protective order.

Subsection (d) provides for the Commission's consideration of protective order applications filed by counsel and professionals. Any objections to an application for a protective order to counsel or professionals must be filed with the Commission within ten days of the date of filing of the application and shall state the reasons why the application should not be granted. The Commission must grant or deny the application within thirty (30) days after receipt of the application. This 30 day requirement was added to these rules to reflect the Commission's duties under the Rules of Procedure.

Subsection (e) requires the Commission to retain in a public file copies of protective orders governed by this subpart, whether issued during the administrative proceeding or during the panel review process. The original interim rules required that persons who are granted new protective orders during a panel review serve those protective orders on the Secretariat and participants. This requirement has been deleted from the revised interim rules because it unnecessarily duplicates service requirements set forth in the Rules of Procedure.

Subsection (f) provides for Commission revocation or modification of a protective order, with upon motion or *sua sponte*. The revised regulations contain an added requirement that the Commission notify the Secretariat of any action to revoke or modify an outstanding protective order in the course of an ongoing panel review.

Section 207.94

This section deals with the release of documents containing privileged information under protective order. The administrative record under review may contain documents for which the Commission claims attorney-client, attorney work product, or government pre-decisional privileges. One reason for classifying documents as privileged is to permit a free and frank exchange between attorney and client, and within an agency. Candor between the Commission and its employees should be encouraged, but could be constrained by the risk of disclosure to a judge or panelist who subsequently reviews the ultimate administrative decision, particularly if the document contains recommendations at odds with that decision. The Court of International Trade, in reviewing Commission determinations under title VII, has not permitted litigants to have access to privileged portions of the record. Both Annex 1901.2 of the Agreement and the Statement of Administrative Action for implementation of the FTA Act specifically contemplate that the Rules of Procedure would make provision for the treatment of privileged information.

Under the Rules of Procedure for binational panel review under Article 1904 of the Agreement, the Commission will not include privileged documents in the copies of the administrative record that are transmitted to the Secretariat for the panel's use, although any documents for which privilege is claimed will be listed in the index of the record. If there are any challenges to the privilege claim, the panel will first examine the affidavits in support of the claim of privilege to determine whether there is a question as to the validity of the claim or if the privilege is qualified and whether the claim meets the criteria generally applied by the federal courts. If the affidavits are not dispositive, then the panelists will select from among themselves two lawyers, one from Canada and one from the United States, to examine in camera and under protective order any document at issue. Only if the two representatives cannot agree whether or not the document should be released under protective order will the decision be referred to the full panel. At that point, the full panel will review the document, in camera, and under protective order, to decide whether to disclose the document under protective order for use in the panel review.

The Rules of Procedure provide that at each stage of consideration of documents containing privileged information, those documents will be protected by protective orders. In accordance with the process prescribed by the Rules of Procedure, the regulation at § 207.94 provides the mechanics of applications for and issuance of protective orders for privileged information subject to panel review. This regulation provides for the issuance of such protective orders if appropriate under the regulations. The revised regulations permit the Commission to issue protective orders to access to privileged information to the U.S. and Canadian Secretaries and their staffs. Such persons may, in certain circumstances, need access in order to perform their Secretariat functions. The revised regulations have omitted provisions requiring the filing of protective orders issued under this section with the Secretariat. These provisions in the original interim rules unnecessarily duplicated requirements set forth in the Rules of Procedure.

Section 207.100–207.120

The Tariff Act, as amended by section 403(c) of the FTA Act, declares it unlawful for any person to violate, or to induce the violation of, any provision of a protective order issued during panel or committee review. The Commission is authorized to impose sanctions against any person who is found by the Commission to have violated or induced violation of the terms of a protective order issued by the Commission for FTA purposes. These sanctions may include a civil penalty of up to $100,000 for each violation, and other administrative sanctions, including but not limited to debarment from practice before the Commission, as the Commission determines to be appropriate. 19 U.S.C. 1677f(d)(4). Before imposing such sanctions, the Commission must provide notice and an opportunity for a hearing in accordance with section 554 of title 5 of the U.S. Code. *Id.* Any person against whom sanctions are imposed may appeal the Commission's determination to the U.S. Court of International Trade. *Id.* at (d)(5).The Commission may file an action in that court to enforce sanctions assessed. *Id.* at (d)(6).

The regulations contained in §§ 207.100–207.120 address the Commission's procedures for imposing sanctions against persons who have violated, or induced violation of, the provisions of a protective order issued during panel and committee proceedings. For the purposes of the sanctions regulations the term "person", as defined in § 207.91 (the definition section for this subpart), means not only an individual, but also any entity such as a partnership, corporation, association or organization.

In deciding whether to initiate sanctions proceedings and whether to impose sanctions, the Commission will interpret the legislative prohibition against violation or inducement of a violation in a manner that best carries out the spirit of the legislation. Thus, a disclosure can be unintentional and still constitute a violation for which sanctions could be imposed. For example, the failure to delete proprietary information from the public version of a brief or the disclosure of proprietary information during a public hearing would constitute violations, and could subject the responsible person to sanctions, even if the disclosure was unintentional. However, the Commission would not generally view conduct permitting disclosure to a customs official at the U.S./Canada border, i.e., transmitting documents containing proprietary information with knowledge that they may be inspected at the border as sanctionable. Similarly, the Commission would not generally consider a failure to report such a disclosure to be a violation of a protective order.

Nor is actual disclosure of protective proprietary information necessary to support assessment of sanctions. For example, the provisions of a protective order could be deemed violated by carelessness in handling the protected information, as evidenced by loss of the information or by failure to follow the procedures required by the protective order for safeguarding proprietary information. Likewise, sanctions could be assessed for failure to supervise properly the handling of the protected information.

Initiation of a violation is not a necessary element of inducement. This point is expressly stated in the revised regulations at § 207.100(c). A person who has accepted information knowing it is being disclosed in violation of a protective order will be regarded as having induced violation of the provisions of the protective order. For example, if counsel for a client breaches a protective order by relaying a competitor's protected proprietary information to the client, and the client accepts the information, having reason to know that counsel's action is in breach of the protective order, the client could be subject to sanctions for inducing violation of the protective order provisions.

The exmaples contained in the above discussion are intended to serve as guidelines, and do not represent an exhaustive list of circumstances under which the Commission could determine that a person has violated or induced violation of the provisions of a protective order.

Section 207.100

This regulation lists types of sanctions that can be imposed upon a person who is found to have violated or induced the violation of any provision of a protective order. The sanctions include those specifically mentioned in the FTA Act, i.e., civil penalties of up to $100,000 for each violation and debarment from practice before the Commission, as well as some other sanctions that the Commission believes constitute other appropriate administrative sanctions. Also tracking the statutory language, the regulation notes that each day of a continuing violation constitutes a separate violation for the purposes of assessing civil penalties. Sanctions may be imposed against persons other than the one who violated the protective order, such as the firm, partner, associate, employee, employer, or client of that person.

Section 207.101

This regulation sets out the procedures for setting in motion an inquiry into an allegation of violation. Any person who has information indicating that there has been a violation shall report the information to the Commission Secretary. Any such information should be reported immediately upon learning of the possible violation. Upon receipt of the information, the Commission may forward it to the Commission's Office of Unfair Import Investigations ("OUII"). OUII will then conduct an inquiry to determine whether there is reasonable cause to believe that a person or persons have violated or induced the violation of any provisions of a protective order.

Subsection (c) has been amended to provide OUII with the assistance of an administrative law judge if necessary to aid in the obtaining of information during the inquiry stage. The Commission does not anticipate that this procedure will often be necessary, but has, however, provided for the assistance of an administrative law judge in those rare instances where a discovery order may be needed.

Section 207.102

Upon completion of the inquiry, OUII may conclude (1) that there is reasonable cause to believe that there has been a violation or inducement to violate the terms of a protective order; or (2) that there has been no violation or

inducement of violation; or (3) that there is a reasonable cause to believe that there has been an actionable violation, but that the responsible person is outside the Commission's jurisdiction but within the jurisdiction of Canada. If OUII concludes that there has been no violation or inducement of violation, the file will be closed, unless otherwise ordered by the Commission. If OUII reaches another of the possible conclusions, this regulation requires that OUII make a recommendation to the Commission based upon that conclusion. The Commission may take appropriate action regarding the initiation of sanctions proceedings, including rejecting, approving, or approving and amending any recommendation made by OUII.

If the Commission determines that initiation of sanctions proceedings is appropriate, the Commission will direct the Commission Secretary to issue a "change letter" as defined in § 207.103. Issuance of the charging letter will initiate proceedings before a Commission administrative law judge.

If appropriate, the Commission will take the necessary steps to request the authorized agency of Canada to initiate proceedings under Canadian law on the basis of an alleged violation of the protective order. It will be appropriate to take such steps if it is determined that (1) the charged party, while not subject to any of the sanctions set forth under § 207.100, could be subject to sanctions imposed by the authorized agency of Canada; or (2) an authorized agency of Canada would otherwise be the more appropriate forum for the initiation of a proceeding.

The revised regulation addresses a concern that was raised regarding notification to the person whose proprietary information has allegedly been disclosed. This regulation now provides that, at the initiation stage, the Commission may make a determination as to whether it is appropriate to notify the person whose proprietary information allegedly has been disclosed. In some cases, such person will have already received constructive notice of a possible unauthorized disclosure, by virtue of questioning by OUII during its inquiry. In other cases, the person who submitted the proprietary information to the Commission may be unaware of a possible unauthorized disclosure, or of the nature or extent of any disclosure. The Commission will review each case individually to determine whether public policy considerations suggest that it is appropriate to provide the person who submitted the proprietary information with notice about initiation of sanctions proceedings or about particular factual allegations pertinent to the proceedings. In making this determination, the Commission will weigh factors such as the consequences to the submitter of the proprietary information, the impact upon the Commission's future ability to obtain proprietary information, the potential for disruption of an ongoing panel review, and the general need to uphold the integrity of the binational panel process.

Because an inquiry into, and a proceeding involving, an alleged breach of a protective order is a sensitive subject that could harm a person's reputation, the Commission has endeavored to provide to the extent consistent with public policy considerations for confidentiality at the various stages of sanctions proceedings. References to confidentiality occur in several of these sanctions regulations. The Commission is concerned about avoiding the detrimental effects on the reputations of persons that may arise from publicity relating to allegations of protective order violations, and about the impact upon the binational panel process of unsubstantiated allegations against panelists, committee members or the Secretariat staff. At the same time, the Commission recognizes that some disclosures concerning the proceedings and underlying allegations and facts are necessary to the gathering of evidence or otherwise appropriate for public policy reasons. Accordingly, these regulations are designed to allow the Office of Unfair Import Investigations, charged parties and the administrative law judges to develop means in particular cases for accommodating these competing concerns.

At the inquiry stage, the Commission expects that the need for confidentiality will be respected, but must remain consistent with the need to gather information in order to conduct an adequate inquiry. Subsection (d) of § 207.102 reflects this concern, by providing that all aspects of the inquiry will be kept confidential, except as needed to gather relevant evidence, or as the Commission may otherwise direct for public policy reasons. The Office of Unfair Import Investigations in the conduct of its inquiry preliminary to its recommendations to the Commission will endeavor to keep the nature of the allegations and facts gathered confidential. The Office shall not, however, regard this instruction as so restrictive as to limit its investigative efforts insofar as disclosure of such allegations or facts may be necessary for the obtaining of information.

Section 207.103

A person against whom sanctions are proposed will be notified in a charging letter, which will include the allegations, proposed sanctions, and procedures for challenging imposition of sanctions. In order to protect the charged party's privacy, the charging letter will be served in a double envelope, with the inner envelope marked for opening by the addressee only. For good cause, the administrative law judge may amend the charging letter at any time, but an amendment that adds an additional charged party must be approved by the Commission. Nothing in this regulation precludes the Office of Unfair Import Investigations from seeking a separate charging letter to initiate separate proceedings against another person whom it believes should be charged with a violation under this Subpart.

Consistent with state bar disciplinary proceedings and judicial contempt proceedings, the person whose information is alleged to have been released is not a party to the proceedings. The interest being vindicated is that of the Commission in ensuring that all provisions of its protective orders are honored.

Section 207.104

This regulation sets forth the filing time, form and content for a response to a charging letter. If the Commission issues a charging letter, it will transmit the letter confidentially to the charged party and provide for notice of the proceedings to become public pending the charged party's submission of a response to the charging letter. If the charged party desires that confidentiality restrictions be placed on the proceedings, the charged party must so state in the response to the charging letter.

Section 207.105

This regulation addresses the Commission's confidentiality concerns with respect to the actual sanctions proceedings. The provisions of the regulation are twofold. First, with respect to proprietary and certain privileged information that is necessary for the defense of the allegations, counsel for the charged party may be granted access to this information under protective order. The only privileged information that can be released under this section is privileged information the disclosure of which is the subject of the sanctions proceedings.

Second, upon the request (in the response to the charging letter) of any charged party, the proceedings will be kept confidential to the extent practical and permitted by law. If a request for confidentiality appears in the response, the administrative law judge shall enter an order to maintain the confidentiality of information relating to allegations of violation of a protective order to the extent practicable consistent with the needs of the parties in conducting the proceedings. The regulations leave the form of such an order to the sound discretion of the administrative law judges, who may for example take into account whether certain facts are particularly sensitive to the charged party and who shall assure that confidentiality orders do not unnecessarily impede efforts to conduct discovery or to gather relevant information.

Section 207.106

Interim measures may be imposed by the Commission if necessary. For example, a person whom the Commission has reason to believe is continuing to unlawfully disclose protected proprietary information may still have access to proprietary information pursuant to an outstanding protective order. In order to curtail possible further unlawful disclosure by that person, the Commission may determine that it is necessary to revoke the outstanding protective order without waiting for the completion of the sanctions proceedings, by which time irreparable damage may have been caused by continued disclosure of proprietary information.

As another example, in some circumstances it may be appropriate not to make efforts to maintain the confidentiality of allegations and facts concerning alleged protective order violations or to allow some disclosures of such allegations that would otherwise not be permitted. For instance, in some cases it may be possible that the inquiry or discovery has not required OUII to contact the company whose proprietary information allegedly has been disclosed unlawfully, or that OUII has not had to notify the company of details about the allegations. Nevertheless, the alleged disclosure may be such that it could lead to such serious consequences that prevention or mitigation of harm to the company whose information has been put at risk may outweigh the interests of confidentiality. The regulations specify that disclosure of information that would otherwise be kept confidential during the proceedings is among the interim measures that the administrative law judge may recommend to the Commission.

Notice and an opportunity to respond will be provided to a party against whom interim measures are proposed. The administrative law judge will issue a recommended determination (RD) as expeditiously as possible, generally within twenty days of the filing of the motion. The Commission will review the RD and issue its determination on interim measures usually within twenty days from issuance of the RD. Interim measures may be revoked at any time.

Section 207.107

This regulation sets forth the requirements for motions and responses to motions.

Section 207.108

This regulation provides for a preliminary conference to consider such matters as a discovery schedule and the confidentiality of the proceedings.

Section 207.109

This regulation provides for discovery under such terms as the administrative law judge may order. Voluntary discovery is encouraged.

A party desiring to depose or obtain nonprivileged documents from a Commission employee can file a motion requesting the administrative law judge to recommend that the Commission direct that employee to testify or produce the requested materials. A party desiring to depose or obtain nonprivileged information from an employee of another U.S. agency or of a Canadian agency, can file a motion requesting the administration law judge to recommend that the Commission seek the testimony or production of requested material from that person.

Section 207.110

This regulation provides for issuance of a subpoena by the administrative law judge, upon the application of a party. Subpoenas issued under this subpart will be enforced by the Commission. The authority to issue and enforce subpoenas for these proceedings is provided by section 403(c) of the FTA Act. If a party files a motion for enforcement of a subpoena, the regulation provides for the administrative law judge to recommend to the Commission in favor of or against enforcement. In the recommendation, the administrative law judges must address each of the criteria necessary for enforcement of an administrative subpoena, as established by relevant case law.

Section 207.111

This regulation provides for a prehearing conference.

Section 207.112

Under this regulation, an opportunity for a hearing must be provided for all sanctions proceedings. Consistent with the legislative mandate of the Tariff Act as amended by section 403(c) of the FTA Act, the administrative law judge is directed to conduct a hearing that complies with section 554 of the Administrative Protective Act.

Section 207.113

This regulation defines the administrative record for sanctions proceedings.

Section 207.114

Within the time frame established by this regulation, the administrative law judge will issue an initial determination, which contains his findings and conclusions necessary to the factual and legal issues presented. In the usual case, the initial determination will be issued within ninety days of issuance of the charging letter. If the judge determines that the case is complicated, he may issue his initial determination within 120 days of the charging letter.

The Commission anticipates that the deadlines set out in this regulation can be met in most sanctions proceedings. If necessary, however, the administrative law judge may request the Commission to extend the time for issuance of an initial determination when discovery has been delayed as a result of the Commission's efforts to compel an employee or official of another United States agency, or of a Canadian agency, to respond to a deposition, or as a result of the Commission's efforts to enforce a subpoena, or when more time is needed to assure a complete record or to avoid manifest injustice.

Subsection (c) has been added to address burden of proof. The original interim rules did not specify the burden of proof to be applied in the sanctions proceedings. The revised rule adopts the burden of proof requirement that would apply under existing case law. Under this regulation, there must be a showing of clear and convincing evidence to support a finding of violation or inducement of violation.

In the typical administrative case, the party bringing the action must prove its allegations only by a "preponderance of the evidence." *See Collins Securities Corp.* v. *Securities and Exchange Commission*, 562 F.2d 820, 823 (D.C. Cir. 1977); *Securities and Exchange Commission* v. *Savoy Industries*, 587 F.2d 1149 (D.C. Cir. 1978), *cert. denied*, 440 U.S. 913 (1979). On the other end of the spectrum, in criminal cases the interests of the defendant are so great

that the state must prove the guilt of the accused "beyond a reasonable doubt." *SSIH Equipment S.A.* v. *U.S. International Trade Commission*, 718 F.2d 365, 380 (Fed. Cir. 1983) (additional views of Nies, J.). The courts also have developed an intermediate standard generally governing administrative or civil cases in which the defendant is accused of fraud or other quasi-criminal wrongdoing, and therefore stands at risk of having his reputation tarnished; in these cases, the courts usually have applied a "clear and convincing evidence" standard. *SSIH Equipment S.A.*, 718 F.2d at 380–81. *See Collins Securities Corp.* and cases cited therein, 562 F.2d 824 & n. 27; *Klein* v. *Peterson*, 866 F.2d 412 (Fed. Cir. 1989).

The sanctions proceedings set out in these regulations fall within the category of civil or administrative cases which could affect the charged party's reputation or ability to practice his profession. Accordingly, the regulations impose a "clear and convincing" standard. Application of a "clear and convincing evidence" burden will require a higher degree of proof than "preponderance of the evidence," but by a somewhat lesser degree of proof than "beyond a reasonable doubt." *See Collins Securities Corp.*, 562 F.2d at 824.

Section 207.115

A party may request the Commission to review the administrative law judge's initial determination by filing a petition for review within fourteen days after the date the initial determination is served upon the charged party. This regulation sets out the requirements for such petition and any response. The Commission will rule on the petition within forty-five days of the date the initial determination is served. The revised regulations have added a provision to this section providing that no person can obtain judicial review of an initial determination imposing sanctions without first filing a petition for Commission review. This change is consistent with the general administrative law principle that a party may be required to exhaust its administrative remedies before seeking judicial review of an agency's determination.

Section 207.116

Absent a petition for review, the Commission may decide *sua sponte* to review an initial determination. This regulation provides for such review when at least one of the participating Commissioners votes for ordering review *sua sponte* within forty-five days of the date the initial determination is served.

Section 207.117

On review, the parties may present argument only on the issues for which review has been ordered. The Commission may take any appropriate action in reviewing the initial determination, including remand.

Section 207.118

In panel review proceedings in which a final antidumping or countervailing duty determination issued by the Commission is being challenged, the Commission will be represented by the Commission's General Counsel. In the usual case, three attorneys from the General Counsel's Office will participate in the representation of the Commission before the panel—the General Counsel; the Assistant General Counsel for Litigation; and a staff attorney. In some instances, a sanctions proceeding will be initiated while the panel review for which the protective order was issued is still pending. If a participant, counsel for a participant, or a panelist involved in an ongoing panel review is charged with breaching a protective order issued during that panel review, the outcome of the sanctions proceeding, as well as the issuance of interim measures (such as revocation of the protective order) during the sanctions proceeding, could affect the ongoing panel review. In order to avoid the appearance of impropriety in such instances, the General Counsel and any other attorneys in the General Counsel's office who are participating in the panel review will not play a role in advising the Commission in matters regarding the relevant sanctions proceedings. Nor will the Assistant Counsel for title VII cases or any other attorney who participated in the underlying administrative proceedings advise the Commission in sanctions proceedings involving breach of a protective order involving on ongoing panel review of the Commission's determination in those proceedings. In such instances, the Assistant General Counsel for Section 337 investigations, who will have played no role in the panel review or underlying investigation, will serve as Acting General Counsel for the purpose of advising the Commission in regard to the sanctions proceedings, and will work with General Counsel staff attorneys who have not so participated.

Section 207.119

This regulation provides for the filing of a petition for reconsideration of a Commission determination. Any such petition must be filed within fourteen days after service of the determination. No responses will be accepted unless requested by the Commission, but the Commission will not grant a petition for reconsideration without first providing an opportunity for response.

Section 207.120

If the Commission's final determination, after the period for reconsideration has run, is that public sanctions are to be imposed, the Commission will publish such determination in the **Federal Register**. The Commission will also notify whichever departments and agencies of the Canadian and United States governments are likely to have an interest in the matter, for example, the U.S. Commerce Department and the U.S. Trade Representative.

The original interim rules prohibited interlocutory appeals. We have deleted this prohibition from the revised rules. The appropriateness of certifying a particular question for interlocutory appeal will be left to the discretion of the administrative law judge. The Commission will have the discretion to grant or deny a request for review of a question that has been so certified.

List of Subjects in 19 CFR Part 207

Administrative practice and procedure, Antidumping, Canada, Countervailing duty, Imports, Trade agreements.

For the reasons set forth in the preamble, 19 CFR part 207, Subpart G is revised to read as follows:

SUBPART G—IMPLEMENTING REGULATIONS FOR THE UNITED STATES-CANADA FREE-TRADE AGREEMENT

Sec.
207.90 Scope.
207.91 Definitions.
207.92 Procedures for commencing review of final determinations.
207.93 Protection of proprietary information during panel and committee proceedings.
207.94 Protection of privileged information during panel and committee proceedings.

Procedures for imposing sanctions for violation of the provisions of a protective order issued during panel and committee proceedings

207.100 Sanctions.
207.101 Reporting of violation and commencement of investigation.
207.102 Initiation of proceedings.
207.103 Charging letter.
207.104 Response to charging letter.
207.105 Confidentiality.
207.106 Interim measures.
207.107 Motions.
207.108 Preliminary conference.
207.109 Discovery.
207.110 Subpoenas.

207.111 Prehearing conference.
207.112 Hearings.
207.113 The record.
207.114 Initial determination.
207.115 Petition for review.
207.116 Commission review on its own motion.
207.117 Review by Commission.
207.118 Role of the General Counsel in advising the Commission.
207.119 Reconsideration.
207.120 Public notice of sanctions.

Subpart G—Implementing Regulations for the United States-Free Trade Agreement

Authority: Sec. 777 of the Tariff Act of 1930, as amended; secs. 403, 405(d) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (102 Stat. 1851, Pub. L. No. 100–449, Sept. 28, 1988); 19 U.S.C. § 1335.

§ 207.90 Scope.

This subpart sets forth the procedures and regulations for implementation of Article 1904 of the United States-Canada Free Trade Agreement under the Tariff Act of 1930, as amended by Title IV of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (19 U.S.C. 1516a and 1677f). These regulations are authorized by section 405(d) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 and 19 U.S.C. 1335.

§ 207.91 Definitions.

As used in this subpart—

Administrative Law Judge means the United States Government employee appointed under section 3105 of Title 5 of the United States Code to conduct proceedings under this part in accordance with sections 556 and 557 of the United States Code;

Agreement means the Free Trade Agreement between Canada and the United States of America entered into between the Government of Canada and the Government of the United States of America and signed on January 2, 1988;

Article 1904 Rules means the Rules of Procedure for Article 1904 Binational Panel Reviews adopted by the United States of America and Canada pursuant to the agreement;

Canadian Secretary means the Secretary of the Canadian section of the Secretariat and includes any person authorized to act on his behalf;

Charged party means, for the purposes of § 207.100, a person who is charged by the United States International Trade Commission with violating or inducing violation of a provision of a protective order;

Clerical person means, for purposes of § 207.93, a person who provides support services to a panelist, committee member, counsel, professional, or member of the interagency group appointed by the United States Trade Representative. This definition includes, but is not limited to, secretaries, paralegals, and law clerks.

Commission means the United States International Trade Commission;

Commission Secretary means the Secretary to the Commission;

Complaint means the complaint referred to in the Article 1904 Rules;

Counsel means, for purposes of § 207.93, persons described in the definition of "counsel of record" in Rule 3 of the Article 1904 Rules, and counsel for an interested person who plans to file a timely Complaint or Notice of Appearance in the panel review.

Date of Service means, for the purposes of § 207.100 only, the day a document is deposited in the mail or delivered in person;

Days means calendar days, except that a deadline which falls on a weekend or United States federal holiday shall be extended to the next working day;

Extraordinary challenge committee means the committee established pursuant to Annex 1904.13 of the Agreement and section 407 of the FTA Act to review decisions of a panel or conduct of a panelist;

Final determination, for the purposes of § 207.92, shall have the meaning assigned to the term "final determination" by Article 1911 of the agreement;

FTA Act means the United States-Canada Free-Trade Implementation Act of 1988, Pub. L. No. 100–449 (Sept. 28, 1988);

Investigative attorney means the attorney(s) designated by the Office of Unfair Import Investigations to engage in inquiries and investigatory activities with respect to investigations and proceedings under § 1907.100 of title 19 of the Code of Federal Regulations;

Notice of Appearance means the notice of appearance provided for by the Article 1904 Rules;

Panel review means review of a final determination pursuant to chapter 19 of the Agreement, including review by an extraordinary challenge committee;

Parties means, for the purposes of §§ 207.100–207.120, the investigative attorney and the persons charged in an action under §§ 207.100–207.120 of this subpart;

Person means, for the purposes of §§ 207.100–207.120, an individual, partnership, corporation, association, organization, or other entity;

Privileged information means all information as to which the Commission claims privilege or has reserved a claim of privilege in accordance with Article 1904.14 of the Agreement and the Article 1904 Rules;

Professional means, for purposes of § 207.93, an accountant, economist, engineer, or other non-legal specialist who is acting on behalf of a participant in a panel review or an interested person who plans to become a participant, and who is under the direction and control of counsel for that participant or interested person.

Proprietary information means all information designated or treated by the United States International Trade Commission as confidential or business proprietary under 19 U.S.C. 1677f and 19 CFR 201.6.

Protective Order means a protective order issued by the Commission;

Secretariat means the Secretariat established pursuant to Article 1909 of the Agreement and includes the Secretariat sections located in both Canada and the United States.

United States Secretary means the Secretary of the United States section of the Secretariat and includes any person authorized to act on his behalf;

Except as otherwise provided in this subpart, the definitions set forth in the Article 1904 Rules are applicable to this Subpart and to any protective orders issued pursuant to this Subpart.

§ 207.92 Procedures for commencing review of final determinations.

(a) *Notice of Intent to Commence Judicial Review.* A Notice of Intent to Commence Judicial Review shall contain such information, and be in such form, manner, and style, including service requirements, as prescribed by the Department of Commerce in its regulations at 19 CFR part 356.

(b) *Request for Panel Review.* A Request for Panel Review shall contain such information, and be in such form, manner, and style, including service requirements, as prescribed by the Department of Commerce in its regulations at 19 CFR part 356.

§ 207.93 Protection of Proprietary Information During Panel and Committee Proceedings.

(a) *Persons Authorized to Receive Proprietary Information Under Protective Order.* The following persons may be authorized by the Commission to receive access to proprietary information if they comply with these regulations and such other conditions imposed upon them by the Commission:

(1) The members of a binational panel or an extraordinary challenge committee, and their non-clerical staffs;

(2) Counsel, as defined in § 207.91, provided that the counsel do not participate in competitive decision-making activity for the person represented or for any person that would gain a competitive advantage through knowledge of the proprietary information sought;

(3) Professionals, as defined in § 207.91, provided that they do not participate in competitive decision-making activity for the person represented or for any person that would gain a competitive advantage through knowledge of the proprietary information sought;

(4) Clerical persons, as defined in § 207.91, who are employed or retained by and under the direction and control of a person described in (a) (1), (2), (3) or (6) who has been issued a protective order, if such clerical persons:

(i) Are not involved in the competitive decision-making, or the support functions for the competitive decision-making, of a participant to the proceeding or of any person that would gain a competitive advantage through knowledge of the proprietary information sought, and

(ii) Have agreed to be bound by the terms set forth in the application for protective order of the person who retains or employs him or her;

(5) The Secretaries of the United States and Canadian sections of the Secretariat and persons retained or employed by the Secretaries, including court reporters hired by the Secretariat to transcribe panel reviews;

(6) Such persons who the United States Trade Representative informs the Commission require access to proprietary information solely for the purpose of evaluating whether the United States should seek an extraordinary challenge committee review of a panel decision or of the conduct of a panelist during panel review.

(b) *Procedures for Obtaining Access to Proprietary Information under Protective Order.*—(1) *Persons Who Must File An Application for Release Under Protective Order.*

In order to be permitted access to proprietary information in the administrative record of a determination under review by a panel, all persons described in paragraphs (a) (1), (2), (3), (5) or (6), unless described in (b)(6) of this section, shall file an original and six (6) copies of an application for release under protective order with the Commission Secretary.

(2) *Contents of Applications for Release Under Protective Order.* (i) The Commission Secretary shall adopt from time to time forms for submitting requests for release pursuant to protective order that incorporate the terms of this rule.

(ii) Such forms shall require the applicant for release of proprietary information under protective order to submit a personal sworn statement that, in addition to such other conditions as the Commission Secretary may require, the applicant will:

(A) Not disclose any proprietary information obtained under protective order to any person other than

(*1*) Personnel of the Commission involved in the particular panel review in which the proprietary information is part of the administrative record,

(*2*) The person from whom the information was obtained,

(*3*) A person who is authorized to have access to the same proprietary information pursuant to a Commission protective order, and

(*4*) A clerical person retained or employed by and under the direction and control of a person described in (a) (1), (2), (3), or (6) who has been issued a protective order if such clerical person

(*i*) Is not involved in the competitive decision-making, or the support functions for the competitive decision-making, of a participant to the proceeding or of any person that would gain a competitive advantage through knowledge of the proprietary information sought, and

(*ii*) Has agreed to be bound by the terms set forth in the application for protective order of the person who retains or employs him or her.

(B) Not use any of the proprietary information released under protective order for purposes other than the particular proceedings under Article 1904 of the Agreement;

(C) Upon completion of the panel review, or at such other date as may be determined by the Commission,

(*1*) If a person described in § 207.93(a)(1), return to the United States Secretary or certify to the Commission Secretary the destruction of; or

(*2*) If a person described in § 207.93(a) (2), (3), (5) or (6), return to the Commission or certify to the Commission the destruction of

all documents released under the protective order, and all other materials, such as notes or charts, based on or containing any proprietary information released under the protective order;

(D) Update factual representations made in his or her application for protective order to the extent and in the manner required by the terms of the protective order issued granting that application; and

(E) Acknowledge that the person becomes subject to the provisions of section 403(c) of the FTA Act and 19 CFR 207.100 as well as (except for persons described in § 207.93(a)(6)), section 77.26 of Canada's Special Import Measures Act, as amended, with respect to the imposition of sanctions for violation of the protective order.

(3) *Timing of Applications.* The United States and Canadian Secretaries and any person retained or employed by them may file an application at any time. Any panelist, or committee member, or member of their non-clerical staffs, counsel, or professional, may file an application for disclosure under protective order after a Notice of Request for Panel Review has been filed with the Secretariat. A person described in § 207.93(a)(6) may file an application when the United States Trade Representative notifies the Commission that such person requires access to the proprietary information.

(4) *Service of Applications.* (i) If a person described in paragraphs (a) (1), (2), or (3) files an application for a protective order before the date on which notices of appearance must be filed in the panel review, such person shall concurrently serve one (1) copy of such application upon each person listed on the service list maintained by the Commission during the administrative proceeding and on such other persons as are required by the Article 1904 Rules to be served by the applicant. If the application is filed after the deadline for notices of appearance, such person shall serve the application upon each person who files a complaint or notice of appearance in the panel review and on such other persons as are required by the Article 1904 Rules to be served by the applicant.

(ii) *Method of Service.* Service of an application may be effected by

(A) personal service, or

(B) sending a copy of the document by facsimile, Express Mail, or expedited courier service.

(5) *Release to Clerical Staff of Panelists, Committee Members, Counsel, Professionals, and designated U.S. Government Employees.* A clerical person described in § 207.93(a)(4) may be provided with access to proprietary information disclosed under protective order to the person who employs or retains him or her, if such clerical person has agreed to the terms of the protective order issued to the person who employs or retains him or her, by signing and dating a completed copy of the application for protective order of the person who employs or retains him or her where indicated in that application.

The person to whom the protective order has been issued shall file the signed and dated application with the Commission Secretary in accordance with paragraph (b)(1).

(6) *Persons who Retain Access to Proprietary Information under a Protective Order Issued during the Administrative Proceeding.* (i) If counsel or a professional has been granted access in an administrative proceeding to proprietary information under a protective order that contains a provision governing continued access to that information during panel review, and that counsel or professional retains the proprietary information more than fifteen (15) days after a First Request for Panel Review is filed with the Secretariat, that counsel or professional, and his or her clerical persons with access on or after that date, becomes immediately subject to the terms and conditions of protective orders issued pursuant to this Subpart, including provisions regarding sanctions for violations thereof.

(ii) Any person described in paragraph (b)(6)(i) of this section, concurrent with the filing of a complaint or notice of appearance in the panel review on behalf of the participant represented by such person, shall:

(A) File four (4) copies of the original application, all existing updates to that application, and the protective order with the United States Secretary; and

(B) Serve seven (7) copies of the protective order, and all existing updates upon the Commission.

(iii) Any person described in paragraph (b)(6)(i) of this section who updates his or her application during the pendency of a panel review shall immediately:

(A) File an original and six (6) copies of the updates with the Commission;

(B) Serve a copy of such updates upon all participants in the panel review; and

(C) File four (4) copies of the updates with the United States Secretary.

(c) *Issuance of Protective Orders to Panelists, Committee Members, non-clerical staffs of Panelists or Committee Members, Secretariat staffs, and designated U.S. Government Employees.* (1) The Commission shall, within thirty (30) days of receipt of the application issue a protective order permitting the release of proprietary information to a person described in §§ 207.93(a) (1), (5) or (6), who has filed an application for protective order under this Subpart.

(2) A panelist shall be issued two (2) copies of any protective order authorizing access to proprietary information. The panelist shall sign both copies of the order and return one (1) to the Commission.

(d) *Issuance of Protective Orders to Counsel and Professionals.*—(1) *Opportunity to object.* The Commission shall not rule on an application filed by a person described in § 207.93(a) (2) or (3) until ten (10) days after the request is filed unless there is a compelling need to rule more expeditiously. Unless the Commission has indicated otherwise, any person may file an objection to the application within seven (7) days of the application's filing date. Any such objection shall state the specific reasons why the application should not be granted. One (1) copy of the objection shall be served on the applicant and on all persons who were served with the application. Service shall be by facsimile, Express Mail or by an expedited courier service. Any reply to an objection will be considered if it is filed before the Commission renders a decision.

(2) *Approval of the Application.* If appropriate, the Commission shall, within thirty (30) days of the receipt of the application, issue a protective order permitting the release of proprietary information to the applicant.

(3) *Denial of the Application.* If the Commission denies an application, it shall, within thirty (30) days of the receipt of the application, issue a letter notifying the applicant of its decision and the reasons therefor.

(e) *Retention of Protective Orders.* The Commission Secretary shall retain, in a public file, copies of applications granted, including any updates thereto, and protective orders issued under this section, and of any protective orders filed in accordance with paragraph (b)(6)(ii) of this section.

(f) *Filing and Service of Updates To Granted Applications.* Any person described in § 207.93(a) (1), (2), or (3) who has been issued a protective order under section 207.93 (c) or (d) shall

(1) File an original and six (6) copies of any submissions updating his or her application for protective order with the Commission Secretary;

(2) Serve such updates upon all participants in the panel review; and

(3) File four (4) copies of such updates with the United States Secretary.

(g) *Modification or Revocation of Protective Orders.* (1) If any person believes that changed conditions of fact or law, or the public interest, may require that a protective order effective under this section be modified or revoked, in whole or in part, such person may file with the Commission a request for such relief. The Commission may consider such action *sua sponte.* The request shall state the changes desired and the changed circumstances warranting such action, and shall include materials and arguments in support thereof. Unless the request is self-initiated, the person filing the request shall serve a copy of the request upon the person to whom the protective order was issued.

(2) Upon receiving a request, the Commission shall either

(i) Provisionally accept the request or

(ii) Reject the request.

The Commission shall treat a self-initiated action as a provisionally accepted request. Any person may file a response to the request within twenty (20) days after the request is filed unless the Commission issues a notice indicating otherwise. After consideration of the request and any responses thereto, the Commission shall take such action as it deems appropriate. If the Commission takes any action that revokes or modifies an outstanding protective order in the course of an ongoing panel review, the Commission Secretary shall immediately notify the Secretariat of such action.

(3) If a request filed under this paragraph alleges that a person is violating the terms of a protective order, the Commission may, in addition to, or in lieu of, provisional acceptance or rejection under the subparagraph, treat the request as a report of violation under § 207.101 of this subpart.

§ 207.94 Protection of Privileged Information During Panel and Committee Proceedings.

(a) *Persons Who May Apply for Access to Privileged Information Under Protective Order.* (1) *Panelists.* If a panel determines that, pursuant to the Article 1904 Rules, *in camera* examination of a document containing privileged information in the administrative record of a final determination that is under panel review is necessary in order for the panel to determine whether the information should be disclosed under a Protective Order for Privileged Information, the Commission shall, upon application, issue two (2) copies of the protective order authorizing the release of the privileged information to the authorized panelists. Panelists shall sign both copies of the Protective Order for Privileged Information and return one (1) to the Commission.

(2) *Persons Designated by the Panel.* Any counsel for a participant, professional under the direction and control of a counsel for a participant, or member of a panelist's non-clerical staff, may file with the Commission an application for release under Protective Order for Privileged Information with the Commission if a decision is made in accordance with the Article 1904 Rules that disclosure to that person of a document containing privileged information is appropriate. Upon such application, the Commission shall issue a Protective Order for Privileged Information.

(3) *Secretariat Staff.* If a decision is made in accordance with the Article 1904 Rules that disclosure of a document containing privileged information is appropriate, the Secretaries of the United States and Canadian sections of the Secretariat and persons retained or employed by the Secretaries may file with the Commission an application for release under Protective Order for Privileged Information with the Commission. Upon such application, the Commission shall issue the Protective Order.

(4) *Designated Officers or Employees of the United States Government.* If, in the course of a panel review, the panel has reviewed privileged information under a Protective Order for Privileged Information and the privileged information related to issues which affect a decision whether to request an Extraordinary Challenge Committee, the Commission shall, upon application, issue a Protective Order for Privileged Information and release such privileged information to those officials of the United States government designated by the United States Trade Representative as being necessary for the evaluation of whether the United States should, pursuant to the Agreement, convene an extraordinary challenge committee.

(5) *Members of an Extraordinary Challenge Committee.* Upon application, the Commission shall issue a Protective Order for Privileged Information to members of an extraordinary challenge committee authorizing the release of privileged information that:

(i) Is part of the extraordinary challenge committee record, as defined in the Rules of Procedure for Article 1904 Extraordinary Challenge Committees; and

(ii) Was covered under a Protective Order for Privileged Information issued by the Commission during panel review.

(6) *Clerical Persons.* Clerical persons, such as paralegals, law clerks, and secretaries, who are retained or employed by and under the direction and control of a person described in § 207.94(a) (1), (2), (4), or (5) who has been issued a Protective Order for Privileged Information, may obtain access to privileged information if such clerical persons have agreed to be bound by the terms set forth in the application for Protective Order of the person who employs or retains him or her.

(b) *Contents of Applications for Release Under Protective Order for Privileged Information.* (1) The Commission Secretary shall adopt from time to time forms for submitting requests for release pursuant to a Protective Order for Privileged Information that incorporate the terms of this rule.

(2) Such forms shall require the applicant for release of privileged information under Protective Order for Privileged Information to submit a personal sworn statement stating, in addition to such other conditions as the Secretary of the Commission may require, that the applicant will:

(i) Not disclose any privileged information obtained under Protective Order to any person other than

(A) Personnel of the Commission involved in the particular panel review in which the privileged information is part of the record;

(B) A person who been issued a similar Protective Order for Privileged Information concerning the privileged information at issue; and

(C) A clerical person, such as a paralegal, law clerk, or secretary, employed or retained by and under the direction and control of a person described in § 207.94(a) (1), (2), (4) or (5) who has been issued a Protective Order for Privileged Information, if such clerical person has agreed to be bound by the terms set forth in the application for Protective Order for Privileged Information of the person who employs or retains him or her by signing and dating the completed application of that person where indicated in that application.

(ii) Use such information solely for the purposes of proceedings under Article 1904 of the Agreement;

(iii) Upon completion of panel review, or at such other date as may be determined by the Commission,

(A) If a person described in § 207.93(a)(1), return to the United States Secretary or certify to the United States Secretary the destruction of; or

(B) If a person described in § 207.93(a) (2), (3), (5) or (6), return to the Commission or certify to the Commission the destruction of

all documents released under the protective order, and all other materials, such as notes or charts, based on or containing the privileged information released under the protective order;

(iv) Acknowledge that sanctions, under section 403(c) of the FTA Act and 19 CFR 207.100, as well as, unless a person described in § 207.94(a)(4), under § 77.26 of Canada's Special Import Measures Act, as amended, may be imposed for violation of the Protective Order.

Procedures for Imposing Sanctions for Violation of the Provisions of a Protective Order Issued During Panel and Committee Proceedings.

§ 207.100 Sanctions.

(a) A person who is determined under this Subpart to have violated or induced the violation of any provision of a protective order issued pursuant to this Subpart, may be subject to one or more of the following sanctions:

(1) A civil penalty not to exceed $100,000 for each violation. Each day of a continuing violation shall constitute a separate violation;

(2) Debarment from practice in any capacity before the Commission for a designated time period following publication of a determination that the protective order has been breached;

(3) Denial of further access to proprietary or privileged information covered by the breached protective order or to proprietary information in future Commission proceedings;

(4) An official reprimand by the Commission;

(5) In the case of an attorney, accountant, or other professional, referral of the facts underlying the violation to the ethics panel or other disciplinary body of the appropriate professional association or licensing authority;

(6) When appropriate, referral of the facts underlying the violation to the United States Trade Representative or his designees, or to another government agency; and

(7) Any other administrative sanctions as the Commission determines to be appropriate.

(b) The partners, associates, employer, and employees of any person who has violated or induced the violation of any provision of a protective order issued pursuant to this subpart, may be subject to any sanctions included in paragraph (a) of this section as the Commission determines to be appropriate.

(c) For the purposes of this subpart, inducement includes the willing acceptance of proprietary or privileged information knowing that such information was obtained in breach of a protective order.

§ 207.101 Reporting of violation and commencement of investigation.

(a) Any person who has information indicating that the terms of a protective order have been violated shall immediately report all pertinent facts relating thereto to the Commission Secretary.

(b) Upon receipt of this information, the Commission Secretary shall record the information and assign an investigation number, and shall then forward all information he or she has received to the Office of Unfair Import Investigations.

(c) As expeditiously as possible, the Office of Unfair Import Inestigations shall conduct an inquiry to determine whether there is reasonable cause to believe that a person or persons have violated any provision of a protective order. At any time, the Office of Unfair Import Investigations may request that the Commission assign an administrative law judge to oversee the inquiry.

(d) At the conclusion of the inquiry, the Office of Unfair Import Investigations shall assess whether or not the available information is sufficient to provide reasonable cause to believe that a person or persons have violated or induced violation of the provisions of a protective order.

§ 207.102 Initiation of proceedings.

(a) Upon completion of the inquiry,

(1) If the Office of Unfair Import Investigations concludes that there is not reasonable cause to believe that a person or persons have violated or induced violation of the provisions of a protective order,

(i) The Office of Unfair Import Investigations shall submit a report to the Commission; and

(ii) Unless the Commission directs otherwise, the file shall be closed and returned to the Commission Secretary.

(2) If the Office of Unfair Import Investigations concludes that there is reasonable cause to believe that a person or persons have violated or induced violation of the provisions of a protective order, the Office of Unfair Import Investigations shall

(i) Make a recommendation to the Commission regarding whether and to what extent it is appropriate to notify the person whose proprietary information may have been compromised; and

(ii) Submit a report and recommendation to the Commission regarding whether to initiate sanctions proceedings or take other appropriate action.

(b) The Commission may make any appropriate determination regarding the initiation of sanctions proceedings, including rejecting, approving, or approving and amending any recommendation made by OUII.

(c) If the Commission determines that it is appropriate to issue a charging letter, the Commission Secretary shall initiate a proceeding under this Subpart by issuing a charging letter as set forth in § 207.103.

(d) If the Commission determines that it is appropriate to initiate proceedings, but that the party to be charged is beyond the jurisdiction of the Commission and within the jurisdiction of Canada, or that for other reasons an authorized agency of Canada would be the more appropriate forum for initation of a proceeding, the Commission shall take the necessary steps for issuance of a letter requesting the authorized agency of Canada to initiate proceedings under Canadian law on the basis of an alleged violation of the protective order.

(e) The Commission may make any determination regarding notification about the alleged breach and the relevant underlying facts to the person who submitted the proprietary information that allegedly has been disclosed. A determination by the Commission on this subject does not foreclose the administrative law judge from redetermining at any time during the hearing whether notification to the compromised party is appropriate.

(f) If the Commission determines that it is not appropriate to issue a charging letter or to refer the facts to the authorized agency of Canada, the file shall be closed and returned to the Commission Secretary, unless the Commission directs otherwise.

(g) Confidentiality. Except as deemed reasonably necessary by the Office of Unfair Import Investigations to gather relevant information and to protect the interests of the person who submitted the proprietary information, all aspects of the inquiry shall remain confidential, unless otherwise ordered by the Commission. Except as the Commission may otherwise order, the Commission Secretary shall maintain all closed investigatory files in confidence to the extent permitted by law, and shall destroy any documentary evidence containing allegations of breach for which no proceeding is initiated one year after the file is closed.

§ 207.103 Charging letter.

(a) *Contents of charging letter.* Each charged party shall be served by the Commission with a copy of a charging letter and any accompanying motion for interim measures, as provided for in § 207.106. The charging letter shall include:

(1) Allegations that the provisions of a protective order have been violated and the basis thereof;

(2) A citation to § 207.100 of this subpart, for a listing of sanctions that may be imposed for breach of a protective order;

(3) A statement that a proceeding has been initiated and that an APA hearing will be held before an administirative law judge;

(4) A statement that, the charged party or his counsel may request the issuance of an appropriate administrative protective order to obtain access to the information upon which the charge is based;

(5) A statement that charged party has a right to retain counsel at the charged party's own expense for purposes of representation; and

(6) A statement that the charged party has the right to request in the response described in § 207.104 of this subpart that the proceedings remain confidential to the extent practicable.

(b) *Service of charging letter.* (1) The charging letter shall be served in a double envelope. The inner envelope shall indicate that it is to be opened only by the addressee. Service of a charging letter shall be made by one of the following methods:

(i) Mailing a copy by registered or certified mail addressed to the charged party at the party's last known permanent address; or

(ii) Personal service; or

(iii) Any other method acceptable under Rule 4 of the Federal Rules of Civil Procedure.

(2) Service shall be evidenced by a certificate of service signed by the person making such service.

(c) *Confidentiality of charging letter.* Prior to entry of an order by the administrative law judge under § 207.105, the charging letter will be confidential and disclosed only to necessary Commission staff and the charged parties.

(d) *Amendment of charging letter.* (1) At any time after proceedings have been initiated, the investigative attorney may move for leave to amend or withdraw the charging letter.

(2) *Amendment to include additional parties.* If the administrative law judge determines that the charging letter should be amended to include additional parties, he shall issue a recommended determination to that effect. The Commission shall review the recommended determination, and issue a determination granting or denying the motion to amend the charging letter to include additional parties.

(3) *Other amendments.* Upon motion, the administrative law judge may grant leave to amend the charging letter for good cause shown upon such conditions

as are necessary to avoid prejudicing the public interest and the rights of the originally-charged parties or parties added to the charging letter.

(4) Any amended charging letter shall be served upon all charged parties in the form and manner set forth in paragraphs (a) and (b) of this section.

§ 207.104 Response to charging letter.

(a) *Time for filing.* A charged party shall have twenty (20) days from the date of service of the charging letter within which to file a written response to the allegations made in the charging letter unless otherwise ordered by the administrative law judge.

(b) *Form and content.* Each response shall be under oath and signed by the charged party or its duly authorized officer, attorney, or agent, with the name, address, and telephone number of the same. Each charged party shall respond to each allegation in the charging letter, and may set forth a concise statement of the facts constituting each ground of defense. There shall be a specific admission or denial of each fact alleged in the charging letter, or if the charged party is without knowledge of any such fact, a statement to that effect.

(c) *Request for confidentiality.* The response shall contain a statement as to whether the charged party seeks an order to maintain the confidentiality of all or part of the proceedings to the extent practicable, pursuant to § 207.105 of this subpart.

§ 207.105 Confidentiality.

(a) *Protection of proprietary and privileged information.* As necessary for the preparation of a defense, counsel for the charged party may be granted access in these proceedings to proprietary information or to the privileged information the disclosure of which is the subject of the proceedings. Any such access shall be under protective order consistent with the provisions of this subpart.

(b) *Confidentiality of proceedings.* Upon the request of any charged party pursuant to § 207.106 of this subpart, the administrative law judge will issue an appropriate confidentiality order. This order will provide for the confidentiality, to the extent practicable and permitted by law, of information relating to allegations of violations of a protective order, consistent with public policy considerations and the needs of the parties in conducting of the sanctions proceedings. The order will provide that all proceedings under this provision shall be kept confidential within the terms of the order except to the extent incorporated into a published final decision of the Commission. Any confidential information not disclosed in such decision will remain protected.

§ 207.106 Interim Measures.

(a) At any time after proceedings are initiated, the administrative law judge, upon motion by the investigative attorney, or on his or her own initiative, may issue a recommended determination to revoke the allegedly-violated protective order, to disclose information about the proceedings that would otherwise be kept confidential, or to take other appropriate interim measures.

(b) Before issuing a determination recommending interim sanctions, the administrative law judge shall afford a party against whom such measures are proposed the opportunity to oppose the motion for interim sanctions. The administrative law judge will notify the parties of the determination on interim measures as expeditiously as possible, usually within no more than twenty (20) days from the date the motion was filed.

(c) The Commission shall review any recommended determination regarding the imposition of interim measures, and within twenty (20) days from issuance of the recommended determination, or within such other time as the Commission may order, the Commission shall issue its determination regarding interim measures. The Commission may impose any appropriate interim measures.

(d) The administrative law judge may at any time recommend to the Commission that interim measures be revoked. Within ten (10) days after issuance of any such recommendation, or within such other time as the Commission may order, the Commission shall rule on such recommendation.

(e) If the Commission takes interim measures that revoke or modify an outstanding protective order issued in the course of an ongoing panel review, the Commission Secretary shall immediately notify the Secretariat of these measures. If any such measures are revoked, the Commission Secretary shall immediately notify the Secretariat of such change.

§ 207.107 Motions.

(a) *Presentation and disposition.* (1) After issuance of the charging letter and while part of the proceeding is pending before the administrative law judge, all motions relating to that part of the proceeding shall be addressed to the administrative law judge. If no administrative law judge has yet been assigned, all motions shall be addressed to the Chief Administrative Law Judge.

(2) While part of a proceeding is pending before the Commission, all motions relating to that part of the proceeding shall be addressed to the Chairman of the Commission. All written motions shall be filed with the Commission Secretary and served upon all parties.

(b) *Content.* All written motions shall state the particular order, ruling, or action desired and the grounds therefor.

(c) *Responses.* Any response to a motion shall be filed within ten (10) days after service of the motions, or within such longer or shorter time as may be designated by the administrative law judge or the Commission. The moving party shall have no right to reply, except as permitted by the administrative law judge or the Commission.

(d) *Service.* All motions, responses, replies, briefs, petitions, and other documents filed in sanctions proceedings under this subpart shall be served by the party filing the document upon each other party. Service shall be made upon counsel for the party unless the administrative law judge or the Commission orders otherwise.

§ 207.108 Preliminary Conference.

As soon as practicable after the response to the charging letter is filed, unless the administrative law judge determines that such a conference is not necessary, the administrative law judge shall direct counsel or other representatives for the parties to meet with him at a preliminary conference. At such conference, he shall consider the issuance of such orders as he deems necessary for the conduct of the proceedings. Such orders may include, as appropriate under these regulations, the establishment of a discovery schedule or the issuance of an order, if requested, to provide for maintaining the confidentiality of the proceedings pursuant to § 207.105(b) of this subpart.

§ 207.109 Discovery.

(a) *Discovery methods.* All parties may obtain discovery under such terms and limitations as the administrative law judge may order. Discovery may be by one or more of the following methods:

(1) Depositions upon oral examination or written questions. The attendance of witnesses at a deposition may be compelled by subpoena as provided in § 207.110 of this subpart;
(2) Written interrogatories;
(3) Production of documents or things for inspection and other purposes; and
(4) Requests for admissions.

If a party or any officer or agent of a party fails to comply with a discovery order, the administrative law judge may take such action as he deems reasonable and appropriate, including the issuance of evidentiary sanctions or deeming the respondent to be in default.

(b) *Depositions of nonparty officers or employees of the United States or Canadian governments.*—(1) *Depositions of Commission officers or employees.* A party desiring to take the deposition of an officer or employee of the Commission (other than a member of the Office of Unfair Import Investigations or of the Office of the Administrative Law Judges), or to obtain nonprivileged documents or other physical exhibits in the custody, control, and possession of such officer or employee, may file a written motion requesting the administrative law judge to recommend that the Commission direct that officer or employee to testify or produce the requested materials.

(2) *Depositions of officers or employees of other United States agencies, or of the Canadian government.* A party desiring to take the deposition of an officer or employee of another agency, or of the Canadian government, or to obtain nonprivileged documents or other physical exhibits in the custody, control, and possession of such officer or employee, may file a written motion requesting the administrative law judge to recommend that the Commission seek the testimony or production of requested material from the officer or employee.

§ 207.110 Subpoenas.

(a) *Application for issuance of a subpoena.* Except as provided in § 207.109(b) of this subpart, an application for issuance of a subpoena requiring a person to appear and depose or testify at the taking of a deposition or at a hearing shall be made to the administrative law judge. The application shall be made in writing, and shall specify the material to be produced as precisely as possible, showing the relevancy of the material and the reasonableness of the scope of the subpoena. The application shall be ruled upon by the administrative law judge.

(b) *Enforcement of a subpoena.* A motion for enforcement of a subpoena shall be made to the administrative law judge. Upon consideration of the motion and any response thereto, the administrative law judge shall recommend to the Commission in favor of or against enforcement. The administrative law judge's recommendation shall provide the basis therefor, and shall address each of the criteria necessary for enforcement of an administrative subpoena. After consideration of the administrative law judge's recommendation, the Commission shall determine whether initiation of enforcement proceedings is appropriate.

(c) *Application for subpoena grounded upon the Freedom of Information Act.* No application for a subpoena for production of documents grounded upon the Freedom of Information Act (5 U.S.C. 552) shall be entertained by the administrative law judge or the Commission.

§ 207.111 Prehearing conference.

The administrative law judge may direct counsel or other representatives for the parties to meet with him to consider any or all of the following:

(a) Simplification and clarification of the issues;

(b) Scope of the hearing;

(c) Stipulations and admissions of either fact or the content and authenticity of documents;

(d) Disclosure of the names of witnesses and the exchange of documents or other physical evidence that will be introduced in the course of the hearing; and

(e) Such other matters as may aid in the orderly and expeditious disposition of the proceedings.

§ 207.112 Hearings.

(a) *Purpose of and scheduling of hearings.* An opportunity for a hearing before an administrative law judge shall be provided for each action initiated under this subpart. The purpose of such hearing shall be to take evidence and hear argument in order to determine whether a party has violated or induced violation of the provisions of a protective order, and if so, what sanctions are appropriate. Hearings shall proceed with all reasonable expedition, and, insofar as practicable, shall be held at one place, continuing until completed unless otherwise ordered by the administrative law judge.

(b) *Joinder or consolidation.* If sanctions are proposed against more than one party or if violations of more than one protective order are alleged, the administrative law judge may order such joinder or consolidation as may tend to avoid unnecessary costs or delay.

(c) *Compliance with Administrative Procedure Act.* The administrative law judge shall conduct a hearing that complies with the requirements of section 554 of title 5 of the United States Code.

§ 207.113 The Record.

(a) *Definition of the record.* The record shall consist of—

(1) All pleadings, the charging letter and response thereto, motions and responses, and other documents and exhibits properly filed with the Commission Secretary;

(2) All orders, notices, and the recommended or initial determinations of the administrative law judge;

(3) Orders, notices, and any final determination of the Commission;

(4) Hearing transcripts, and evidence admitted at the hearing; and

(5) Any other items certified into the record by the administrative law judge.

(b) *Certification of the record.* The record shall be certified to the Commission by the administrative law judge upon his filing of the initial determination.

§ 207.114 Initial determination.

(a) *Time for filing of initial determination.* (1) Except as may otherwise be ordered by the Commission, within ninety (90) days, or within 120 days in a complicated case, of the date of issuance of the charging letter, the administrative law judge shall certify the record to the Commission and shall file with the Commission an initial determination as to whether each charged party has violated or induced violation of the provisions of a protective order, and as to appropriate sanctions. Any party may request the administrative law judge to treat the proceeding as a complicated case requiring 120 days for completion.

(2) The administrative law judge may request the Commission to extend the time period for issuance of the initial determination as for good cause shown.

(b) *Contents of the initial determination.* The initial determination shall include the following:

(1) An opinion stating findings and conclusions necessary for the disposition of all material issues of fact, law, or discretion, and the reasons or bases therefor.

(2) A statement that the initial determination shall become the determination of the Commission unless a party files a petition for review of the determination pursuant to § 207.115 or the Commission pursuant to § 207.116 orders on its own motion a review of the initial determination or certain issues therein.

(c) *Burden of proof.* A finding that a charged party violated or induced the violation of the terms of a protective order shall be supported by clear and convincing evidence. The administrative law judge may impose any appropriate sanctions if clear and convincing evidence supports a finding that the charged party violated or induced the violation of the terms of a protective order.

(d) *Effect of initial determination.* The initial determination shall become the determination of the Commission forty-five (45) days after the date of service of the initial determination, unless the Commission within such time orders review of the initial determination or certain issues therein pursuant to §§ 207.115 or 207.116 or by order shall have changed the effective date of the initial determination. In the event an initial determination becomes the determination of the Commission, the parties shall be notified thereof by the Commission Secretary.

§ 207.115 Petition for review.

(a) *The petition and responses.* (1) Any party may request a review by the Commission of the initial determination by filing with the Commission Secretary a petition for review, except that a party who has defaulted may not petition for review of any issue regarding which the party is in default.

(2) Any person who wishes to obtain judicial review pursuant to section 403(c) of the FTA Act must first seek review by the Commission in accordance with the procedures set forth in this regulation governing petitions for review.

(3) Any petition for review must be filed within fourteen (14) days after service of the initial determination on the charged party. The petition shall:

(i) Identify the party seeking review;

(ii) Specify the issues upon which review is sought, including a statement as to whether review is sought of the initial determination regarding the existence of a violation, or of the initial determination regarding sanctions;

(iii) Set forth a concise statement of the relevant law or material facts necessary for consideration of the stated issues; and

(iv) Present a concise argument setting forth the reasons why review is necessary or appropriate.

(4) Any issue not raised in the petition for review filed under this section will be deemed to have been abandoned and may be disregarded by the Commission in determining whether to review, and in reviewing, an initial determination.

(5) Any party may file a response to the petition within seven (7) days after service of the petition, except that a party who has defaulted may not file a response to any issue regarding which the party is in default.

(b) *Grant or denial of review.* (1) The Commission shall decide whether to grant a petition for review, in whole or in part, within forty-five (45) days of the service of the initial determination on the parties, or by such other time as the Commission may order.

(2) The Commission shall base its decision whether to grant a petition for review upon the petition and response thereto, without oral argument or further written submissions, unless the Commission shall order otherwise.

(3) The Commission shall grant a petition for review of an initial determination or certain issues therein when at least one of the participating Commissioners votes for ordering review. In its notice, the Commission shall establish the scope of the review and the issues that will be considered and make provisions for the filing of briefs and oral argument if deemed appropriate by the Commission. The notice that the Commission has granted the petition shall be served by the Commission Secretary on all parties.

§ 207.116 Commission review on its own motion.

Within forty-five (45) days of the date of service of the initial determination, the Commission on its own initiative may order review of an initial determination or certain issues therein when at least one of the participating Commissioners votes for ordering review.

§ 207.117 Review by Commission.

On review, the parties may not present argument on any issue that is not set forth in the notice of review. On review, the Commission may affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part, the initial determination of the administrative law judge. The Commission may make any findings or conclusions that in its judgment are proper based on the record in the proceeding.

§ 207.118 Role of the General Counsel in Advising the Commission.

When the allegedly-violated protective order was issued in connection with a panel review that was not completed as of the date the charging letter was issued, and in other appropriate circumstances, the General Counsel and any other Commission attorneys who have participated in the panel review, shall not participate in advising the Commission as to the sanctions proceedings brought under this subpart. In such cases, the Assistant General Counsel for Section 337 Investigations, who shall have had no role in the panel review or underlying investigation, shall be designated Acting General Counsel.

§ 207.119 Reconsideration.

(a) *Petition for reconsideration.* Within fourteen (14) days after service of a Commission determination, any party may file with the Commission a petition for reconsideration, setting forth the relief desired and the grounds in support thereof. Any petition filed under this section must be confined to new questions raised by the determination or action ordered to be taken thereunder and upon which the petitioner had no opportunity to submit arguments.

(b) *Disposition of petition for reconsideration.*

The Commission shall grant or deny the petition for reconsideration. No response to a petition for reconsideration will be received unless requested by the Commission, but a petition for reconsideration will not be granted in the absence of such a request. If the motion to reconsider is granted, the Commission may affirm, set aside, or modify its determination, including any action ordered by it to be taken thereunder. When appropriate, the Commission may order the administrative law judge to take additional evidence.

§ 207.120 Public notice of sanctions.

If the final Commission decision is that there has been a violation of a protective order, and that public sanctions are to be imposed, notice of the decision will be published in the **Federal Register** and forwarded to the Secretariat. Such publication will occur no sooner than fourteen (14) days after issuance of a final decision or after any petition for reconsideration has been denied. The Commission Secretary shall also serve notice of the Commission decision upon such departments and agencies of the United States and Canadian governments as the Commission deems appropriate.

Issued: August 23, 1989.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 0

[Order No. 1364-89]

Delegation of Authority to the Assistant Attorneys General for the Criminal and Civil Rights Division

AGENCY: Office of the Attorney General.

ACTION: Final Rule.

SUMMARY: This order amends 28 CFR part O to delegate the Attorney General's authority under 18 U.S.C. 245, which protects individuals against civil rights violations, to the Assistant Attorneys General for the Criminal and Civil Rights Divisions. This order will revise the Code of Federal Regulations so that it accurately reflects the current rules.

EFFECTIVE DATE: August 21, 1989.

FOR FURTHER INFORMATION CONTACT: Carol A. Williams, Special Counsel, Office of Legal Counsel, telephone: 202-633-3865. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: This regulation will amend title 28 of the Code of Federal Regulations to reflect an internal Department of Justice delegation of authority. This is not a major rule within the meaning of Exec. Order No. 12291. This will not have an impact on a significant number of small businesses. 5 U.S.C. 901.

List of Subjects in 28 CFR Part 0

Authority delegations (Government agencies).

By the authority vested in me including 28 U.S.C. 509, 510, and 5 U.S.C. 301, subparts J and K of part O of title 28 of the Code of Federal Regulations are amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for part 0 continues to read as follows:

Authority: 5 U.S.C. 301, 2303, 3101; 8 U.S.C. 1103, 1324A, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 3621, 3622, 4001, 4041, 4042, 4044, 4082, 4201 *et seq.*, 6003(b); 21 U.S.C. 871, 881(d), 904; 22 U.S.C. 263a, 1621-1645o, 1622 note; 28 U.S.C. 509, 510, 515, 516, 519, 524, 543, 552, 552a, 569; 31 U.S.C. 1108, 3801 *et seq.*; 50 U.S.C. App. 1989b, 2001-2017p; Pub. L. No. 91-513, sec. 501; EO 11919; EO 11267; EO 11300.

2. Section 0.50 is amended by adding a new paragraph (k) to read as follows:

§ 0.50 [AMENDED]

* * * * *

(k) Upon request, certifications under 18 U.S.C. 245.

3. Section 0.55 is amended by adding a new paragraph (t) to read as follows:

§ 0.55 [AMENDED]

* * * * *

(t) Upon request, certifications under 18 U.S.C. 245.

Dated: August 21, 1989.

Dick Thornburgh,

Attorney General.

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 65

[COTP Tampa Regulation 89-35]

Safety Zone Regulations; Headwaters of Crystal River FL., Kings Bay, Crystal Bay

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone near the headwaters of the Crystal River. Kings Bay, Crystal Bay and their adjoining waters are a safety zone. All boating traffic transiting these waters must proceed at "idle speed." This safety zone becomes effective at 6:00 p.m. Friday, 1 September 1989 and expires at 6:00 a.m. Tuesday, 5 September 1989.

This regulation is needed to reduce the hazards to boaters and their vessels associated with the heavy traffic anticipated in the area.

EFFECTIVE DATE: These regulations become effective at 6:00 p.m. Friday, 1 September 1989. It terminates at 6:00 a.m. Tuesday, 5 September 1989.

FOR FURTHER INFORMATION CONTACT: LT P.J. MacDonald (813) 228-2194.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent possible damage to the boaters and their vessels involved.

This regulation is issued pursuant to 33 U.S.C. 1231 as set out in the authority citation for all of part 165.

Drafting Information

The drafters of this regulation are LT P.J. MacDonald, Project Officer for the Captain of the Port Tampa, and LCDR Dickman, Project attorney, Seventh Coast Guard District Legal Office.

Discussion of Regulations

The circumstances requiring this regulation will begin on 1 September 1989 at 6:00 p.m. The regulation is needed to protect boaters and vessel traffic from the hazards of the high vessel traffic anticipated in the area.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart C of part 165 of title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 160.5, 49 CFR 1.46.

2. A new § 165.T07035 is added to read as follows:

§ 165.T07035 Safety Zone: Sarasota Bay and Gulf of Mexico, Sarasota, FL

(a) *Location,* The following area is a safety zone: The headwaters of the Crystal River, Kings Bay, Crystal Bay and their adjoining waters.

(b) *Effective date:* This regulation becomes effective at 6:00 p.m. 1 September 1989. It terminates at 6:00 a.m. on 5 September 1989.

(c) *Regulations:* In accordance with the general regulations in 165.23 of this part, all vessel traffic transiting the established safety zone must proceed at "Idle Speed".

Dated: August 25, 1989.

H.D. Jacoby,

Captain, U.S. Coast Guard, Captain of the Port, Tampa, FL.

[FR Doc. 89-20628 Filed 8-31-89; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD8-89-05]

Drawbridge Operation Regulations; Inner Harbor Navigation Canal, LA

AGENCY: U.S. Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Louisiana Department of Transportation and Development (LDOTD), the Coast Guard is changing the regulation governing the operation of the new Danziger bridge over the Inner Harbor Navigation Canal, mile 3.1, in New Orleans, Orleans Parish, Louisiana, by permitting the draw to open on at least four hours advance notice from 8 p.m. to 7 a.m. This change is in addition to the present regulation for the bridge. This change is being made because of the infrequent requests for openings of the draw during the prescribed advance notice period. This action will relieve the bridge owner of the burden of having a person constantly available at the bridge to open the draw, while still providing for the reasonable needs of navigation.

EFFECTIVE DATE: This regulation becomes effective on October 2, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. John Wachter, Bridge Administration Branch, Eighth Coast Guard District, telephone (504) 589-2965.

SUPPLEMENTARY INFORMATION: On 30 March 1989, the Coast Guard published a proposed rule (54 FR 13080) concerning this amendment. The Commander, Eighth Coast Guard District, also published the proposal as a Public Notice dated 6 April 1989. In each notice interested parties were given until 15 May 1989 to submit comments.

Drafting Information

The drafters of this regulation are Mr. John Wachter, project officer, and Commander J. A. Unzicker, project attorney.

Discussion of Comments

Five letters of comment were received in response to public notification of the proposed rule change. The Federal Emergency Management Agency, Western Towing Company, and Navios Ship Agencies, Inc. each offered no objection to the proposed rule. Two letters of concern were received. Johnson Maritime Services (Gulf), Inc., and the New Orleans Steamship Association each expressed concern about the economic impact on deep draft traffic caused by delayed bridge openings. The Louisiana Department of Transportation and Development answered the concern to the respondent's satisfaction. Therefore in the absence of any objection to the proposed rule as published in (54 FR 13080) on 30 March 1989, the final rule is unchanged from the proposed rule.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Economic Assessment and Certification

This regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034: February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The basis for this conclusion is that very few vessels now pass the bridge during the advance notice period of 8 p.m. to 7 a.m. For that period, the bridge opens about one time every three days. When the need arises, the vessels involved can reasonably give four hours advance notice for a bridge opening during that period by placing a collect call to the bridge owner at anytime. Mariners requiring the bridge opening are repeat users and scheduling their arrival at the bridge at the appointed time should involve little or no additional expense to them. Since the economic impact of this regulation is expected to be minimal, the Coast Guard certifies that it will not have a significant impact on a substantial number of small entities.

The advance notice for opening of the draw can be given by placing a collect call at anytime to the LDOTD in Bridge City, Louisiana, telephone (504) 436-9100. From afloat, this contact may be made by radiotelephone through a public coast station.

The LDOTD recognizes that there may be an unusual occasion to open the bridge on less than four hours notice for an emergency, or to operate the bridge on demand for an isolated but temporary surge in waterway traffic, and has committed to doing so if such an event should occur.

List of Subjects in 33 CFR Part 117

Bridges.

Regulation

In consideration of the foregoing, part 117 of title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g); 33 CFR 117.43.

2. Section 117.458 is revised to read as follows:

§ 117.458 Inner Harbor Navigation Canal, New Orleans.

(a) The draw of the US90 (Danziger) bridge, mile 3.1, shall open on signal;

except that, from 8 p.m. to 7 a.m. the draw shall open on signal if at least four hours notice is given, and the draw need not be opened from 7 a.m. to 8:30 a.m. and 5 p.m. to 6:30 p.m. Monday through Friday.

(b) The draw of the Leon C. Simon Blvd. (Seabrook) bridge, mile 4.6, shall open on signal; except that, from 7 a.m. to 8:30 a.m. and 5 p.m. to 6:30 p.m. Monday through Friday, the draw need not be opened.

Dated: August 21, 1989.

W.F. Merlin,

Rear Admiral, U.S. Coast Guard Commander, Eighth Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3638-4]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Final Rulemaking.

SUMMARY: In a November 16, 1988, notice of proposed rulemaking, USEPA proposed to disapprove a site-specific revision to the Ohio State Implementation Plan (SIP) for ozone. This revision is a relaxation of the reasonably available control technology (RACT) requirement for volatile organic compounds (VOC), for the Paper Products Company (PPC) roll coating line. This facility is located in Hamilton County, Ohio, an area designated as nonattainment for ozone.

In today's Final Rulemaking, USEPA is disapproving this SIP revision because (1) it has not been demonstrated that it is technically or economically infeasible for PPC to meet the existing RACT limit, and (2) the State has not shown that this variance is consistent with an approvable attainment demonstration for the Cincinnati area.

EFFECTIVE DATE: This final rulemaking becomes effective on October 2, 1989.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886-6031, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604.

Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 WaterMark Drive, Columbus, Ohio 43266-0149.

A copy of today's revision to the Ohio SIP is available for inspection.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan Air and Radiation Branch (5AR-26) U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-6031.

SUPPLEMENTARY INFORMATION: On July 16, 1986, the Ohio Environmental Protection Agency (OEPA) submitted a proposed SIP revision consisting of a relaxation of RACT requirements for a roll coating line at PPC, located in Hamilton County, Ohio. The roll coating line produces paperboard used in the food industry. The proposed revision includes the following conditions:

1. The source shall not apply more than 10 gallons of coatings in any 1 day.
2. PPC must keep monthly records for all coating material used by the source.
3. PPC must submit annual reports on source emissions.

The variance contains no limits on total emissions or emission rates.

On October 2, 1986, USEPA notified OEPA that the July 16, 1986, submittal was deficient (see USEPA's September 15, 1986, technical support document (TSD)). The OEPA did not respond to USEPA's October 2, 1986, letter.

I. Current VOC SIP

Under the existing federally approved SIP, each roll coating line is subject to the control requirements contained in OAC Rule 3745-21-09(F), and the compliance schedule contained in OAC Rule 3745-21-04(C)(5). These rules require PPC to meet a limit of 2.9 pounds of VOC per gallon of coating, excluding water, by April 1, 1982. USEPA approved these rules as meeting the RACT requirements of the Clean Air Act (CAA) on October 31, 1980 (45 FR 72122), and June 29, 1982 (45 FR 28097).

II. Deficiencies in the RACT Relaxation

An exemption from the VOC regulations for this source constitutes a site-specific relaxation of RACT (i.e., a source-specific redefinition of RACT). In order for such a relaxation to be approved by USEPA PPC must demonstrate that compliance with the applicable limit is technically or economically infeasible.

III. Proposed SIP Revision

In a November 16, 1988, (53 FR 46097) notice of proposed rulemaking, USEPA proposed to disapprove PPC's relaxation of RACT for VOC involving its roll coating line. On December 16, 1988, the OEPA submitted comments to USEPA.

OEPA's Comment

OEPA asked that the revision be reviewed under the "five percent equivalency" policy based on the following:

> Based on a maximum allowed daily usage of 10 gallons of coatings, the maximum daily emission would be 60 pounds of VOC (coating with 6.0 pounds of VOC per gallon and 10 percent solids by volume, as reported by the company). The related allowable daily emission would be 11.4 pounds of VOC (based on 81 percent control, USEPA's presumptive RACT for add-on control). An exemption for this site would increase the daily allowable emission by 48.6 pounds of VOC (22.0 kilograms of VOC). This represents a 2.8 percent increase in allowable daily VOC emission during 1982 for the paper coating category within the ozone SIP for Cincinnati. The paper coating category for Hamilton County has a total daily allowable emission of 537 kilograms, as reported in that SIP and in a letter of December 23, 1986, to Steve Rothblatt, Chief, Air and Radiation Branch Region V, USEPA. However, the seven-county demonstration area of the Cincinnati ozone SIP has a total daily allowable emission of 799 kilograms for paper coating during 1982.

USEPA's Response

The 5 percent equivalency policy is intended to be used to justify a different cutoff for applicability on a category-wide basis. It *cannot* be used to justify a site-specific relaxation of RACT.

Conclusion

USEPA is disapproving this SIP revision for PPC because (1) it has not been demonstrated that it is technically or economically infeasible for PPC to meet the RACT limit, and (2) the State has not shown that this variance is consistence with an approvable attainment demonstration for the Cincinnati area.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989, (54 FR 2214-2225). On January 6, 1989, the Office of Management and Budget waived Tables 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of 2 years.

List of Subjects in 40 CFR Part 52

40 CFR Part 52

[FRL-3636-5, KY-030]

Approval and Promulgation of Implementation Plans, Kentucky; State Regulation for Prevention of Significant Deterioration (PSD) and Visibility New Source Review in Attainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: In this action EPA is finalizing approval of revisions to the Kentucky State Implementation Plan (SIP) which were submitted to EPA on February 20, 1986. This action was proposed on March 17, 1987 (52 FR 8311). These revisions include a regulation for prevention of significant deterioration (PSD), a visibility monitoring strategy, and regulations for visibility new source review in attainment areas. This approval of Kentucky's PSD regulation will give the Natural Resources and Environmental Protection Cabinet (NREPC) full authority to implement and enforce the current PSD program in Kentucky. PSD requirements for particular matter (PM_{10}) are not included in this action. Kentucky's PSD requirements for PM_{10} were recently submitted to EPA and will be acted on in a separate **Federal Register** Notice.

The principal effect of the new visibility protection regulations will be to require the State to consider visibility impacts when reviewing permit applications for new major sources and major modifications in attainment areas which could affect visibility in federal Class I areas.

DATE: This rule will become effective on October 2, 1989.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Natural Resources and Environmental Protection Cabinet, Division of Air Pollution Control, 18 Reilly Road, Frankfort Office Park, Frankfort, Kentucky 40601

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Pamela Adams of the EPA Region IV Air Programs Branch at the above address, telephone (404) 347-2864 or FTS 257-2864.

SUPPLEMENTARY INFORMATION: Following a December 30, 1985, public hearing in conformity with 40 CFR 51.102 (old 51.4), the Commonwealth of Kentucky's Natural Resources and Environmental Protection Cabinet (NREPC) adopted regulation changes involving PSD and visibility and submitted them to EPA on February 20, 1986, for approval as implementation plan revisions. EPA proposed to approve the revisions on March 17, 1987 (52 FR 8311). This notice finalizes that approval. Comments received from the National Park Service are addressed below in the section entitled *Visibility Monitoring Strategy.*

PSD: On December 5, 1974, EPA published regulations for PSD under the 1970 version of the Clean Air Act. These regulations established a program for protecting areas with air quality better than the National Ambient Air Quality Standards (NAAQS). The Clean Air Act Amendments of 1977 changed the 1970 Act and EPA's regulations in many respects, particularly with regard to PSD. In addition to mandating certain changes to EPA's PSD regulations immediately, the new Clean Air Act, in Sections 160-169, contains comprehensive new PSD requirements. These new requirements are to be incorporated by states into their implementation plans.

On June 19, 1978 (43 FR 26380), and August 7, 1980 (45 FR 52676), EPA promulgated regulations that contain requirements that states must follow when preparing State Implementation Plan (SIP) revisions that meet the new PSD requirements.

On December 21, 1982 (47 FR 56882), EPA proposed approval of a previous version of Kentucky's regulation for Prevention of Significant Deterioration.

Natural Resources and Environmental Protection Cabinet (NREPC) adopted regulation changes involving PSD and visibility and submitted them to EPA on February 20, 1986, for approval as implementation plan revisions. EPA proposed to approve the revisions on March 17, 1987 (52 FR 8311). This notice finalizes that approval. Comments received from the National Park Service are addressed below in the section entitled *Visibility Monitoring Strategy.*

In adopting the Clean Air Act, Congress designated EPA as the agency primarily responsible for interpreting the statutory provisions and overseeing their implementation by the states. EPA must approve state programs that meet the requirements of 40 CFR part 51. Conversely, EPA cannot approve programs that do not meet those requirements. However, the requirements of the Act and 40 CFR Part 51 for New Source Review (NSR), including those for PSD, stack heights/dispersion techniques, and visibility, are by nature very complex and dynamic. It would be administratively impracticable to include all statutory interpretations in the EPA regulations and the SIPs of the various states, or to amend the regulations and SIPs every time EPA interprets the statute or regulations or issues guidance regarding the proper implementation of the NSR program. Morever, the Act does not require EPA to do so. Rather, action by EPA to

BEST COPY AVAILABLE

approve these NSR-related regulations and narrative as part of the Kentucky SIP has the effect of requiring the State to follow EPA's current and future interpretations of the Act's provisions and regulations, as well as EPA's operating policies and guidance (but only to the extent that such policies are intended to guide the implementation of approval state NSR programs).

Similarly, EPA approval also has the effect of superceding any interpretations or policies that the State might otherwise follow to the extent they are at variance with EPA's interpretations and applicable policies. Of course, any fundamental changes in the administration of NSR would have to be accomplished through amendments to the regulations in 40 CFR Part 51 and subsequent SIP revisions. Following today's approval of these revisions to the NSR requirements of the Kentucky SIP, EPA will continue to oversee implementation of this important program by reviewing and commenting upon proposed permits as appropriate. Specifically, EPA will comment upon proposed permits that do not implement the letter of the law, as well as EPA's statutory and regulatory interpretations and applicable guidance. If a final permit is issued which still does not reflect consideration of the relevant factors, EPA may deem the permit inadequate for purposes of implementing the requirements of the Act and Kentucky's SIP, and may consider enforcement action under Sections 113 and 167 of the Act to address the permit deficiency.

PSD: On December 5, 1974, EPA published regulations for PSD under the 1970 version of the Clean Air Act. These regulations established a program for protecting areas with air quality better than the National Ambient Air Quality Standards (NAAQS). The Clean Air Act Amendments of 1977 changed the 1970 Act and EPA's regulations in many respects, particularly with regard to PSD. In addition to mandating certain changes to EPA's PSD regulations immediately, the new Clean Air Act, in Sections 160–169, contains comprehensive new PSD requirements. These new requirements are to be incorporated by states into their implementation plans.

On June 19, 1978 (43 FR 26380), and August 7, 1980 (45 FR 52676), EPA promulgated regulations that contain requirements that states must follow when preparing State Implementation Plan (SIP) revisions that meet the new PSD requirements.

On December 21, 1982 (47 FR 56882), EPA proposed approval of a previous version of Kentucky's regulation for Prevention of Significant Deterioration (401 KAR 51:017). This proposal will not be finalized because of the amount of time that has passed (4 years) and because the regulations proposed for approval are superseded by the revised regulations proposed for approval in the March 17, 1987, **Federal Register** and finalized in this notice. These revisions to Kentucky's regulations were made primarily to respond to EPA requirements stated in the original proposal. EPA reviewed the revised regulations and found them to meet the requirements of 40 CFR 51.166 (old 51.24), except as noted in the March 17, 1987, proposal notice. The conditions mentioned in that notice are discussed below. EPA is today finalizing approval of 401 KAR 51:017 as part of the Kentucky SIP.

As stated in the proposal notice of March 17, 1987, EPA's final approval of Kentucky's PSD regulation was to be contingent upon the removal from Kentucky's regulations of the volatile organic compound (VOC) definition contained in their general definitions. For PSD purposes this definition improperly exempted compounds of low vapor pressure. Kentucky amended this definition to remove its applicability to the PSD and new source review (NSR) regulations, 401 KAR 51:017 and 401 KAR 51:052. This amended definition became effective for the Commonwealth of Kentucky on December 2, 1986. This regulatory amendment was submitted to EPA by letter of December 29, 1986.

EPA is taking no action on 51:017, Section 20, which allows rescission of State PSD permits issued under earlier versions of the State PSD regulations, because those regulations were never a part of the federally approved SIP. Sources holding these permits also hold a federal PSD permit if the sources are subject to federal PSD requirements. Rescission of those federal permits, if appropriate, may be accomplished through the procedures of 40 CFR 52.21. Federal PSD permits will not be affected by Section 20. Conversely, EPA's inaction will not affect Kentucky's ability to rescind state permits where appropriate.

The March 17, 1987, **Federal Register** notice made final approval of Kentucky's PSD regulation contingent upon Kentucky's removing the second sentence of 51:017 section 8(3). This sentence could be interpreted as exempting PSD sources from PSD review if they agree to nonattainment review. Kentucky did not intend that interpretation and deleted that sentence in an amendment submitted to EPA in the previously mentioned December 29, 1986, letter. The amended version of 51:017 became effective for the Commonwealth of Kentucky on December 2, 1986.

Kentucky's regulation adopts the definition of "stationary source" which was promulgated on June 25, 1982 (47 FR 27554), by EPA. This definition excludes all vessel emissions from the definition for purposes of determining if the source is major. On January 17, 1984, the Court of Appeals for the District of Columbia Circuit overturned and remanded to EPA for further consideration this portion of EPA's new source review regulations. EPA has not yet completed its reconsideration of how vessel emissions are to be treated. Although vessel emissions are an insignificant part of Kentucky's emission inventory, approval of Kentucky's PSD regulations was made contingent upon Kentucky's written commitment to revise their PSD regulation to incorporate revised vessel emission provisions as soon as EPA changes 40 CFR 51.166 (old 51.24). Kentucky stated this commitment in an October 17, 1986, letter to EPA.

In the **Federal Register** of July 8, 1985 (50 FR 27892), EPA published final regulations to implement section 123 of the Clean Air Act, which regulates the manner in which dispersion of pollutants from a source may be considered in setting emission limitations. These regulations limit the amount of stack height or dispersion credit a source can claim while setting its emission limitations. The dispersion techniques include the use of stack heights greater than 65 meters and the use of other techniques to increase the dispersion of emissions rather than reduce the emissions of a source. Kentucky committed to reviewing all sources under EPA's new stack height regulations. Kentucky has since promulgated a new regulation for stack heights effective June 10, 1986, to require the use of good engineering practice stack height in determining emission limitations for all sources in Kentucky. This regulation, 401 KAR 50:042, was submitted to EPA by letter of March 23, 1987, and was designed to satisfy the requirements of EPA's regulations. Final approval of this regulation was published in the September 4, 1987, **Federal Register** (52 FR 33592).

The EPA's stack height regulations were challenged in *NRDC* v. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit issued its decision affirming the regulations in large part, but remanding three provisions to the EPA for reconsideration.

These are:

1. Grandfathering pre-October 11, 1983 within-formula stack height increases from demonstration requirements [40 CFR 51.100(kk)(2)];
2. Dispersion credit for sources originally designed and constructed with merged or multiflue stacks [40 CFR 51.100(hh)(2)(ii)(A)]; and
3. Grandfathering pre-1979 use of the refined H + 1.5L formula [40 CFR 51.100(ii)(2)].

Under the Prevention of Significant Deterioration program, Kentucky will be issuing permits and establishing emission limitations that may be affected by the court-ordered reconsideration of the stack height regulations promulgated on July 8, 1985 (50 FR 27892). For this reason, the EPA has required that the State include the following caveat in all potentially affected permit approvals until the EPA completes its reconsideration of remanded portions of the regulations and promulgates any necessary revisions:

> In approving this permit, the Kentucky Division for Air Quality has determined that the application complies with the applicable provisions of the stack height regulations as revised by the EPA on July 8, 1985 (50 FR 27892). Portions of the regulations have been remanded by a panel of the U.S. Court of Appeals for the D.C. Circuit in *NRDC* v. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). Consequently, this permit may be subject to modification if and when the EPA revises the regulations in response to the court decision. This may result in revised emission limitations or may affect other actions taken by the source owners or operators.

Kentucky has made an enforceable commitment to include this caveat in all affected permits by letter dated May 11, 1988. This commitment is being incorporated into the Code of Federal Regulations for the State of Kentucky as part of EPA's approval action.

On September 9, 1986, EPA revised the requirements for air quality modeling procedures to be used in processing PSD permits (51 FR 32176). The Kentucky regulations were adopted before that date and did not incorporate that change. Therefore, Kentucky committed to adopting these changes to its regulations prior to nine months after approval of these PSD regulations by EPA. Kentucky committed to using the new modeling procedures in processing PSD permits in the interim. Kentucky has met these commitments by incorporating the revised version of the "Guideline on Air Quality Models" by reference in 401 KAR 50:015, Documents Incorporated by Reference. This revised version of 401 KAR 50:015 became effective for the Commonwealth of Kentucky on February 10, 1987. The other regulations which require the use of the modeling guideline, including 401 KAR 51:017, refer to 401 KAR 50:015, and thus the revised version of the guideline. The amended version of 401 KAR 50:015 was submitted to EPA on March 23, 1987. EPA proposed approval of this amended version of 401 KAR 50:015 on October 16, 1987 (52 FR 38481). EPA promulgated Supplement A to the "Guideline on Air Quality Models (revised)" (1986), EPA 450/2–78–027R on January 6, 1988 (53 FR 392). Kentucky submitted its Prevention of Significant Deterioration regulation, 401 KAR 51:017, prior to that date. Kentucky has recently incorporated Supplement A into the State's regulations. This incorporation of Supplement A became state-effective in Kentucky on October 26, 1988. The revised version of 401 KAR 50:015 incorporating Supplement A by reference is expected to be submitted to EPA in the near future.

Action is being deferred on section 12(e) regarding ozone monitoring data. This section references 401 KAR 51:052 which is not currently a part of the federally approved State Implementation Plan (SIP). Section 12(e) will be approved at a later date provided that 401 KAR 51:052 is approved.

References are made in Kentucky's State regulations to 40 CFR 51.18, Review of new sources and modifications, and 40 CFR 51.24, Prevention of Significant Deterioration. EPA's 40 CFR Part 51 regulations were recodified in the November 7, 1986 **Federal Register**. Therefore, EPA will interpret former Part 51 citations such as 51.18 and 51.24 as referring to the new citations in Part 51 as codified in the November 7, 1986, **Federal Register** notice (51 FR 40656).

EPA directly issued federal PSD permits to all new PSD sources in Kentucky between 1974 and 1980. Since that time, Kentucky has issued PSD permits pursuant to a delegation from EPA. For enforcement purposes, EPA must retain in the Kentucky SIP the EPA PSD regulations of 40 CFR 52.21 as they apply to those sources. As is the case presently, Kentucky will retain delegation of authority to enforce the Federal PSD permits issued by EPA between 1974 and 1980 and the PSD permits issued by Kentucky under delegation of authority.

Visibility

On December 2, 1980, EPA promulgated visibility regulations at 45 FR 80084, codified at 40 CFR 51.300 et seq. These regulations required that the 36 states listed in section 51.300(b)(2) accomplish the following: (1) develop a program to assess and remedy visibility impairment from new and existing sources, (2) develop a long-term (10 to 15 years) strategy to assure progress toward the national goal, (3) develop a visibility monitoring strategy to collect information on visibility conditions, and (4) consider any "integral vistas" (important views of landmarks or panoramas that extend outside the boundaries of the Class I area and are considered by the Federal Land Managers (FLM's) to be critical to the visitor's enjoyment of the Class I area) in all aspects of visibility protection. These visibility regulations only address a type of visibility impairment which can be traced to a single source or small group of sources known as reasonably attributable impairment or "plume blight." EPA deferred action on the regulation of widespread homogeneous haze (referred to as regional haze) and urban plumes due to scientific and technical limitations in visibility monitoring techniques and modeling methods (see 45 FR 80085 col. 3).

In December 1982, environmental groups filed a citizen's suit in the United States District Court for the Northern District of California alleging that EPA had failed to perform a nondiscretionary duty under section 110(c) of the Act to promulgate visibility SIPs for the 35 states that had failed to submit SIPs to EPA (EDF vs. Gorsuch, No. C 82–6850 RPA (N.D. Cal.)). The State of Alaska had submitted a SIP which was approved on July 5, 1983, at 48 FR 30623. EPA and the plaintiffs negotiated a settlement agreement for the remaining states which the court approved by order on April 20, 1984. EPA announced the details of the settlement agreement at 49 FR 20647 (May 16, 1984).

The first part of the settlement agreement required Kentucky to develop visibility new source review and visibility monitoring provisions to meet the requirements of 40 CFR 51.305 and 51.307 and submit those provisions to EPA by May 6, 1985. The first part of the settlement agreement further required EPA to approve the state submittal or to promulgate a Federal Implementation Plan (FIP) by January 6, 1986. Since Kentucky had not yet submitted a final visibility SIP, EPA promulgated a federal program for Kentucky to meet the requirements of 51.305 and 51.307 on February 13, 1986 (51 FR 5504). The federal program, which is covered by the federal visibility monitoring strategy (§ 52.26) and visibility NSR program (§ 52.27 and 52.28), was promulgated as part of the Kentucky SIP.

Kentucky has now submitted its "Plan for Visibility Protection in Class I

OL
54
SS
1
6
9
E
1
989
MI

Areas" for EPA's approval. In accordance with the first part of the settlement agreement, this plan satisfies the visibility requirements of 40 CFR 51.305 and 51.307 (a) and (d). A visibility monitoring strategy satisfies the requirements of 40 CFR 51.305, and regulations for visibility new source review in attainment areas satisfy the requirements of 51.307 (a) and (d). Although Kentucky has revised Regulation 401 KAR 51.052 (New Source Review in Nonattainment Areas) to satisfy the requirements of 40 CFR 51.307 (b) and (c), such revisions are not being acted on in this notice. Such revisions are not pending at EPA for approval at this time. Therefore, this **Federal Register** notice partially removes the federal promulgation of February 13, 1986, and approves Kentucky's visibility plan in place of the parts removed.

The second part of the settlement agreement required EPA to determine the adequacy of the SIPs to meet the remaining provisions of the visibility regulations. These provisions are the general plan provisions including implementation control strategies (§ 51.302), integral vista protection (§§ 51.302 through 51.307) and long-term strategies (§ 51.306). The settlement agreement required EPA to propose and promulgate FIPs on a specified schedule to remedy any deficiencies. The original deadlines for promulgating the FIPs were renegotiated and extended by a court order on September 9, 1986. The order provided that a state could avoid federal promulgation if it submitted a SIP to address the part 2 (remaining visibility provisions) requirements by August 31, 1987.

The part 2 visibility provisions are spelled out in § 51.302(c) (General Plan Requirements) and require that the SIPs include the following: (1) An assessment of visibility impairment and a discussion of how each element of the plan relates to the national goal, (2) emission limitations, or other control measures, representing best available retrofit technology (BART) for certain sources, (3) provisions to protect integral vistas identified pursuant to § 51.304, (4) provisions to address any existing impairment certified by the FLM, and (5) a long-term (10–15 year) strategy for making progress toward the national goal pursuant to § 51.306. Kentucky submitted its plans to satisfy the part 2 visibility requirements on August 31, 1987. EPA approved such plan on July 12, 1988 (53 FR 26253).

Visibility Narrative SIP

The new narrative section states that Kentucky's visibility goal is to "prevent any future impairment of visibility in Federal Class I areas which results from man-made air pollution." This is consistent with EPA's national goal of preventing any future and remedying any existing visibility impairment in mandatory Class I areas. Kentucky has only one mandatory Class I area, the Mammoth Cave National Park. No visibility impairment has been identified in this Class I area. The narrative visibility SIP also identifies the cause of visibility impairment, outlines the State's permitting procedures as they pertain to visibility new source review, and describes the State's visibility monitoring strategy.

Kentucky's "Visibility SIP" is composed of two main parts. First, it describes the State's visibility new source review regulations. Second, it describes Kentucky's visibility monitoring strategy.

Visibility New Source Review

Kentucky has revised its Prevention of Significant Deterioration rule (401 KAR 51:017) to include notification procedures and review requirements for assessing potential visibility impacts of new major sources proposed to be located in attainment areas.

These regulations also allow the State to require monitoring of visibility in the Class I area near the proposed new facility or modification. These revisions meet the requirements of 40 CFR 51.307 for visibility new source review in attainment areas and include the necessary visibility definitions contained in 40 CFR 51.301.

Kentucky has revised its provisions for new source review in attainment areas to make it incumbent upon the State to:

- Notify the Federal Land Manager (FLM) within 30 days of receiving a permit application;
- Notify the FLM within 30 days of receiving advance notification of a permit application;
- Notify the FLM 60 days prior to any public hearing on the permit;
- Consider comments from the FLM received up to 30 days after the FLM has been notified;
- Include a visibility impairment analysis in the notification to the FLM;
- Require sources to monitor;
- Deny permits in cases where State agrees with the FLM that visibility impairment would occur; and
- Provide an explanation of nonconcurrence in the notice of public hearing or give notice as to where the explanation may be obtained if the State disagrees with the FLM that visibility impairment would occur.

Visibility Monitoring Strategy

The State's monitoring strategy will be to use data from the human observations that are made by the National Weather Service at the Bowling Green-Warren County Airport in Bowling Green, Kentucky. The airport is approximately twenty-five air miles southwest of Mammoth Cave National Park.

Observers at the airport obtain visibility readings every hour of the day and make determinations as to whether haze is present. Any visibility monitoring required by the State in a Class I area will be approved by the Federal Land Manager. Data will be used to provide background data and to determine if there are any long-term visibility trends. Throughout the development of Kentucky's "Visibility SIP," the staff of the Kentucky Division of Air Pollution Control coordinated their efforts closely with the National Park Service (NPS) park, regional, and headquarters personnel. The National Park Service stated in its comments on EPA's proposed approval that the State provided several opportunities for input and was very responsive to the NPS concerns. Relevant to the State's expressed interest in establishing a visibility monitorng station in Mammoth Cave National Park, preliminary field work was conducted by the State and the NPS to find a suitable location for such a station, but resource constraints have been precluding implementation of the monitoring site according to the NPS. Consequently, Kentucky's visibility SIP indicates that EPA's support would be necessary before Kentucky could seriously consider this undertaking. The NPS encourages EPA to provide whatever assistance may be available to help the State carry out this part of their plan.

Further details pertaining to these regulation changes are contained in the Technical Support Document, which is available for public inspection at EPA's Regional Office in Atlanta, Georgia.

Final Action

EPA has found Kentucky's regulation for prevention of significnt deterioration, visibility monitoring program, and provisions for visibility new source review in attainment areas to meet the requirements contained in 40 CFR 51.166 (old 51.24), 51.305, and 51.307 (a) and (d). EPA is therefore finalizing approval of Kentucky's regulations for prevention of significant deterioration, visibility monitoring strategy, and visibility new source review in attainment area regulations as submitted on February 20, 1986. Furthermore, EPA is partially removing the part 1 federal visibility plan which was promulgated for Kentucky on February 13, 1986, at 51 FR 5504.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 31, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations.

Incorporation by reference of the State Implementation Plan for the State of Kentucky was approved by the Director of the **Federal Register** on July 1, 1982.

Dated August 22, 1989.

William K. Reilly,
Administrator.

Part 52 of chapter I, title 40, of the Code of Federal Regulations, is amended as follows:

Subpart S—Kentucky

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.920 is amended by adding paragraph (c)(46) to read as follows:

§ 52.920 Identification of plan.

* * * * *

(c) * * *

(46) Kentucky regulation 401 KAR 51:017, Prevention of significant deterioration of air quality, and Kentucky's State Implementation Plan Revision for the Protection of Visibility for the Commonwealth of Kentucky pursuant to 40 CFR part 51, subpart P, submitted on February 20, 1986, by the Kentucky Natural Resources and Environmental Protection Cabinet.

(i) *Incorporation by reference.* (A) Kentucky regulation 401 KAR 51:017, Prevention of significant deterioration of air quality, which became State-effective on February 4, 1986.

(ii) *Other material.* (A) Kentucky's State Implementation Revision for the Protection of Visibility for the Commonwealth of Kentucky, pursuant to 40 CFR part 51, subpart P, which became State-effective on February 4, 1986.

3. Section 52.931 is amended by removing paragraph (a), revising and redesignating paragraphs (b) and (c) as (a) and (b) respectively, and by adding a new paragraph (c) to read as follows:

§ 52.931 Significant deterioration of air quality.

(a) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 (b) through (w) are hereby incorporated and made a part of the applicable state plan for the State of Kentucky only as they apply to permits issued pursuant to § 52.21 prior to final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source Review in Attainment Areas. The provisions of § 52.21 (b) through (w) are rescinded for permits issued after final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source Review in Attainment Areas.

(b) The Commonwealth of Kentucky has committed to revising the state's regulations accordingly when EPA amends the federal vessel emissions provisions contained in 40 CFR 51.166. In a letter dated October 17, 1986, Kentucky stated:

> As requested, the Division of Air Pollution Control hereby commits to changing the definition of "building, structure, facility, or installation," and any other applicable definitions, when the issue of vessel emissions is resolved at the federal level, and after the federal regulation, 40 CFR 51.24, is amended.

(d) In a letter dated May 3, 1988, EPA informed Kentucky that the following caveat must be included in all potentially affected permits due to a decision of the U.S. Court of Appeals for the District of Columbia Circuit (*NRDC* v. *Thomas*, 838 F.2d 1224):

> In approving this permit, the Kentucky Division for Air Quality has determined that the application complies with the applicable provisions of the stack height regulations as revised by the EPA on July 8, 1985 (50 FR 27892). Portions of the regulations have been remanded by a panel of the U.S. Court of Appeals for the D.C. Circuit in *NRDC* v. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). Consequently, this permit may be subject to modification if and when the EPA revises the regulation in response to the court decision. This may result in revised emission limitations or may affect other actions taken by the source owners or operators.

Kentucky responded with a letter dated May 11, 1988, stating in part:

> This is in response to your letter dated May 3, 1988 * * *. As requested by your letter, the Kentucky Division for Air Quality agrees to include the condition set forth in your letter, in all potentially affected permits issued under regulation 401 KAR 51:017 or 401 KAR 51:052. Therefore, we request that you consider this letter as our commitment that the required caveat will be included in all potentially affected permits * * *.

4. Section 52.936 is revised to read as follows:

§ 52.936 Visibility protection.

(a) The requirements of Section 169A of the Clean Air Act are not met because the plan does not include approvable procedures meeting the requirements of 40 CFR 51.307 (b) and (c) for protection of visibility in mandatory Class I Federal areas from sources in nonattainment areas.

(b) Regulations for visibility monitoring and new source review. The provisions of § 52.28 are hereby incorporated and made part of the applicable plan for the State of Kentucky.

[FR Doc. 20639 Filed 8–31–89; 8:45 am]

BILLING CODE 6560-50-M

---

40 CFR Part 790

[OPTS–46019; FRL 3637–5]

Procedures Governing Testing Consent Agreements and Test Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule.

SUMMARY: EPA is amending the procedural rule in 40 CFR part 790 for manufacturers and processors of chemical substances and mixtures (chemicals) performing testing pursuant to section 4 of the Toxic Substances Control Act (TSCA) by modifying and clarifying the EPA procedures for reviewing and approving or denying modifications to test standards and test schedules. This includes stating that EPA will normally: (1) Require submission of requests to extend test schedules at least 30 days before the reporting deadline; (2) limit extensions to no longer than a period of time equal to the in-life portion of the test plus 60 days, but not to exceed 1 year; and (3) grant extensions of longer than 1 year without notice and comment rulemaking only if the delay is due to unforeseen circumstances such as a demonstrated lack of laboratory availability or of a suitable test substance. By this amendment, EPA intends to reduce delays in developing required health and environmental effects test data and reduce the paperwork burden for EPA and test sponsors. This amendment also requires that all exemption applications

include the CAS number of the chemical to which the application applies.

DATES: Effective on October 31, 1989. Submit written comments on or before October 2, 1989.

ADDRESSES: Submit written comments, identified by the docket number (OPTS-46019), in triplicate to: TSCA Public Docket Office (TS-793), Office of Toxic Substances, Environmental Protection Agency, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

All submitted public comments on this interim final rule will be available for public inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, Rm. EB-44, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION:

I. Introduction

Since 1987, EPA has promulgated over 20 test rules and consent orders that require test sponsors to perform health, environmental, and/or chemical fate tests according to specified test standards. In response to these rules and consent orders, test sponsors have submitted over 75 applications for modifying test standards or extending reporting deadlines. EPA has found that the time and effort needed to respond to these applications, especially those requiring notice and comment, has been far greater than expected. These amendments should decrease the number of applications for modification submitted by test sponsors and reduce the number of modifications that will require notice and comment.

EPA believes that these amendments make only procedural changes and do not impose any substantive requirements on manufacturers or processors subject to TSCA section 4(a) test rules and consent orders. However, EPA is inviting comment on these amendments and if these comments result in a need for changes to the interim final rule, EPA will modify this rule as appropriate. EPA will take all comments into consideration when promulgating a final rule on the procedures governing testing consent agreements and test rules.

II. Amendments

A. Modifications To Test Standards and Test Schedules

These amendments make several changes in the process that should result in test sponsors submitting fewer applications and will give EPA more flexibility in processing these applications in a timely manner.

Test sponsors should submit an application to modify a test standard only if they wish to modify one or more of the mandatory testing conditions or requirements in a test standard. The only mandatory requirements in a test standard are the "shall statements". There are few of these statements in most test standards, and they usually refer to the test species, route of exposure, length of test, minimum criteria for test acceptance, and minimum reporting requirements. If the testing laboratory selected by the test sponsor does not follow all of these "shall statements", the test sponsor may be held in violation of the rule or consent order.

Test sponsors are not required to adhere to the non-mandatory testing conditions in the test standard; i.e., the "should statements". These statements provide guidance on how to perform a test and need not be precisely followed by the test laboratory if they have a procedure they believe is better or equally acceptable.

If a test sponsor or test laboratory wants EPA to provide guidance or to clarify non-mandatory testing requirements (i.e., "should statements") they should directly contact the EPA project manager for that test rule or consent order. If the project manager is not known, the test sponsor should submit the request for guidance to the Public Docket for that rule or consent order.

The current procedural rule, in 40 CFR 790.55, lists four specific modifications of test standards or schedules that EPA considers "major". These modifications either significantly affect the scope of testing or significantly change the test schedule. Currently, EPA seeks public comment before approving any such modification. Through experience gained in handling modification requests, EPA now recognizes a need to refine the criteria that allow EPA to approve certain modifications without first seeking public comment.

Upon publication of this amendment, EPA may approve modifications to a test standard without first seeking public comment if EPA determines that the successful completion or achievement of a requirement or test condition (i.e., "shall statement") by the test laboratory is not technically feasible for that particular test chemical without modification.

With this amendment, EPA will have the authority to approve, without first obtaining public comments, a requested test schedule extension for up to 12 months instead of 6 months as currently allowed. EPA will, on a case-by-case basis, also have the latitude to approve extensions that exceed 12 months without first seeking public comment if EPA concludes that the delay is not the fault of the test sponsor and is due to unforeseen circumstances. Examples would include a demonstrated lack of test laboratory availability, a lack of availability of a suitable test substance (e.g., a 14-C labeled test organisms, or the unexpected failure of a long-term test near the end of the test.

EPA believes that this limited change in the types of circumstances for approving test standard and test schedule modifications without notice and comment is necessary to ensure the efficient and timely implementation of test rules and consent orders. Without the latitude to approve such modifications by letter, EPA would have to wait for notice and comment rulemaking before granting the modification, resulting in a delay of testing that would be much longer than if EPA granted the request by letter. EPA approval of test schedule extensions without seeking notice and comment, even if they exceed 12 months, should result in test results being submitted to EPA in a more timely manner. EPA believes this more flexible approach will benefit all parties.

B. Timing of Submission of Applications for Test Standard and Test Schedule Modifications

On several occasions, test sponsors have submitted applications for test schedule extensions just before the deadline for submission of the final report. These extension requests frequently did not contain factually documented reasons for the extension and usually suggested that the test sponsor was not closely monitoring the test laboratory.

Test sponsors should submit all applications for test schedule modifications as soon after they first realize that the test reporting deadline, as specified in the rule or consent order, cannot be met. Test sponsors should submit all extension requests at least 60 days before the reporting deadline to allow EPA sufficient time to evaluate the application and make a reasonable decision.

Unless there are extenuating circumstances, EPA does not intend to approve extension requests that are not submitted at least 30 days before the reporting deadline and do not include a sound rationale why the delay in testing could not have been avoided. The maximum time that EPA will grant for an extension will normally equal the period of time required to perform the in-life or on-test portion of the test plus 60 days, but not to exceed 1 year.

EPA has found that the time periods specified in test rules and consent orders for specific tests are more than adequate for the successful completion of each test. This includes time for the test sponsor to select and contract with a test laboratory, develop the analytical methods if needed, perform the preliminary and definitive testing, and prepare and submit a final report. Under most circumstances, an additional extension of time equal to the in-life portion of the test plus 60 days is sufficient to overcome typical testing problems or to repeat the test if necessary.

Once EPA has granted an extension to a specific reporting deadline, normally no additional extension will be granted for the same test. Most of the tests required in test rules and consent orders are routine tests that have been successfully completed at many testing laboratories.

C. Content of Exemption Applications

This amendment requires that all exemption applications submitted by manufacturers and processors include the CAS number of the chemical subject to the rule if a CAS number has been assigned.

D. Other Amendments

To clarify the procedural rule, EPA is making several minor changes to it. These include: (1) Stating that all study plan amendments must be sent to the Office of Compliance Monitoring; (2) requiring that test sponsors include in the study protocol submitted with the study plan the rationale for combining two or more test protocols into one test protocol; (3) requiring that the reporting dates in the study plan be within the deadlines specified in the rule or consent agreement; and (4) making it clear that EPA does not routinely review, at the time of submission, the protocols submitted with the study plan to determine if the protocols comply with the EPA test standards specified in the rule or consent agreement; this is the responsibility of the test sponsor

III. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this procedural rule change is not major because it does not meet any of the criteria set forth in section 1(b) of the Order; i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.* Pub. L. 96-354, September 19, 1980), EPA is certifying that this procedural rule change will not have a significant impact on a substantial number of small businesses because: (1) They are not likely to perform testing themselves, or to participate in the organization of the testing effort; (2) they would experience only very minor costs, if any, in securing exemption from testing requirements; and (3) small businesses are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in this interim final rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned an OMB control number of 2070-0033.

These changes in the procedural rule for implementation of section 4 of TSCA are expected to have a negligible effect on the public reporting burden. To the extent that the clearer guidance and criteria provided by these changes reduces the number of applications for test standard and test schedule modifications submitted by test sponsors, the reporting burden will be reached.

List of Subjects in 40 CFR Part 790

Chemicals, Environmental protection, Hazardous substances, Testing, Laboratories, Reporting and recordkeeping requirements.

Dated: August 21, 1989.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR, Part 790 is amended as follows:

PART 790—[AMENDED]

1. The authority citation for part 790 continues to read as follows:

Authority: 15 U.S.C. 2603.

2. In § 790.40, by revising the introductory text of paragraph (b)(1) to read as follows:

§ 790.40 Promulgation of test rules.

* * * * *

(b) * * *

(1) Under single-phase test rule development, EPA will promulgate a test rule in part 799 of this chapter through a notice and comment rulemaking which specifies the following:

* * * * *

3. In § 790.50, by revising paragraphs (a)(2), (b)(1), and (c)(1) (v) and (vi), and by adding paragraph (e) to read as follows:

§ 790.50 Submission of study plans.

(a) * * *

(2) Persons who notify EPA of their intent to conduct tests in compliance with the requirements of a Phase I test rule as described in § 790.40(b)(2) must submit the proposed study plans for those tests on or before 90 days after the effective date of the Phase I rule; or, for processors complying with the notice described in § 790.48(b)(2), 90 days after the publication date of that notice; or 60 days after the date manufacture or processing begins as described in § 790.45(d), as appropriate, to the address in § 790.5(b).

* * * * *

(b) * * *

(1) EPA may grant requests for additional time for the development of study plans on a case-by-case basis. Requests for additional time for study plan development must be made in writing to the Director, Office of Compliance Monitoring at the address in § 790.5(d). Each extension request must state why EPA should grant the extension.

* * * * *

(c) * * *

(1) * * *

(v) Study protocol, including the rationale for any combination of test protocols; the rationale for species/strain selection; dose selection (and supporting data); route(s) or method(s) of exposure; description of diet to be used and its source; including nutrients and contaminants and their concentrations; for *in vitro* test systems, a description of culture medium and its source; and a summary of expected spontaneous chronic diseases (including tumors), genealogy, and life span.

(vi) Schedule for initiation and completion of each short-term test and of each major phase of long-term tests; dates for submission of interim progress and final reports to EPA that are within the reporting deadlines specified by EPA In the final test rule.

* * * * *

(e) *Amendments to study plans.* Test sponsors shall submit all amendments to study plans to the Director, Office of Compliance Monitoring at the address in § 790.5(d).

4. In § 790.55, by revising paragraphs (a), (b)(3) and (b)(4)(iv), and by adding paragraph (d) to read as follows:

§ 790.55 Modification of test standards or schedules during conduct of test.

(a) *Application.* Any test sponsor who wishes to modify the test schedule or the mandatory testing conditions or requirements (i.e., "shall statements") in the test standard for any test required by a test rule must submit an application in accordance with this paragraph. Application for modification must be made in writing to the Director, Office of Compliance Monitoring at the address in § 790.5(d), or by phone with written confirmation to follow within 10 working days. Applications must include an appropriate explanation and rationale for the modification. Where a test sponsor requests EPA to provide guidance or to clarify a non-mandatory testing requirement (i.e., "should statements") in a test standard, the test sponsor should submit these requests to EPA at the address in § 790.5(b).

(b) * * *

(3) Where, in EPA's judgment, the requested modification of a test standard or schedule would significantly alter the scope of the test or significantly change the schedule for completing the test, EPA will publish a notice in the **Federal Register** requesting comment on the proposed modification. However, EPA will approve a requested modification of a test standard under paragraph (b)(3) of this section without first seeking public comment if EPA believes that an immediate modification to the test standard is necessary to preserve the accuracy or validity of an ongoing test. EPA may also modify a testing requirement or test condition in a test standard if EPA determines that the completion or achievement of this requirement or condition is not technically feasible. EPA may approve a test schedule extension under paragraph (b)(3) of this section without first seeking public comment if EPA determines, on a case-by-case basis, that a delay of over 12 months is not the fault of the test sponsor and is the result of unforeseen circumstances such as a lack of laboratory availability, lack of availability of suitable test substance (e.g., 14–C labelled test substance), lack of availability of healthy test organisms, or the unexpected failure of a long-term test. EPA will publish an annual notice in the **Federal Register** announcing the approval of any test standard modifications and test schedule extensions under paragraph (b)(3) of this section and provide a brief rationale of why the modification was granted.

(4) * * *

(iv) Except as provided in paragraph (b)(3) of this section, extend the final reporting deadline more than 12 months from the date specified in the final rule.

* * * * *

(d) *Timing.* (1) Test sponsors should submit all applications for test schedule modifications at least 60 days before the reporting deadline for the test in question.

(2) EPA will not normally approve any test schedule extensions submitted less than 30 days before the reporting deadline for the test in question.

(3) Except as provided in paragraph (b)(3) of this section, EPA may grant extensions for up to 1 year but will normally limit extensions to a period of time equal to the in-life portion of the test plus 60 days.

(4) EPA will normally approve only one deadline extension for each test.

(5) Test sponsors should submit requests for test standard modifications as soon as they determine that the test cannot be successfully completed according to the test standard specified in the rule.

5. In § 790.60, by revising paragraph (a)(8) to read as follows:

§ 790.60 Contents of consent agreements.

(a) * * *

(8) Schedules with reasonable deadlines for submitting interim progress and/or final reports to EPA.

* * * * *

6. In § 790.62, by revising paragraphs (a), (b)(9), and (c)(1), and by adding paragraph (c)(4) to read as follows:

§ 790.62 Submission of study plans and conduct of testing.

(a) *Timing of submission.* The principal sponsor of testing conducted pursuant to a consent agreement shall submit a study plan no later than 45 days prior to the initiation of testing.

(b) * * *

(9) Study protocol, including the rationale for any combination of test protocols; the rationale for species/strain selection; dose selection (and supporting data); route(s) or method(s) of exposure; description of diet to be used and its source, including nutrients and contaminants and their concentrations; for *in vitro* test systems, a description of culture medium and its source; and a summary of expected spontaneous chronic diseases (including tumors), genealogy, and life span.

* * * * *

(c) * * *

(1) Upon receipt of a study plan, EPA will review it to determine whether it complies with paragraph (b) of this section. If EPA determines that the study plan does not comply with paragraph (b) of this section, EPA will notify the submitter that the plan is incomplete and will identify the deficiencies and the steps necessary to complete the plan. It is the responsibility of the test sponsor to review the study protocols to determine if they comply with all the mandatory testing conditions and requirements in the test standards (i.e., "shall statements").

* * * * *

(4) The test sponsor shall submit any amendments to study plans to the Director, Office of Compliance Monitoring at the address specified in § 790.5(d).

7. In § 790.68, by revising paragraphs (b)(1), (b)(2)(iii), and (b)(iv)(D), and adding paragraph (c) to read as follows:

§ 790.68 Modification of consent agreements.

* * * * *

(b) * * *

(1) Any test sponsor who wishes to modify the test standard or schedule for any test required under a consent order must submit an application in accordance with this paragraph. Application for modification must be made in writing to the Director, Office of Compliance Monitoring at the address in § 790.5(d) or by phone, with written confirmation to follow within 10 working days. Applications must include an appropriate explanation of why the modification is necessary. EPA will consider only those applications that request modifications to mandatory testing conditions or requirements (i.e., "shall statements" in the consent order). Where a test sponsor requests EPA to provide guidance or to clarify a non-mandatory testing requirement (i.e., "should statements"), the test sponsor should submit these requests to EPA at the address in § 790.5(b).

(2) * * *

(iii) Where, in EPA's judgment, the requested modification of a test standard or schedule would significantly alter the scope of the test or significantly change the schedule for completing the test, EPA will publish a notice in the **Federal Register** requesting comment on the proposed modification. However, EPA will approve a requested modification of a test standard under paragraph (b)(2)(iii) of this section without first seeking public comment if EPA believes that an immediate modification to the test standard is

necessary to preserve the accuracy or validity of an ongoing test. EPA also may modify a testing requirement or test condition in a test standard if EPA determines that the completion or achievement of this requirement or condition is not technically feasible. EPA may approve a requested modification of a test schedule under paragraph (b)(2)(iii) of this section without first seeking public comment if EPA determines, on a case-by-case basis, that a delay of over 12 months is not the fault of the test sponsor and is due to unforeseen circumstances such as a lack of laboratory availability, lack of availability of suitable test substance (e.g., 14–C labelled test substance), lack of availability of healthy test organisms, or the unexpected failure of a long-term test. EPA will publish an annual notice in the **Federal Register** announcing the approval of any test standard modifications and test scheduled extensions under paragraph (b)(2)(iii) of this section, and provide a brief rationale of why the modification was granted.

(iv) * * *

(D) Except as provided in paragraph (b)(2)(iii) of this section, extend the final reporting deadline more than 12 months from the date specified in the consent order.

(c) *Timing.* (1) Test sponsors should submit all applications for test schedule modifications at least 60 days before the reporting deadline for the test in question.

(2) EPA will not normally approve any test schedule extensions submitted less than 30 days before the reporting deadline for the test in question.

(3) Except as provided in paragraph (b)(2)(iii) of this section, EPA may grant extensions as shown necessary for up to 1 year but will normally limit extensions to a period of time equal to the in-life portion of the test plus 60 days.

(4) EPA will normally approve only one deadline extension for each test.

(5) Test sponsors should submit requests for test standard modifications as soon as they determine that the test cannot be successfully completed according to the test standard specified in the consent order.

8. In § 790.82, by revising paragraph (a) to read as follows:

§ 790.82 Content of exemption application.

* * * * *

(a) The identity of the test rule, the chemical identity, and the CAS No. of the test substance on which the application is based.

* * * * *

[FR Doc. 89–20580 Filed 8–31–89; 8:45 am]
BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 56 and 164

[CGD 86–035]

RIN 2115–AC32

Prohibition of Asbestos-Containing Construction Materials

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is revising the approval specification for noncombustible materials to delete references to asbestos as an acceptable noncombustible material for the construction of merchant vessels, and to update the list of designated testing laboratories for noncombustible materials. It is also deleting references to asbestos gaskets from the regulations on piping systems. The Coast Guard no longer issues approvals for asbestos-containing structural fire protection materials, and does not permit the use of such materials in merchant vessel construction. The action taken under this docket makes the regulations consistent with established Coast Guard practice.

EFFECTIVE DATE: October 2, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Klaus Wahle, Office of Marine Safety, Security, and Environmental Protection, (202) 267–1444.

SUPPLEMENTARY INFORMATION: Coast Guard regulations require the construction of sections of certain types of commercial vessels to be of approved structural fire protection materials. The materials approval specifications are contained in subchapter Q of title 46 CFR. Materials which have complied with the applicable provisions of these specifications are issued Certificates of Approval.

Traditionally, many materials approved for fire protection purposes have contained asbestos. As the health hazards of asbestos became known, manufacturers of structural fire protection materials switched from producing asbestos-containing materials to asbestos-free substitutes. Now, no asbestos-containing materials are used.

A notice of proposed rulemaking was published in the **Federal Register** on December 1, 1988 (53 FR 48556), inviting comments for 45 days ending January 17, 1989. No comments were received during the comment period.

The approval specification for noncombustible materials, 46 CFR 164.009, is being revised to formally remove references to asbestos as an acceptable structural fire protection material. Additionally, this rulemaking updates the list of designated laboratories contained in § 164.009–1.

The Coast Guard is also revising 46 CFR 56.25–15, to delete reference to asbestos-metallic gaskets for high temperature or high pressure piping systems. The notice of proposed rulemaking had proposed deletion of asbestos-metallic gaskets, leaving only metal as suitable gasket material.

After the closing of the public comment period a comment was received indicating that suitable asbestos-free nonmetallic gaskets are now commercially available. In order to enable the industry to avail itself of the widest possible source of gaskets, the regulations have been revised to permit either metallic or suitable asbestos-free nonmetallic gaskets for high temperature and high pressure pipe.

Drafting information

The principal persons involved in drafting this proposal are: Mr. Klaus Wahle, Project Manager, and Lieutenant Commander Don. M. Wrye, Project Attorney, Office of Chief Counsel.

Regulatory Evaluation

This final rule is considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). References to asbestos and asbestos-containing materials as acceptable for use in vessel construction and as gasket material are simply being deleted, and the list of designated testing laboratories for noncombustible materials updated. Since the use of asbestos is now obsolete, and asbestos-free substitutes are readily available, the economic impact on vessel construction or replacement of gaskets has been found to be minimal. Because the economic impact of this rulemaking is expected to be so minimal, the Coast Guard certifies that it will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

These regulations do not contain any information collection or recordkeeping requirements.

Environmental Analysis

These regulations have been thoroughly reviewed by the Coast Guard and have been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2. of Commandant Instruction (COMDTINST) M16475.1B.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that these regulations do not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects

46 CFR Part 56

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 164

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, Chapter I of Title 46, Code of Federal Regulations is amended as follows:

PART 56—PIPING SYSTEMS AND APPURTENANCES

1. The authority citation for part 56 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5515; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

2. In § 56.25–15, paragraphs (b) and (c) are revised to read as follows:

§ 56.25–15 Gaskets (reproduces 108.4).

* * * * *

(b) Only metallic and suitable asbestos-free nonmetallic gaskets may be used on flat or raised face flanges if the expected normal operating pressure exceeds 720 pounds per square inch or the operating temperature exceeds 750 °F.

(c) The use of metal and nonmetallic gaskets is not limited as to pressure provided the gasket materials are suitable for the maximum fluid temperatures.

PART 164—MATERIALS

3. The authority citation for part 164 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

4. In § 164.009–1, paragraph (b) is revised to read as follows:

§ 164.009–1 General.

* * * * *

(b) The test and measurements described in this subpart are conducted by a laboratory designated by the Commandant. The following laboratories are so designated:

Underwriters Laboratories, Inc., 333 Pfingsten Road, Northbrook, IL 60062
Dantest, National Institute for Testing and Verification, Amager Boulevard 115, DK 2300 Copenhagen S., Denmark

§ 164.009–3 [Removed]

5. Section 164.009–3 is removed.

§ 164.009–5 [Redesignated as § 164.009–3]

6. Section 164.009–5 is redesignated as § 164.009–3 and revised to read as follows:

§ 164.009–3 Noncombustible materials not requiring specific approval.

The following noncombustible materials may be used in merchant vessel construction though not specifically approved under this subpart:

(a) Sheet glass, block glass, clay, ceramics, and uncoated fibers.

(b) All metals, except magnesium and magnesium alloys.

(c) Portland cement, gypsum, and magnesite concretes having aggregates of only sand, gravel, expanded vermiculite, expanded or vesicular slags, diatomaceous silica, perlite, or pumice.

(d) Woven, knitted or needle punched glass fabric containing no additives other than lubricants not exceeding 2.5 percent.

Dated: August 10, 1989.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88–603; RM–6455]

Radio Broadcasting Services; Hot Springs Village, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allows FM Channel 225A to Hot Springs Village, Arkansas, as that community's first local broadcast service, in response to a petition for rule making filed on behalf of Caddo Broadcasting. See 54 FR 4862, January 31, 1989. Coordinates utilized for Channel 225A at Hot Springs Village are 34–40–19 and 92–59–55. With this action, the proceeding is terminated.

DATES: Effective October 10, 1989; The window period for filing applications on Channel 225A at Hot Springs Village, Arkansas, will open on October 11, 1989, and close on November 9, 1989.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–603, adopted August 7, 1989, and released November 9, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 40, Washington, DC 20037.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

47 CFR PART 73—[AMENDED]

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments is amended under Arkansas, by adding Hot Springs Village, Channel 225A.

Federal Communications Commission.

Karl A. Kensinger,

Chief, Allocations Branch Policy and Rules Division Mass Media Bureau.

Proposed Rules

Federal Register
Vol. 54, No. 169
Friday, September 1, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–CE–12–AD]

Airworthiness Directives; Beech 90 and 100 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD) applicable to certain Beech Models 65–90, 65–A90, 65–A90–1, 65–A90–2, 65–A90–3, 65–A90–4, B90, C90, C90A, E90, 100, A100, and B100 airplanes which would supersede AD 87–23–09 and AD 70–25–04. The superseded AD's currently require repetitive inspections of the wing main spar lower cap and associated structure. This amendment would incorporate those portions of the superseded AD's which remain valid, and would correct certain minor editorial errors.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Beech Structural Inspection and Repair Manual (SIRM) P/N 98–39006, Revision A4, dated May 1, 1987, applicable to this AD may be obtained from Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085. Aviadesign Engineering Order E.O. B–8001, Issue 3, dated May 30, 1985, may be obtained from Western Aircraft Maintenance, 4444 Aeronca Street, Boise, Idaho 83705. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–12–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, Holidays excepted.

FOR FURTHER INFORMATION CONTACT: Don Campbell, Aerospace Engineer, Airframe Branch, ACE–120W, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–12–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

AD 87–23–09, Amendment No. 39–5765, published in the **Federal Register** on November 12, 1987 (52 FR 43318), requires inspection of the wing main spar lower cap and attach fittings for fatigue cracks. When this AD was promulgated, certain serial numbers of the Beech Model 65–90 were omitted from the effectivity because the airplanes were already being repetitively inspected per AD 70–25–04, Amendment No. 39–1332, published in the **Federal Register** on November 12, 1971 (36 FR 21668). For reasons discussed below, AD 70–25–04 is considered obsolete. It relies on an outdated Beech Service Instruction (No. 0394–018) for inspection criteria. These improved criteria are now available in the Beech Structural Inspection and Repair Manual (SIRM). Certain portions of the SIRM have been made mandatory by AD 87–23–09 for all 90 Series airplanes except Serials LJ–1 through LJ–67. The SIRM inspections are known to be effective in that at least 20 cracked wing spar components have been found by these inspections since September, 1983, out of the entire fleet of approximately 1550 airplanes. These inspections have been performed by Beech-trained personnel using state-of-the-art methods. This contrasts against the inspection methods in AD 70–25–04, which have found no cracks since September, 1979, in the fleet of 67 airplanes, applying the outdated inspection criteria and not necessarily utilizing Beech-trained personnel. Additional cause for requiring improved inspections on these 67 airplanes is that the wing lower forward attach fittings are not as durable as the improved fittings on airplanes having serial numbers LJ–68 and higher. The likelihood of cracks occurring in the attach fittings of these 67 airplanes is probably higher than for the remaining fleet. The likelihood of spar cap cracks would be about the same as for the remaining fleet. Since the remaining fleet is already protected by AD 87–23–09, the first 67 airplanes should be offered the same protection.

Another deficiency of AD 70–25–04 is that it calls for inspection of the wing skin adjacent to the attach fitting for cracks, and requires further inspections only if skin cracks are found. Since skin cracks are not an indicator of, and in fact are not related to, the condition of the attach fitting or spar cap, the straight-forward fitting and spar cap inspection methods in the SIRM are much preferred.

Based on the above discussion, it is proposed that AD's 87–23–09 and 70–25–04 be superseded by a new AD which follows the inspection requirements of AD 87–23–09. Also, the mailing address on the reporting form included in AD 87–23–09 would be changed and an omission in paragraph (e) of AD 87–23–09 will be corrected by adding a reference to Beech Wing Modification Kit No. 100-4007-1S.

Since the condition described in likely to exist or develop in other Beech 90 Series Airplanes of the same design, the proposed AD would require inspection of the wing main spar structure in accordance with the Beech SIRM. The FAA has determined there are approximately 1617 airplanes affected by the proposed AD. The cost of inspecting these airplanes in accordance with the proposed AD is estimated to be the same as already required by AD's 87–23–09 and 70–25–04. Therefore, the proposed revision has no economic impact on the private sector.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism duplications to warrant the preparation of a Federalism Assessment. Therefore, I certify that this action (1) Is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of 14 CFR part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. By superseding AD 87–23–09 Amendment Number 39–5765 and AD 70–25–04, Amendment Number 39–1332 with the following new AD:

Beech: Applies to Models 65–90 and 65–A90 (S/N LJ–1 thru LJ–317); 65–A90–1, 65–A90–2, 65–A90–3, 65–A90–4, B90, C90 (all S/N); C90A (S/N LJ–1063 thru LJ–1087, except LJ–1085); E90, 100, A100 and B100 (all S/N) airplanes certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To detect possible fatigue cracking of the wing main spar lower cap and associated structure, accomplish the following:

(a) Within the next 200 hours time-in-service (TIS), after the effective date of this AD, or upon accumulating 3000 hours TIS, whichever occurs later, unless previously accomplished per Ad 87–23–09, Amendment 39–5765, or AD 70–25–04, Amendment 39–1332, and thereafter at intervals not to exceed 1000 hours TIS (except as provided in paragraph (b) below) after the initial inspection, inspect the wing lower forward spar attach fittings, center section and outboard wing spar caps adjacent to the attach fittings by visual, fluorescent penetrant and eddy current methods as specified in the applicable section of Beech Structural Inspection and Repair Manual (SIRM), P/N 98–39006, Revision A4, dated May 1, 1987. The inspection must be performed by personnel specifically trained by Beech Aircraft Corporation.

Note 1. Beech offers a two-day training course free of charge to qualified personnel who have prior knowledge of eddy current inspection techniques. A listing of Beech Corporate maintenance facilities may be obtained from the sources contained in paragraph (h) of this AD. A listing of other facilities employing qualified inspectors is not available.

(b) At each inspection required by paragraph (a) above, inspect any reinforcing strap installed per Supplemental Type Certificate (STC) SA1178CE or SA1583CE for proper tension and condition in accordance with Aviadesign Engineering Order E.O. B–8001, Issue 3, dated May 30, 1985. Correct any discrepancy prior to further flight. For airplanes so equipped and inspected, the repetitive inspection interval of 1000 hours TIS in paragraph (a) above may be extended to 3000 hours TIS.

(c) If any crack is found in a main spar lower cap or fitting, prior to further flight repair or replace the defective part using the instructions and limitations specified in the Beech SIRM or other FAA approved instructions provided by Beech Aircraft Corporation.

(d) Within one week after completion of any inspection required by paragraph (a) or (b) of this AD, complete the reporting form included with this AD as Figure 1 and mail it to the address shown thereon (Reporting approved by the Office of Management and Budget under OMB No. 2120–0056).

(e) The initial and repetitive inspections specified in this AD are no longer required when the airplane is modified by Beech Wing Modification Kit No. 90–4077–1S or 100–4007–1S.

(f) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD can be accomplished.

(g) An alternate method of compliance or adjustment of the initial or repetitive compliance times, which provides an equivalent level of safety, may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4400.

Note 2: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office, at the above address.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Beech Aircraft Corporation, Commercial Service, Department 52, Wichita, Kansas 67201–0085, or Western Aircraft Maintenance, 4444 Aeronca Street, Boise, Idaho 83705, or examined at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment supersedes AD 87–23–09, Amendment 39–5765, and Ad 70–25–04, Amendment 39–1332.

Issued in Kansas City, Missouri, on August 23, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate Aircraft Certification Service.

[Document No. 89–CE–18–AD]

Airworthiness Directives; Beech 65–80 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD), applicable to certain Beech Models 65, 65–80, 65–A80 and 65–B80 airplanes, which would supersede AD 70–25–01, Amendment 39–1609. The FAA has determined that improved inspection criteria is available that will enhance the effectiveness of the required inspections. The proposed AD incorporates this new criteria.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Beech Structural Inspection and Repair Manual (SIRM) P/N 98–39006, Revision A4, dated May 1, 1987, applicable to this AD, may be obtained from the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085. Aviadesign Engineering Order E.O. B–8001, Issue 3, dated May 30, 1985, may be obtained from Western Aircraft Maintenance, 4444 Aeronca Street, Boise, Idaho 83705. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–18–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Don Campbell, Aerospace Engineer, Airframe Branch, ACE–120W, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–18–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

AD 70–25–01, Amendment 39–1609, published in the **Federal Register** on March 22, 1973 (38 FR 7451), requires inspections for fatigue cracking of the wing main spar lower cap and attach fittings on certain Beech 65–80 Series airplanes. AD 70–25–01 relies on an obsolete Beech Service Instruction (No. 0393–018) for the inspection criteria. Improved criteria are now available in the Beech Structural Inspection and Repair Manual (SIRM). The SIRM methods have been available for Beech 90 and 100 Series airplanes since September 1986, and are known to be effective. The criteria in AD 70–25–01 has also been used for the 90 Series airplanes, and have been found not to be as effective as the SIRM methods. Therefore, the FAA has determined that the methods in the SIRM should be used in lieu of the AD 70–25–01 criteria. In addition, AD 70–25–01 currently calls for inspections of the wing skin adjacent to the attach fitting for cracks, and requires further inspections only if skin cracks are found. The FAA has determined that skin cracks are not an indicator of, and in fact are not related to, the condition of the attach fitting or spar cap and that the straight-forward fitting and spar cap inspection methods specified in the SIRM should be utilized.

Therefore, the FAA proposes to supersede AD 70–25–01 with a new AD based on the SIRM inspection methods. The proposed AD is similar to that in effect for the Beech 90 and 100 Series, except for the training requirements for inspection personnel. The need for special training is not warranted by the service history for the 65–80 Series as it is for the 90 and 100 Series since only five cracked wing attach fittings have been found throughout the history of the 65–80 Series and no spar cap cracks have been found. AD 70–25–01 is effective at 3,000 hours time-in-service (TIS) for Models 65–80 and 65–A80 airplanes, and at 5,000 hours TIS for Models 65 and 65–B80 airplanes. The same effectivity is proposed in the superseding AD. The inspection interval in AD 70–25–01 is 500 hours TIS, decreasing to 300 hours TIS if skin cracks appear. A 1,000 hour TIS inspection interval is proposed for the superseding AD, and skin crack inspections are not included. As in the case of the AD on the Beech 90 and 100 Series, the inspection interval is lengthened to 3,000 hours TIS if a reinforcing strap is installed per STC SA1583CE and maintained with proper tension. The supersedure is therefore relaxatory.

Since the condition described is likely to exist or develop in other Beech 65–80 Series airplanes of the same design, the proposed AD would require inspections of the wing main spar structure in accordance with the Beech SIRM. The FAA has determined there are approximately 739 airplanes affected by the proposed AD. The cost of inspecting these airplanes in accordance with the proposed AD is estimated to be less than that required by AD 70–25–01. Therefore, the proposed revision has no additional economic impact on the private sector.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 70–25–01, Amendment Number 39–1609, with the following new AD:

Beech: Applies to Models 65 (serial numbers (S/N) L–1, L–2, L–6, LF–7 through LF–76, and LC–1 through LC–180); 65–80 and 65–A80 (S/N LD–1 through LD–244); 65–A80 (S/N LD–245 through LD–269) when Beech Modification Kit No. 80–4004–1 or –3 is installed; and 65–B80 (all S/N) airplanes certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To detect possible fatigue cracking of the wing main spar lower cap and associated structure, accomplish the following:

(a) Within 200 hours time-in-service (TIS) after the effective date of this AD, or upon accomplishing 3000 hours TIS on Models 65–80 and 65–A80 airplanes, or upon accumulating 5000 hours TIS on Models 65 and 65–B80 airplanes, whichever occurs later, and thereafter at intervals not to exceed 1000 hours TIS (except as provided in paragraph (b) below) after the initial inspection, inspect the wing lower forward spar attach fittings, center section and outboard wing spar caps adjacent to the attach fittings by visual, fluorescent penetrant and eddy current methods as specified in the applicable section of Beech Structural Inspection and Repair Manual (SIRM), P/N 98–39006, Revision A4, dated May 1, 1987.

Note 1: Beech offers a two-day training course free of charge to qualified personnel who have prior knowledge of eddy current inspection techniques. A listing of Beech Corporate maintenance facilities may be obtained from the sources identified in paragraph (f) of this AD. A listing of other facilities employing qualified inspectors is not available.

(b) At each inspection required by paragraph (a) above, inspect any reinforcing strap installed per Supplemental Type Certificate (STC) SA1583CE for proper tension and condition in accordance with Aviadesign Engineering Order E.O. B–8001, Issue 3, dated May 30, 1985. Correct any discrepancy prior to further flight. For airplanes equipped with STC SA1583CE and inspected in accordance with paragraph (a) above, the repetitive inspection interval of 1000 hours TIS in paragraph (a) above may be extended to 3000 hours TIS.

(c) If any crack is found in a main spar lower cap or fitting, prior to further flight repair or replace the defective part using the instructions and limitations specified in the SIRM or other FAA approved instructions provided by Beech Aircraft Corporation.

(d) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD can be accomplished.

(e) An alternate method of compliance or adjustment of the initial or repetitive compliance times, which provides an equivalent level of safety, may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4400.

Note 2: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office, at the above address. All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Beech Aircraft Corporation, Commercial Service, Department 52, P.O. Box 85, Wichita, Kansas 67201–0085; or Western Aircraft Maintenance, 4444 Aeronca Street, Boise, Idaho 83705; or these documents may be examined at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment supersedes AD 70–25–01, Amendment 39–1609.

Issued in Kansas City, Missouri on August 23, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 89–NM–161–AD]

Airworthiness Directives; Boeing of Canada, Ltd., de Havilland Division, Model DHC–7 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to all de Havilland Model DHC–7 series airplanes, which would require a visual inspection for loose rivets, low frequency ultrasonic inspection for disbonding of unriveted stringers on fuselage skins, and repair, if necessary. This proposal is prompted by a recent report of disbonding found during routine inspection in a waffle doubler/belly skin. This condition, if not corrected, could lead to reduced structural capability of the fuselage and subsequent decompression of the airplane.

DATES: Comments must be received no later than October 23, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 89–NM–161–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. Anthony Socias, Airframe Branch, ANE–172; telephone (516) 791–6220. Mailing Address: FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Valley Stream, New York 11581.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–167–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

Transport Canada, which is the airworthiness authority of Canada, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on de Havilland Model DHC–7 series airplanes. There has been a recent report of disbonding found during a routine inspection in a waffle doubler/belly skin. The disbonding is not attributed to prior damage and is currently under investigation by the manufacturer. This condition, if not corrected, could lead to reduced structural capability of the fuselage and subsequent decompression of the airplane.

Boeing of Canada, Ltd., de Havilland Division, has issued Service Bulletin 7–53–33, Revision A, dated June 9, 1989, which describes procedures for a visual inspection for loose rivets and low frequency ultrasonic testing to check for disbonding of unriveted stringers on fuselage skins, between the flight compartment bulkhead and the passenger door/emergency exit areas, and repair, if necessary. Transport Canada has classified this service bulletin as mandatory, and has issued Airworthiness Directive No CF–89–07 addressing this subject.

This airplane model is manufactured in Canada and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require a visual inspection for loose rivets and low frequency ultrasonic testing to check for disbonding of unriveted stringers on fuselage skins, and repair, if necessary, in accordance with the service bulletin previously described. In addition, operators would be required to submit a report of their inspection findings to the FAA, Transport Canada, and the manufacturer.

This is considered to be interim action. The manufacturer is currently attempting to determine the extent and nature of the addressed damage, and is developing an appropriate repetitive inspection schedule and/or modification that will preclude the need for repetitive inspections. Once these are developed, the FAA may consider further rulemaking to revise this AD to require additional necessary actions.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB Control Number 2120–0056.

It is estimated that 42 airplanes of U.S. registry would be affected by this AD, that it would take approximately 36 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $60,480.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation Safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing of Canada, LTD., De Havilland Division: Applies to all Model DHC–7 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent reduced structural capability of the fuselage and subsequent decompression of the airplane, accomplish the following:

A. Within 30 days after the effective date of this AD, perform the following inspections and repair, in accordance with de Havilland Service Bulletin 7–53–33, Revision A, dated June 9, 1989:

1. Perform a low frequency ultrasonic inspection for disbonding of the fuselage belly skin doublers, between fuselage stations X248.00 and X535.25 below stringer 20 left and right, in accordance with Inspection Part A of the service bulletin.

2. Visually inspect for looseness or working of the rivets in the vertical skin joints, at fuselage stations X535.25 and X576.25 below stringer 20, left and right.

3. Visually inspect for looseness or working of the rivets in the fuselage skin joints at station X630.00 around the complete periphery of the fuselage, above and below the passenger and emergency exit doors.

4. Visually inspect for looseness or working of the rivets in the skin longitudinal joint between fuselage stations X424.00 to X484.00 along stringer 20, left and right. Pay particular attention to the lower line of rivets.

5. Repair all loose rivets prior to further flight, in a manner approved by the Manager, New York Aircraft Certification Office, ANE–170, FAA, New England Region.

6. Repair all disbonding prior to further flight, in accordance with the service bulletin.

B. Within 90 days after the effective date of this AD:

1. Perform a low frequency ultrasonic inspection for disbonding of the fuselage left and right sidewall skin doublers, between fuselage stations X248.00 and X596.75, between stringer 20 and 10, in accordance with de Havilland Service Bulletin 7–53–33, Revision A, dated June 9, 1989.

2. Repair any disbonding prior to further flight, in accordance with the service bulletin.

C. Within 150 days after the effective date of this AD:

1. Perform a low frequency ultrasonic inspection for disbonding of the fuselage roof skin doublers between fuselage stations X248.00 and X630.00, between stringer 10, left and right, in accordance with de Havilland Service Bulletin 7–53–33, Revision A., dated June 9, 1989.

2. Repair any disbonding prior to further flight, in accordance with the service bulletin.

D. Within 3 days after accomplishing each of the inspections required by paragraphs A., B., and C., above, report all findings, positive or negative, to the Director, Airworthiness Branch, Transport Canada, Ottawa, Canada; to the manufacturer, Boeing of Canada, Ltd., de Havilland Division, in accordance with de Havilland Service Bulletin 7–53–33, Revision A, dated June 9, 1989; and to the FAA, Manager, New York Aircraft Certification Office, ANE–170, New England Region.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office, ANE–170, FAA, New England Region.

NOTE: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, New York Aircraft Certification Office, ANE–170.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or New York Aircraft Certification Office, FAA, New England Region, 181 South Franklin Avenue, Valley Stream, New York.

Issued in Seattle, Washington, on August 23, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-NM-154-AD]

Airworthiness Directives; Fokker Model F-27 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to Fokker Model F-27 Series Airplanes, which currently requires a one-time inspection of both the right and left upper nacelle brace struts, and replacement of struts if the struts are found with self-tapping screws. This action would expand the applicability of the existing AD to include additional affected airplanes. This proposal is prompted by discovery of brace struts with self-tapping screws on an airplane which was not included in the existing AD. This condition, if not corrected, could result in engine separation and subsequent structural damage to the airplane aft of the engine.

DATES: Comments must be received no later than October 23, 1989.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-154-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Fokker Aircraft USA, Inc., 1199 N. Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mark Quam, Standardization Branch, ANM-103; telephone (206) 431-1978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-address, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-154-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

On February 6, 1989, the FAA issued AD 89-04-06, Amendment 39-6143 (54 FR 6642; dated February 14, 1989), to require inspection of both the right and left upper nacelle brace struts in accordance with Fokker Service Bulletin F27/54-44, dated July 7, 1988. If any brace strut is found with a self-tapping screw, the brace strut is to be replaced prior to the accumulation of 30,000 landings on the strut, or within the next 500 landings after the AD effective date of the AD (March 28, 1989), whichever occurs later.

That action was prompted by a report of a broken upper nacelle brace strut on Model F-27 which apparently failed due to fatigue cracking that initiated at the hole of a self-tapping screw. The broken brace strut was found to deviate from the production configuration by not having a welded washer with a screw at both ends of the brace strut tube. This condition, if not corrected, could result in engine separation and subsequent structural damage to the airplane aft of the engine.

Since issuance of that AD, brace struts with self-tapping screws were discovered on an airplane which was not included in the applicability of the existing AD (or the effectivity of the applicable service bulletin).

Fokker has now issued Service Bulletin F27/54-44, Revision 1, dated May 19, 1989, which includes Model F-27 airplanes, Serial Numbers 10308 through 10340, and 10342 through 10360, in its effectivity. The RLD has classified this revised service bulletin as mandatory, and has issued Netherlands Airworthiness Directive BLA No. 88-44, Issue 2, dated June 16, 1989.

This airplane model is manufactured in the Netherlands and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would expand the applicability of AD 89-04-06 to include all affected U.S.-registered airplanes, and reflect Revision 1 of the service bulletin in the requirements of the AD. This action would ensure, for all U.S.-registered airplanes, that a one-time inspection of the right and left upper-nacelle struts, and replacement of struts if found with self-tapping screws, is accomplished in accordance with the service bulletin previously described.

It is estimated that 1 additional airplane of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $160.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by amending Amendment 39-6143 (54 FR 6642; dated February 14, 1989), AD 89-04-06, as follows:

Fokker: Applies to Model F-27 series airplanes, Serial Numbers 10102 through 10307, 10308 through 10340, and 10342 through 10360, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent engine separation and subsequent structural damage to the airplane aft of the engine, accomplish the following:

A. For airplanes listed in Fokker Service Bulletin F27/54-44, dated July 7, 1988: Within 60 days after March 28, 1989 (the effective date of AD 89-04-06, Amendment 39-6143), inspect both the right and left upper nacelle brace struts, in accordance with Fokker Service Bulletin F27/54-44, dated July 7, 1988. If any brace strut is found with a self-tapping screw, prior to the accumulation of 30,000 landings on the strut, or within the next 500 landings from May 27, 1989, whichever occurs later, replace the brace strut in accordance with the referenced service bulletin.

B. For airplanes Serial Numbers 10308 through 10340 and 10342 through 10360: Within 60 days after the effective date of this amendment, inspect both the right and left upper nacelle brace struts, in accordance with Fokker Service Bulletin F27/54-44, Revision 1, dated May 19, 1989. If any brace strut is found with a self-tapping screw, prior to the accumulation of 30,000 landings on the strut, or within the next 500 landings after the effective date of this amendment, whichever occurs later, replace the brace strut in accordance with the referenced service bulletin.

C. An alternate means of compliance of adjustment of the compliance time, which provides an acceptable level of sefety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manfacturer may obtain copies upon request to Fokker Aircraft USA, Inc., 1199 N. Fairfax Street, Alexandria, Virginia 22314. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 23, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-ASW-10]

Airworthiness Directives; McDonnell Douglas Helicopter Company (MDHC) Model 369 Series Helicopters (Including the YOH-6A and OH-6A)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would require a one-time inspection of engine-to-transmission driveshaft couplings and removal and replacement with airworthy parts, if necessary, on MDHC Model 369 series helicopters. The proposed AD is needed to prevent failure of engine-to-transmission couplings which could result in loss of control of the helicopter.

DATES: Comments must be received on or before October 16, 1989.

ADDRESSES: Comments on the proposed may be mailed in duplicate to: Regional Rules Docket, FAA, Office of the Assistant Chief Counsel, Fort Worth, Texas 76193-0007, or delivered in duplicate to 4400 Blue Mound Road, Room 158, Building 3B, of the Regional Rules Docket at the above address. Comments must be marked: Docket No. 89-ASW-10. Comments may be inspected at the above location in Room 158 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

The applicable service information may be obtained from: McDonnell Douglas Helicopter Company, 5000 E. McDowell Road, Attention: Publications Department, MS543/D214, Mesa, Arizona 85205, or may be examined in the Regional Rules Docket.

FOR FURTHER INFORMATION CONTACT: Mr. Roy McKinnon, Aerospace Engineer, ANM-143L, FAA, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425, telephone (213) 988-5247.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the FAA before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Room 158, Building 3B, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket

Number 89–ASW–10. The postcard will be date/time stamped and returned to the commenter.

There have been reports of cracks in the spline area of the engine-to-transmission driveshaft coupling, Part Number (P/N) 369H5660, which may lead to failure of the part on MDHC 369 series helicopters. Failure of this part could result in engine overspeed and loss of power to the main rotor transmission resulting in an unplanned autorotation. Since this condition is likely to exist or develop on other helicopters of the same type design, the proposed AD would require a one-time inspection and replacement of parts, as necessary, to assure no couplings, serial numbers 5200 through 5309, are installed on MDHC Model 369 series helicopters.

The regulations proposed herein would not have a direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves approximately 1,000 helicopters with an approximate cost of only $80 per helicopter. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

PART 39—AIRWORTHINESS DIRECTIVES

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of 14 CFR part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

McDonnell Douglas Helicopter Company (MDHC): Applies to Model 369 series helicopters (including Models YOH–6A and OH–6A) certificated in any category.

Compliance required as indicated, unless already accomplished.

To prevent possible failure of the engine-to-transmission driveshaft coupling, which could result in loss of control of the helicopter, accomplish the following:

(a) Within the next 25 hours' time in service or within 120 days after the effective date of the AD, whichever occurs first, inspect the couplings, MDHC Part Number (P/N) 369H5660, to determine serial numbers.

(b) Replace any couplings, P/N 369H5660, which have serial numbers in the range from 5200 through 5309, with airworthy parts.

(c) Record compliance with paragraph (a) of this AD in the AD compliance record and in the maintenance record of the helicopter log book. Record the serial numbers of any deficient couplings found during compliance with this AD.

NOTE: MDHC Service Information Notices HN–216, DN–157, EN–47, FN–35, dated April 5, 1989, pertain to this subject.

(d) In accordance with FAR §§ 21.197 and 21.199, flight is permitted to a base where the requirements of this AD may be accomplished.

(e) An alternate method of compliance or adjustment of the compliance time which provides an equivalent level of safety, may be used if approved by the Manager, Los Angeles Aircraft Certification Office, ANM–100L, FAA, 3229 East Spring Street, Long Beach, California 90806–2425. Note: Unairworthy couplings removed from service and in spares inventory should be marked unairworthy. Unairworthy couplings should be purged from spares inventory in accordance with MDHC SIN HN–216, DN–157, EN–47, FN–35, dated April 5, 1989.

Issued in Fort Worth, Texas, on August 22, 1989.

James D. Erickson,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 109

[Docket No. 89N–0014]

RIN 0905–AC91

Lead From Ceramic Pitchers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: The Food and Drug Administration (FDA) is reopening for 90 days the period for submitting comments on its proposal to establish a regulatory limit for ceramic food-service pitchers, excluding creamers, that would limit the leaching of lead from the glazes and decorations on the food-contact surface of these pitchers to no more than 0.1 microgram per milliliter (µg/mL) of test solution and to consider all decorative ceramicware that appears to be suitable for food use to be for food use unless it is otherwise conspicuously and permanently marked or made unsuitable for food by drilling a hole in the food-contact surface. In addition, the agency is reopening for 180 days the period for submitting comments on the need to decrease leachable lead from other ceramicware and appropriate measures for achieving any needed decrease. FDA is reopening the comment period in response to request from the Coalition for Safe Ceramicware, the European Economic Community, and the Italian Embassy.

DATES: Comments by November 30, 1989, for ceramic pitchers and decorative ceramicware and by February 28, 1990, for all other issues.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Terry C. Troxell, Center for Food Safety and Applied Nutrition (HFF–312), Food and Drug Administration, 200 C St. SE., Washington, DC 20204, 202–485–0229.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 1, 1989 (54 FR 23485), FDA issued a proposed rule that would limit the amount of leachable lead from the glazes and decorations on the food-contact suface of ceramic food-service pitchers, excluding creamers, to no more than 0.1 µg/mL of test solution. The agency proposed this action based on recent toxicology and epidemiology studies on lead which have shown adverse effects in children, including deficits in intelligence and reduced stature, at lead exposure levels that were once thought not to be associated with adverse effects.

The agency further proposed to establish a regulation that would provide that all decorative or ornamental ceramicware that appears to be suitable for food use (i.e., is capable of holding food and may be asumed by the consumer to be for food use) will be deemed to be intended for food use and will be regulated as such unless it is otherwise conspicuously and

permanently marked, "Not for Food Use—May Poison Food," or a hole is bored through the potential food-contact suface of the decorative ceramicware to make it unsuitable for food use.

Finally, the agency requested comments on a variety of concerns regarding lead, including lead toxicity and the provisional tolerable intake range; the leachability of and exposure to lead from a variety of ceramicware under various conditions; the lowest leachable lead levels routinely attainable for various types of ceramicware; the impact of the proposed regulations; and the availability of alternative lead-free glazes and decorations including the leachability of potentially toxic substances from these glazes.

FDA received a request for a 180-day extension of the comment period from a group of ceramicware corporations and associations. They stated that this additional time is needed to address the issues raised and to provide information solicited by FDA in its proposal. They stated that gathering this information will involve complicated, time-consuming research by a number of parties that will take longer to complete than the time originally set aside for comments. FDA also received a request for a 30-day extension from an international federation and for a 77-day extension from a foreign embassy.

Because of the nature of the health concerns regarding lead, the agency believes that there should be no unnecessary delay in establishing an appropriate regulatory limit for ceramic pitchers or for ensuring that decorative ceramicware that is not intended for food use in appropriately identified. However, because of the difficult issues involved, FDA recognizes the need for some additional time to respond. Therefore, the agency is reopening the comment period for 90 days, until November 30, 1989 to respond to the proposal on a reduced limit for leachable lead in pitchers and on the proposed requirements for decorative ceramicware that appears suitable for food use. This will allow sufficient time to respond without causing unnecessary delays.

In addition, FDA believes that good cause has been shown that additional time is needed to gather information on the other aspects of this notice and is reopening for 180 days, until February 28, 1990, the period for interested persons to submit comments regarding the other issues on lead in ceramicware described in the notice.

Interested persons may, on or before November 30, 1989, submit to the Dockets Management Branch (address above) written comments regarding the proposed limits for lead in food-service pitchers excluding creamers and the proposed requirements for decorative ceramicware, and by February 28, 1990, comments on all other issues of lead in ceramicware. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 28, 1989.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89–20634 Filed 8–31–89; 8:45 am]

BILLING CODE 4160–01–M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 55

[Notice No. 688]

Commerce in Explosives

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is proposing to amend 27 CFR 55.211 to require that the placards required by the Department of Transportation during transportation of blasting agents be in place on all facilities used to store blasting agents.

DATE: Written comments must be received by October 31, 1989.

ADDRESSES: Send written comments to: Chief, Firearms and Explosives Operations Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 189, Washington, DC 20044–0189, ATTN: Notice No. 688.

FOR FURTHER INFORMATION CONTACT: Daniel E. Crowley, ATF Specialist, Firearms and Explosives Operations Branch, Bureau of Alcohol, Tobacco and Firearms, (202) 789–3029. .

SUPPLEMENTARY INFORMATION: The Bureau of Alcohol, Tobacco and Firearms (ATF) is concerned that emergency response personnel be made aware of the contents of the vehicles and other facilities used to store blasting agents. While blasting agents are among the least sensitive explosives in common use, they, like all explosives, will sometimes explode when involved in a fire. Displaying the Department of Transportation (DOT) placards, which are required during over the road transportation, will identify the contents of these vehicles and other facilities and direct the emergency responders to the proper guide in the DOT "Emergency Response Guidebook". The explosives industry safety position on signs in areas where explosives are stored is that any sign be located so that a bullet passing through the sign will not strike a magazine. The Bureau supports this position where the magazines to be protected contain bullet sensitive explosive materials. Having the placards displayed will not increase the hazard to the general public from this stored explosive material since blasting agents are not sensitive to bullet impact. Thus, a bullet fired by chance at the placard and striking the contents of the magazine will not initiate an explosion of the blasting agent contents. Rather, the public and response team members will be better protected by the DOT guidebook recommended restriction of access and required evacuation of the fire scene area where blasting agents are involved in a fire.

Based on the above, ATF is proposing to amend the regulations at 27 CFR 55.211 to require that the DOT placards be displayed on magazines storing blasting agents.

Executive Order 12291

In compliance with Executive Order 12291, 46 FR 13193 (1981), ATF has determiined that this final rule is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal, because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significiant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this notice because no requirement to collect information is proposed.

Public Participation

ATF requests comments from all interested persons. Comments received on or before the closing date wil be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date.

ATF will not recognize any material as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure should not be included in the comment. The name of the person submitting the comment is not exempt from disclosure.

Disclosure

Copies of this notice and the written comments will be available for public inspection during normal business hours at: ATF Reading Room, Disclosure Branch, Room 4412, Ariel Rios Federal Building, 1200 Pennsylvania Avenue, NW, Washington, DC.

Drafting Information

The principal author of this notice of proposed rulemaking is Daniel E. Crowley, ATF Specialist, Firearms and Explosives Operations Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 55

Administrative practice and procedure, Authority delegation, Customs duties and inspection, Explosives, Hazardous materials, Imports, Penalties, Reporting and recordkeeping requirements, Safety, Security measures, Seizures and forefeitures, Transportation, and Warehouses.

Authority and Issuance

PART 55—COMMERCE IN EXPLOSIVES

Par. 1 The authority citation for Part 55 continues to read as follows:

Authority: 18 U.S.C. 847.

Par. 2 Section 55.211 is amended by adding a new paragraph (a)(5) to read as follows:

* * * * *

§ 55.211 Construction of type 5 magazines.

(a) * * *

(5) *Placards.* The placards required by Department of Transportation regulation at 49 CFR Part 172, Chapter F for the transportation of blasting agents shall be displayed on all magazines.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 9E3706/P489; FRL 3637-7]

Pesticide Tolerance for Metolachlor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues (free and bound) of the herbicide metolacholor and its metabolites in or on the raw agricultural commodity Cubanelle peppers. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 9E3706/P489], must be received on or before October 2, 1989.

ADDRESS: By mail, submit written comments to: Public Information Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460.

In person, bring comments to: Rm. 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H–7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiement Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 9E3706 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of Puerto Rico.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for combined residues (free and bound) of the herbicide metolachlor (2-chloro-*N*-(2-ethyly-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acteamide) and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the recent compound, in or on the raw agricultural commodity Cubanelle peppers at 0.1 part per million (ppm).

The petitioner proposed that use on this commodity be limited to Puerto Rico based on the geograhical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons

seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and all other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The data considered in support of the tolerance include:

1. A 90-day dog feeding study with a no-observed-effect level (NOEL) of 500 ppm (12.5 milligrams (mg)/kilogram (kg)).
2. A 6-month dog feeding study with a NOEL of 100 ppm (2.5 mg/kg).
3. A rat teratology study with no maternal, teratogenic, or fetotoxic effects at all levels tested (0, 60, 180, and 360 mg/kg/day).
4. A rabbit teratology study with a NOEL for maternal effects at 120 mg/kg and no teratogenic of fetotoxic effects at all levels tested (0, 36, 120, 360 mg/kg/day).
5. A 2-year oncogenicity study in mice with no observed oncogenic potential under the conditions of the study at 30, 1,000 and 3,000 ppm (highest dose level equivalent to 428 mg/kg); and a repeated mouse oncognenicity study with no observed oncognic potential under the conditions of the study and a systemic NOEL of 1,000 ppm at the same dose levels as the original study.
6. A two-generation rat reproduction study with a reproductive NOEL of 300 ppm (15 mg/kg) and a lowest effect level (LEL) of 1,000 ppm (50 mg/kg).
7. Mutagencity studies including: A mouse dominant-lethal study, negative for mutagenic effects; a mouse lymphoma mutation assay, not a mutagen in both presence and absence of metabolic activator; two DMA damage/repair assays (in fibroblasts and in rat hepatocytes), both negative; an Ames assay, negative for mutagenic effects; and a Chinese hamster micronucleus assay with no evidence of mutagenicity at dosage levels tested (0, 1, 250, 2,500 and 5,000 mg/kg).
8. A 2-year chronic feeding/oncogencity study (IBT validated) in the rat conducted at dietary doses of 0, 30, 300 and 3,000 ppm with a statistically significant increase in primary liver neoplasms in females at the high dose (3,000 ppm).
9. A repeated 2-year chronic feeding/oncogenicity study in the rat conducted at the same dietary doses as the original study with a systemic NOEL of 300 ppm (15 mg/kg), a systemic LEL of 3,000 ppm (testicular atrophy) and a statistically significant increased incidence of neoplastic liver nodules and proliferative hepatic lesions in females in the high-dose group of 3,000 ppm.

The Agency has concluded that the available data constitute limited evidence for carinogenicity of metolachlor. Metolachlor has been tentatively classified as a Category C carcinogen (limited evidence of carinogencity in animals) based on the following considerations:

1. The oncogenic responses observed in rats were confined to the high-dose females at one site (liver).
2. The proliferative liver lesions observed in rats were primarily benign (neoplastic nodules in 6 of 60 animals) rather than hepatocellular carcinomas (1 of 60 animals). There was no apparent difference in the time-to-occurrence of the lesions (almost all liver tumors were observed at terminal sacrifice).
3. Metolachlor was not oncogenic to mice under the conditions of the 2-year mouse oncogenicity studies.
4. An Ames mutagenicity assay and a dominant-lethal study were negative for mutagenic effects.

An ancogenic risk assessment for metalochlor has been completed by the Agency based on the available information. The potential oncogenic risk from dietary exposure resulting from existing uses of metalochlor is calculated at 2×10−6. The dietary risk assessment is based on a potency estimator (Q^*) of 2.1×10−3 (mg/kg/day)−1 and dietary exposure as calculated by the theoretical maximum residue contribution (TMRC) for established tolerances (0.001167 mg/kg/day).

Tolerances have previously been established for residues of metolachlor ranging from 0.02 ppm in meat, milk, poultry, and eggs to 30.0 ppm in peanut forage and hay. Tolerances have also been established for residues of metolachlor on both chili and tabasco peppers at 0.5 ppm. Based on the rat chronic feeding study with a NOEL of 300 ppm (15 mg/kg/day) for nononcogenic effects and using a 100-fold safety factor, the acceptable daily intake (ADI) is 0.15 mg/kg/day. The theoretical maximal residue contribution (TMRC) for existing tolerances is 0.001167 mg/kg/day. The proposed use will contribute an additional 0.000001 mg/kg/day (0.09 percent increase). Published tolerances utilize 0.78 percent of the ADI. The proposed use of metolachlor on Cubanelle peppers poses a negligible, incremental increase since tolerances are already established on chili and tabasco peppers. The Agency concludes that the amount of the pesticide added to the diet from the proposed use will not significantly increase dietary exposure. Thus the tolerance established by the proposed rule is considered to pose a negligible incremental risk.

The nature of the residues is adequately understood and an adequate analytical method, gas-liquid chromatography with an electrolytic detector specific for nitrogen, is available for enforcement purposes. Analytical enforcement methods are currently available in the *Pesticide Analytical Manual* (PAM), Volume II. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that Cubanelle peppers are not considered an animal feed commodity, the tolerance established by amending 40 CFR 180.368 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 9E3706/P489]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities,

BEST COPY AVAILABLE

Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 22, 1989.

Juanita Wills,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.368, by revising the introductory texts of paragraphs (a), (b), and (c) to specify the regulated combined residue as "free and bound" and by amending the table in paragraph (c) by adding and alphabetically inserting the raw agricultural commodity Cubanelle peppers, to read as follows:

§ 180.368 Metolachlor; tolerances for residues.

(a) Tolerances are established for the combined residues (free and bound) of the herbicide metolachlor (2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-Methoxy-1-methylethyl)acetamide) and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound, in or on the raw agricultural commodities.

* * * * *

(b) Tolerances are established for indirect or inadvertent combined residues (free and bound) of the herbicide metolachlor (2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)-acetamide) and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound, in or on the following raw agricultural commodities when present therein as a result of the application of metolachlor to growing crops listed in paragraph (a) of this section to read as follows:

* * * * *

(c) Tolerances with regional registration as defined in § 180.1(n) are established for the combined residues (free and bound) of the herbicide metolachlor (2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acetamide) and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl]amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound, in or on the following raw agricultural commodities:

Commodities	Parts per million
* * *	* *
Peppers, Cubanelle	0.1
* * *	* *

40 CFR Part 180

[PP 4E3048/P490; FRL 3637-6]

Pesticide Tolerance for Oxamyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the insecticide/nematicide oxamyl in or on the raw agricultural commodity non-bell peppers and that the oxamyl tolerance expression be modified to include the oxime metabolite. The proposed regulation to establish a maximum permissible level for residues of the pesticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments, identified by the document control number [PP 4E3048/P490], must be received on or before October 2, 1989.

ADDRESS: By mail, submit written comments to: Public Information Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H-7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 557-2310.

SUPPLEMENTARY INFORMATION:

The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 4E3048 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Stations of Arizona, Georgia, Louisiana, North Carolina, and Puerto Rico.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, proposed the establishment of a tolerance for residues of the insecticide/nematicide oxamyl (methyl *N'*, *N'*-dimethyl-*N*-[(methylcarbamoyl)oxy]-1-thiooxamimidate) in or on the raw agricultural commodity peppers at 3.0 parts per million (ppm). The petition was later revised to propose a residue level of 5.0 ppm in or on non-bell peppers. Tolerances are currently established at 3.0 ppm in or on bell peppers.

The Agency has determined that the tolerance expression for oxamyl in 40 CFR 180.303 should reflect the sum of the residues of the insecticide oxamyl (methyl *N'*,*N'*-dimethyl-*N*-[(methylcarbamoyl)oxy]-1-thiooxamimidate and its oxime metabolite *N'*,*N'*-dimethyl-*N*-hydroxy-1-thiooxamimidate calculated as oxamyl.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. A 2-year rat feeding/oncogenicity study with a systemic no-observed-effect level (NOEL) of 2.5 milligrams (mg)/kilogram (kg) or 50 ppm and no evidence of oncogenicity at 150 ppm (highest dose tested). A repeat rat study has been requested since the available study does not meet guidline requirements.

2. A 2-year mouse feeding/oncogenicity study with a systemic NOEL of 25 ppm and no evidence of oncogenicity at all levels tested (0, 25, 50, and 75 ppm).

3. A rabbit teratology study with a NOEL for developmental toxicity of 4 mg/kg/day or greater.

4. Mutagenicity studies including: Ames assay, chromosomal aberration, HGPRT, and DNA repair were all negative.

Toxicological data for oxamyl which are lacking but considered desirable include a chronic feeding/oncogenicity study in rats, a chronic feeding study in dogs, a three-generation reproduction study, a rat teratology, and a general metabolism study.

The preliminary limiting dose (PLD), based on the 2-year rat feeding study NOEL of 50 ppm (2.5 mg/kg/day) and using a 100-fold safety factor, is calculated to be 0.025 mg/kg of body weight (bw)/day. A PLD is set when the available data are insufficient to establish an acceptable daily intake (ADI) or a provisional acceptable daily intake (PADI). A PLD provides an exposure level of relatively low concern and will be replaced with an ADI once an acceptable chronic feeding study is available.

The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.013229 mg/kg/day. The current action will result in a negligible increase in the TMRC of 0.000052 mg/kg/day (0.4 percent). Published tolerances utilize 52.9 percent of the PLD; the current action will utilize an additional 0.2 percent of the PLD.

The nature of the residues is adequately understood, and an adequate analytical method, gas-liquid chromatography using a flame photometric detector, is available in the *Pesticide Analytical Manual*, Vol. II (PAM II), for enforcement purposes. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.303 would protect the public health. No secondary residues in meat, milk, poultry, or eggs are expected since peppers are not considered a livestock feed commodity. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 4E3048/P490]. All written comments filed in response to this petition will be available in the Public Information Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12292.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: August 18, 1989.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.303, the introductory text is revised by modifying the tolerance expression to include the oxamyl metabolite, and the table is amended by adding and alphabetically inserting the raw agricultural commodity non-bell peppers, to read as follows:

§ 180.303 Oxamyl; tolerances for residues.

Tolerances are established for the sum of residues of the insecticide oxamyl (methyl *N'*,*N'*-dimethyl-*N*-[(methylcarbamoyl)-oxy]-1-thiooxamimidate and its oxime metabolite *N'*,*N'*-dimethyl-*N*-hydroxyl-thiooxamimidate) calculated as oxamyl in or on the following raw agricultural commodities:

Commodities	Parts per million
* * *	* *
Peppers, non-bell	5.0

40 CFR Part 180

[OPP-300204; FRL-3637-9]

Pome Fruits Group; Expansion of Definition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that 40 CFR 180.34(f)(9)(xi) be amended to include mayhaws in the subject pome fruits group. This proposed amendment, which will expand and redefine the definition of pome fruits group, was submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number [OPP-300204], must be received on or before October 2, 1989.

ADDRESS: By mail, submit written comments to: Public Information Branch, Field Operations Division (H-7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Emergency Response and Minor Use Section (H7505C), Registration Division, Environmental Protection Agency, 401 M ST., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716H, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: Dr. Jerry J. Baron, Associate Coordinator, Interregional Research Project No. 4 (IR–4), New Jersey Agriculture Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted this request to EPA on behalf of the IR–4 Project.

IR–4 requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose that 40 CFR 180.34(f)(9)(xi) be amended by adding *Crataegus aestivalis*, and *C. opaca* (mayhaws) to the subject "pome fruits group," thereby expanding its definition. It has further been recommended by the Agency that *Crataegus rufula* (mayhaw) also be included in this grouping. Therefore, the entire proposal is that 40 CFR 180.34(f)(9)(xi) be amended by adding and alphabetically inserting "mayhaws (*Crataegus aestivalis, C. opaca,* and *C. rufula*)" to the subject "pome fruits group."

This amendment is requested in order to clarify and update the relationship between the subject "pome fruits group" and the specific raw agricultural commodities defined therein.

The IR–4 supports the portion of the request concerning *Crataegus aestivalis* and *C. opaca* by pointing out that "pome fruits group" should be precisely defined to include mayhaws, (*C. aestivalis* and *C. opaca*). The Agency further concludes that the mayhaw species *C. rufula* should also be included in this definition, since this species, as well as *C. aestivalis* and *C. opaca* produce fruits of potential commercial importance.

Mayhaws (*Crataegus aestivalis, C. opaca,* and *C. rufula*), as well as the other members of the pome fruits group, belong to the botanical subfamily Maloideae of the family Rosaceae. In addition, they have characteristics similar to the subject pome fruits group. Mayhaw is a small tree with ornamental characteristics which is planted commercially, in low wet acidic soils from North Carolina to Florida and west to Texas. The plant produces small apple-like fruits (8 to 19 millimeters in diameter) that are used for the production of jellies, marmalades, butter, preserves, and other processed commodities as well as feed for the wildlife.

Mayhaw is susceptible to many insects and diseases which affect other members of the pome fruits group, including plum curculio, aphids, flat-headed apple borer, white flies, weevils, quince rust, and fire blight.

The Agency agrees that these raw agricultural commodities are botanically and culturally similar and should be included in the pome fruits crop group for pesticide tolerance purposes. This revision will expand the tolerances and exemptions established for residues of pesticide chemicals in or on the subject "pome fruits group" to include the specific raw agricultural commodity mayhaws. Based on the information considered by the Agency, it is concluded that the regulation established by amending 40 CFR 180.34(f)(9)(xi) would protect the public health. Therefore, it is proposed that 40 CFR 180.34(f)(9)(xi) be amended as set forth below.

Interested persons are invited to submit written comments on the proposed amendment. Comments must bear a notation indicating the document control number, [OPP–300204]. All written comments filed in response to this petition will be available in the Public Information Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural Commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: August 18, 1989.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

§ 180.34 [Amended]

2. Section 180.34 *Tests on the amount of residue remaining* is amended in paragraph (f)(9)(xi) by adding and alphabetically inserting in the entry "pome fruits group" the raw agricultural commodity "mayhaws (*Crataegus aestivalis, C. opaca,* and *C. rufula*);".

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

45 CFR Part 1180

Regulations Under Section 504 of the Rehabilitation Act of 1973, Nondiscrimination on Basis of Handicap in Federally Assisted Programs and Activities

AGENCY: Institute of Museum Services, NFAH.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Institute of Museum Services issues regulations under section 504 of the Rehabilitation Act of 1973 (prohibiting discrimination on the basis of handicap in Federally assisted programs of IMS).

DATE: Comments must be received on or before October 30, 1989.

ADDRESSES: Comments should be addressed to Mamie Bittner, Public Information Officer, Institute of Museum Services, Room 510, 1100 Pennsylvania Ave. NW., Washington, DC 20506 (786–0536). Comments will be available for public inspection at the above address from 9:00 a.m. to 5:00 p.m. Monday through Friday except legal holidays.

FOR FURTHER INFORMATION CONTACT: Mamie Bittner, Public Information Officer, Institute of Museum Services, Room 510, 1100 Pennsylvania Ave., NW., Washington, DC 20506, (202) 786–0536 (Voice) or (202) 786–0136 (TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

1. General Background.

The Museum Services Act ("the Act"), which is Title II of the Arts, Humanities and Cultural Affairs Act of 1976, was enacted on October 8, 1976 and amended on December 4, 1980.

The purpose of the Act is stated in section 202, 20 U.S.C. 961, as follows:

> It is the purpose of [the Museum Services Act] to encourage and assist museums in their educational role in conjunction with formal systems of elementary, secondary, post-secondary education and with programs of nonformal education for all age groups; to assist museums in modernizing their methods and facilities so that they may be better able to conserve our cultural, historic, and scientific heritage; and to ease the financial burden borne by museums as a result of their increasing use by the public.

The Act establishes an Institute of Museum Services (IMS) consisting of a National Museum Services Board (Board) and a Director. IMS is an independent agency placed in the National Foundation on the Arts and Humanities (National Foundation). Public Law 97–100, December 23, 1981; Public Law 97–394, December 30, 1982.

The act lists a number of illustrative activities for which grants may be made, including assisting museums to meet their administrative costs for preserving and maintaining their collections, exhibiting them to the public, and providing educational programs to the public. During fiscal year 1987 IMS provides four types of grant assistance to museums: (1) General operating support; (2) conservation assistance; (3) museum assessment assistance; and (4) assistance to professional museum organizations.

2. Need for the Regulations.

Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, provides in pertinent part:

> No otherwise qualified individuals with handicaps in the United States, as defined in section 706(7) of [Title 29], shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. * * *

Prior regulations of IMS have specified the applicability of section 504 to programs of assistance administered by IMS. *Compare* 43 CFR 1180.44, F.R. 27733 (June 17, 1983) with former 45 CFR 84.17, 45 FR 53419 (Aug. 11, 1980). *See also* 45 FR 53415 (Aug. 11, 1980). Thus, formulation by the Board of rules regarding the applicability of section 504 does not establish a new statutory requirement for IMS recipients. Prior to the transfer of IMS to the National Foundation, regulations of the Education Department (of which IMS was then a part) governed the operation of section 504 as it related to programs of IMS. With the transfer of IMS to the National Foundation it is necessary to establish regulations governing the administration of section 504 as it pertains to these programs in the context of the status of IMS as an agency within the National Foundation.

In 1986 IMS issued regulations under section 504 relating to the enforcement of nondiscrimination on the basis of handicap in programs or activities conducted by the Institute itself. 45 CFR part 1181. These regulations implement section 119 of the Rehabilitation Comprehensive Services and Developmental Disabilities Amendments of 1978 and apply to all programs or activities conducted by the agency. 45 CFR 1181.102. It is now appropriate for IMS to issue revised regulations pertaining to nondiscrimination on the basis of handicap in federally assisted programs carried out by museums or other recipients under the Museum Services Act through grants or other financial assistance provided by IMS.

3. Description.

A purpose for the transfer of IMS to the National Foundation was to improve coordination of the policies of IMS with those of other agencies in the National Foundation. The Board has determined that, in formulating regulations under section 504, it would be consistent with this purpose for IMS to look to analogous rules adopted by the National Endowment for the Humanities (NEH), which is also an agency within the National Foundation. A number of reasons support this determination.

(1) By inter-agency agreement, IMS looks to NEH for administrative services with respect to section 504 matters. Making the NEH regulations applicable to IMS programs will facilitate a more efficient administration of section 504 to meet the needs of handicapped visitors to museums served by IMS.

(2) The Board desires to minimize the degree to which museums assisted both by IMS and by the Endowments, as well as members of the affected target population, must look to different sets of regulations to govern the same cross-cutting issue.

(3) The NEH regulations have been developed in light of particular questions which cultural institutions face in achieving compliance with section 504.

(4) Many museums which participate in programs administered by IMS are presumably familiar with the NEH regulations under section 504 and thus will more readily understand their responsibilities under its provisions.

For these reasons the Board determined to make applicable to IMS programs the NEH regulations under section 504 which are found in 45 CFR part 1170, 46 FR 55697 (Nov. 12, 1981).

Part 1170 was issued by NEH in 1981 and was based on the regulation for federally assisted programs issued by the Department of Health, Education, and Welfare (HEW) in 1977 (42 FR 22676) and later transferred to the Department of Health and Human Services (45 CFR part 84). Since 1977 a number of significant court opinions have been issued interpreting section 504 and the regulations implementing it. Because of this developing case law, regulations implementing section 504 in federally conducted programs issued in recent years by the IMS and more than 40 other agencies explicitly provide, unlike part 1170, that, in communicating with individuals with handicaps and ensuring that a program or activity is accessible, the Federal agency is not required to take any action that it can demonstrate would result in a fundamental alteration in the nature of the program or activity or in undue financial and administrative burdens (45 CFR 1181.150(a), 1181.160(d) (IMS); *see also, e.g.,* 28 CFR 39.150(a), 39.160(d) (Department of Justice); 45 CFR 1153.150(a), 1153.160(d) (NEA); 45 CFR 1175.150(a), 1175.160(d) (NEH). These provisions which were recently upheld in *Department of Justice Handicapped Employees Association* v. Meese, No. 84–5645 (E.D. Pa., Oct. 9, 1987), are based on the Supreme Court's ruling in *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979), that section 504 and the HEW regulation implementing it do not require actions that would have such effects. These provisions are also supported by *Alexander* v. *Choate*, 469 U.S. 287 (1985), in which the Court noted that section 504 and its implementing regulations at the time require "reasonable adjustments in the nature of the benefit offered * * * to assure meaningful access" (469 U.S. at 301 n. 21), but do not require " 'changes;' 'adjustments;' 'modifications' to existing programs that would be 'substantial' * * * or that would constitute 'fundamental alteration[s] in the nature of a program.' " *Id.* at n. 20 (citations omitted). Thus, although the NEH regulation that IMS proposes to adopt does not include the language found in the more recently issued regulations for federally conducted programs, it does not provide recipients, by virtue of judicial interpretation, the same fundamental alteration/undue burdens defenses. [*See e.g., Rhode Island Handicapped Action Committee* v. *Rhode Island Public Transit Authority*, 718 F. 2d 490 (1st Cir., 1983); *Dopico* v. *Goldschmidt*, 687 F. 2d 644 (2d. Cir. 1982);] *American Public Transit Association* v. *Lewis*, 655 F. 2d 1272 (D.C. Cir., 1981).

Numerous section 504 regulations for federally conducted programs, including the final rule issued by the Advisory Council on Historic Preservation also contain a clarification of the requirements of the statute as applied to historic preservation programs (36 CFR 812.150 (a)(2), (b)(2) (Advisory Council on Historic Preservation)); *see also, e.g.,* 45 CFR 1153.150 (a)(2), (b)(2) (NEA); 45 CFR 2104.150 (a)(2), (b)(2) (Commission of Fine Arts)). In order to avoid a possible conflict between the congressional mandates to preserve historic properties on the one hand and to eliminate discrimination against individuals with handicaps on the other, these regulations provide that in historic preservation programs the agency is not required to take any action that would result in a substantial impairment of significant historic features of an historic property (*i.e.,* a property that is listed or eligible for listing in the National Register of Historic Places or designated as historic under a statute of the appropriate State or local government body). Nevertheless, because the primary benefit of an historic preservation program is uniquely the experience of the historic property itself, the regulations require the agency to give priority to methods of providing program accessibility that permit individuals with handicaps to have physical access to the historic property. When such access cannot be provided, however, the regulations permit the agency to adopt alternative methods for providing program accessibility. Such methods include using audio-visual materials to depict those portions of an historic property that cannot otherwise be made accessible, assigning persons to guide individuals with handicaps into or through portions of historic properties that cannot otherwise be made accessible, or adopting other innovative methods. IMS will follow this approach in applying 45 CFR Part 1170 to programs that have preservation of historic properties as a primary purpose.

4. Executive Order 12291.

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are classified as nonmajor because they do not meet the criteria for major regulations established in the order.

5. Regulatory Flexibility Act Certification.

The Director certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. To the extent that these proposed regulations affect States and State agencies, they will not have an impact on small entities because States and State agencies are not considered to be small entities under the Regulatory Flexibility Act.

These regulations will affect certain museums receiving Federal financial assistance under the Museum Services Act. However, they will not have a significant economic impact on the small entities affected because they do not impose excessive regulatory burdens or require unnecessary Federal supervision.

6. Invitation to Comment.

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before the 60th day after publication of this document will be considered in developing the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 510, 1100 Pennsylvania Avenue NW., Washington, DC, between the hours of 9:00 a.m. and 5:00 p.m., Monday through Friday of each week except Federal holidays.

7. List of Subjects in 45 CFR Part 1180.

Blind; Buildings; Civil Rights; Employment; Equal employment opportunity; Equal educational opportunity; Handicapped; Historic places; Historic preservation; Museums; National boards.

Lois Burke Shepard,
Director Institute of Museum Services.

PART 1180—[AMENDED]

The Institute of Museum Services proposes to amend Subchapter E of Chapter XI of Title 45 of the Code of Federal Regulations as follows:

1. The authority citation for part 1180 is revised to read as follows:

Authority: 20 U.S.C. 961–968; Pub. L. 97–100, 95 Stat. 1414; Pub. L. 97–394, 96 Stat. 1994; 29 U.S.C. 794.

2. Part 1180 is amended by revising S 1180.44 to read as follows:

§ 1180.44 Federal statutes and regulations on nondiscrimination.

(a) Each grantee shall comply with the following statutes:

Subject	Statute
Discrimination on the basis of race, color or national origin	Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d through 2000d–4). 2000d–4).
Discrimination on the basis of sex	Title IX of the Education Amendments of 1972 (20 U.S.C. 1681–1683).
Discrimination on the basis of handicap	Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).
Discrimination on the basis of age.	The Age Discrimination Act (42 U.S.C. 6101) et seq.
(b)–(c) [reserved]	

(d) *Regulations under section 504 of the Rehabilitation Act of 1973.*

The Institute applies the regulations in 45 CFR part 1170, issued by the National Endowment for the Humanities and relating to nondiscrimination on the basis of handicap in federally assisted programs and activities, in determining the compliance of museums with section 504 of the Rehabilitation Act of 1973 as it applies to recipients of Federal financial assistance from the Institute. These regulations apply to each program or activity that receives such assistance. In applying these regulations, references to the "Endowment" or the "agency" shall be deemed to be references to the Institute and references to the "Chairman" shall be deemed to be references to the Director.

[Docket No. 90690–9190]

RIN 0648–AC72

Foreign Fishing; General Provisions for Domestic Fisheries; Groundfish of the Gulf of Alaska, Groundfish Fishery of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: The Secretary of Commerce (Secretary) proposes a rule that would implement Amendment 13 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI) and Amendment 18 to the FMP for Groundfish of the Gulf of Alaska (GOA). These regulations would implement the following measures specific to both Amendments 13 and 18: (1) Specific seasons would be deleted from the FMPs and all future seasons would be established by regulatory amendment; (2) a comprehensive data collection program would be implemented, which would consist of augmented recordkeeping and reporting requirements and a mandatory observer program; and (3) the Secretary's authority to separate or combine species within the target species category would be clarified. Proposed regulations specific to Amendment 13 would (1) close an area in the vicinity of the Walrus Islands to fishing for groundfish and (2) allocate fixed percentages of the allowable harvest amount of sablefish to trawl gear and fixed gear. Proposed regulations specific to Amendment 18 would: (1) Establish Shelikof Strait area as a management district; (2) Close areas around Kodiak Island to bottom trawl gear; and (3) Establish for one year interim Pacific halibut prohibited species catch limits for fixed gear and trawl gear. This action is necessary to promote management and conservation of groundfish and other fish resources. It is intended to further the goals and objectives contained in both fishery management plans that govern these fisheries.

DATE: Comments are invited until October 12, 1989.

ADDRESS: Comments may be sent to Steven Pennoyer, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802. Copies of the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) may be obtained from the same address. Comments on the environmental assessment are particularly requested.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg or Susan J. Salveson (Fishery Management Biologists, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the Exclusive Economic Zone (EEZ) of the GOA and BSAI areas are managed by the Secretary according to FMPs prepared by the North Pacific Fishery Management Council (Council) under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The FMPs are implemented by regulations for the foreign fishery at 50 CFR Part 611 and for the U.S. fishery at 50 CFR Parts 672 and 675. General regulations that also pertain to the U.S. fishery are implemented at 50 CFR Part 620.

The Council annually solicits management proposals from the public and state and Federal agencies. The Council set a deadline of October 1, 1988 for receiving proposals for inclusion in Amendments 13 and 18. At its meeting on January 18–20, 1989, the Council reviewed the proposals that were received. It selected three measures that would amend both FMPs, two measures to specifically amend the GOA FMP and three measures to specifically amend the BSAI FMP for further consideration. The Council's GOA and BSAI Plan Teams prepared draft EA/RIR/IRFAs to discuss and analyze the need for the proposals under each FMP under guidance of the National Environmental Policy Act of 1969, Executive Order 12291, and NOAA policy. The Council reviewed these documents at its meeting on April 10–14, 1989 and decided to send the analyses to the interested public for review. These documents are dated May 3, 1989. A June 12, 1989 supplement to the EA/RIR/IRFA was prepared by the Council staff.

At its June 20–23, 1989, meeting, the Council considered the testimony and recommendations of its Advisory Panel (AP), Scientific and Statistical Committee (SSC), Plan Teams, fishing industry representatives and the general public on each amendment proposal and the EA/RIR/IRFA documents. It then approved the following measures for inclusion into Amendments 13 and 18 for review by the Secretary under § 304(b) of the Magnuson Act:

Measures specific to both Amendment 13 and 18:

(1) Specifications for fishing seasons would be deleted from the FMPs and all future season changes would be implemented by regulatory amendment.

(2) A comprehensive fishery data collection program would be implemented, which would consist of:

A. augmented recordkeeping and reporting requirements; and

B. a mandatory observer program.

(3) The Secretary's authority to separate or combine species within the target species category would be clarified.

Measures specific to Amendment 13:

(1) An area in the vicinity of the Walrus Islands would be closed to fishing for groundfish.

(2) Sablefish would be allocated to fixed gear and trawl gear.

Measures specific to Amendment 18:

(1) Shelikof Strait District would be established as a management district.

(2) Areas around Kodiak Island would be closed to trawling.

(3) Interim Pacific halibut prohibited species catch limits for fixed gear and trawl gear would be established for 1990.

A description of, and the reasons for, each measure are as follows:

1. Delete Specific Seasons From the FMPs

Currently, fishing season opening and closing dates are established in the FMPs. All seasons are specified in both FMPs to be the January 1–December 31 fishing year, except for the GOA hook-and-line season for sablefish, for which the season starting date is established by the FMP to be April 1. Since the FMPs establish the seasons, they can be changed only by amendments to the FMPs, a procedure that normally takes about a year to implement. As domestic fisheries have matured, the need to change seasons to meet fishery needs has necessitated a more timely procedure to implement fishing seasons.

Under this measure, specifications for fishing seasons would be deleted from the FMPs but would be retained in regulations implementing the FMPs. The purpose of this measure is to establish a mechanism, regulatory amendment, for timely changing of seasons. The Council recommends that future season changes be proposed and implemented by the Secretary in consultation with the Council. Since the Secretary must consider whether a regulatory amendment is consistent with the Magnuson Act and other applicable law, appropriate analyses would accompany future regulatory amendments. Regulatory amendments would be published in the **Federal Register** for public review and comment.

The Council proposes to remove specific references to seasons from the BSAI and GOA FMPs, and proposes any future changes in fishing seasons be implemented by regulatory amendments. Such future changes would be considered on a case-by-case basis and would be implemented only if they are consistent with the criteria specified in the FMP, the Magnuson Act, and other applicable law.

2. Comprehensive Data Collection Program

The comprehensive data gathering program considered below for the BSAI and GOA groundfish fisheries consists of two parts:

(A) Recordkeeping and reporting requirements; and

(B) A mandatory observer program.

The purpose of the comprehensive data collection program is to provide the Council and NMFS with adequate and reliable fishery data on which to (1) base inseason and inter-season management decisions; (2) efficiently carry out their resource management responsibilities; and (3) measure fishery performance against existing and proposed management measures. Historically, the NMFS' Foreign Fisheries Observer program has been the primary source for these data. Foreign groundfish operations have been curtailed in recent years with the rapid expansion of the domestic groundfish industry. As a result, fishery managers have lost access to much of the resource and fishery performance data that were formerly gathered from the foreign fishery.

Alaskan groundfish harvests by U.S. fishermen grew from 8,600 mt in 1979 to over 2.2 million mt in 1988. Domestic trawlers fishing in joint ventures with foreign processors were responsible for most of the initial growth in the U.S. groundfish industry. In 1988, however, catches from vessels involved in wholly domestic operations comprised over a third of the total groundfish harvest off Alaska. In 1989, domestic operations are expected to take about 80 percent of the groundfish harvest. The rapid expansion in the wholly domestic fishery coupled with the lack of a comprehensive domestic observer program and inconsistent, inadequate, or unenforceable reporting requirements has placed new demands on management and enforcement agencies, at a time of limited management resources. The growing contentiousness of fishery management issues, including resource allocation among competing domestic user groups, compels managers to take steps to regain some of the fishery information previously gathered from foreign fleets, and requires reliable catch, resource, and economic information when evaluating potential management measures.

The need for fishery managers to consider reliable biological, economic, and other fishery performance information is explicit in the management goals and objectives established by the Council, and are required by the Magnuson Act, Executive Order 12291, the Regulatory Flexibility Act, and other applicable law. These requirements mandate, for example, that concise biological and economic analyses be completed to assess all relevant effects of proposed changes in management measures. These requirements place specific burdens upon the Council and NMFS to consider the biological, economic, and social implications of, not only the preferred alternative, but of all reasonable options available to them. Attainment of this level of assessment is highly dependent upon the quality and timeliness of the biological and economic data available for analysis.

These data are not currently collected in sufficient detail, nor on an adequately consistent basis, to provide guidance to decision makers in the increasingly complex circumstances which prevail in the groundfish fisheries off Alaska. The cost of making decisions based on inadequate information is no longer borne by foreign fisheries. Rather, it is imposed on the domestic groundfish industry. Such costs can adversely affect the viability of the domestic groundfish industry in the very competitive world groundfish markets. The lack of adequate information also results in the fishery management decision making process being less objective, more political, and potentially less equitable. This can decrease the credibility of the fishery management process and result in an unnecessarily costly and less effective management system.

The Council, therefore, proposes a comprehensive fishery data collection program that augments recordkeeping and reporting requirements and mandates observer coverage. Fishery information would be compiled and maintained by NMFS in a fisheries information database that would be accessed by fishery managers and used (1) for inseason enforcement and catch verification; (2) to evaluate existing and proposed management measures; and (3) as a secondary index for stock assessment.

A description of the proposed measures for (A) augmented recordkeeping and reporting requirements and (B) the mandatory observer program follows:

(A) Recordkeeping and Reporting Requirements

Existing regulations do not allow adequate catch, effort, and economic data to be collected from the fishing industry. The changes in recordkeeping and reporting requirements discussed below are intended to reduce this problem with respect to information for which the industry is the best or only source. In general terms, this information includes the following: 1) Fishing effort, 2) retained groundfish catch, 3) discard amounts, 4) fish products, 5) employment, 6) costs, and 7) product value.

Changes in Recordkeeping Requirements

Each catcher/processor, mothership processor, and shoreside processor utilizing groundfish harvested off Alaska would be required to maintain a daily cumulative production log (DCPL).

Each vessel 5 net tons and larger that harvests groundfish off Alaska would be required to maintain a daily fishing log (DFL).

Each shoreside processor would be required to maintain a product transfer log similar to that currently required of at-sea processors.

Changes in Reporting Requirements

Each processor required to maintain a product transfer log would be required to submit to NMFS a weekly summary of their transfer log entries for each week in which transfers occurred.

The weekly catch report in round weight for each at-sea processor would be replaced with a weekly production report in product weight.

Each shoreside processor would also be required to submit a weekly production report in product weight.

Each processor and catcher vessel required to maintain a DCPL and/or DFL would be required to submit quarterly to NMFS a copy of their DCPL and/or DFL records.

Each processor (i.e., at-sea and shoreside) or its parent company would be required to submit annually a monthly product value report (MPVR) that would summarize sales in quantity and value by species and product form.

The NMFS will provide logbooks to the industry. Logbooks will be printed on 2-part carbonless paper so that vessel operators and plant owners can simply tear out copies of their daily logs when making their quarterly submissions to NMFS.

To lessen the cost to the industry of meeting the recordkeeping and reporting requirements, logbooks have been designed so that each sector of the industry receives a logbook form tailored to meet its specific needs. For example, a logbook will be made available to catcher/processor vessels that: (1) May be used for meeting the requirements for both the daily cumulative production log and the daily fishing log; and (2) will provide the information required in the weekly production report.

The recordkeeping programs developed for the groundfish industry have also been designed to compliment reporting requirements and would consolidate, to the extent practicable, other recordkeeping requirements to lessen the paperwork burden on vessel and processor operators. For example, the proposed marine mammal logbook program contains recordkeeping requirements (54 FR 258321, June 19, 1989) mandated by recent amendments to the Marine Mammal Protection Act of 1972 (MMPA) that have been incorporated into the groundfish logbook program.

Most of the information specified in the recordkeeping requirements is currently maintained by the industry for internal business reasons. To minimize the recordkeeping costs associated with fishery management requirements, the logbooks are designed to provide a convenient form to enter information that serves both the business needs of those who maintain them and the reporting requirements being proposed.

Species product amounts recorded in the DCPL and product transfer log are expected to be accurate to the nearest 0.1 mt (220 lbs). Because enforcement personnel are mainly interested in preventing intentional gross under logging of valuable groundfish species, some enforcement discretion will be necessary when encountering minor discrepancies between reported and observed product weights.

Examples of the logbook forms and associated report forms are presented as an Appendix to this notice. These forms have been developed to collect the type of information needed by fishery managers to respond to the concerns and problems addressed above. In addition to this information, additional data on gear specifications, crew size, and vessel specifications and activity are discussed below. The Secretary is inviting comments from the industry and the public concerning the practicality and advisability of providing this data and may consider requiring the submission of this data depending on the comments received. The specifics of the proposed changes in the recordkeeping and reporting requirements are included in the following discussions of the individual logs and reports.

Daily Cumulative Production Log (DCPL)

Catcher/processors, mothership processors, and shoreside processors would be required to maintain a daily cumulative production log (DCPL). The log would include daily, weekly, and year to date production information. The logs would remain on the vessels or at the processing plants during the fishing year and for as long after the fishing year as species products recorded in the DCPL are retained. These logs would be made available to observers and enforcement officers. Copies of the DCPLs would be submitted to NMFS on a quarterly basis to allow for timely data entry and analyses.

The processors' DCPL records would be used by enforcement officers to assist in verifying information reported in the weekly production reports. It would also assist processors in preparing their weekly production reports.

Daily Fishing Log (DFL)

Each vessel 5 net tons or larger harvesting groundfish off Alaska would be required to maintain a daily fishing log (DFL). The DFL would include: 1) Vessel and gear specifications; 2) individual haul or set information; 3) daily information on discards; and 4) information on daily vessel activity.

Vessel and gear specifications would include such information as the reporting area where the vessel is conducting fishing activities, crew size, and type of gear used. For hook-and-line and pot gear, information would be collected on the average number of hooks or pots per skate, size of hooks used, and average length of skates. Specific trawl information would include size of net opening, codend mesh size, and average speed of tow.

The Secretary is considering additional reporting requirements, not specified in the proposed rule, concerning gear specifications. Additionally, the crew size information may be required to be further specified according to the number of the crew involved in fishing activities and the number involved in processing activities. Finally, additional vessel specifications such as engine power may be required. Comments are requested with respect to these additional reporting requirements.

The individual haul information would include the date, time, location, sea depth, trawl depth, duration of haul or soak time, number of units of gear fished for fixed gear vessels, i.e., those using hook-and-line and pot gear, and estimated haul weight of total catch. The discard information would be for groundfish and for prohibited species. The estimated daily discards of halibut, crab, and salmon would be reported in numbers and by species if possible. All other species discard estimates would be reported by weight (0.1 mt). Fishing vessels delivering to groundfish processors would be required to provide their discard estimates to the processors so that the processors can report these discards in their weekly production reports.

The fishing effort information would be used for inseason enforcement and for biological and economic evaluations of existing and proposed fishery management measures. The former would consist primarily of activities associated with verifying information reported in weekly production reports.

Discard data would be used to obtain information relating to total fishing mortality resulting from groundfish operations. Although a comprehensive observer program would provide groundfish and prohibited species discard information from a significant portion of the industry, all catcher vessels and processors would be required to record discard information. In addition to total mortality estimates, this information would be used to derive estimates of bias resulting from intentional or unintentional misreporting of data, or from collection of non-representative data.

The Secretary is considering additional requirements not specified in the proposed rule. The vessel operators may be required to record vessel time (to the nearest hour) spent on the following activities: (1) Searching for fish; (2) fishing; (3) time in transit to a fishing area; and (4) down time. This information could be used to evaluate fishing effort and associated costs in economic analyses of fishery performance. The Secretary requests comments on the practicality of these requirements relative to the increased burden imposed should they be implemented.

The logs would remain on the vessels until the end of the fishing year and would be made available to both at-sea and shoreside observers and to enforcement officers. Mothership processor vessels would be required to make the daily fishing log information for its catcher vessels available to an at-sea observer. At-sea and shoreside observers would collect the effort data and use other information in the logs to assist in meeting their data collection responsibilities. The discard information maintained in the logs would assist those responsible for completing the weekly production reports which include estimates of discards.

Copies of the DFLs would be submitted to NMPS on a quarterly basis. As mentioned above, this information, along with that recorded in the DCPLs, would be maintained in a NMPS database that would be accessed to evaluate existing and proposed management measures.

Product Transfer Logs

Shoreside processors would be required to maintain a product transfer log similar to that currently required of at-sea processors. This log would be used to record all shipments or receipts of product by species and product type, the name of the company or person transporting the product, the date of shipment (or receipt), and the destination of the product.

This information is necessary to verify the accuracy of reported groundfish catches received by a processor. Verification of groundfish catches received by shoreside processors also requires that DCPLs and product transfer logs be made available for comparison to actual inventories.

Weekly Transfer Report

Each processor required to maintain a transfer log would be required to submit to NMFS copies of the transfer log entries for each week in which transfers occurred. Current regulations require only catcher/processors and mothership vessels to submit summary product transfer information. This information assists enforcement officers in verifying reported catch, and would be compared with on board transfer logs, DCPLs, and product inventory to verify the amount of retained product reported in the weekly production reports.

Weekly Production Report

The weekly catch report now required of catcher/processor and mothership vessels would be changed to a weekly product report, and a similar weekly product report would also be required of shoreside processors. It would summarize (1) total estimated catch weight or receipt; (2) weekly production by species and product form; and (3) estimated discards of prohibited species and other species.

For catcher/processor and mothership vessels, the principal change is that they would report product weight rather than round weight. This simplifies reporting, because product weights are maintained for business purposes. It also eliminates any inconsistencies that can occur when standard conversion factors by species and product form are not used to estimate round weight equivalents of product weight.

NMPS would prepare a list of standard product recovery rates prior to the beginning of a fishing year. A notice of availability of these rates would be published in the **Federal Register** and comments would be invited. Any changes to these rates made as a result of comments received would be submitted to the industry in a news release. Any changes in these rates during a fishing year would be accomplished by the same procedure. These rates may be adjusted based on observer data or industry input. This requirement will contribute to better enforcement and more accurate catch reporting by removing any incentive to vessel operators to manipulate product conversion rates in order to "stretch" quotas of valuable groundfish species.

Shoreside processors currently submit groundfish landings information on State of Alaska fish tickets. These processors would also submit weekly production reports for the following reasons: (1) Fish tickets do not collect discard information on prohibited species; (2) the landed groundfish product reported on fish tickets often differs from the product type placed in inventory by the processor, which is a situation that can frustrate attempts by enforcement personnel to verify reported landings with product inventory; and (3) fish tickets are not easily modified to reflect changes in Federal reporting requirements that are necessary to account for species by species quota management.

Species discard information is currently required on the weekly catch report. This information would continue to be required in the weekly production report for the same reason it is included in the proposed daily fishing log. That is, to account for total fishing mortality. Mothership processors and shoreside processors would be expected to collect and report at-sea discard information from the fishing vessels that deliver groundfish to them and also report their own discards of landed fish.

Monthly Product Value Report (MPVR)

Each catcher/processor, mothership processor, and shoreside processor or its parent company would complete a monthly product value report (MPVR) for any month during which groundfish harvested off Alaska were sold. The report would consist of quantity and product value data summarized by species and product form for all sales transactions for the calendar month. The report would be submitted to NMPS annually, at the conclusion of the fishing year. By providing monthly information on an annual basis, valuable data on seasonal price fluctuations would be obtained without placing domestic processors in a position of disclosing sensitive proprietary information during the fishing season.

Exvessel product value data are often reported on fish tickets for fishing vessels delivering to shoreside processors. Typically, an exvessel transaction does not occur when catcher/processor or mothership vessels off-load their product; and there are no exvessel prices and values to be reported on a fish ticket at the time it must be submitted. Therefore, an alternative mechanism is required to collect price and value data for this important and rapidly growing component of the groundfish fishery. To have comparable data from shoreside processors, extension of this requirement to all processors is necessary.

This information would be used in monitoring the economic performance of the groundfish fisheries and in conducting economic analyses of existing and proposed management measures. The requirements for such activities were discussed earlier.

The Council recommends that the above recordkeeping and reporting requirements be implemented so that adequate fishery information may be collected from the groundfish industry.

Other Changes in Reporting Requirements

In addition to the above changes in recordkeeping and reporting requirements that were adopted by the Council at its June 1989 meeting, the Secretary is proposing the following two changes to existing reporting requirements:

(1) Place the responsibility of submitting Alaska State fish tickets with groundfish buyers, including shoreside and floating processors, although the responsibility for the accuracy and completeness of the fish ticket would remain with the catcher vessel. This proposal recognizes the existing practice whereby buyers submit fish tickets on behalf of the fishermen and would make the Federal reporting requirement for fish ticket submission the same as State regulations (5 AAC 30.130. Reports Required of Processors, Buyers, and Fishermen.) Compliance with submission requirements is more practical to enforce if the party that collects the fish tickets is made responsible for timely submissions.

(2) Extend Federal reporting requirements to processors that receive

from fishing vessels that have been issued a Federal groundfish permit, groundfish harvested from State waters. Existing regulations do not require these processors to submit weekly catch reports or product transfer reports for groundfish harvested from State waters. Inseason monitoring and catch verification of groundfish receipts by these vessels relies only on State fish ticket information which is often less timely than weekly catch reports and does not allow for verification of catch receipts to the extent that logbooks and weekly production reports would. Excluding these processors from Federal reporting requirements undermines the intent of Amendment 17 to the Gulf FMP and Amendment 12 to the Bering Sea FMP (54 FR 18519, May 1, 1989) that extended Federal reporting requirements under §§ 672.5 (a) and 675.5 (a) to mothership processors that operate outside of the EEZ and process groundfish harvested from the EEZ. The proposal to extend Federal reporting requirements to all floating groundfish processors operating within the State waters recognizes the need of Federal managers to be able to account for total fishing mortality for inseason monitoring of quotas. In order to do this, Federal reporting requirements need to be extended to those mothership processors that take Federally managed groundfish from State waters.

In 1989, only 1 mothership processor has operated within the State waters, but most of the groundfish received by this vessel were reportedly harvested from the EEZ. Although the problem addressed by this proposal does not appear to be an issue at this time, it is desirable to implement the proposed extension of Federal recordkeeping and reporting requirements to close this potential loophole in Federal regulations. Mothership vessels operating within State waters during 1988 and 1989 were included in the analysis presented in the EA/RIR/IRFA prepared for Amendments 13 and 18 that examined the potential burden to the groundfish industry to comply with proposed recordkeeping and reporting requirements.

(B) Mandatory observer program.

Observers will be a uniformly trained group of scientists whose objectives are data gathering. They will be stationed aboard vessels and at shorebased processing plants to gather data according to a statistically-sound sampling plan of fishing and processing activities in the industry to provide data that cannot be accurately reported by fishermen or are too burdensome for them to collect during their normal operations. The observer program is intended to augment the industry recordkeeping and reporting system. Observers will perform multiple duties including: estimating haul weight, sampling for species composition, estimating product recovery rates, estimating discards and catch of prohibited species (PSCs), collecting biological data and specimens, and collecting data on the operation and characteristics of the vessel and fishing effort.

The need for observer coverage is directly related to the desired quality and reliability of the data collected from the fishing industry. Two principal reasons for observer coverage are:

(1) *To reduce the chance of bias in the data.*

Some fishery data, such as haul weight, amount of discards (e.g. undersized fish, undesired species, undesired quality), and amount of PSCs (e.g. Pacific halibut, king crab, and Tanner crabs), have a greater potential for bias than other data such as landed catch. Bias can result from intentional or unintentional misreporting of data or collecting non-representative data. Deliberate under-reporting of PSCs to stay under a PSC cap and therefore prolong a fishery opening is an example of intentional misreporting of data. Underreporting or over-reporting of discards, because the importance of such data collection is secondary to catching and processing target species, is an example of unintentional misreporting of data. Nonrepresentative data may be gathered if a fishing crew aboard a vessel collects sound data on PSCs in one area (e.g. because catch is small and there is time to collect such data) but not in another (e.g. because catch is large and there is not time to collect data).

(2) *To relieve industry from the burden of collecting data.*

Collection of data not normally gathered by fishermen or processors might be an inordinate burden if fishermen and processors were required to collect such data. For example, samples used to provide age data on some species are not normally collected in the prosecution of a fishery. Even collecting data on amounts of discard and PSC divert fishermen and processors from their primary responsibilities. In addition, gathering certain kinds of data may require specialized training, which could be an added burden if such training were required of industry.

Examples of data which, for one or both of these reasons, are best collected by onboard or onshore observers include:

- Mortality rates for non-landed catch—e.g. PSC and discards.
- Species composition data—to determine species co-occurrence and interactions.
- Size/length and age composition data—to determine year class strength and as input data for age-structured cohort analyses models.
- Fish stomach samples—to determine predator-prey relationships.
- Marine mammal interactions.
- Biological specimens and tag placement or recovery—to provide information for selected objectives, such as migration.
- Processing gear and techniques.
- Product recovery rates.

To provide a comprehensive sampling of the industry's activities over a wide geographical area and time period, the observer deployment will be devised so as to achieve a "statistically reliable" sampling of the fleet's fishing and processing activities.

The Council, with wide industry support, recognizes the importance of at-sea and shore-side observers to obtain the above information. The Council, therefore, recommends that the Secretary, in consultation with the Council, implement a mandatory observer program, according to an Observer Plan that the Council will develop in coordination with the industry. The Secretary recognizes that at this time the scope of the mandatory observer program is not fully developed. Should the Secretary approve this amendment, additional details need to be worked out in relation to requirements for marine mammal observers that are being imposed in compliance with the amended Marine Mammal Protection Act, and coordinated with NMFS with respect to the training needs and deployment.

3. Clarification Of The Secretary's Authority.

Under this measure, current authority in the BSAI and GOA FMPs and implementing regulations would be clarified to indicate that the Council is able to recommend total allowable catches (TACs) for (1) additional target species within the "target species" category for purposes of managing smaller stock components, or (2) fewer target species within the "target species" category for purposes of managing larger stock components. This action is necessary, because both FMPs are vague with respect to the Council's existing authority. The Council would continue to use the framework procedure that is now in place for establishing the annual TACs. The need to clarify the Council's authority on establishing TAC amounts within the target species category is as follows.

Four categories of species and species groups are now specified in the FMPs. They are: Target species, "other species", prohibited species, and non-specified species. For each of these categories, species and species groups are listed, as shown below.

Area	Target	"Other"	Prohibited	Non-specified
GOA & BSAI species.	Pollock Pacific cod. Sablefish Other rockfish.	Sculpins Sharks Skates Eulachon Smelts Octopus Capelin	Halibut Salmon Steelhead. Herring King crab. Tanner crab.	Species or groups of no economic value. Records not required
BSAI only	Arrowtooth flounder. Greenland turbot. Yellowfin sole. Rock sole. Atka mackerel. Pacific ocean perch. Squid. Other flatfish.			
GOA only.	Pelagic shelf rockfish. Thornyhead rockfish. Demersal shelf rockfish.	Flatfish	Atka mackerel. Squid	

Each January 1–December 31 fishing year, the Council recommends TACs and apportionments thereof among DAP, JVP, TALFF, and reserves for each of the above target species and the "other species" category. Subject to his approval, the Secretary implements the new TACs and apportionments. These actions are provided for by a procedure summarized below and set forth in the FMPs and implementing regulations, and are normally accomplished within a four-month (September–December) time frame.

Under this procedure, the Council recommends to the Secretary at its September meeting of each year preliminary specifications for TACs and apportionments thereof for each of the target species and the "other species" category. The Secretary publishes these recommendations in the **Federal Register** and invites public comments for 30 days. The Council, at its December meeting, reviews comments received and other available information and recommends to the Secretary initial specifications and apportionments thereof for the new fishing year Subject to Secretarial approval, these recommendations are then published in the **Federal Register** for purposes of managing the groundfish fisheries during the new fishing year.

Prior to 1988, the Council had split some of the target species groups into individual species and had established separate TACs for the individual species during the process of developing TACs for the upcoming fishing year. Reasons for establishing TACs for additional target species included fostering management of smaller components of the groundfish stocks to prevent overharvesting any one component. Examples of these actions in the BSAI included: (1) Splitting the "other flatfish" group into "other flatfish" and turbot; and (2) splitting the turbot group into arrowtooth flounder and Greenland turbot. Examples in the GOA included splitting "other rockfish" into pelagic shelf rockfish, slope rockfish, and demersal shelf rockfish. The Council took these actions in previous years after being advised by NOAA General Counsel that the Secretary is authorized under the FMPs to split species groups within the four discrete categories without amending the FMPs. NOAA General Counsel also advised, however, that moving species or species groups among the four categories, for example redesignating a target species as a prohibited species, would require an FMP amendment.

Nonetheless, the Council recommended that a TAC for rock sole be split from the "other flatfish" TAC as part of a 1988 amendment package to the BSAI FMP. The Secretary implemented this measure as Amendment 12 to the FMP. This process of using an FMP amendment to split a species from a target species group by FMP amendment is inconsistent with previous Council actions listed above, whereby the Council simply incorporated such changes during the development of initial TAC amounts. Furthermore, measures addressed under the amendment process take approximately one year to become effective, whereas the development and implementation of TAC amounts for an upcoming fishing year take about four months.

The Council recommends that the FMPs and regulations be amended to clarify the appropriate procedure. The Council proposes to amend the framework procedure contained in the FMPs and in the implementing regulations to clarify the procedure.

4. Walrus Islands Fishing Area Closure

Under this measure, portions of the Bering Sea subarea shoreward of twelve miles from islands named "the Twins" and "Round Island" and also Cape Peirce would be closed to fishing for groundfish from April 1 through September 30 of 1990 and 1991. The purpose of this measure is to restrict fishing activity in areas used as haul-out sites by walrus for a two-year period, during which effects of noise from fishing operations on walrus behavior can be better determined. In 1987 and 1988 the number of walrus hauled out on Round Island (Walrus Islands State Game Sanctuary) and at Cape Peirce (Togiak National Wildlife Refuge) declined by more than 50 percent, coincident with the initiation of fishing for yellowfin sole in the same area of northern Bristol Bay. State officials on Round Island reported frequent, loud noise on the island for the first time in 1987; these sounds emanated from yellowfin sole fishing vessels that were present. Various management actions near Round Island have been taken over the past several years to maintain or reduce levels of potential disturbance to walrus from other human related activities (e.g., from tourism and other fisheries such as salmon, herring, etc.).

Conclusive data establishing a direct cause and effect relationship between the sounds generated by the yellowfin sole fishery and the decline in walrus numbers are not available. However, Federal and State agencies, Native groups, and conservation organizations are concerned that these sounds are likely disturbing walrus to the point of adversely affecting their use of beaches in the region for hauling out. The Council believes that circumstantial evidence is sufficiently compelling to warrant corrective measures. Accordingly, the Council has recommended that no fishing for groundfish be allowed seaward of these haul-out sites during periods of peak walrus utilization, April 1 through September 30, for both the 1990 and 1991 fishing years. After that time, the Council may recommend further action with respect to protecting these areas as a management response intended to protect walrus. The Council proposes that these identified areas be closed to fishing for the prescribed period. The Secretary, however, notes that similar closures are not yet imposed by the State of Alaska within the adjacent State waters. Without complementary action by the State, the Council's recommendation would likely be diminished. Also, since this measure "sunsets" in two years, the time that this measure would be in effect may be too short to determine its success. The Secretary particularly requests comment on these two issues.

5. Sablefish Allocations

Under this measure, respective sablefish TACs in the Bering Sea and in the Aleutian Island subareas would be allocated to users of trawl gear and fixed gear in the following proportions:

Bering Sea subarea: trawl gear—50 percent and fixed gear—50 percent; and
Aleutian Islands subarea: trawl gear—25 percent and fixed gear—75 percent.

The purpose of this measure is to allocate shares of sablefish to the separate gear types such that each would be monitored independently of the other. Fisheries by the separate gear types could then be closed separately, which would, therefore, prevent one gear type from harvesting amounts of sablefish that the other gear type might have depended upon. Since the collective users of each gear type would have a set percentage of the sablefish TAC, they would be able to make more accurate business decisions as to how much sablefish they could depend on for harvest. The need to establish separate quotas by gear types in the BSAI became apparent in 1988 for the first time as a result of an inseason management action implemented by the Secretary.

In 1988, the Secretary determined that the sablefish TAC was insufficient to accommodate both a directed and bycatch harvest in the Bering Sea subarea. The Secretary, therefore, closed the Bering Sea subarea sablefish directed fishery on June 11, prior to the attainment of TAC (53 FR 22328, June 15, 1988). The Secretary took this action, because the attainment of the sablefish TAC would otherwise have required the Secretary to either close the groundfish fisheries that take sablefish as bycatch or prohibit retention of sablefish bycatch for the remainder of the year. The former would have imposed a substantial cost on the groundfish industry in terms of foregone catch and earnings and the latter would have resulted in substantial waste and potentially unaccounted for fishing mortality. In 1989 it was determined that the entire initial TAC was needed to support the bycatch needs of other directed groundfish fisheries.

The Magnuson Act requires that conservation and management measures prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery. While the NMFS action can be justified in these terms, the effect of this action was perceived to be a *de facto* allocation of sablefish to the non-directed fisheries, which are primarily trawl fisheries.

Trawl fisheries take the largest amount of the total groundfish harvest of all the gear types. Since some amounts of sablefish are caught as bycatch in the trawl fisheries, a disproportionate share of sablefish could be taken in the trawl fisheries, depending on the percentage used to define directed fishing for sablefish. In 1988, 20 percent was used to define directed fishing, which meant that even though the Secretary had closed the directed sablefish fishery, all vessels including those using trawl gear could still have caught amounts of sablefish less than 20 percent of the total amounts of groundfish on board. Since large amounts of other groundfish species, for example pollock and flounder had already been caught, trawl fishermen could target on sablefish, albeit illegally, with the result that the amount of sablefish would still be less than 20 percent of their total catch. Such action could rapidly consume the sablefish TAC and leave little or no amounts of sablefish for fixed gear users.

Amendment proposals requesting the Council to consider the allocation issue were submitted by representatives of both the trawl and fixed gear sectors of the industry. Given that the total TAC for sablefish in the Bering Sea will be harvested whether or not a directed fishery exists, the concern is not with the level of the sablefish TAC, but rather with its gear/mode allocation between fixed and trawl gear. Trawlers have typically been identified with the bycatch of sablefish, especially in the pollock, Pacific cod, Greenland turbot, and Pacific ocean perch fisheries. Users of hook-and-line gear have accounted for the majority of the directed sablefish catch. However, hook-and-line fisheries targeting on Pacific cod and Greenland turbot also take sablefish as bycatch.

For most of the 1989 fishing year, an emergency rule has redefined sablefish directing fishing to mean fishing that results in the retention of sablefish of 1 percent or more of the total amounts of fish and fish products on board, except Greenland turbot and Pacific ocean perch, plus 10 percent of the amounts of Greenland turbot and Pacific ocean perch. Thus, fishermen using trawl gear would have a much reduced incentive to top off their loads with sablefish when the allowable amount of sablefish on board might only be less than 1 percent of the total amount of groundfish. In fact, in the Bering Sea subarea where sablefish is only a bycatch fishery, the total amount of sablefish that has been harvested as of the June 20–23, 1989 Council meeting was less than 15 percent of the TAC. If trawl vessels do not harvest a disproportionate share of the sablefish TAC as a result of the percentage used to define sablefish directed fishing, more sablefish would be available to fixed gear users.

The Council, upon reviewing the status of the 1988 and 1989 sablefish catches in the BSAI and upon reviewing public testimony and the EA/RIR/IRFA, has recommended that the Secretary implement this sablefish allocation measure. At this time, the Secretary is publishing this measure to gain public comment and to review the result of the analyses supporting this measure. Prior to the conclusion of the time allocated to him under the Magnuson Act, he will determine whether this measure meets the test of the national standards contained in the Magnuson Act as well as standards in other applicable law.

6. Shelikof Strait District

Under this measure, an area known as Shelikof Strait in the Gulf of Alaska and presently part of the Central Regulatory Area would be established as a management district for purposes of managing harvests of pollock. Provisions for regulating the harvest of pollock from the Shelikof Strait District are needed to protect the spawning stock. During the last decade, a significant portion of the Gulf of Alaska pollock stock has spawned in the Shelikof Strait region. These large spawning concentrations became the target of a commercially important fishery. The best available information on the condition of the Gulf of Alaska pollock stock indicates that the stock has experienced a significant decline. If the pollock stock remains at a low level of abundance, it may be necessary to adopt strict conservation measures to protect the spawning stock. One type of conservation measure would be to regulate the harvest of pollock in the Shelikof Strait area. To implement this type of regulation a new Shelikof Strait management region must be defined.

Total biomass estimates for the Gulf of Alaska pollock stock are derived from hydroacoustic and bottom trawl survey data collected by the Northwest and Alaska Fisheries Center (NWAFC).

Hydroacoustic surveys were conducted in 1981, and annually since 1983. The annual hydroacoustic surveys were conducted in Shelikof Strait and focused on aggregations of pollock while they were in spawning condition (March–April). Since few pollock were believed to be present outside of Shelikof Strait during this time, the information obtained from the hydroacoustic surveys was thought to represent most of the pollock biomass occurring in the Western/Central Regulatory Area. Bottom trawl surveys of the entire Western and Central regions of the Gulf of Alaska were conducted in 1984 and 1987 during the summer (May–September). The bottom trawl survey data provides information on the distribution and abundance of pollock during their summer feeding period.

Recent estimates of pollock biomass in the Gulf of Alaska show biomass peaked in 1981 and declined rapidly in subsequent years. The 1988 hydroacoustic survey in Shelikof Strait produced a biomass estimate that was the lowest on record. The low biomass is attributed to poor recruitment of the 1984 and 1985 year classes. Information obtained from the 1987 triennial bottom trawl survey also showed a decline in pollock biomass between 1984 and 1987; however, the decline in biomass was not as large as the hydroacoustic survey suggested. Because the 1987 bottom trawl biomass estimate was substantially higher than the 1988 hydroacoustic survey estimate, the premise that hydroacoustic surveys in Shelikof Strait provide the best estimates of pollock abundance for the entire Western/Central Regulatory Area is being questioned.

Because of the apparent decline in pollock biomass, the Council recommended a limited quota for the Shelikof Strait region in 1989. The limited quota was imposed as a conservation measure to protect pollock, which in past years has been harvested in Shelikof Strait to obtain roe from mature female pollock. The Secretary concurred with the Council's recommendation and adjusted the TAC under the inseason management authority contained in § 672.22 such that no more than 6,250 mt of pollock may be harvested in Shelikof Strait. The Secretary requested that fishermen use "621" as the statistical area for purposes of reporting Shelikof Strait pollock harvests on catch reports required under § 672.5.

The Council, therefore, recommends that a separate Shelikof Strait district be established to provide a mechanism for monitoring the amount of pollock harvested from Shelikof Strait in future years. The Council proposes that the FMP be amended to establish the Shelikof Strait District to provide the necessary regulatory basis for managing pollock, including regulations to require reporting as is the current practice in other management areas.

The coordinates defining the proposed Shelikof Strait district are listed at § 672.2 of this rulemaking. In order to maintain the time series of historical catches based on International North Pacific Fisheries Commission (INPFC) statistical areas, two statistical areas, numbered 621 and 631, are proposed. The two reporting areas would be divided at 154° W. longitude, which would be consistent with the current reporting procedures used in the NWAFC observer database and the Pacific Fisheries Information Network (PacFIN) database.

7. Kodiak Island Trawl Area Closures

Under this measure, Type I and Type II closed areas of the EEZ now in effect through December 31, 1989 would be extended until December 31, 1992. Type I areas are closed to bottom trawling year-round. Type II areas are closed to bottom trawling from February 15 to June 15. These closures were implemented as part of Amendment 15 to the FMP for reasons that remain unchanged from those contained in the final rule implementing that amendment (49 FR 7868, March 13, 1987). The purpose of this measure is to extend protection to severely depressed king crab stocks for another three years in the vicinity of Kodiak Island where king crab are caught incidentally as bycatch in the bottom trawl fisheries.

This bycatch control measure was developed by the Council to provide an environment conducive to the recovery of king crab stocks around the island at a time of developing groundfish bottom trawl fisheries. This measure afforded protection to king crab in some areas during their molting or soft-shell period while in other areas it protected crab from bottom trawls year-round. The current expiration date of December 31, 1989, was selected under Amendment 15 to necessitate a review of the status of the crab stocks, and determine whether these measures are effective and should be continued.

The Type I and Type II areas of the EEZ continue to protect about 85 percent of the Kodiak Island king crab resource from bottom trawls during their softshell period and also protect 70 percent of the king crab resource year-round. These closures still provide bottom trawl fishing opportunities geographically close to established processing and support facilities. These measures are still considered vital if the king crab stocks are to recover in this area.

Either of these two types of areas could be expanded by a third type of closed area, referred to as a "Type III" area. The Type III expansion would be the result of what is referred to by the Council as a "recruitment event", which is the appearance of female king crab in sufficient numbers that indicate that the rebuilding schedule for king crab is effective and that further protection of female and prerecruit king crab is warranted to bolster the rebuilding success. Type III closure areas would protect juvenile king crab in areas which have been noted as important rearing areas or migratory pathways and would increase the probability of a king crab population recovery.

The Council has coordinated this measure with Kodiak area fishing representatives. Insufficient time has passed since its implementation in 1986 to determine the extent of improvement for king crab stocks, but biologists and the Kodiak area fishing industry generally believe that king crab stocks will continue to improve under this measure, albeit improvement is expected to be slow. The Council proposes this measure.

8. Interim Pacific Halibut Prohibited Species Catch Limits

Under this measure, interim prohibited species catch (PSC) limits would be established in the Gulf of Alaska for fixed gear and for trawl gear for the 1990 fishing year only. Fixed gear, which includes hook-and-line gear and pot gear would be allocated 750 mt. Trawl gear would be allocated 2,000 mt. The purpose of this measure is to allocate specific amounts of halibut PSCs to the two gear types for the 1990 fishing year so that PSC amounts and closures for the two gear types are independent of each other. During 1990, the Council intends to develop a regulatory amendment that would prohibit further fishing by hook-and-line gear fishermen as well as trawl fishermen if they were to reach a PSC limit, but retain after 1990 the framework procedures currently used to establish PSC limits, which are set forth in paragraph 672.20(f) in 50 CFR Part 672.

The incidental catch of halibut is a major bycatch management issue in the Gulf of Alaska. Halibut are distributed throughout the Gulf of Alaska and are taken as bycatch by all gear groups, including hook-and-line, pot, and trawl gear. In 1985, the Council adopted Amendment 14 to the GOA FMP, which

included a halibut bycatch management regime. The amendment established the halibut PSC framework procedure whereby the Secretary, in consultation with the Council, could manage halibut bycatch. The amendment intended, for example, that halibut PSC limits could be allocated to separate gear groups, including trawl and fixed gear. If either gear group reached its share of the halibut PSC allocation, just that gear group would be prohibited from further fishing. The regulations at § 672.20(f), however, that implemented the PSC framework procedure resulted in significantly less flexibility. Under the regulations, even though all catches of halibut are counted against the halibut PSC, only bottom trawling is prohibited if the halibut PSC is reached.

Under this regime, the Council has managed the incidental catch of halibut in the Gulf by annually determining a halibut PSC mortality limit. Since 1985, the Council has set the PSC limit at 2,000 mt. Industry representatives for trawl gear users have repeatedly testified that the way halibut are counted against the PSC is unfair when only trawl gear is affected. The Council recommended at its June 1989 meeting that the regulations be amended such that hook-and-line and pot gear would be closed independently of trawl gear. Establishing annual PSCs that would be allocated to fixed gear and trawl gear would continue to be accomplished through the framework procedure. A regulatory amendment to allow the Secretary to close fixed gear users independently of trawl gear will be the subject of future proposed rulemaking.

Industry representatives testified that PSC limits of 2,000 mt for trawl gear and 750 mt for fixed gear should be set for the 1990 fishing year. The Council, therefore, recommends that these limits be implemented, but that after 1990, the existing framework procedure for setting annual PSC limits would supercede these fixed limits. The Council intends that if the aggregated bycatch of halibut caught by hook-and-line or pot gear reaches 750 mt, further fishing by those gear types would be prohibited. The Council further intends that if the bycatch caught by trawl gear reaches 2,000 mt, further fishing with bottom trawl gear would be prohibited. The Council proposes to set halibut PSC limits of 750 mt for fixed gear and 2,000 mt for trawl gear for the 1990 fishing year only.

9. Examples of Forms

The following forms are provided as examples of forms that may be used in implementing the proposed rule. These forms will not appear in the Code of Federal Regulations.

MARINE MAMMAL LOG

If you intend to fish in 1991 and want to renew your exemption certificate, please check this box. ☐

Exemption No. : ____________ CG Documentation No. : ____________ State Vessel Registration No. : ____________

A Complete Set of Instructions are included on the Back of this Form.

This form must be kept current and available for inspection.
The form must be filled out each day you fish, whether or not you interact with a marine mammal.
Submit completed forms to your Regional Office at any time, however, all report forms must be received no later than December 31.

Classification

This proposed rule is published under section 304(a)(1)(C) of the Magnuson Act as amended by Pub. L. 99-659, which requires the Secretary to publish regulations proposed by the Council within 15 days of receipt of the fishery management plan amendment and regulations. At this time the Secretary has not determined that the amendments these regulations would implement are consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making these determinations, will take into account the data and comments received during the comment period.

The Council prepared an environmental assessment (EA) for these amendments and concluded that a significant impact on the environment will not occur as a result of this rule. A copy of the EA may be obtained from the Council at the address above and comments on it are requested.

The Under Secretary for Oceans and Atmosphere (Under Secretary) determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the EA/RIR/IRFA prepared by the Council. A copy of the EA/RIR/IRFA may be obtained from the Council at the address above.

The Under Secretary concludes that this proposed rule, if adopted, would have significant effects on small entities. These effects have been discussed in the EA/RIR/IRFA, a copy of which may be obtained from the Council at the address above.

The Under Secretary determined that this proposed rule contains a collection of information requirement subject to the Paperwork Reduction Act. This collection of information requirement has been submitted to the Office of Management and Budget for approval. Most of the information collected under the proposed recordkeeping and reporting requirements is effort, production and value information normally maintained by the groundfish vessel operators and processing plant owners for their own internal business purposes. Public recordkeeping and reporting burden for this collection of information is limited to the amount of time necessary for vessel operators and processor plant owners to transfer this information to the required logbook or report and to submit this information to the NMFS. The additional burden is estimated to average 30 to 36 hours per year (about 10 to 13 minutes per day) for floating processors, 24 hours per year (less than 20 minutes per day) for shoreside processing plants, and 5.5 hours per year (about 10 minutes per day) for vessels harvesting groundfish. These estimates include the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. The proposed rule (§ 672.5(c)(1)(ii) and § 675.5(c)(1)(ii)) makes a minor change to an existing regulation that requires catcher/processors and mothership processors to submit checkin/checkout reports to NMFS, Alaska Region. The burden associated with this regulation averages less than 10 minutes per response and is approved under OMB No. 0648-0213. Send comments regarding these burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden to the NMFS at the address above, and to the Office of Information and Regulatory Affairs, Office of Management of Budget, Washington, DC 20503 (Attn. NOAA Desk Officer).

The Council determined that this rule, if adopted, will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Parts 611, 620, 672, and 675

Fisheries, Fishing vessels, Reporting and recordkeeping.

Dated: August 25, 1989.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 C.F.R. Parts 611, 620, 672, and 675 are proposed to be amended as follows:

PART 611—FOREIGN FISHING

1. The authority citation for Part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 611.92, paragraph (c)(2)(i) is revised to read as follows:

§ 611.92 Groundfish of the Gulf of Alaska.

* * * * *

(c) * * *

(2) * * *

(i) The catch and retention of the amount of any groundfish in the Gulf of Alaska for which a nation has an allocation is permitted during fishing seasons specified at 50 CFR 672.23, except in the following circumstances:

* * * * *

3. In § 611.93, paragraph (b)(3)(i) is revised and paragraph (c) is amended by redesignating paragraphs (c)(2) through (c)(4) as (c)(3) through (c)(5) and adding a new paragraph (c)(2) to read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

* * * * *

(b) * * *

(3) * * *

(i) The catch and retention of the amount of any groundfish in the Bering Sea and Aleutian Islands management area for which a nation has an allocation is permitted during fishing seasons specified at 50 CFR 675.23, except in the following circumstances:

* * * * *

(c) * * *

(2) *Fishing.* No fishing is allowed in that part of the Bering Sea Subarea shoreward of a line on which each point is 12 miles from the baseline used to measure the Territorial Sea around islands named Round Island and The Twins as shown on National Oceanic Survey Chart INT 500, and around Cape Pierce (160°10′ W. longitude, 58°40′ N. latitude) during April 1 through September 30 of each of the 1990 and 1991 fishing years.

* * * * *

PART 620—GENERAL PROVISIONS FOR DOMESTIC FISHERIES

4. The authority citation for Part 620 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

5. Section 620.3 is amended by revising paragraph (d) as follows:

§ 620.3 Relation to other laws.

* * * * *

(d) *Marine mammals.* Regulations governing exemption permits and the recordkeeping and reporting of the incidental take of marine mammals are set forth at Parts 216 and 229 of this title.

* * * * *

PART 672—GROUNDFISH OF THE GULF OF ALASKA

6. The authority citation for Part 672 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

7. In § 672.2, the definition of the *Shelikof Strait District* is added and the definition of *Statistical area* is revised to read as follows:

* * * * *

Shelikof Strait district means all waters of the EEZ enclosed by a line connecting the following points in the order listed:

I			intersection of 157°00′ W. with the Alaska Peninsula.

* * *

Statistical area means any one of the nine statistical areas of the EEZ in the Gulf of Alaska defined as follows:

(1) Statistical Area 61—between 170°00′ and 159°00′ W. longitudes;

(2) Statistical Area 62—between 159°00′ and 154°00′ W. longitudes;

(3) Statistical Area 620—Shelikof Strait district as defined by this paragraph.

(4) Statistical Area 621—that part of the Shelikof Strait District between 157°00′ and 154°00′ W. longitudes.

(5) Statistical Area 631—that part of the Shelikof Strait District between 154°00′ and 152°00′ W. longitudes.

(6) Statistical Area 63—between 154°00′ and 147°00′ W. longitude;

(7) Statistical Area 64—between 147°00′ and 140°00′ W. longitudes;

(8) Statistical Area 65—east of 137°00′ W. longitude and north of 54°30′ N. latitude;

(9) Statistical Area 68—between 140°00′ and 137°00′ W. longitudes.

8. Section 672.3 is amended by revising paragraph (b) as follows:

§ 672.3 Relation to other laws.

* * * * *

(b) For regulations governing foreign fishing for groundfish in the Gulf of Alaska, see 50 CFR 611.92; for those governing foreign fishing for groundfish in the Bering Sea and Aleutian Islands, see 50 CFR 611.93. For regulations governing fishing for groundfish in the Bering Sea and Aleutian Islands by vessels of the United States, see 50 CFR Part 675; for those governing exemption permits and the recordkeeping and reporting of the incidental take of marine mammals, see 50 CFR 216.24 and 50 CFR 229. For regulations governing fishing for Pacific halibut by vessels of the United States, see 50 CFR 301.

9. In § 672.5 paragraph (a) is revised; paragraph (b) is retitled and redesignated as paragraph (d), paragraph (c) is redesignated as paragraph (e), and new paragraphs (b) and (c) are added to read as follows:

§ 672.5 Recordkeeping and reporting.

(a) *Reporting areas and general requirements.*—(1) *Reporting areas.* (i) A reporting area for a groundfish species, species group, or prohibited species consists of the relevant Gulf of Alaska statistical area specified under paragraphs (a)(1) (ii) and (iii) of this section and, in addition to the State waters described in the relevant statistical area, all State waters between the shore and any inshore boundary of that statistical area.

(ii) With respect to any groundfish species, other than pollock, any groundfish species group or any prohibited species, the relevant Gulf of Alaska statistical areas include each of the following statistical areas described in section 672.2: 61, 62, 63, 64, 65, and 68.

(iii) With respect to pollock, the relevant Gulf of Alaska statistical areas include each of the following statistical areas: 61, 62, 621, 631, 64, 65, 68, and that portion of 63 outside of 621 and 631.

(2) *General requirements.* All fishing vessels issued a Federal groundfish fishing permit under § 672.4 of this part and all catcher/processors, mothership processor vessels, and shoreside processing plants that receive groundfish from vessels regulated under this part must comply with the recordkeeping and reporting requirements set forth under this section.

(b) *Logbooks.* The operator of any catcher vessel larger than 5 net tons or of any catcher/processor vessel or mothership processor vessel, or the owner of any shoreside processing plant that harvests or processes groundfish from any reporting area in the Gulf of Alaska described in Section 672.5, must meet the following recordkeeping requirements:

(1) *General.* The operator of each catcher vessel, catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processing plant must maintain timely and accurate records required by this section.

(i) The operator of each catcher vessel, catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processing plant must maintain all required records in English, based on Alaska Local Time (ALT) unless otherwise specified in the regulations, and make the original copy of the records immediately available for inspection upon the request of an authorized officer or observer.

(ii) For any fishing year, the operator of each catcher vessel, catcher/processor vessel, and mothership vessel, and the owner of each shoreside processing plant must retain the original copy of all required records on board the vessel, or for shoreside plants, within the processing facility, until the end of the fishing year or for as long after the fishing year as fish or fish products recorded in logbooks are retained onboard a vessel or at a processing facility.

(iii) The operator of each catcher vessel, catcher/processor vessel, and mothership vessel, and the owner of each shoreside processing plant must use the logbook prescribed and provided by the Regional Director. The logs shall be maintained in accordance with these regulations and the instructions attached to the issued logs.

(iv) Recordkeeping required under paragraphs (b)(2)(ii), (b)(3)(ii), and (b)(4)(i) of this section must be in indelible ink with corrections to be accomplished by lining out and rewriting so that the original entry remains legible. Original pages in issued logs shall not be removed from the log.

(2) *Daily fishing logbook.* (i) The operator of each catcher/processor and catcher vessel harvesting groundfish from any reporting area in the Gulf of Alaska must maintain onboard a daily fishing log of the effort and catch information of the vessel as described in paragraph (b)(2)(ii) of this section. Daily effort entries are required for each day the vessel conducts fishing operations. Daily entries are not required for those days when the fishing vessel stays in port. A separate page in the daily fishing logbook must be used for each day's fishing activity. If fishing activity is conducted in more than one Gulf of Alaska reporting area during any day, a separate page in the daily fishing logbook must also be used for each reporting area. Catcher/processor vessels will be provided with daily fishing logbooks that also record the daily production information required under paragraph (b)(3) of this section.

(ii) Contents. (A) The daily fishing log must record the following effort information on a daily basis:

(1) A consecutive page number beginning with the first day of the fishing year that the vessel started fishing operations and continuing throughout the log for the remainder of the fishing year;

(2) The date;

(3) The catcher vessel's name and ADF&G vessel number;

(4) The reporting area in which the catcher vessel is conducting fishing activity;

(5) The gear type;

(6) For hook and line and pot gear, the average number of hooks or pots per skate, size of hooks used, and average length of skates;

(7) For trawl gear, the size of net opening, codend mesh size, and average speed of tow;

(8) The vessel operator's signature;

(9) Crew size;

(10) Daily discard amounts of each groundfish species or species group to at least the nearest tenth of a metric ton (0.1 mt) round weight, and daily discard amounts of each prohibited species listed under section 672.20(e) by number, except for discard amounts of herring, which should be reported by round weight (0.1 mt).

(B) The following information must be recorded for each haul or set, as appropriate to the gear type employed:

(1) The consecutive trawl or set number, beginning with the first trawl or set of the fishing year;

(2) The time the gear was set (ALT);

(3) The set position in geographical coordinates;

(4) The sea depth;

(5) The trawl depth;

(6) The hauling time;

(7) The haul position in geographical coordinates;

(8) The duration of the set;

(9) The number of pots or skates;

(10) The estimated total weight of the catch for the trawl or set, to at least the nearest metric ton round weight.

(11) Marine mammal log form required under 50 CFR Part 229.

(iii) Maintenance of the daily fishing log. Entries in the daily fishing log as to trawl or set number, time, position, and estimated catch weight shall be updated within two hours of the hauling time. All other entries in the daily fishing log shall be updated within 12 hours of the end of the day (ALT) on which the trawl or set occurred.

(iv) Upon each delivery or landing, species discard amounts must be provided to the processor receiving the vessel's catch so that such amounts may be reported under the requirements set forth at paragraphs (c)(1)(iii)(J) and (c)(1)(iii)(K) of this section.

(v) Submission of daily fishing logs. Each vessel operator must submit a copy of the daily fishing log on a quarterly basis to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. Copies of the DFL must be submitted by May 1, August 1, November 1, and February 1 for the previous quarter's fishing activity.

(3) *Daily cumulative production log* (DCPL). (i) The operator of each catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processor that processes groundfish from any reporting area in the Gulf of Alaska must maintain on the processing vessel or within the processing facility a daily cumulative production log of catch receipt (if applicable), species discard, and retained groundfish product information as described in paragraph (b)(3)(ii) of this Section. Daily log entries are required for each day the vessel or facility receives or processes groundfish. A separate page in the daily fishing logbook must be used for each day's fishing activity. If fishing activity is conducted in more than one reporting area during any day, a separate page in the daily fishing logbook must also be used for each reporting area. For the purpose of logbook entries, a week is defined as the period from Sunday through Saturday.

(ii) Contents. (A) The DCPL must record the following information on a daily basis:

(1) A consecutive page number beginning with the first day of the fishing year the vessel started operations and continuing throughout the log for the remainder of the fishing year;

(2) The date;

(3) The vessel or plant name and ADF&G vessel number or Alaska State Processor Code, whichever is applicable;

(4) The reporting area from which the groundfish catch receipt was harvested;

(5) The gear type used to harvest the groundfish catch receipt;

(6) The vessel operator's or plant owner's signature;

(7) Information on crew size or number of employees;

(8) Daily discard amounts by a processor of each groundfish species or species group to at least the nearest tenth of a metric ton (0.1 mt) round weight, and, for each prohibited species listed under paragraph 672.20(e), daily discard amounts by number, except for discard amounts of herring, which should be reported by round weight (0.1 mt).

(9) For each species or species group for which a total allowable catch (TAC) has been specified by the Secretary under Section 672.20 of this part, and product produced during the day:

(*i*) The product by species code and product type;

(*ii*) The balance forward of species product amounts produced during a week to the nearest tenth of a metric ton (0.1 mt). (At the beginning of each week, the balance forward for species product amounts for that week will be zero).

(*iii*) The daily total product produced by species and product type to the nearest tenth of a metric ton (0.1 mt);

(*iv*) The cumulative weekly total product aboard by species and product type to the nearest tenth of a metric ton (0.1 mt).

(B) The following information must be recorded for each catch receipt:

(1) For each set or codend received by mothership processor vessels;

(*i*) A consecutive catch receipt or codend number for the day;

(*ii*) The catch receipt time;

(*iii*) The catch receipt position;

(*iv*) The name of the delivering vessel;

(*v*) The delivery vessel's Federal groundfish permit number or ADF&G vessel number;

(*vi*) Estimated catch receipt weight to at least the nearest metric ton round weight.

(*vii*) Marine mammal interaction information required under 50 CFR part 229.

(2) For each groundfish landing received by shoreside processors from catcher vessels:

(i) State of Alaska fish ticket number;

(*ii*) The name of the delivering vessel;

(*iii*) The delivery vessel's ADF&G vessel number or federal groundfish permit number;

(*iv*) The catch receipt time (ALT);

(*v*) Estimated catch receipt weight to at least the nearest metric ton round weight.

(iii) Daily maintenance of the DCPL. Entries in the DCPL as to codend or fish ticket number, receipt time, position, estimated catch receipt weight, and delivering vessel's name shall be updated within two hours of the receipt time. All other entries in the DCPL shall be updated within 12 hours of the end of the day (ALT) on which the trawl, set, receipt, or production occurred. Product shall be logged on the day processed regardless of the day of catch or receipt. Entries for product weights must be based on the number of production units (pans, cartons, blocks, trays, cans, bags, or individually frozen fish) and the average weight of the production unit, with reasonable allowance for water added. Allowance for water added cannot exceed five percent of the gross unit weight. Product unit weights must be based on the total actual net weight of the product as determined by representative samples.

(iv) Submission of DCPL's. Each processing vessel operator or plant owner must submit a copy of the DCPL on a quarterly basis to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. Copies of the DCPL must be submitted by May 1, August 1, November 1, and February 1 for the previous quarter's processing activity.

(4) *Product transfer logbooks.* The operator of each catcher/processor vessel and mothership processor vessel, and the owner of each shoreside processor plant must record, in a separate transfer log, each offloading, shipment or receipt of any processed fishery product, including quantities transferred or off-loaded outside the EEZ, within any states' territorial waters, or within the internal waters of any state or at any shoreside facility.

(i) Contents. The transfer log must record the following information:

(A) A consecutive page number beginning with the first transfer or shipment of groundfish product in a fishing year and continuing throughout the log for the remainder of the fishing year;

(B) Whether the product transfer reflects a product receipt or shipment/offloading;

(C) Company representative's name, telephone number, and Fax or telex number;

(D) Vessel or plant name, plant location, Federal permit number or Alaska State processor code number, and radio call sign of vessel if applicable;

(E) The name of the other vessel (including Federal permit number and call sign) shipping agent, or commercial facility (including location) involved in the transfer or shipment;

(F) The time and date (ALT) and, if applicable, vessel location (in geographic coordinates, or if within a port, the name of the port) at which the transfer or shipment began and was completed;

(G) The intended destination of the carrier or vessel receiving product;

(H) For each product type by species or species group, the total net product weight transferred or shipped to the nearest one-tenth of a metric ton (0.1 mt), an estimated net weight in kilograms or pounds of product per carton, and the total number of cartons of product transferred or shipped.

(ii) Submission of transfer logs. Copies of transfer logs for each weekly period, Sunday through Saturday, ALT, must be submitted to the Regional Director within one week following the week ending date through such means as the Regional Director will prescribe. Submission of product transfer logs is only required if product transfer activity occurred during that weekly period.

(c) *Other recordkeeping and reporting requirements*—(1) *Catcher/processor vessels, mothership processor vessels, and shoreside processor plants.* The operator or owner of any vessel or shoreside processor of the United States who processes groundfish caught in the EEZ from any reporting area in the Gulf of Alaska must, in addition to the requirements of paragraphs (a) and (b) of this section, comply with the following requirements:

(i) State of Alaska Fish Tickets—(A) The operator of any mothership processor vessel, catcher/processor vessel, or the owner of any shoreside processing facility that harvests or receives groundfish harvested from any reporting area in the Gulf of Alaska or internal waters of the State of Alaska, will be responsible for the submission to ADF&G of an accurately completed State of Alaska fish ticket or an equivalent document containing all of the information required on an Alaska fish ticket. U.S. catcher vessels delivering to U.S. processors must provide to the processor information necessary for accurate completion of the fish ticket. Operators of catcher vessels to which a permit has been issued under § 672.4 of this part and who do not deliver to a catcher/processor vessel, mothership processor vessel, or shoreside processing facility are responsible for their own submission of fish tickets. Fish tickets are not required for groundfish sold or delivered to a foreign processing vessel which has a permit under § 611.92 or § 611.93 of this title.

(1) When to submit fish tickets.

(i) Shoreside processors. Owners of shoreside processing facilities must prepare and submit State of Alaska fish tickets required under paragraph (c)(1)(i) of this section to ADF&G within one week after fish are landed.

(ii) Catcher/processor vessels and mothership processor vessels. Operators of processing vessels must prepare and submit State of Alaska fish tickets required under paragraph (c)(1)(i) of this section to ADF&G within one week after returning to port. A document equivalent to a State of Alaska fish ticket may be submitted if groundfish product is landed outside of Alaska.

(iii) Catcher vessels. Operators of catcher vessels to which a permit has been issued under § 672.4 of this part and who do not deliver to a vessel at sea or to a shoreside processing facility must submit the fish ticket required under (c)(1)(i) of this section within one week after fish are landed.

(B) Address. Mail or deliver State of Alaska fish tickets to the ADF&G office located nearest to the area of groundfish purchase, or send these documents to the Director, Commercial Fish Division, Alaska Department of Fish and Game Headquarters, P.O. Box 3–2000, Juneau, Alaska 99802.

(ii) Alaska groundfish check-in report. The operator of any catcher/processor and/or mothership processor vessel must notify the Regional Director before starting and upon stopping fishing for or receiving groundfish from any reporting area in the Gulf of Alaska. Notification will be through such means as the Regional Director will prescribe, and will consist of the vessel's name, permit number (if applicable), radio call sign, date and hour (ALT) of when fishing for or receiving groundfish will begin or cease, and the latitude and longitude of such activity.

(iii) Weekly production report. After a receipt of groundfish by a shoreside plant and continuing for the rest of the year, or after notification of starting fishing by a vessel under paragraph (c)(1)(ii) of this section and continuing until that vessel's entire catch or cargo of fish has been off-loaded, the operator of that vessel or plant owner must submit a weekly product report, including reports of zero tons caught or received, for each weekly period, Sunday through Saturday, ALT, and each portion of such a weekly period. The weekly product report must be received by the Regional Director within one week of the end of the reporting period through such means as the Regional Director will prescribe. This report must contain the following information:

(A) Submitter's name, telephone number, and Fax or telex number;

(B) Name of vessel or plant and radio call sign of vessel;

(C) Federal permit number or Alaska State processor code, which ever is applicable;

(D) The ending date (Saturday) of the reporting period;

(E) Gear type used to harvest groundfish catch or catch receipt;

(F) The reporting area(s) from which each retained species or species group product was caught during the reporting period;

(G) Number of days fished or during which fish were received;

(H) The total estimated catch weight or catch receipt for each reporting area;

(I) The product type and total product weight produced during the weekly reporting period for each species or species group for which a total allowable catch (TAC) has been specified by the Secretary under Section 672.20 of this part;

(J) The amount of each groundfish species or species group discarded during the reporting period, including discard amounts provided to processors under paragraph (b)(2)(iv). Discard amounts should be reported in round weight to the nearest metric ton.

(K) The amount of each prohibited species discarded during the reporting period, including prohibited species discard amounts provided to processors under paragraph (b)(2)(iv). Discard amounts of each prohibited species listed under paragraph 672.20(e) must be reported by number, except for herring, which should be reported by round weight (0.1 mt).

(iv) Alaska groundfish processor monthly product value report. Each groundfish processor or its parent company must complete a monthly product value report for any month during which groundfish harvested from any of Gulf of Alaska reporting area were sold. Monthly product value reports must be submitted annually to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. The monthly product value reports must be received by NMFS no later than March 1 for the previous fishing year. These reports must include the following information:

(A) Name of the representative for the vessel, plant or company, telephone number, and Fax or telex number;

(B) Name of vessel(s) or plant(s);

(C) Federal permit number or Alaska State processor code, which ever is applicable;

(D) Month and year;

(E) For each species or species group for which product was sold during the month, the product type(s); Product size(s) or grade(s); product weight(s) to the nearest tenth of a metric ton (0.1 mt); and product value(s).

(d) *Groundfish utilization surveys.*

* * * * *

10. Section 672.7 is amended by adding paragraph (d) as follows:

§ 672.7 Prohibitions.

* * * * *

(d) Fish for groundfish except in compliance with the terms of an observer plan as provided by § 672.27 of this part.

* * * * *

11. In § 672.20, paragraph (a)(2) is revised, paragraph (f)(2) is suspended from January 1, 1990 through December 31, 1990, and new paragraph (f)(3) is added from January 1, 1990, through December 31, 1990, to read as follows:

§ 672.20 General limitations.

(a) * * *

(2) *Total Allowable Catch (TAC).* The Secretary, after consultation with the North Pacific Fishery Management Council (Council), will specify the annual TAC for each calendar year for each target species and the "other species" category, and will apportion the TACs among DAP, JVP, TALFF, and reserves. TACs in the target species category may be split or combined for purposes of establishing new TACs with apportionments thereof under paragraph (c)(1) of this section.

* * * * *

(f) * * *

(3) Pacific halibut PSC limits. (i) PSC limits of 2,000 mt for trawl gear and 750 mt for hook-and-line and pot gear, combined are established. Each share is allocated to DAP and to JVP in proportion to the specified DAP and JVP amount of groundfish apportionment.

(ii) Trawl gear. If during the year, the Regional Director determines that the catch of halibut by vessels using trawl gear and delivering their catch to foreign vessels (JVP vessels) or vessels using trawl gear and delivering their catch to U.S. fish processors (DAP vessels) will reach their proportional share of 2,000 mt of halibut provided for under paragraph (f)(3)(i) of this section, the Regional Director will publish a notice in the Federal Register prohibiting fishing with trawl gear other than pelagic trawl gear for the rest of the year by DAP or JVP vessels in the area to which the PSC limit applies.

(iii) Hook-and-line and pot gear. If during the year, the Regional Director determines that the catch of halibut by vessels using hook-and-line and vessels using pot gear and delivering their catch to foreign vessels (JVP vessels) or vessels using hook-and-line and vessels using pot gear and delivering their catch to U.S. fish processors (DAP vessels) will reach their proportional share of 750 mt of halibut provided for under paragraph (f)(3)(i) of this section, the Regional Director will publish a notice in the **Federal Register** prohibiting fishing with hook-and-line or pot gear for the rest of the year by DAP or JVP vessels in the area to which the PSC limit applies.

12. Section 672.23 is revised to read as follows:

§ 672.23 Seasons.

(a) Fishing for groundfish during the January 1-December 31 fishing year in the statistical areas defined at § 672.2 is authorized from January 1 through December 31, subject to the other provisions of this part, except as provided in paragraph (b) of this section.

(b) Fishing for sablefish is authorized with hook-and-line gear from 12:00 noon Alaska local time on April 1 through December 31, subject to other provisions of this part.

13. In § 672.24, paragraph (c) is revised to read as follows:

§ 672.24 Gear limitations.

* * * * *

(c) *Trawls other than pelagic trawls.* (1) No person may trawl in waters of the EEZ within the following areas in the vicinity of Kodiak Island (see Figure 2, Area Type I) from a vessel having any trawl other than a pelagic trawl either attached or on board:

(i) *Alitak Flats and Towers Areas:* All water of Alitak Flats and the Towers Areas enclosed by a line connecting the following seven points in the order listed:

Reference point	N. lat.	W. long.	Land description
a	56°59'4"	154°31'1"	Low Cape.
b	57°00'0"	155°00'0"	
c	56°17'0"	155°00'0"	
d	56°17'0"	153°52'0"	
e	56°33'5"	153°52'0"	Cape Sitkinak
f	56°54'5"	153°32'5"	East point of Two-headed Island
g	56°56'0"	153°35'5"	Kodiak Island, thence, along the coastline of Kodiak Island until intersection of
a	56°59'4"	154°31'1"	Low Cape

(ii) *Marmot Flats Area:* All water enclosed by a line connecting the following five points in the clockwise order listed:

Reference point	N. lat.	W. long.	Land description
a	58°00'0"	152°30'0"	
b	58°00'0"	151°47'0"	
c	57°37'0"	151°47'0"	
d	57°37'0"	152°10'1"	Cape Chiniak, thence, along the coastline of Kodiak Island to
e	57°54'5"	152°30'0"	North Cape.
a	58°00'0"	152°30'0"	

(2) From February 15 to June 15, no person may trawl in waters of the EEZ within the following areas in the vicinity of Kodiak Island (see Figure 2, Area Type II) from a vessel having any trawl other than a pelagic trawl either attached or on board:

(i) *Chirikof Island Area:* All waters surrounding Chirikof Island enclosed by a line connecting the following four points in the counter clockwise order listed:

Reference point	N. lat.	W. long.
a	56°07'0"	155°13'0"
b	56°07'0"	156°00'0"
c	55°41'0"	156°00'0"
d	55°41'0"	155°13'0"
a	56°07'0"	155°13'0"

(ii) *Barnabas Area:* All waters enclosed by a line connecting the following six points in the counter clockwise order listed:

Reference point	N. lat.	W. long.	Land description
a	57°00'0"	153°18'0"	Black Point
b	56°56'0"	153°09'0"	
c	57°22'0"	152°18'5"	South Tip of Ugak Island
d	57°23'5"	152°17'5"	North Tip of Ugak Island
e	57°25'3"	152°20'0"	Narrow Cape, thence, along the coastline of Kodiak Island to
f	57°04'2"	153°30'0"	Cape Kasick to
a	57°00'0"	153°18'0"	Black Point, incl. inshore waters

(3) (i) *Type III Areas.* Nothwithstanding the gear restrictions in paragraphs (c)(1) and (c)(2) of this section, the Secretary, in consultation with the Council, may classify the following additional Type III as a Type I area under paragraph (c)(1) of this section or as a Type II area under paragraph (c)(2) of this section and close the expanded areas to further fishing as described by paragraph (c)(1) or (c)(2) by procedures in paragraph (c)(3)(ii) of this section:

(A) Outer Marmot Bay: All waters bounded by lines connecting the following coordinates in the order listed:

N. lat.	W. long.
58°00'00"	151°55'40"
58°02'30"	151°55'40"
58°02'30"	151°47'00"
58°04'53"	151°47'00"
58°04'53"	151°35'25"
57°57'40"	151°35'25"
57°57'40"	151°47'00"
58°00'00"	151°47'00"
58°00'00"	151°55'40"

(B) Outer Barnabas Area: All waters bounded by lines connecting the following coordinates in the order listed:

N. lat.	W. long.	Land description
57°14'30"	152°37'50"	
57°10'00"	152°25'30"	
57°02'32"	152°35'02"	
57°04'25"	152°54'15"	Then following the three mile limit line to
57°13'00"	152°49'25"	Then following the three mile limit line to
57°14'30"	152°37'50"	

(C) Horse's Head Area: All waters bounded by lines connecting the following coordinates in the order listed:

N. lat.	W. long.	Land description
56°49'55"	153°36'30"	
56°34'35"	153°05'37"	
56°28'35"	153°05'37"	
56°28'35"	153°52'05"	Then following the three mile limit line to
56°49'55"	153°36'30"	

(D) Outer Chirikof Area: All waters bounded by lines connecting the following coordinates in the order listed:

N. lat.	W. long.
56°16'45"	155°39'00"
56°16'45"	155°11'45"
55°41'00"	155°13'00"
56°07'10"	155°13'00"
56°07'10"	155°39'00"
56°16'45"	155°39'00"

(ii) Procedure. No expansion of Type I or Type II areas by the additional Type III areas described at paragraph (c)(3)(i) of this section will take effect until the Secretary has published the proposed expansion in the **Federal Register** for public comment for a period of thirty (30) days before it is made final.

(4) Each person using a trawl to fish in any area limited to pelagic trawling under paragraphs (c)(1) and (c)(2) of this section must maintain in working order on that trawl a properly functioning, recording net-sonde device, and must retain all net-sonde recordings aboard the fishing vessel during the fishing year.

(5) No person using a trawl to fish in any area limited to pelagic trawling under paragraphs (c)(1) and (c)(2) of this section will allow the footrope of that trawl to be in contact with the seabed for more than 10 percent of the period of any tow, as indicated by the net-sonde device.

BILLING CODE 3510-22-M

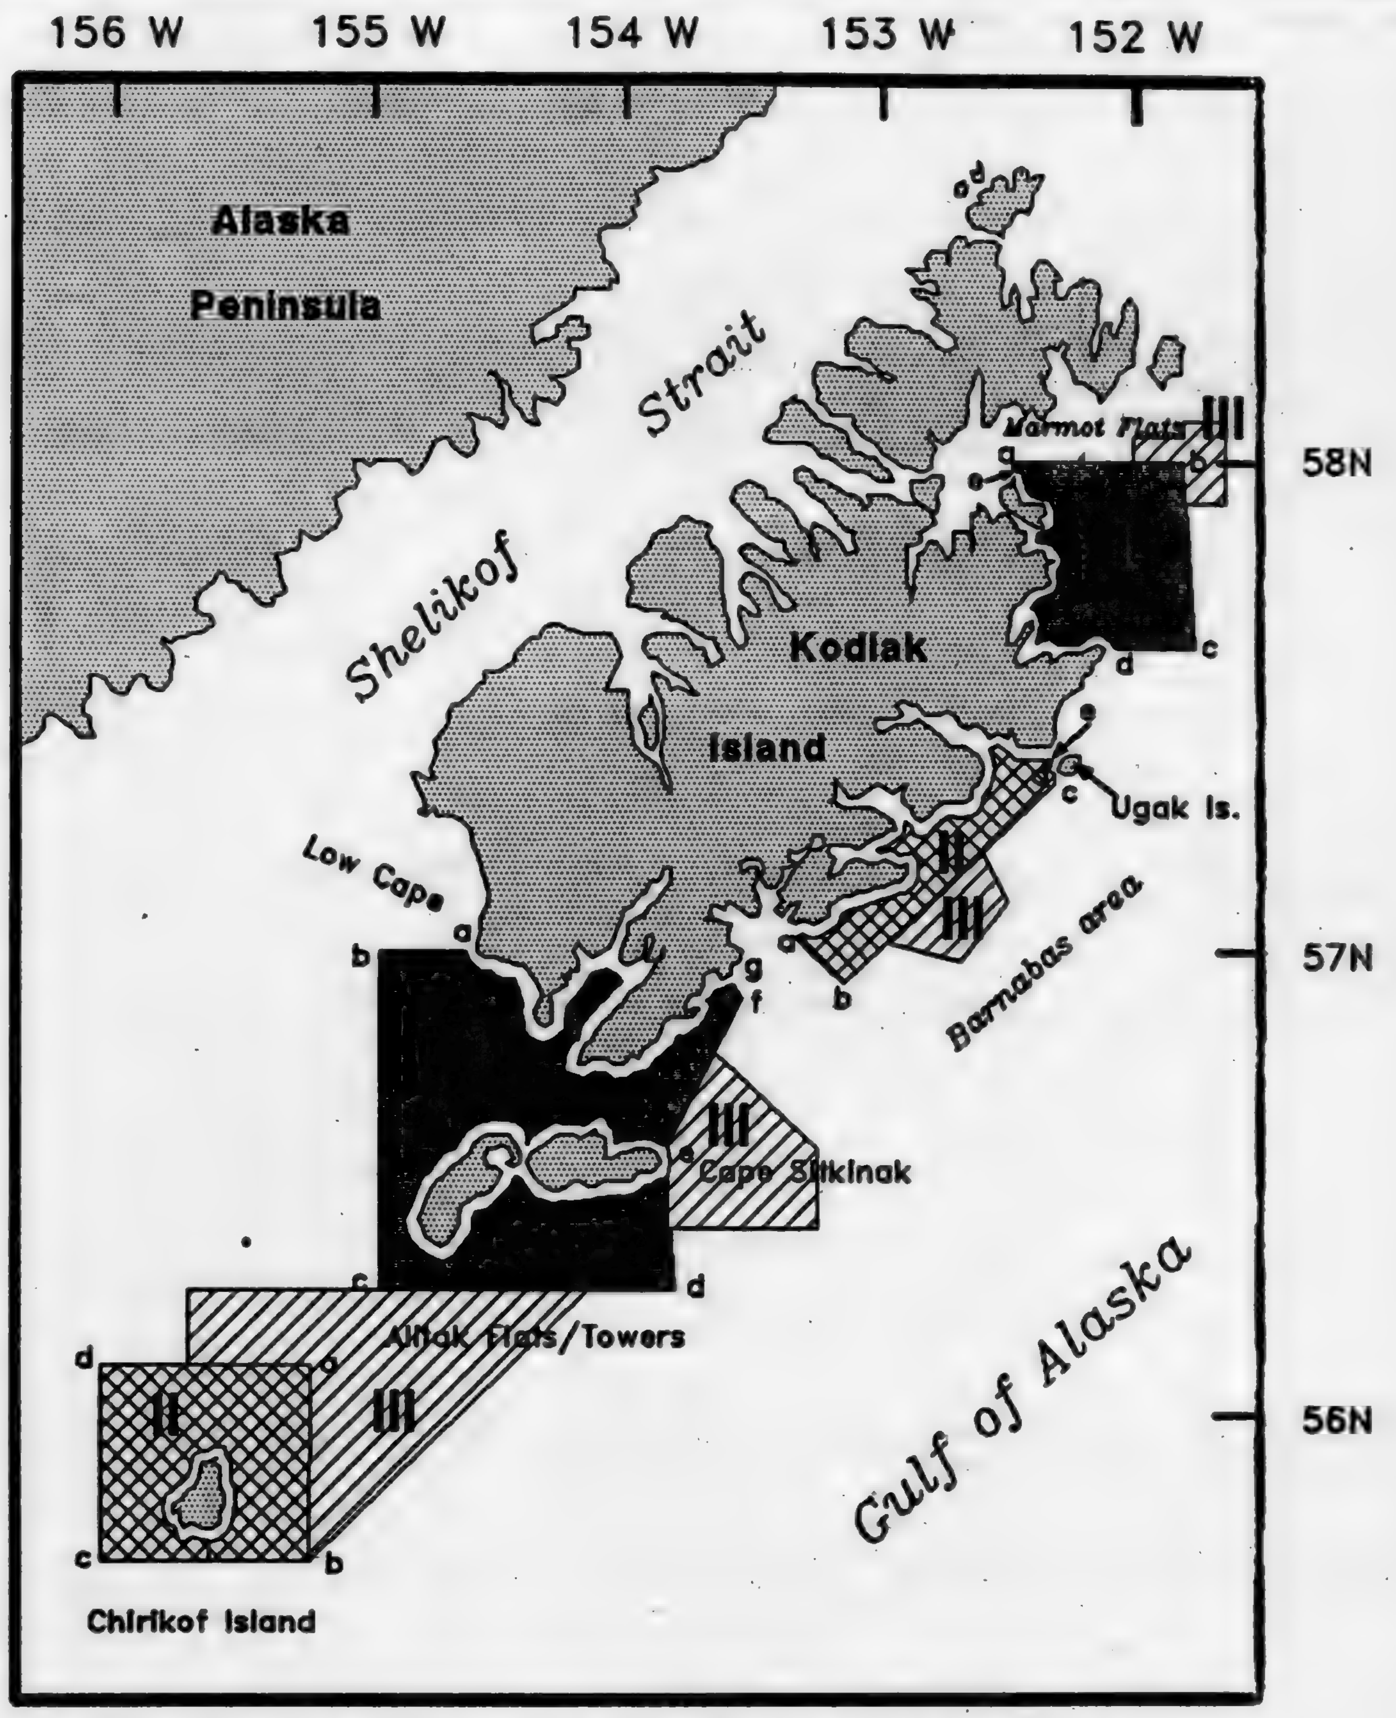

Figure 2. Areas around Kodiak Island closed to trawling except with pelagic trawls. TYPE I areas are closed year round. TYPE II areas are closed February 15 to June 15. TYPE III areas are pending. See section 672.24, Gear Limitations, for coordinate descriptions.

BILLING CODE 3510-22-C

14. Section 672.27 is revised to read as follows:

§ 672.27 Observers.

All fishing vessels subject to this part must comply with terms contained in an observer plan that has been prepared by the Secretary in consultation with the Council for purposes of providing data useful in management of the groundfish fishery, unless specifically exempt from such compliance by the observer plan.

PART 675—GROUNDFISH FISHERY OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

15. The authority citation for part 675 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

16. Section 675.3 is amended by revising paragraph (b) as follows:

§ 675.3 Relation to other laws.

* * * * *

(b) For regulations governing foreign fishing for groundfish in the Gulf of Alaska, see 50 CFR 611.92. For regulations governing foreign fishing in the Bering Sea and Aleutians Islands area, see 50 CFR 611.93. For regulations concerning the conservation of halibut, see part 301 of this chapter. For regulations governing fishing for groundfish in the Gulf of Alaska by vessels of the United States, see part 672 of this chapter; and for those governing exemption permits and the recordkeeping and reporting of the incidental take of marine mammals, see 50 CFR 216.24 and 50 CFR part 229.

* * * * *

17. In § 675.5, paragraph (a) is revised, paragraph (b) is retitled and redesignated as paragraph (d), and new paragraphs (b) and (c) are added to read as follows:

§ 675.5 Recordkeeping and reporting.

(a) *Reporting areas and general requirements*—(1) *Reporting areas.* A BSAI reporting area for a groundfish species, species group, or prohibited species consists of the relevant statistical area described in § 675.2 and, in addition to the State waters described in the relevant statistical area, all State waters between the shore and any inshore boundary of that statistical area.

(2) *General requirements.* All fishing vessels issued a Federal groundfish fishing permit under § 675.4 of this part and all catcher/processors, mothership processor vessels, and shoreside processing plants that receive groundfish from vessels regulated under this part, must comply with the recordkeeping and reporting requirements set forth under this section.

(b) *Logbooks.* The operator of any catcher vessel larger than 5 net tons or of any catcher/processor vessel or mothership processor vessel, or the owner of any shoreside processing plant that harvests or processes groundfish from any BSAI reporting area must meet the following recordkeeping requirements:

(1) *General.* The operator of each catcher vessel, catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processing plant must maintain timely and accurate records required by this section.

(i) The operator of each catcher vessel, catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processing plant must maintain all required records in English, based on Alaska Local Time (ALT) unless otherwise specified in the regulations, and make the original copy of the records immediately available for inspection upon the request of an authorized officer or observer.

(ii) For any fishing year, the operator of each catcher vessel, catcher/processor vessel, and mothership vessel, and the owner of each shoreside processing plant must retain the original copy of all required records on board the vessel, or for shoreside plants, within the processing facility, until the end of the fishing year or for as long after the fishing year as fish or fish products recorded in logbooks are retained onboard a vessel or at a processing facility.

(iii) The operator of each catcher vessel, catcher/processor vessel, and mothership vessel, and the owner of each shoreside processing plant must use the logbook prescribed and provided by the Regional Director. The logs shall be maintained in accordance with these regulations and the instructions attached to the issued logs.

(iv) Recordkeeping required under paragraphs (b)(2)(ii), (b)(3)(ii), and (b)(4)(i) of this section must be in indelible ink with corrections to be accomplished by lining out and rewriting so that the original entry remains legible. Original pages in issued logs shall not be removed from the log.

(2) *Daily fishing logbook.* (i) The operator of each catcher/processor and catcher vessel harvesting groundfish from any BSAI reporting area must maintain onboard a daily fishing log of the effort and catch information of the vessel as described in paragraph (b)(2)(ii) of this section. Daily effort entries are required for each day the vessel conducts fishing operations. Daily entries are not required for those days when the fishing vessel stays in port. A separate page in the daily fishing logbook must be used for each day's fishing activity. If fishing activity is conducted in more than one BSAI reporting area during the day, a separate page in the daily fishing logbook must also be used for each reporting area. Catcher/processor vessels will be provided with daily fishing logbooks that also record the daily production information required under paragraph (b)(3) of this section.

(ii) Contents. (A) The daily fishing log must record the following effort information on a daily basis:

(1) A consecutive page number beginning with the first day of the fishing year that the vessel started fishing operations and continuing throughout the log for the remainder of the fishing year;

(2) The date;

(3) The catcher vessel's name and ADF&G vessel number;

(4) The BSAI reporting area in which the catcher vessel is conducting fishing activity;

(5) The gear type;

(6) For hook and line and pot gear, the average number of hooks or pots per skate, size of hooks used, and average length of skates;

(7) For trawl gear, the size of net opening, codend mesh size, and average speed of tow;

(8) The vessel operator's signature;

(9) Crew size;

(10) Daily discard amounts of each groundfish species or species group to at least the nearest tenth of a metric ton (0.1 mt) round weight, and daily discard amounts of each prohibited species by number, except for discard amounts of herring, which should be reported by round weight (0.1 mt).

(B) The following information must be recorded for each haul or set, as appropriate to the gear type employed:

(1) The consecutive trawl or set number, beginning with the first trawl or set of the fishing year;

(2) The time the gear was set (ALT);

(3) The set position in geographical coordinates;

(4) The sea depth;

(5) The trawl depth;

(6) The hauling time;

(7) The haul position in geographical coordinates;

(8) The duration of the set;

(9) The number of pots or skates;

(10) The estimated total weight of the catch for the trawl or set, to at least the nearest metric ton round weight.

(11) Marine mammal log form required under 50 CFR part 229.

(iii) Maintenance of the daily fishing log. Entries in the daily fishing log as to trawl or set number, time, position, and estimated catch weight shall be updated within two hours of the hauling time. All other entries in the daily fishing log shall be updated within 12 hours of the end of the day (ALT) on which the trawl or set occurred.

(iv) Upon each delivery or landing, species discard amounts must be provided to the processor receiving the vessel's catch so that such amounts may be reported under the requirements set forth at paragraphs (c)(1)(iii)(J) and (c)(1)(iii)(K) of this section.

(v) Submission of daily fishing logs. Each vessel operator must submit a copy of the daily fishing log on a quarterly basis to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. Copies of the DFL must be submitted by May 1, August l, November l, and February l for the previous quarter's fishing activity.

(3) *Daily cumulative production log (DCPL).* (i) The operator of each catcher/processor vessel, and mothership processor vessel, and the owner of each shoreside processor that processes groundfish from any BSAI reporting area must maintain on the processing vessel or within the processing facility a daily cumulative production log of catch receipt (if applicable), species discard, and retained groundfish product information as described in paragraph (b)(3)(ii) of this Section. Daily log entries are required for each day the vessel or facility receives or processes groundfish. A separate page in the daily fishing logbook must be used for each day's fishing activity. If fishing activity is conducted in more than one BSAI reporting area during the day, a separate page in the daily fishing logbook must also be used for each reporting area. For the purpose of logbook entries, a week is defined as the period from Sunday through Saturday.

(ii) Contents. (A) The DCPL must record the following information on a daily basis:

(1) A consecutive page number beginning with the first day of the fishing year the vessel started operations and continuing throughout the log for the remainder of the fishing year;

(2) The date;

(3) The vessel or plant name and ADF&G vessel number or Alaska State Processor Code, whichever is applicable;

(4) The BSAI reporting area from which the groundfish catch receipt was harvested;

(5) The gear type used to harvest the groundfish catch receipt;

(6) The vessel operator's or plant owner's signature;

(7) Information on crew size or number of employees;

(8) Daily discard amounts by a processor of each groundfish species or species group to at least the nearest tenth of a metric ton (0.1 mt) round weight, and, for each prohibited species listed under paragraph 675.20(c), daily discard amounts by number, except for discard amounts of herring, which should be reported by round weight (0.1 mt).

(9) For each species or species group for which a total allowable catch (TAC) has been specified by the Secretary under Section 675.20 of this part, and product produced during the day:

(*i*) The product by species code and product type;

(*ii*) The balance forward of species product amounts produced during a week to the nearest tenth of a metric ton (0.1 mt). (At the beginning of each week, the balance forward for species product amounts for that week will be zero).

(*iii*) The daily total product produced by species and product type to the nearest tenth of a metric ton (0.1 mt);

(*iv*) The cumulative weekly total product aboard by species and product type to the nearest tenth of a metric ton (0.1 mt).

(B) The following information must be recorded for each catch receipt:

(1) For each set or codend received by mothership processor vessels;

(*i*) A consecutive catch receipt or codend number for the day;

(*ii*) The catch receipt time;

(*iii*) The catch receipt position;

(*iv*) The name of the delivering vessel;

(*v*) The delivery vessel's Federal groundfish permit number or ADF&G vessel number;

(*vi*) Estimated catch receipt weight to at least the nearest metric ton round weight.

(*vii*) Marine mammal interaction information required under 50 CFR part 229.

(2) For each groundfish landing received by shoreside processors from catcher vessels:

(*i*) State of Alaska fish ticket number;

(*ii*) The name of the delivering vessel;

(*iii*) The delivery vessel's ADF&G vessel number or federal groundfish permit number;

(*iv*) The catch receipt time (ALT);

(*v*) Estimated catch receipt weight to at least the nearest metric ton round weight.

(iii) Daily maintenance of the DCPL. Entries in the DCPL as to codend or fish ticket number, receipt time, position, estimated catch receipt weight and delivering vessel's name shall be updated within two hours of the receipt time. All other entries in the DCPL shall be updated within 12 hours of the end of the day (ALT) on which the trawl, set, receipt, or production occurred. Product shall be logged on the day processed regardless of the day of catch or receipt. Entries for product weights must be based on the number of production units (pans, cartons, blocks, trays, cans, bags, or individually frozen fish) and the average weight of the production unit, with reasonable allowance for water added. Allowance for water added cannot exceed five percent of the gross unit weight. Product unit weights must be based on the total actual net weight of the product as determined by representative samples.

(iv) Submission of DCPL's. Each processing vessel operator or plant owner must submit a copy of the DCPL on a quarterly basis to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. Copies of the DCPL must be submitted by May 1, August l, November 1, and February l for the previous quarter's processing activity.

(4) *Product transfer logbooks.* The operator of each catcher/processor vessel and mothership processor vessel, and the owner of each shoreside processor plant must record, in a separate transfer log, each offloading, shipment or receipt of any processed fishery product harvested from any BSAI reporting area, including quantities transferred or off-loaded outside the EEZ, within any state's territorial waters, or within the internal waters of any state or at any shoreside facility.

(i) Contents. The transfer log must record the following information:

(A) A consecutive page number beginning with the first transfer or shipment of groundfish product in a fishing year and continuing throughout the log for the remainder of the fishing year;

(B) Whether the product transfer reflects a product receipt or shipment/offloading;

(C) Company representative's name, telephone number, and Fax or telex number;

(D) Vessel or plant name, plant location, Federal permit number or Alaska State processor code number, and radio call sign of vessel if applicable;

(E) The name of the other vessel (including Federal permit number and call sign) shipping agent, or commercial facility (including location) involved in the transfer or shipment;

(F) The time and date (ALT) and, if applicable, vessel location (in geographic coordinates, or if within a port, the name of the port) at which the transfer or shipment began and was completed;

(G) The intended destination of the carrier or vessel receiving product;

(H) For each product type by species or species group, the total net product weight transferred or shipped to the nearest one-tenth of a metric ton (0.1 mt), an estimated net weight in kilograms or pounds of product per carton, and the total number of cartons of product transferred or shipped.

(ii) Submission of transfer logs. Copies of transfer logs for each weekly period, Sunday through Saturday, ALT, must be submitted to the Regional Director within one week following the week ending date through such means as the Regional Director will prescribe. Submission of product transfer logs is only required if product transfer activity occurred during that weekly period.

(c) *Other recordkeeping and reporting requirements.*— (1) *Catcher/processor vessels, mothership processor vessels, and shoreside processor plants.* The operator or owner of any vessel or shoreside processor of the United States who processes groundfish harvested from any BSAI reporting area must, in addition to the requirements of paragraphs (a) and (b) of this section, comply with the following requirements:

(i) State of Alaska Fish Tickets—(A) The operator of any mothership processor vessel, catcher/processor vessel, or the owner of any shoreside processing facility that harvests or receives groundfish harvested from any BSAI reporting area or internal waters of the State of Alaska, will be responsible for the submission to ADF&G of an accurately completed State of Alaska fish ticket or an equivalent document containing all of the information required on an Alaska fish ticket. U.S. catcher vessels delivering to U.S. processors must provide to the processor information necessary for accurate completion of the fish ticket. Operators of catcher vessels to which a permit has been issued under § 675.4 of this part and who do not deliver to a catcher/processor vessel, mothership processor vessel, or shoreside processing facility are responsible for their own submission of fish tickets. Fish tickets are not required for groundfish sold or delivered to a foreign processing vessel which has a permit under § 611.92 or § 611.93 of this title.

(1) When to submit fish tickets.

(i) Shoreside processors. Owners of shoreside processing facilities must prepare and submit State of Alaska fish tickets required under paragraph (c)(1)(i) of this section to ADF&G within one week after fish are landed.

(ii) Catcher/processor vessels and mothership processor vessels. Operators of processing vessels must prepare and submit State of Alaska fish tickets required under paragraph (c)(1)(i) of this section to ADF&G within one week after returning to port. A document equivalent to a State of Alaska fish ticket may be submitted if groundfish product is landed outside of Alaska.

(iii) Catcher vessels. Operators of catcher vessels to which a permit has been issued under § 675.4 of this part and who do not deliver to a vessel at sea or to a shoreside processing facility must submit the fish ticket required under (c)(1)(i) of this section within one week after fish are landed.

(B) Address. Mail or deliver State of Alaska fish tickets to the ADF&G office located nearest to the area of groundfish purchase, or send these documents to the Director, Commercial Fish Division, Alaska Department of Fish and Game Headquarters, P.O. Box 3–2000, Juneau, Alaska 99802.

(ii) Alaska groundfish check-in report. The operator of any catcher/processor and/or mothership processor vessel must notify the Regional Director before starting and upon stopping fishing for or receiving groundfish from any BSAI reporting area. Notification will be through such means as the Regional Director will prescribe, and will consist of the vessel's name, permit number (if applicable), radio call sign, date and hour (ALT) of when fishing for or receiving groundfish will begin or cease, and the latitude and longitude of such activity.

(iii) Weekly production report. After a receipt of groundfish by a shoreside plant and continuing for the rest of the year, or after notification of starting fishing by a vessel under paragraph (c)(1)(ii) of this section and continuing until that vessel's entire catch or cargo of fish has been off-loaded, the operator of that vessel or plant owner must submit a weekly product report, including reports of zero tons caught or received, for each weekly period, Sunday through Saturday, ALT, and each portion of such a weekly period. The weekly product report must be received by the Regional Director within one week of the end of the reporting period through such means as the Regional Director will prescribe. This report must contain the following information:

(A) Submitter's name, telephone number, and Fax or telex number;

(B) Name of vessel or plant and radio call sign of vessel;

(C) Federal permit number or Alaska State processor code, which ever is applicable;

(D) The ending date (Saturday) of the reporting period;

(E) Gear type used to harvest groundfish catch or catch receipt;

(F) The BSAI reporting area(s) from which each retained species or species group product was caught during the reporting period;

(G) Number of days fished or during which fish were received;

(H) The total estimated catch weight or catch receipt for each BSAI reporting area;

(I) The product type and total product weight produced during the weekly reporting period for each species or species group for which a total allowable catch (TAC) has been specified by the Secretary under § 675.20 of this part;

(J) The amount of each groundfish species or species group discarded during the reporting period, including discard amounts provided to processors under paragraph (b)(2)(iv). Discard amounts should be reported in round weight to the nearest metric ton.

(K) The amount of each prohibited species discarded during the reporting period, including prohibited species discard amounts provided to processors under paragraph (b)(2)(iv). Discard amount of each prohibited species listed under paragraph 675.20(c) must be reported by number, except for herring, which should be reported by round weight (0.1 mt).

(iv) Alaska groundfish processor monthly product value report. Each groundfish processor or its parent company must complete a monthly product value report for any month during which groundfish harvested from any BSAI reporting area were sold. Monthly product value reports must be submitted annually to the Northwest and Alaska Fishery Center, National Marine Fisheries Service, Sand Point Way NE Bldg. 4, Seattle, Washington 98115. The monthly product value reports must be received by NMFS no later than March 1 for the previous fishing year. These reports must include the following information:

(A) Name of the representative for the vessel, plant or company, telephone number, and Fax or telex number;

(B) Name of vessel(s) or plant(s);

(C) Federal permit number or Alaska State processor code, which ever is applicable;

(D) Month and year;

(E) For each species or species group for which product was sold during the month, the product type(s); Product size(s) or grade(s); product weight(s) to the nearest tenth of a metric ton (0.1 mt); and product value(s).

(d) *Domestic Groundfish utilization surveys.*

* * * * *

18. Section 675.7 is amended by adding paragraph (d) as follows:

§ 675.7 General prohibitions.

* * * * *

(d) Fish for groundfish except in compliance with the terms of an observer plan as provided by § 675.25 of this part.

19. In § 675.20, paragraph (a)(2) is revised to read as follows:

§ 675.20 General limitations.

(a) * * *

(2) *Total Allowable Catch (TAC).* The Secretary, after consultation with the North Pacific Fishery Management Council (Council), will specify the annual TAC for each calendar year for each target species and the "other species" category, and will apportion the TACs among DAP, JVP, TALFF, and reserves. TACs in the target species category may be split or combined for purposes of establishing new TACs with apportionments thereof under paragraph (b) of this section. The sum of the TACs so specified must be within the OY range of 1.4–2.0 million mt for target species and the "other species" category.

* * * * *

21. In § 675.22, paragraph (f) is added to read as follows:

§ 675.22 Time and area closures.

* * * * *

(f) No fishing is allowed in that part of the Bering Sea Subarea shoreward of a line on which each point is 12 miles from the base line used to measure the Territorial Sea around islands named Round Island and The Twins as shown on National Oceanic Survey Chart INT 500, and around Cape Peirce (160°10′ W. longitude, 58°40′ N. latitude) during April 1 through September 30 of each of the 1990 and 1991 fishing years.

22. § 675.23 is added as follows:

§ 675.23 Seasons.

Fishing for groundfish during the January 1–December 31 fishing year in the Federal statistical areas defined at § 675.2 of this part is authorized from January 1 through December 31, subject to other provisions of this part.

23. Section 675.24 is added to read as follows:

§ 675.24 Gear Allocations.

Vessels using gear types other than those specified by paragraphs (a) and (b) of this section, must treat sablefish as a prohibited species.

(a) In the Bering Sea Subarea, defined at § 675.2 of this part, hook-and-line and pot gear may be used to take no more than 50 percent of the TAC for sablefish; trawl gear may be used to take no more than 50 percent of the TAC for sablefish.

(b) In the Aleutian Islands Subarea, defined at § 675.2 of this part, hook-and-line and pot gear may be used to take no more than 75 percent of the TAC for sablefish; trawl gear may be used to take no more than 25 percent of the TAC for sablefish.

24. Section 675.25 is added to read as follows:

§ 675.25 Observers.

All fishing vessels subject to this part must comply with terms contained in an observer plan that has been prepared by the Secretary in consultation with the Council for purposes of providing data useful in management of the groundfish fishery, unless specifically exempt from such compliance by the observer plan.

Notices

Federal Register

Vol. 54, No. 169

Friday, September 1, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Designation Renewal of the Fostoria (OH) Agency and the States of Louisiana (LA) and North Carolina (NC)

AGENCY: Federal Grain Inspection Service (Service).

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of Robert B. Whitta dba Fostoria Grain Inspection (Fostoria), Louisiana Department of Agriculture and Forestry (Louisiana), and North Carolina Department of Agriculture (North Carolina) as official agencies responsible for providing official services under the U.S. Grain Standards Act, as Amended (Act).

EFFECTIVE DATE: October 1, 1989.

ADDRESS: James. R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service announced that Fostoria's, Louisiana's, and North Carolina's designations terminate on September 30, 1989, and requested applications for official agency designation to provide official services within specified geographic areas in the April 3, 1989, **Federal Register** (54 FR 13394). Applications were to be postmarked by May 3, 1989. Fostoria, Louisiana, and North Carolina were the only applicants for designation in their area, and each applied for designation renewal in the entire area currently assigned to that agency. The Service announced the applicant names in the June 1, 1989, **Federal Register** (54 FR 23498) and requested comments on the applicants for designation. Comments were to be postmarked by July 17, 1989. No comments were received.

The Service evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act; and in accordance with section 7(f)(1)(B), determined that Fostoria, Louisiana, and North Carolina are able to provide official services in the geographic areas for which the Service is renewing their designations. Effective October 1, 1989, and terminating September 30, 1992, Fostoria and North Carolina are designated to provide official inspection functions, and Louisiana is designated to provide official inspection and Class X or Y weighing functions, in their specified geographic areas, as previously described in the April 3 **Federal Register.**

Interested persons may obtain official services by contacting the agencies at the following telephone numbers: Fostoria at (419) 435-3804, Louisiana at (318) 772-0151, and North Carolina at (919) 733-7577.

Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: August 16, 1989.

J.T. Abshier,

Director, Compliance Division.

[FR Doc. 89-20596 Filed 8-31-89; 8:45 am]

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to the Alva (OK) and Schaal (IA) Agencies

AGENCY: Federal Grain Inspection Service (Service).

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the geographic area currently assigned to Thomas Oller dba Alva Grain Inspection Department (Alva) and Lewis D. Schaal dba D.R. Schaal Agency (Schaal).

DATE: Comments must be postmarked on or before October 16, 1989.

ADDRESS: Comments must be submitted in writing to Lewis Lebakken, Jr., RM, FGIS, USDA, Room 0628 South Building, P.O. Box 96454, Washington, DC 20090-6454.

Telemail users may respond to [LLEBAKKEN/FGIS/USDA] telemail.

Telex users may respond as follows:

TO: Lewis Lebakken
TLX: 7607351, ANS: FGIS UC.

All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 475-3428.

SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service requested applications for official agency designation to provide official services within specified geographic areas in the July 3, 1989, **Federal Register** (54 FR 27907). Applications were to be postmarked by August 2, 1989. Alva and Schaal were the only applicants for designation in those areas, and each applied for the entire area currently assigned to that agency.

This notice provides interested persons the opportunity to present their comments concerning the applicants for designation. Commenters are encouraged to submit reasons for support or objection to this designation action and include pertinent data to support their views and comments. All comments must be submitted to the Resources Management Division, at the above address.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: August 16, 1989.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Designation Applicants to Provide Official Service in the Geographic Area Currently Assigned to the Columbus (OH) Agency

AGENCY: Federal Grain Inspection Service (Service).

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of an agency will terminate, in accordance with the Act, and requests applications from parties interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agency. The official agency is Columbus Grain Inspection, Inc. (Columbus).

DATE: Applications must be postmarked on or before October 2, 1989.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454. All applications received will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of the Service is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Columbus, located at 348 E. Franklin, Circleville, OH 43113, was designated under the Act as official agency on March 1, 1987, to provide official inspection functions.

The official agency's designation terminates on February 28, 1990. Section 7(g)(1) of the Act states that designations of official agencies shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Columbus, in the State of Ohio, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

Bounded on the North by U.S. Route 30 east to State Route 154; State Route 154 east to the Ohio-Pennsylvania State line;

Bounded on the East and South by the Ohio-Pennsylvania State line south to the Ohio River; the Ohio River south-southwest to the western Scioto County line; and

Bounded on the West by the western Scioto County line north to State Route 73; State Route 73 northwest to U.S. Route 22; U.S. Route 22 west to U.S. Route 68; U.S. Route 68 north to Clark County; the northern Clark County line west to State Route 560; State Route 560 north to State Route 296; State Route 296 west to Interstate 75; Interstate 75 north to State Route 47; State Route 47 northeast to U.S. Route 68; U.S. Route 68 north to U.S. Route 30.

Interested parties, including Columbus, are hereby given opportunitiy to apply for official agency designation to provide the official services in the geographic area, as specified above, under the provisions of section 7(f) of the Act and § 800.196(d) of the regulations issued thereunder. Designation in the specified geographic area is for the period beginning March 1, 1990, and ending February 28, 1993. Parties wishing to apply for designation should contact the Review Branch, Compliance Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: August 16, 1989.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Forest Service

Chikamin Timber Sale in the Wenatchee National Forest, Washington

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Notice is hereby given that the Forest Service will prepare an environmental impact statement (EIS) for the Chikamin timber sale and other related site specific projects, such as, construction of roads and trails, establishment a Spotted Owl Habitat Area (SOHA), and fisheries and watershed improvements in the vicinity of the Chikamin Creek drainage. The drainage is located approximately 40 air miles northwest of Wenatchee, Washington in Chelan County. Part of the proposed timber sale and road construction are within the Rock Creek roadless area. These management activities would be administered by the Lake Wenatchee Ranger District of the Wenatchee National Forest. This EIS will tier to the Chelan Planning Unit, final EIS (1976) which provides the overall guidance for management of the area. Currently, the Final EIS for the Wenatchee National Forest Land and Resource Management Plan (L&RMP) is scheduled for completion in September, 1989. When this plan is complete it will supersede the direction contained in the Chelan Planning Unit. The agency invites written comment and suggestions on this proposed project and related activities and the scope of this analysis. In addition, the agency give notice of the full environmental analysis and decision making process that will occur on this proposed project so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the management and scope of this project analysis must be received by November 1, 1989.

ADDRESS: Submit written comments and suggestions concerning the management of the area to Sonny O'Neal, Forest Supervisor, 301 Yakima Street, Wenatchee, Washington 98801 or George Pozzuto, District Ranger, Lake Wenatchee Ranger District, 22976 State Highway 207, Leavenworth, Washington 98826.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and environmental impact statement should be directed to Jim Furlong, Project Team Leader, Lake Wenatchee Ranger District, Wenatchee National

Forest, 22976 State Highway 207, Leavenworth, WA 98826. Phone: (509) 763–3103.

SUPPLEMENTARY INFORMATION: The purpose and goals for the proposed project are to (1) help satisfy short-term demands for timber, and maintain a continuous supply of timber in the future; (2) create a desired future forested condition through the implementation of sound silvicultural management prescriptions; (3) improve the areas trail system to better serve recreational activities such as hiking, horseback riding, off-road vehicle use, snowmobiling, and cross-country skiing; and (4) provide protection to the Northern Spotted Owl by establishment of a SOHA..

The decision to be made is what, if any, timber harvest and other integrated resource projects will be undertaken within the next 2 to 5 years.

Sonny J. O'Neal, Forest Supervisor, Wenatchee National Forest is the responsible official.

The Forest Service also serves notice that the agency is seeking information and comments from Federal, state, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparing the draft EIS. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Identification of reasonable alternatives.
5. Identification of potential environmental effects of the alternatives.
6. Determination of potential cooperating agencies and task assignments.

A range of alternatives will be considered. One of these will be the "no-action" alternative in which the roadless character of the Rock Creek roadless area would be maintained and timber harvest and associated road building would be deferred. Other alternatives will examine timber harvest and road construction in different locations and varied cutting methods and timber management intensities as well as variable SOHA, trail system, watershed and fisheries improvement project locations to achieve the purpose of the proposed action.

The Forest Service will analyze and document the direct, indirect, and cumulative environmental effects of the alternatives. This will include an analysis of the effects of alternatives on the roadless character of the area affected. In addition, the EIS will disclose the analysis of site specific mitigation measures and their effectiveness.

Public participation will be important during the analysis. People may visit with Forest Service officials at any time during the analysis and prior to the decision.

The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by January 1, 1990. At that time EPA will publish a notice of availability of the draft EIS in the **Federal Register.**

The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register.**

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2d. 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. (Reviewer may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environment Policy Act at 40 CFR 1503.3 in addressing these points.).

After the 45 day comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final EIS. The final EIS is scheduled to be completed by April 1980. In the final EIS, the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to review under 36 CFR Part 217.

Dated: August 23, 1989.

Sonny J. O'Neal,

Forest Supervisor.

BILLING CODE 3410-11-M

Packers and Stockyards Administrtation

Posted Stockyards; Foister Auction & Sales Co. et al.

Pursuant to the authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), it was ascertained that the lifestock markets named below were stockyards within the definition of that term contained in section 302 of the Act, as amended (7 U.S.C. 202), and notice was given to the owners and to the public by posting notices at the stockyards as required by said section 302, on respective dates specified below.

Facility no., name, and location of stockyard	Date of posting
GA-201 Foister Auction & Sales Co., Baconton, Georgia.	Nov. 7, 1988.
LA-140 Miller Livestock Market-DeRidder Branch, DeRidder, Louisiana.	Nov. 4, 1988.
ME-105 Clark Livestock Sales, Inc., Skowhegan, Maine.	Aug. 25, 1985.
MN-185 Twin Cities Horse Sales, Cannon Falls, Minnesota.	Dec. 16, 1988.
MN-186 Northern Minnesota Cattle Yards, Hines, Minnesota.	Nov. 2, 1988.
PA-152 Kish Valley Dairy Sales, Belleville, Pennsylvania.	Sept. 8, 1986.
TN-165 Apison Livestock Auction Sales, Apison, Tennessee.	Nov. 3, 1988.
WI-140 Great Northern Investments, Fond du Lac, Wisconsin.	June 23, 1986.

Done at Washington, DC this 28th day of August 1989

Harold W. Davis,

Director, Livestock Marketing Division, Packers and Stockyards Administration.

[FR Doc. 89–20657 Filed 8–31–89; 8:45 am]

BILLING CODE 3410-KD-M

Deposting of Stockyards; Decker & Feller Livestock Auction Inc., et al.

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., name and location of stockyard	Date of posting
IL-113 Decker and Feller Livestock Auction, Inc., Cissna Park, Illinois.	Nov. 18, 1959.
IN-144 Producers Marketing Association, Inc., Terre Haute, Indiana.	Apr. 27, 1959.
IA-158 Grinnell Livestock Exchange, Inc., Grinnell, Iowa.	May 20, 1959.
LA-114 DeRidder Livestock Commission Co., DeRidder, Louisiana.	June 11, 1957.
MD-104 Cumberland Stockyards, Inc., Cumberland, Maryland.	Oct. 28, 1959.
MD-115 Baltimore Livestock Exchange, Inc., West Friendship, Maryland.	July 14, 1955.
MT-114 Northern Pacific Stockyards, Missoula, Montana.	Mar. 25, 1941.
NJ-104 Jaeger Livestock Auction Market, Sussex, New Jersey.	Dec. 22, 1959.
NC-107 Brite and Tatum Livestock Company, Inc., Elizabeth City, North Carolina.	May 8, 1961.
NC-158 Howell Stables and Producers Livestock Exchange, Elizabeth, North Carolina.	Nov. 15, 1979.
NC-159 Stegall's Livestock and Auction Barn, Concord, North Carolina.	Apr. 8, 1968.
OH-119 Producers Livestock Association, Findlay, Ohio.	June 1, 1959.
TN-120 Jackson County Commission Company, Gainesboro, Tennessee.	May 11, 1959.
VA-132 Roanoke Livestock Market, Inc., Roanoke, Virginia.	Mar. 11, 1959.
WV-110 Moundsville Livestock Auction Co., Moundsville, West Virginia.	Nov. 6, 1959.

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly deposting a stockyard which is no longer within the definition of the term contained in the Act.

The foregoing is in the nature of a change relieving a restriction and may be made effective in less than 30 days after publication in the **Federal Register.** This notice shall become effective upon publication in the **Federal Register.**

(42 Stat. 159, as amended and supplemented; 7 U.S.C. 181 *et seq.*).

Done at Washington, DC, this 28th day of August 1989.

Harold W. Davis,

Director, Livestock Marketing Division, Packers and Stockyards Administration.

BILLING CODE 3410-KD-M

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Frequency Management Advisory Council; Open Meeting

AGENCY: National Telecommunications and Information Administration.

ACTION: Notice of Open Meeting, Frequency Management Advisory Council.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 2, notice is hereby given that the Frequency Management Advisory Council (FMAC) will meet from 9:30 a.m. to 4:30 p.m. on September 22, 1989, in Room 1605 at the United States Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington DC. (Public entrance to the building is on 14th Street between Pennsylvania Avenue and Constitution Avenue.).

The Council was established on July 19, 1965. The objective of the Council is to advise the Secretary of Commerce on radio frequency spectrum allocation matters and means by which the effectiveness of Federal Government frequency management may be enhanced. The Council consists of 15 members whose knowledge of telecommunications is balanced in the functional areas of manufacturing, analysis and planning, operations, research, academia and international negotiations.

The principal agenda items for the meeting will be:

(1) ITU Plenipotentiary Conference Report

(2) Radio Frequency Radiation Exposure Issues.

(3) Policy Implications for Spectrum Use in the 1990's.

(4) Comprehensive Spectrum Management and Use Policy Review

The meeting will be open to public observations. A period will be set aside for oral comments or questions by the public which do not exceed 10 minutes each per member of the public. More extensive questions or comments should be submitted in writing before September 15, 1989. Other public statements regarding Council affairs may be submitted at any time before or after the meeting. Approximately 20 seats will be available for the public on a first-come, first-served basis.

Copies of the minutes will be available on request 30 days after the meeting.

FOR FURTHER INFORMATION CONTACT: Inquires may be addressed to the Executive Secretary, FMAC, Mr. Michael W. Allen, National Telecommunications and Information Administration, Room 4099, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, D.C. 20230, telephone 202–377–0805.

Dated: August 21, 1989.

Michael W. Allen,

Executive Secretary, FMAC, National Telecommunications and Information Administration.

BILLING CODE [illegible]

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment and Amendment of Import Limits and Amendment of Group Coverages for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in Indonesia

August 28, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing and amending import limits and amending group coverages.

EFFECTIVE DATE: September 5, 1989.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 635–9400. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

During negotiations held August 2–4, 1989 between the Governments of the United States and Indonesia, agreement was reached, effected by a Memorandum of Understanding (MOU) dated August 4, 1989, to amend their current bilateral textile agreement. A formal exchange of notes will follow.

The MOU, among other things, establishes new levels for newly merged Categories 334/335, 336/636 and 351/651. These levels include adjustments for handicraft products, as provided for under the terms of the agreement.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 53 FR 44937, published on November 7, 1988). Also see 54 FR 27864, published on June 30, 1989.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement and the Memorandum of Understanding of August 4, 1989, but are designed to assist only in the implementation of certain of their provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreement

August 28, 1989

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner:

This directive amends, but does not cancel, the directive of June 23, 1989 issued to you by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Indonesia and exported during the period which began on July 1, 1989 and extends through June 30, 1990.

Effective on September 5, 1989, you are directed to amend the directive of June 23, 1989 to eliminate the current Group I limit. All charges for Group I shall remain at the category levels. Also, you are directed to move Category 336 from Group I to Group II and Categories 627, 628, 629 and 651 from Group II to Group I. All charges made to the limits for Categories 336 in Group I and 651 in Group II shall be charged to the limits for Categories 336/636 in Group II and 351/651 in Group I, respectively. All charges in Group II for Categories 627, 628 and 629 shall be charged to the limit for Categories 625/626/627/628/629 in Group I.

The June 23, 1989 directive is amended further to include new and amended limits for the following categories:

Category	New and Amended Limits[1]
Levels in Group I:	
334/335	126,245 dozen.
351/651	267,881 dozen.
625/626/627/628/629	15,950,000 square meters.
Group II:	
200, 201, 218, 220, 222–227, 229, 237, 239, 300, 301, 330, 332, 333, 336/636, 342/642, 345, 349, 350, 352–354, 359, 360–363, 369–D,[2] 369–0,[3] 400–444 447–469, 600, 603, 604–0[4], 606, 607, 611, 618, 619/620, 621, 622, 624, 630, 631–634, 643, 644, 649, 650, 652–654, 659, 665, 666, 669, 670, 831–836, 838, 839, 840, 842–847, 850–852, 858 and 859, as a group.	65,817,022 square meters equivalent.
Sublevels in Group II:	
336/636	348,783 dozen.
611	8,560,294 square meters.
619/620	4,500,000 square meters.
634	45,154 dozen.
647	231,291 dozen.

---

[1] The limits have not been adjusted to account for any imports exported after June 30, 1989.

[2] In Category 369–D, only HTS numbers 6302.60.0010, 6302.91.0005 and 6302.91.0045.

[3] In Category 369–0, all HTS numbers except 6302.60.0010, 6302.91.0005 and 6302.91.0045 in Category 369–D; and 6307.10.2005 in Category 369–S.

[4] In Category 604–0, all HTS numbers except 5509.32.0000 in Category 604–A.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1989 Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1989 a commodity and a military resale commodity to be produced and services to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 2, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703)557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity, military resale commodity and services listed below from workshops for the blind or other severely handicapped. It is proposed to add the following commodity, military resale commodity and services to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

Commodity

Folder, File 7530–00–990–8884
  (Requirements for Belle Mead, New Jersey Supply Facility only)

Military Resale Item No. and Name

No. 929 Mop, Stick, Foam/Nonwoven

Services

- Commissary Shelf Stocking and Custodial
  - Fort Bragg & Malonee Village, Fayetteville, North Carolina

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before October 2, 1989.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryalnd Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following:

(1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the

requests are available from Margaret Webster at the address specified above.

Dated: August 28, 1989.

George Sotos,

Acting Director, for Office of Information Resources Management.

Office of Planning, Budget, and Evaluation

Type of Review: New.

Title: Design for a Study of Chapter 1 Services in Secondary Schools.

Frequency: One time.

Affected Public: State or local governments.

Reporting Burden:

Responses: 240. Burden Hours: 160.

Recordkeeping Burden:

Recordkeepers: 0. Burden Hours: 0.

Abstract: The purpose of this study is to provide the Department with detailed information of chapter 1 programs in secondary schools and to examine existing dropout rates or prevention programs that might serve as models for administering chapter 1 services.

Office of Planning, Budget, and Evaluation

Type of Review: New.

Title: Study of Programs for Retaining the Benefits of Early Childhood Education for Disadvantaged Children.

Frequency: One time.

Affected Public: State or local governments.

Reporting Burden:

Responses: 2,494. Burden Hours: 1,491.

Recordkeeping Burden:

Recordkeepers: 0. Burden Hours: 0.

Abstract: The purpose of this study is to determine the extent of transition programs designed to improve the school performance of disadvantaged children. Data will identify and describe transition programs in public schools and develop criteria for exemplary programs.

Type of Review: New.

Title: Study of Drug-Free Schools and Community Act.

Frequency: One time.

Affected Public: Individuals or households; State or local governments; businesses or other for-profit; Non-profit institutions; Small businesses or organizations.

Reporting Burden:

Responses: 2842.

Burden Hours: 2899.

Recordkeeping Burden:

Recordkeepers: 0.

Burden Hours: 0.

Abstract: This study will collect information about State, school district, and community practices in planning, administering, implementing, and evaluating State and local programs funded under the Drug-Free Schools and Communities Act, as amended. The Department will use this information to assess the accomplishments of project goals and objectives and to aid in effective program management.

Type of Review: New.

Title: State Survey of Chapter 1 Programs.

Frequency: One time.

Affected Public: State or local governments.

Reporting Burden:

Responses: 53.

Burden Hours: 106.0.

Recordkeeping Burden:

Recordkeepers: 0.

Burden Hours: 0.

Abstract: The purpose of this survey is to provide the Department with detailed information on state implementation of Chapter 1 provisions. The Department will use this information to determine how states and school districts are responding to the new provisions and identify states which have taken exemplary or innovative actions.

Office of Bilingual Education and Minority Languages Affairs

Type of Review: Extension.

Title: Application for Grants Under the Transition Program for Refugee Children.

Frequency: Annually.

Affected Public: State or local governments.

Reporting Burden:

Responses: 52.

Burden Hours: 7,944.

Recordkeeping Burden:

Recordkeepers: 0.

Burden Hours: 0.

Abstract: This application will be used by State educational agencies to apply for grants under the Transitional Program for Refugee Children. The Department uses the data collected to determine the amount of the grant award based on the number of eligible refugee children enrolled in a States's public and private elementary and secondary schools.

Office of Educational Research and Improvement

BILLING CODE 4000-01-M

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board.

ACTION: Notice of partially closed meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: September 15 and 16, 1989.

TIME: September 15: 9:00 A.M.–12:15 A.M.; 12:15–1:15 P.M., closed; 1:15 P.M.-Adjournment, open. September 16: 8:30 A.M.–3:30 P.M., open.

ADDRESS: Hyatt Regency Hotel (on Capitol Hill), 400 New Jersey Avenue NW., Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Roy Truby, National Assessment Governing Board, U.S. Department of Education, Mary E. Switzer Building, Room 4060, Washington, DC 20202–7583, Telephone: (202) 732–1834.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board

is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Act (NAEP Improvement Act), title III–C of the Augustus F. Hawkins—Robert T. Stafford Elementary and Secondary School Improvement Amendments of 21988 (Pub. L. 100297); (20 U.S.C. 1221e–1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Education Progress, and develop specifications for the design, methodology, analysis and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons.

The National Assessment Governing Board will meet in Washington, DC on September 15 and 16, 1989. The Board will meet from 9:00 A.M. until completion of business on September 15, 1989 and from 8:30 A.M. to 3:30 P.M. on September 16, 1989.

The proposed agenda of the open portion of the meeting includes reports by subcommittees on writing, analysis, and reporting and dissemination. There will also be a discussion of the pros and cons of state by state comparisons, a progress report on goal setting, discussion on reading issues related to public hearings and consensus solicitations, an update of the National Assessment of Educational Progress program including a review of the current contract, a review of the role of the National Governor's Association in goal setting, and a working dinner discussing the Board's role in the Department. On September 16, the open portion will be a continuation of the subcommittee reports.

On September 15, 1989, from 12:15 P.M. to 1:15 P.M., a portion of the meeting will be closed to the public. The closed portion of the meeting will be closed under the authority of 10(d) of the Federal Advisory Committee Act (5 U.S.C. App. 2) and under exemption 9(B) of the Government in the Sunshine Act (5 U.S.C. 552b(c). During the closed portion of the meeting, there will be review of a grantee's draft trend report prior to its formal release by the Department. The draft report is still undergoing technical review and analysis and there is a significant possibility that the data may be incorrect or incomplete. Disclosure of this information is likely to disclose information, the premature disclosure of which would likely to significantly frustrate implementation of proposed agency action. Such matters are protected by 5 U.S.C. 552b(c)(9)(B).

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of title 5 U.S.C. 522b will be available to the public within fourteen days of the meeting. Records are kept of all Board proceedings, and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Mary E. Switzer Building, 330 C Street SW., Room 4060, Washington, DC 20202–7583 from 8:30 A.M. to 5:00 P.M., Monday through Friday.

Dated: August 29, 1989.

Bruno V. Manno,

Acting Assistant Secretary for Educational Research and Improvement.

[FR Doc. 89-20602 Filed 8-31-89; 8:45 am]

BILLING CODE 4000-01-M

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board.

ACTION: Notice of open meeting.

SUMMARY: The National Assessment Governing Board, U.S. Department of Education, is announcing four public hearings. These hearings will be held as part of the Board's consensus-building process which will lead to specific recommendations for the reading assessment goals for the 1992 National Assessment of Educational Progress. The hearings will provide interested individuals and organizations with the opportunity to present oral and/or written views to the Board. The hearings will focus on goal statements for grades 4, 8, and 12, the model grades for these ages. These hearings are being conducted pursuant to Public Law 100-297, section 6(E) which states that "Each learning area assessment shall have goal statements devised through a national consensus approach, providing for active participation of teachers, curriculum specialists, local school administrators, parents and concerned members of the general public." The results of these hearings are particularly important because they will form the framework of the assessment for both the national sample (at all age/grade levels), and the state representative sample (at grade 4 only).

DATES: The dates of the four public hearings are as follows:

September 27, 1989: Dallas, Texas
October 11, 1989: Trenton, New Jersey
October 26, 1989: Los Angeles, California
November 3, 1989: Atlanta, Georgia

The hearings will begin at 12:00 Noon and adjourn at 8:00 P.M. There will be a 15-minute recess from 4:00 to 4:15. If necessary it may be possible to extend the ending time beyond 8:00 P.M. Persons desiring to present oral statements at the hearing shall submit a notice of intent to appear, postmarked no fewer than fourteen (14) days prior to the scheduled meeting date. Scheduling of oral presentations cannot be guaranteed for notices of intent to appear that are not received on time.

Notices of intent to present oral statements shall be mailed to: National Assessment Governing Board, Mary E. Switzer Building, Suite 4060, 330 C Street, SW., Washington, DC 20202–7583, Attention: Public Hearings.

ADDRESSES: The locations of the four public hearings are as follows:

Dallas: Richland College Campus, Performance Hall, Dallas, Texas
Trenton: Trenton Board of Education, Board Room, 108 North Clinton Avenue, Trenton, New Jersey 08609
Los Angeles: Los Angeles County Board of Education, County Office Room, 9300 East Imperial Highway, Downey, California 90242–2890
Atlanta: Southern Regional Education Board, Georgia Tech Campus, 592 Tenth Street, NW., Atlanta, Georgia 30318–5790

Written Statements: Written statements may be submitted for the public record in lieu of oral testimony through November 3, 1989. These statements should be sent directly to the Board (see address given above) in the following format:

I. Issues and Questions Addressed

Identify the issue(s) and question(s) to which the testimony is directed. For example, "age 9/grade 4 reading goals,"or "state curriculum in reading."

II. Summary

Briefly summarize the major points and recommendations presented in the testimony.

III. Discussion

The narrative should provide information, points of view, and recommendations that will enable the Board to consider all factors relevant to the question(s) the testimony addresses.

Respondents are encouraged to limit this section of their written statements to five (5) pages. The discussion may be appended with documents of any length providing further explanation.

Written statements presented at the hearings will be accepted and incorporated into the public record. All written statements should follow the above format, as far as this is possible.

Hearings, objectives, and procedures

The Board seeks participation in the hearings from a wide spectrum of individuals and organizations. Speakers will be scheduled, to the extent feasible, to provide a broad but balanced number of viewpoints and to reflect a variety of interests.

The goal of the hearing is to provide for maximum input and guidance from teachers, curriculum specialists, local school administrators, parents and concerned members of the general public. Accordingly, the hearings will include a very brief introduction by National Assessment Governing Board members, with the great majority of each day devoted to presentations by scheduled speakers.

As listed in the **DATES** and **ADDRESSES** sections above, speakers wishing to present statements shall file notices of intent. To assist the Board in appropriately scheduling speakers, the written notice of intent to present oral testimony should include the following information:

(1) Name, address, and telephone number of each person to appear;

(2) Affiliation (if any);

(3) A brief statement of the issues and/or concerns that will be addressed; and

(4) whether a written statement will be submitted for the record.

Individuals who do not register in advance will be permitted to register and speak at the meeting in order of registration, if time permits. Speakers should plan to limit their total remarks to no more than 5 minutes. While it is anticipated that all persons desiring to do so will have an opportunity to speak, time limits may not allow this to occur. The Board will make the final determination on selection and scheduling of speakers.

However, all written statements presented at the hearings will be accepted and incorporated into the public record. Written statements submitted in lieu of oral testimony should be received by November 3, 1989 in order to be incorporated into the public record. Written statements received after that date will be accepted; however, inclusion in the public record cannot be guaranteed.

A member of the Board will preside at each of the four hearings. The proceedings will be audiotaped. The hearings will also be signed for the hearing-impaired, and a bilingual speaker (Spanish-English) will be available on site.

Additional information

Individuals wishing more information on a specific hearing should contact either the Board offices in Washington, DC, at (202) 732–7885, or one of the following contact persons at the nearest Regional offices:

For Dallas, contact Ms. Clydene Thomas, (214) 767–3628
For Trenton, contact Mike Hatam, (212) 264–7006
For Los Angeles, contact Ms. Pearlie Herbert, (415) 556–4571
For Atlanta, contact Ms. Frances Hyatt, (404) 331–0550

Next steps

The Board plans to analyze all comments received in response to this announcement. A report of the public outcomes of these public hearings will be available to the public upon request after January 1, 1990.

The results of the public comments will be used by the National Assessment Governing Board, in conjunction with all other solicited written testimony, and formal consensus-building activities, to establish the goal statements and test specifications for the 1992 reading assessment of the National Assessment of Educational Progress.

Records are kept of all Board proceedings, and are available for public inspection at U.S. Department of Education, National Assessment Governing Board, Mary E. Switzer Building, 330 C Street, SW., Room 4060, Washington, DC 20202–7583, from 8:30 a.m. to 5:00 p.m., Monday through Friday.

Date: August 29, 1989.

Bruno V. Manno,

Acting Assistant Secretary for Educational Research and Improvement.

[FR Doc. 89–20683 Filed 8–31–89; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of the Secretary

Solicitation of Comments From the General Public on the Environmental Restoration and Waste Management Five-Year Plan

AGENCY: Office of the Secretary, DOE.

ACTION: Notice of availability of the Environmental Restoration and Waste Management Five-Year Plan for the general public review and comment.

SUMMARY: As stated publicly on numerous occasions, and as testified to before the Congress, the Department of Energy has been preparing the Environmental Restoration and Waste Management Five-Year Plan to establish a departmentwide agenda for environmental cleanup and compliance against which overall progress can be measured. The Five-Year Plan has now been completed. The Plan encompasses three discrete compliance-related activity areas: Corrective Activities, Environmental Restoration, and Waste Management Operations, and includes budget projections through fiscal year 1995. The Department is making available for interested groups and individuals the Environmental Restoration and Waste Management Five-Year Plan for review and comment. The comment period will be approximately 90 days beginning on (date of publication) and extending through November 30, 1989. All comments will be considered in the preparation of the updated plan (1992–1996) which will be available for review and comment in May 1990.

DATE: Comments will be accepted through November 30, 1989.

ADDRESSES: Persons requiring copies of the Plan should submit their requests to Mr. R.P. Whitfield, Office of Defense Waste and Transportation Management, DP–12, Attn: Five-Year Plan, Department of Energy, Washington, DC 20545 or call (301) 353–3555. Written comments should be addressed to Mr. Whitfield at the same address.

FOR FURTHER INFORMATION CONTACT: Mr. R.P. Whitfield on (303) 353–3555.

Leo P. Duffy,

Special Assistant to the Secretary of Coordination of DOE Waste Management.

BILLING CODE 6450-01-M

Office of Fossil Energy

[Docket No. PP–85A]

Application by Westmin Resources, Inc. for Re-issuance of Presidential Permit PP–85 to Westmin Mines, Inc.

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application by Westmin Resources, Inc. for re-issuance of Presidential Permit PP–85 to Westmin Mines, Inc.

SUMMARY: Westmin Resources, Limited (Westmin), on behalf of its wholly-owned subsidiary Westmin Resources, Inc. (WRI), has applied to the Office of Fossil Energy (FE) of the Department of Energy (DOE) for the re-issuance of Presidential Permit PP–85 to Westmin Mines, Inc. (WMI), a new U.S. corporation, which is indirectly controlled by Westmin. Presidential Permit PP–85 authorizes WRI to construct, connect, operate and maintain a 35-kilovolt electric transmission line at the international border between the U.S. and Canada. The purpose of the transmission line and the conditions imposed upon WRI by the permit will not be affected by the re-issuance of the permit.

FOR FURTHER INFORMATION CONTACT:

Anthony J. Como, Office of Fuels Programs, (FE–52), Office of Fossil Energy, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–5935.
Lise Courtney M. Howe, Office of General Counsel, (GC–41), Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–2900.

SUPPLEMENTARY INFORMATION: On July 17, 1987, Westmin, a Canadian corporation, applied to the DOE, under Executive Order 10485, as amended, for a Presidential permit to construct a 35-kilovolt transmission line which would cross the U.S. international border from British Columbia, Canada, pass through the State of Alaska, and re-enter British Colubmia at a second point on the U.S. international border. This application is contained in Docket No. PP–85. Westmin proposed to use the facilities to transmit electric energy from an existing powerplant located in Stewart, British Columbia, to a mine developed by Westmin in British Columbia, about 10 miles north of Hyder, Alaska. The transmission facilities would not connect with any existing U.S. transmission lines and no electric energy would flow to or from any U.S. electric utility as a result of this project.

Subsequent to filing the application, Westmin requested that, if a Presidential permit were granted, it be issued to Westmin Resources, Inc., Westmin's wholly-owned subsidiary incorporated in Colorado. On October 5, 1988, Presidential Permit PP–85 was issued to WRI.

On July 19, 1989, Westmin applied to the Office of Fuels Programs to have Presidential Permit PP–85 re-issued in the name of Westmin Mines, Inc. WMI is a newly formed Idaho corporation and a wholly-owned subsidiary of Westmin. Westmin has established WMI and has requested re-issuance of the permit to WMI in order to facilitate a reorganization of the Westmin group of companies. Westmin is prohibited by Article 9 of the permit from transferring the Presidential permit to another entity, except in the event of involuntary transfer of the facilities by the operation law. Accordingly, Westmin is applying for the re-issuance of the permit to WMI.

Any person desiring to be heard or to protest this application to re-issue Presidential Permit PP–85 should file a petition to intervene or protest with the Office of Fuels Programs, Room 3H–087, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, in accordance with § 385.211 or § 385.214 of the Rules of Practice and Procedure (18 CFR 385.211, 385.214).

Any such petitions and protests should be filed on or before (30 days after publication of this notice). An additional copy of such petitions to intervene or protests also should be filed with:

Raymond O. Hampton, Corporate Secretary, Westmin Mines, Inc., 904–1055 Dunsmuir Street, P.O. Box 49066, The Bentall Centre, Vancouver, British Columbia, Canada V7X 1C4, (604) 681–2253.
Stephen D. Wortley, Lang, Michener, Lawrence & Shaw, 2500–595 Burrard Street, P.O. Box 49200, Vancouver, British Columbia, Canada V7X 1L1, (604) 689–9111.

Protests and comments will be considered by the DOE under 18 CFR 385.211 in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene under 18 CFR 385.214. Section 385.214 requires that a petition to intervene must state, to the extent known, the position taken by the petitioner and the petitioner's interest in sufficient factual detail to demonstrate either that the petitioner has a right to participate because it is a State Commission; that it has or represents an interest which may be directly affected by the outcome of the proceeding, including any interest as a consumer, customer, competitor, or security holder of a party to the proceeding; or that the petitioner's participation is in the public interest.

Copies of this application will be made available, upon request, for public inspection and copying at the DOE's Freedom of Information Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on August 28, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 89–20673 Filed 8–31–89; 8:45 am]

BILLING CODE 6450-01-M

Office of Energy Research

Special Research Grant Program Notice 89–8: Health Effects Research

AGENCY: Department of Energy, (DOE).

ACTION: Notice inviting grant applications.

SUMMARY: The Office of Health and Environmental Research (OHER) of the Office of Energy Research (OER), U.S. Department of Energy (DOE) announces its interest in receiving applications for Special Research Grants in support of the Human Genome Initiative. This initiative is a coordinated multidisciplinary research effort aimed at developing creative, innovative resources and technologies which will lead to a detailed understanding of the human genome at the molecular level. Several research goals are encompassed in this Notice: (1) Research will be supported to develop technologies and resources necessary for the physical mapping of human chromosomes, i.e., establishing the original linear order of DNA fragments. This includes development of improved automated systems for analysis of DNA fragments and clones, and better means of obtaining DNA as purified chromosomes or chromosome fragments; (2) Research will be supported for the development of innovative and cost-effective technologies leading to rapid and accurate large scale DNA sequencing. This includes non-gel techniques and direct imaging approaches; (3) Research will be supported to develop data management systems, data structures, retrieval schemes, user interfaces and advanced database theory to support DNA mapping and sequencing. Also desired are improved algorithms and hardware for analyzing DNA sequences, including identification of homologies, regulatory sites, and protein coding regions.

DATES: To permit timely consideration for award in Fiscal Year 1990, formal applications submitted in response to this Notice should be received by the Division of Acquisition and Assistance Management by December 15, 1989.

ADDRESS: Formal applications referencing Program Notice 89–8 should be forwarded to: U.S. Department of

Energy, Office of Energy Research, Division of Acquisition and Assistance Management, ER-64, Room G-236, Washington, DC 20545, ATTN: Program Notice 89-8.

PREAPPLICATIONS AND FURTHER INFORMATION: Before preparing a formal application, potential applicants should submit a brief preapplication in accordance with 10 CFR 600.10(d)(2) which consists of two to three pages of narrative describing research objectives. These will be reviewed relative to the scope and the research needs of the DOE human genome program. Preapplications are due on September 22, 1989, and should be sent to the following address: Dr. Benjamin J. Barnhart, Office of Health and Environmental Research, ER-72 (GTN), Washington, DC 20545, (301) 353-5037. A response which is based on these preapplications and which discusses the potential program relevance of a formal application will be communicated by October 6, 1989. Telephone and telefax numbers are requested.

SUPPLEMENTARY INFORMATION: It is anticipated that approximately $2M will be available for grant awards during FY 1990. Based on past experience, this year funding of awards is expected, subject to the availability of future funds. Information about development and submission of applications, eligibility, limitations, evaluation and selection processes, and other policies and procedures may be found at 10 CFR part 605. The Office of Energy Research (ER), as part of its grant regulations, requires at 10 CFR 605.11(b) that any grantee funded by ER and performing research that involves recombinant DNA molecules and/or organisms and viruses containing recombinant DNA molecules shall comply with the National Institutes of Health "Guidelines for Research Involving Recombinant DNA Molecules; May 7, 1986" (51 FR 16957, May 7, 1986). Application kits and copies of 10 CFR part 605 are available from the U.S. Department of Energy, Division of Acquisition and Assistance Management (see above address). Telephone requests may be made by calling (301) 353-5037. Instructions for preparation of an application are included in the application kit. The Catalog of Federal Domestic Assistance number for this program is 81.049.

Issued in Washington, DC on August 23, 1989.

D. D. Mayhew,

Deputy Director for Management, Office of Energy Research.

[FR Doc. 89-20674 Filed 8-31-89; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER89-613-000, et al.]

Kansas City Power & Light Company, et al.; Electric rate, Small power production, and Interlocking Directorate filings

Take notice that the following filings have been made with the Commission:

1. Kansas City Power & Light Company

[Docket No. ER89-613-000]

August 22, 1989.

Take notice that on August 18, 1989, Kansas City Power & Light Company (KCPL) tendered for filing an Amendatory Agreement No. 1 to Municipal Participation Agreement, between KCPL and the City of Osawatomie, Kansas dated July 13, 1989. KCPL states that the Amendatory Agreement provides for an extension of the contract term and a modified rate design for firm power service.

KCPL requests an effective date of August 1, 1989, and therefore requests waiver of the Commission's notice requirements.

Comment date: September 5, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. New England Power Company Boston Edison Company

[Docket No. ER89-612-000]

August 22, 1989.

Take notice that on August 18, 1989, New England Power Company (NEP) and Boston Edison Company (BECO) submitted for filing amendments to the AC Facilities Support Agreements among the two companies and the participants in Phase II of the New England Power Pool/Hydro-Quebec interconnection. NEP and BECO state that these amendments provide for the initial rate of return on equity, 14% and 13.75% respectively, to be included in the support calculations under these Agreements.

According to the companies, the AC transmission facilities are estimated to be in-service by November 1, 1989. The companies request that the proposed amendments be made effective October 16, 1989 but that billing be deferred until commercial operation of the facilities.

Comment date: September 5, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Central Illinois Public Service Company

[Docket No. ER89-614-000

August 22, 1989.

Take notice that on August 18, 1989, Central Illinois Public Service Company (CIPS) tendered for filing a new Interconnection Agreement dated July 1, 1989, between CIPS and Indiana Municipal Power Agency (IMPA).

The new Interconnection Agreement provides for coordinated interconnection operation including the interchange of Power and Energy under Service Schedule A, Seasonal Power, Service Schedule B, Short Term Power, Service Schedule C, Maintenance Power, Service Schedule D, Emergency Energy, Service Schedule E, Interchange Energy, and Service Schedule F, Term Energy.

Copies of this filing have been sent to Indiana Municipal Power Agency, Inc. and the Illinois Commerce Commission.

Comment date: September 5, 1989, in accordance with Standard Paragraph E end of this notice.

4. Gulf Power Company

[Docket No. ER89-619-000]

August 24, 1989.

Take notice that on August 21, 1989, Gulf Power Company filed a revised sheet to its FERC Electric Tariff which would allow the Company to recover the costs associated with the buy-out of long term fuel supply agreements through the fuel cost adjustment clause. This clause is applicable to the sale of electric energy to Gulf's territorial wholesale customers. Gulf has requested, pursuant to § 385.207 of FERC regulations, a waiver of and/or deviation from the provisions of § 35.14, including but not restricted to paragraphs (a)(6) and (a)(9) of that section, as provided for by paragraph (10) of § 35.14. This waiver, if granted, would allow the tariff revision as proposed by Gulf and would continue to result in lower fuel adjustment charges to its wholesale customers. This tariff revision is proposed to become effective on January 1, 1987; and Gulf has requested waiver of the Commission's notice requirements in order to allow such an effective date.

Gulf's wholesale customers have been furnished with a copy of the proposed tariff revisions and each of the affected wholesale customers has consented to the proposed tariff change by executing letters of consent.

Comment date: September 7, 1989, in accordance with Standard Paragraph E end of this notice.

5. Washington Water Power Company

[Docket No. ER89-615-000]

August 24, 1989.

Take notice that on August 8, 1989, Washington Water Power Company (WWP) submitted for filing its annual rate revision under WWP's 15-year agreement with Puget Sound Power & Light Company. WWP requests waiver of the Commission's notice requirements in order to permit an effective date of April 1, 1989.

Comment date: September 7, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Arizona Public Service Company

[Docket No. ER89-616-000]

August 24, 1989.

Take notice that on August 14, 1989, Arizona Public Service Company ("APS" or "Company") tendered for filing amendments affecting estimated contract demands or maximum demands in the following FPC/FERC Electric Service Rate Schedules:

FPC/FERC No.	Customer	Revised exhibit
56	Wellton-Mohawk	Exhibit B.
59	APA	Exhibit B.
65	CRIIP	Exhibit A.
66	SCIIP	Exhibit A.
74	Wickenburg	Exhibit B.
120	Southern California Edison.	Exhibit B.
126	ED-6	Exhibit "II".
128	ED-7	Exhibit "II".
140	ED-8	Exhibit "II".
141	AID	Exhibit "II".
142	McMullen Valley	Exhibit "II".
143	Tonopah	Exhibit "II".
149	Citizens Utility Company.	Exhibit B.
153	Harquahala	Exhibit "II".
155	Buckeye	Exhibit "II".
158	Roosevelt	Exhibit "II".
161	PTUA	Exhibit B.
170	Wickenburg	Exhibit A.

No changes from the currently effective Wholesale Power or Transmission ("Wheeling") rate levels are proposed herein. No new facilities are required to provide these services.

A copy of this filing has been served on the above customers, the California Public Utilities Commission and the Arizona Corporation Commission.

Comment date: September 7, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. Georgia Power Company

[Docket No. ER89-618-000]

August 24, 1989.

Take notice that on August 22, 1989, Georgia Power Company ("Georgia Power") tendered for filing a Coordination Services Agreement (the "Agreement") dated as of August 21, 1989, between Georgia Power and Oglethorpe Power Corporation (An Electric Membership Generation & Transmission Corporation) ("OPC").

Georgia Power states that the Agreement has been executed to facilitate a power purchase by OPC from Big Rivers Corporation. Georgia Power seeks waiver of the Commission's notice requirements and seeks an effective date of August 21, 1989. The Agreement will terminate on May 31, 1992.

Comment date: September 7, 1989, in accordance with Standard Paragraph E at the end of this notice.

8. The Washington Water Power Company

[Docket No. ER89-617-000]

August 24, 1989.

Take notice that on August 21, 1989, The Washington Water Company (Washington) tendered for filing its revised Index of Purchasers under Washington's FERC Electric Tariff Original Volume No. 3 (Tariff 3). The revision incorporates the addition of new nonfirm Service Agreements with Arizona Public Service; British Columbia Power Export Corporation; Chelan County Public Utility District #1; Cowlitz County Public Utility District; Deseret Generation & Transmission Co-operative; Eugene Water & Electric Board; Grant County Public Utility District #2; Nevada Power Company; Pend Oreille County Public Utility District #1; Public Service Company of New Mexico; Salt River Project; City of Santa Clara; Utah Municipal Power Systems; Western Area Power Administration; and West Kootenay Power, Limited.

WWP requests that the effective date as indicated on the Index of Purchasers be assigned by the Commission.

Washington states that copies of the filing have been sent to parties to Washington's Tariff 3 Service Agreements.

Comment date: September 7, 1989, in accordance with Standard Paragraph E at the end of this notice.

9. Wisconsin Power and Light Company

[Docket No. EL89-48-000]

August 24, 1989.

Take notice that on August 22, 1989, Wisconsin Power and Light Company (WPL), in accordance with § 385.207 of the Commission's Regulations, filed a petition for a declaratory order on the propriety of recording coal reserve payments in Account 501 and recovering those costs through its fuel adjustment clause. WPL states that its fuel costs include payments made to a coal supplier under a coal reserve provision of a coal supply contract. WPL believes that these amounts are properly recordable in Account 501 and therefore properly recoverable through the fuel adjustment clause. In the event that the Commission finds WPL's proposal improper, WPL requests a waiver of the Commission's fuel clause regulations in accordance with §§ 35.14(a)(10) and 385.207. WPL requests an effective date of August 1, 1989.

Comment date: September 14, 1989, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-20585 Filed 8-31-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP89-1971-000, et al.]

Trunkline Gas Company, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Company

[Docket No. CP89-1971-000]

August 21, 1989.

Take notice that on August 16, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1971-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Natural Gas Clearinghouse, Inc. (NGC), a marketer, under the blanket certificate issued in Docket No. CP86-586-000, pursuant to

Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trunkline states that pursuant to a transportation agreement dated June 1, 1989, under its Rate Schedule PT, it proposes to transport up to 50,000 dekatherms (dt) per day equivalent of natural gas for NGC. Trunkline states that it would transport the gas received from Anadarko at East Cameron 359, offshore Louisiana, and Mesa at Vermillion Block 348, offshore Louisiana, as shown in Exhibit "A" of the transportation agreement, and would deliver the gas, less fuel and unaccounted for line loss, to Stingray Subsea at East Cameron 338, offshore Louisiana, and Panhandle Subsea at Vermillion Block 340, offshore Louisiana.

Trunkline advises that service under § 284.223(a) commenced June 1, 1989, as reported in Docket No. ST89-4460-000. Trunkline further advises that it would transport 5,000 dt on an average day and 1,825,000 dt annually.

Comment date: October 5, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Panhandle Eastern Pipe Line

[Docket No. CP89-1975-000]

August 22, 1989.

Take notice that on August 21, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1975-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Phillips 66 Natural Gas Company (Phillips), a producer, under the blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Panhandle states that pursuant to a transportation agreement dated June 13, 1989, under its Rate Schedule PT, it proposes to transport up to 300,000 dekatherms (dt) per day equivalent of natural gas for Phillips. Panhandle states that it would transport the gas from various receipt points in Colorado, Kansas, Oklahoma and Texas, and deliver such gas, less fuel used and unaccounted for line loss, to Haven Pool in Reno County, Kansas.

Panhandle advises that service under § 284.223(a) commenced July 1, 1989, as reported in Docket No. ST89-4429-000. Panhandle further advises that it would transport 300,000 dt on an average day and 109,500,000 dt annually.

Comment date: October 6, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. United Gas Pipe Line Company

[Docket No. CP89-1964-000]

August 22, 1989.

Take notice that on August 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1964-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act, to transport on an interruptible basis under its blanket certificate Docket No. CP88-6-000, a maximum of 36,000 MMBtu on behalf of Air Products and Chemicals, Inc. (Air Products), an end user, all as more fully set forth in the request on file with the Commission and open to public inspection.

United States that service commenced July 1, 1989, under § 284.223 (a) of the Commission Regulations, as reported in Docket No. ST89-4276 and estimates the volumes transported to be 36,000 MMBtu per day on peak day and average day, and 13,156,250 MMBtu on an annual basis.

United also indicates that no new facilities are to be constructed.

Comment date: October 6, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. United Gas Pipe Line Company

[Docket No. CP89-1962-000]

August 22, 1989.

Take notice that on August 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77152-1478, filed in Docket No. CP89-1171-000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Marathon Oil Company (Marathon), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is one file with the Commission and open to public inspection.

United proposes to transport, on an interruptible basis, up to 151,583 MMBtu per day for Marathon. United states that construction of facilities would not be required to provide the proposed service.

United further states that the maximum day, average day, and annual transportation volumes would be approximately 151,583 MMBtu, 151,583, MMBtu, and 55,327,795 MMBtu, respectively.

United advises that service under § 284.223(a) commenced July 10, 1989, as reported in Docket No. ST89-4277.

Comment date: October 6, 1989, in accordance with Standard Paragraph G at the end of this notice.

5. Colorado Interstate Gas Company

[Docket No. CP89-1970-000]

August 23, 1989.

Take notice that on August 18, 1989, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP89-1970-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Phillips Pipe Line Company (Phillips), an end user, under its blanket authorization issued in Docket No. CP86-589-000, *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

CIG would perform the proposed firm transportation service for Phillips, pursuant to a firm transportation service agreement dated July 1, 1989. The transportation agreement is effective until the earlier of June 30, 1990, or the date CIG receives authority to, or is required to, abandon service rendered pursuant to its blanket transportation certificate in Docket No. CP89-569-000, *et al.* CIG proposes to transport up to 200 Mcf of natural gas on a peak and average day; and on an annual basis 73,000 Mcf of natural gas for Phillips. CIG proposes to receive the subject gas at an existing point of receipt located in sec. 24 T. 18N., R. 108 W., Sweetwater County, Wyoming and redeliver the gas, less fuel gas and lost and unaccounted-for gas, for the account of Phillips in sec. 33 T. 22 S., R. 60 W., Pueblo County, Colorado. CIG avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. CIG commenced such self-implementing service on July 1, 1989, as reported in Docket No. ST89-4244-000.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. ANR Storage Company

[Docket No. CP89-1953-000]

August 23, 1989.

Take notice that on August 15, 1989, ANR Storage Company (ANRS), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-1953-000, an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing new storage services pursuant to two new rate schedules, Rate Schedules FS (Firm Storage Service) and IS (Interruptible Storage Service) to be incorporated in a new ANRS Original Volume No. 1 FERC Gas Tariff, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANRS states that the proposed Rate Schedule FS provides for firm winter storage service. It is stated that for the period November 1 through March 31 (winter period), the storage demand withdrawal quantity cannot be greater than 1/60 of the maximum storage quantity nor can it be less than 1/126 of the maximum storage quantity. It is also stated that for the period April 1 through October 31 (summer period), the maximum daily injection quantity is 1/200 of the maximum storage quantity. It is further stated that the storage demand withdrawal quantity and maximum storage quantity would be specified in the FS service agreement. ANRS states that injection and withdrawal quantities above the maximum contract entitlements would be accepted on a best efforts basis.

ANRS states that the charge for FS service would consist of a maximum FS deliverability reservation rate of $2.063 per dekatherm per month and a maximum FS capacity reservation rate of $.452 per dekatherm. It is stated that fuel would consist of 1.3 percent for injection and 0.2 percent for withdrawal which must be provided in kind by the customer. ANRS states that Rate Schedule FS would be available to all customers on a first-come, first-served basis.

ANRS states that Rate Schedule IS provides for an interruptible storage service that ANRS would make available from time to time if it has storage capacity available after providing for firm obligations. It is explained that subject to ANRS' best efforts to withdraw gas, the maximum daily withdrawal quantity, during the summer period, is 1/30 of the customer's working storage gas as of the last day of the prior month and, during the winter period, is 1/100 of the customer's working storage gas at the end of the preceding summer period. It is also explained that subject to ANRS' best efforts to inject gas, the maximum daily injection quantity is 1/60 of the customer's maximum storage quantity. It is stated that ANRS may, if storage capacity is needed to meet its firm obligations, require customer, upon forty-eight hours notice, to withdraw all IS working storage gas within forty-five days. ANRS states that any working storage gas remaining at the end of such forty-five day period would be retained by ANRS.

ANRS states that the charge for IS service would consist of a maximum monthly storage commodity rate of 5.1 cents per dekatherm of monthly average working storage gas. It is stated that fuel would consist of 1.3 percent for injection and 0.2 percent for withdrawal which must be provided in kind by the customer. It is stated that Rate Schedule IS would be available to all customers on a first-come, first-served basis.

ANRS states that each customer would be responsible for arranging all necessary transportation to and from the point of injection/withdrawal. It is stated that such point is located at the interconnection of ANRS' facilities with the facility of Great Lakes Gas Transmission Company in Crawford County, Michigan.

ANRS requests authority to provide service under the above described rate schedules for interested customers, on a self-implementing basis, with pregranted abandonment, without further authorization by the Commission. ANRS also requests authority to discount rates between the maximum and minimum rates requested.

Comment date: September 13, 1989, in accordance with Standard Paragraph F at the end of this notice.

7. Great Lakes Gas Transmission

[Docket No. CP89-1947-000]

August 23, 1989.

Take notice that on August 14, 1989, Great Lakes Gas Transmission Company (Great Lakes), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket No. CP89-1947-000, an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Great Lakes to transport natural gas, on an interruptible basis, for the account of MichCon Trading Company (Shipper), until November 1, 1994, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Great Lakes states that Shipper has requested that Great Lakes transport up to 200,000 Mcf per day for the account of Shipper, from a point on the International Border between the United States and Canada, at Emerson, Manitoba (Emerson), where the facilities of Great Lakes interconnect with the facilities of TransCanada PipeLines Limited, to existing points of interconnection between the facilities of Great Lakes and Michigan Consolidated Gas Company located within the State of Michigan at Crystal Falls, Rapid River, Sault Ste. Marie, Mackinaw City, Pellston, Boyne City, Petoskey, Gaylord and Belle River Mills. Great Lakes also states that the subject Canadian natural gas would be purchased by Shipper and sold to end users in the State of Michigan. Great Lakes indicates that Shipper and Great Lakes have entered into a Transportation Service Agreement, dated June 8, 1989 (Service Agreement), which would implement these arrangements. Great Lakes further indicates that the Service Agreement provides for a term ending November 1, 1994.

Great Lakes states that the Service Agreement provides for a rate for the transportation service, to delivery points in Great Lakes' Central Zone which is equal to the 100 percent load factor rate, as determined from the demand and commodity components utilized in the transportation component of existing Rate Schedule CQ-2 of Great Lakes' FERC Gas Tariff, under which volumes of natural gas are also transported from Emerson to Great Lakes' Central Zone.

Great Lakes also states that the Service Agreement provides for a rate for the transportation service to delivery points located in Great Lakes' Eastern Zone which is equal to the 100 percent load factor rate as determined from the demand and commodity components utilized in Rate Schedule T-4 of Great Lakes' FERC Gas Tariff, under which volumes of natural gas are also transported from Emerson to Great Lakes' Eastern Zone. Great Lakes indicates that no new facilities would be required to provide either of the proposed services.

Comment date: September 13, 1989, in accordance with Standard Paragraph F at the end of the notice.

8. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1974-000]

August 23, 1989.

Take notice that on August 21, 1989, Panhandle Eastern Pipe Line Company, (Panhandle) P.O. Box 1642, Houston, Texas, 77251-1642 filed in Docket No.

CP89-1974-000 a request pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Levinson Partners Corporation (Levinson), under its blanket authorization issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle would perform the proposed interruptible transportation service for Levinson, a shipper and producer of natural gas, pursuant to a transportation agreement for interruptible service under Rate Schedule PT dated June 21, 1989 (Contract No. P-PLT-2865). The term of the transportation agreement is for a primary term of one month from the initial date for service, and shall continue in effect month-to-month thereafter until terminated by either party upon at least 30 days' prior notice to the other party. Panhandle proposes to transport on a peak day up to 750 dekatherm equivalent; on an average day up to 450 dekatherm equivalent; and on an annual basis 164,250 dekatherm equivalent of natural gas for Levinson. Panhandle proposes to receive the subject gas from Tom Federal 1, North Creston 1, and Windy Hill 1 in Carbon County, Wyoming. Panhandle would then transport and redeliver subject gas, less used and unaccounted for line loss, to Western Transmission in Carbon County, Wyoming. Panhandle proposes to charge the then effective, applicable rates and charges under its PT rate schedule. Panhandle avers that no new facilities nor expansion of existing facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Panhandle commenced such self-implementing service on July 11, 1989, as reported in Docket No. ST89-4437-000.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. Texas Gas Transmission Corporation

[Docket No. CP89-1979-000]

August 23, 1989.

Take notice that on August 21, 1979, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-1979-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas for Ladd Gas Marketing, Inc. (Ladd), a marketer of natural gas, which has identified the end-user of the gas as Western Kentucky Gas Company, under Texas Gas' blanket certificate issued in Docket No. CP88-666-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commisison and open to public inspection.

Texas Gas proposes to transport, on an interruptible basis, up to 120,000 MMBtu equivalent on a peak day, 72,000 MMBtu equivalent on an average day and 43,800,000 MMBtu equivalent on an annual basis for Ladd. It is stated that Texas Gas would receive the gas for Ladd's account at various points on Texas Gas' system in Texas, Louisiana, offshore Texas, offshore Louisiana, Illinois, Arkansas, Indiana, and Kentucky, and would deliver equivalent volumes at various points on Texas Gas' system in Kentucky. It is asserted that existing facilities would be used for the transportation service and that no construction of additional facilities would be required. It is explained that the transportation service commenced July 15, 1989, under the automatic authorization provisions of Section 284.223 of the Commission's Regulations, as reported in Docket No. ST89-4319.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Texas Eastern Transmission Corporation

[Docket No. CP87-92-006]

August 23, 1989.

Take notice that on August 22, 1989, Texas Eastern Transmission Corporation, (Applicant), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP87-92-006 a petition to amend the Certificate of Public Convenience and Necessity, pursuant to Section 7(c) of the Natural Gas Act, issued on June 7, 1989 in this proceeding to substitute an electric motor prime mover in lieu of the gas turbine authorized at Applicant's Sarahsville Compressor Station 19, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that by *Order Issuing Certificates* issued June 7, 1989,[1] (Order) Applicant[2] was authorized, *inter alia* to construct and operate in 1989 and 1990 its Capacity Restoration Program consisting of (1) 281.24 miles of 8 to 42-inch pipeline and 32,000 Horsepower of additional compression, in Ohio, West Virginia, Pennsylvania and New Jersey, (2) the removal of 215 miles of 20 and 24-inch pipeline, (3) and the placement into idle service of 344.73 miles of 20 and 24-inch pipeline. Applicant states that it accepted the certificate on June 9, 1989, and that construction activities were commenced June 15, 1989.

Applicant further states that the Order authorized Applicant to construct and Operate, in 1990, a 11,000 HP gas turbine driven compressor at its existing Compressor Station 19, near Sarahsville, Ohio, and provided that the proposed gas turbine compressor be relocated and certain noise control procedures be approved and implemented to satisfy the recommendations of the Environmental Assessment.

Applicant states that the existing units at Station 19 consist of four electric motor compressor packages totaling 6500 HP, and that in consideration of the Environmental Assessment recommendations, Applicant investigated the feasibility of substituting an electric motor as the prime mover for the proposed compressor which could be installed adjacent to the existing units. Applicant states that its investigation showed that the electric motor, as the prime mover, would reduce or eliminate the environmental impacts.

Comment date: September 13, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

11. Viking Gas Transmission Company

[Docket No. CP88-206-005]

August 23, 1989.

Take notice that on August 15, 1989, Viking Gas Company (Viking), P.O. Box 2511, Houston, Texas 77252, filed an application pursuant to Section 7(c) of the Natural Gas Act for an amended certificate authorizing an extension of the winter season transportation service provided thereunder to Northern States Power Company (NSP), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Viking states that the order issued in Docket No. CP88-206-000, as amended, authorizes the transportation of up to 30,800 dt equivalent of natural gas per day on a firm basis during the winter season (November to March) for NSP for a term ending the earlier of October 31, 1989, or the date that Viking accepts a blanket certificate under § 284.221 of the Commission's Regulations. It is asserted that Viking requests an extension of the term of the firm seasonal transportation service for an additional year to coincide with the term agreed on in Rate Schedule T-9, or in the alternative Viking seeks to extend this winter service for one year. It is indicated that the extension of the term is required in order for NSP to maintain its long-term gas supplies and to meet the firm gas requirements of residential and commercial customers located on Viking's system during the winter heating season.

Comment date: September 13, 1989, in accordance with the first of Standard Paragraph F at the end of this notice.

[2] CNG Transmission Corporation was a joint applicant with Applicant for a portion of the 1990 facilities, but is not involved in or affected by the facilities subject of this Petition.

12. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1976-000]

August 23, 1989.

Take notice that on May 23, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1976-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Gastrak Corporation (Gastrak), a marketer of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Pursuant to a gas transportation agreement dated June 16, 1989, Panhandle requests authority to transport up to 161,500 Dt. of natural gas per day, on an interruptible basis, on behalf of Gastrak. Panhandle states that the agreement provides for it to receive gas from various existing points of receipts along its system and to redeliver the gas, less fuel used and unaccounted for line loss, to Central Illinois Public Service Company at existing points of delivery in various counties of Illinois. Gastrak has informed Panhandle that it expects to have the full 161,500 Dt. transported on an average day and, based thereon, estimates that the annual transportation quantity would be 58,947,500 Dt. Panhandle advises that the transportation service commenced on July 14, 1989, as reported in Docket No. ST89-4438, pursuant to § 284.223 of the Commission's Regulations.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. Northern Natural Gas Company, Division of Enron Corporation

[Docket No. CP89-1967-000]

August 23, 1989.

Take notice that on August 17, 1989, Northern Natural Gas Company, Division of Enron Corporation (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP89-1967-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Feagan Gathering Company (Feagan), under the blanket certificate issued in Docket No. CP86-435-000 pursuant to Section 7 of the Natural Gas Act, all or more fully set forth in the request on file with the Commission and open to public inspection.

Northern states that it proposes up to 18,000 MMBtu of natural gas per day for Feagan, on a peak day, 13,500 MMBtu on an average day and 2,180,000 MMBtu annually, under Rate Schedule IT-1. This service was reported to the Commission in Docket No. ST89-4405-000. Northern further states that construction of facilities will not be required to provide the proposed service.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

14. Northwest Pipeline Corporation

[Docket No. CP89-1972-000]

August 23, 1989.

Take notice that on August 18, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-1972-000 an application pursuant to §§ 157.205 and 284.223 (18 CFR 157.205 and 284.223) of the Commission's Regulations under the Natural Gas Act for authorization to provide interruptible transportation service for Exxon Corporation (Exxon), a producer of natural gas, pursuant to Northwest's blanket transportation certificate issued by Commission order on January 19, 1988, in Docket No. CP86-578-000, All as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest states it will receive the gas at various system supply wells in Lincoln, Sublette and Sweetwater Counties, Wyoming, for transportation and delivery, for the account of Exxon, to the Opal Plant in Lincoln County, Wyoming and to the Black Canyon Line in Sublette County, Wyoming.

Northwest proposes to transport daily up to 20,000 MMBtu equivalent of gas on a peak day, 5,000 MMBtu equivalent of gas on an average day and approximately 1,809,000 MMBtu equivalent of gas annually. Northeast states the transportation service commenced under the 120-day automatic authorization of § 284.223(a) of the Commission's Regulations on July 1, 1989, pursuant to a transportation agreement dated September 26, 1988, as amended September 26, 1988. Northwest notified the Commission of the commencement of the transportation service in Docket No. ST89-4402-000 on August 4, 1989.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

15. United Gas Pipe Line Company

[Docket No. CP89-1968-000]

August 23, 1989.

Take notice that on August 17, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1968-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service on behalf of Texaco Gas Marketing (Texaco), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88-6-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that it would transport a maximum daily quantity of 103,000 MMBtu for Texaco pursuant to an Interruptible Gas Transportation Agreement, dated July 25, 1987, as amended June 23, 1989, between United and Texaco. United further states that it would receive the natural gas at existing points of receipt in the states of Louisiana and Texas and would redeliver the natural gas at existing points of delivery in the states of Louisiana, Texas and Mississippi. United indicates that the estimated average day and annual quantities to be transported would be 103,000 MMBtu and 37,595,000 MMBtu, respectively.

United states that it commenced the transportation of natural gas for Texaco on July 18, 1989, as reported in Docket No ST89-4310, for a 120-day period pursuant to § 284.223(a) of the

Commission's Regulations (18 CFR 284.223(a)).

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

16. Columbia Gulf Transmission

[Docket No. CP89-1969-000]

August 23, 1989.

Take notice that on August 17, 1989, Columbia Gulf Transmission Company (Columbia Gulf), 3805 West Alabama, Houston, Texas 77027, filed in Docket No. CP89-1969-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport, on an interruptible basis, on behalf of Exxon Corporation (Exxon), a marketer of natural gas, under Columbia's blanket certificate issued in Docket No. CP86-239-000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

It is stated that the volume anticipated to be transported on a peak day is a maximum of 75,000 MMBtu, on an average day up to 9,000 MMBtu, and approximately 3,285,000 MMBtu on an annual basis.

It is also stated that Columbia Gulf proposes to receive the gas in St. Mary, Iberia, Cameron and Jefferson Parishes, Louisiana and from West Cameron Block 630A, Offshore Louisiana and proposes to redeliver the gas for Exxon to points in Vermillon, St. Mary, Acadia and Terrebonne Parishes, Louisiana. Columbia Gulf states that this service commenced on July 7, 1989, as reported in Docket No. ST89-4431-000, pursuant to Section 284.223(a) of the Commission's Regulations.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

17. Texas Gas Transmission Corporation

[Docket No. CP89-1977-000]

August 23, 1989.

Take notice that on August 21, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-1977-000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Ladd Gas Marketing Inc. (Ladd Marketing), under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport, on an interruptible basis, up to 300,000 MMBtu per day for Ladd Marketing. Texas Gas states that facilities required to be constructed would be installed, owned, and operated as specified in Exhibits B and C of the transportation agreement.

Texas Gas further states that the maximum day, average day, and annual transportation volumes would be approximately 300,000 MMBtu, 180,000 MMBtu and 109,500,000 MMBtu respectively.

Texas Gas advises that service under § 284.223(a) commenced July 14, 1989, as reported in Docket No. ST89-4320.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

18. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89-1937-000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89-1937-000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to the Philadelphia Gas Works (PGW), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 11, 1970, it entered into a service agreement with PGW providing for the sale for resale of a maximum daily quantity of 159,625 Mcf of natural gas per day under Transco's Rate Schedule CD-3. Transco further states that the Commission authorized such service to PGW by order issued in Docket No. CP70-193-000.

Transco indicates that on December 1, 1987, PGW converted, pursuant to § 284.10 of the Commission's Regulations, a total of 23,944 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states PGW's current Rate Schedule CD-3 firm sales entitlement is 135,681 Mcf of natural gas per day. Transco indicates that on April 1, 1989, PGW converted, pursuant to § 284.10 of the Commission's Regulations, an additional 5,042 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states further that in the instant application, it seeks authorization to partially abandon PGW's present firm sales entitlement pursuant to Rate Schedule CD-3 by a total quantity of 5,042 Mcf of natural gas per day, resulting in a revised Rate Schedule CD-3 firm sales entitlement of 130,639 Mcf of natural gas per day for PGW.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of the notice.

19. Northwest Pipeline Corporation

[Docket No. CP89-1961-000]

August 24, 1989

Take notice that on August 21, 1989, Northwest Pipeline Company (Northwest) filed in Docket No. CP89-1961-000 a request pursuant to §§ 157.205 and 284.233 of the Commission's Regulations under the Natural Gas Act, to transport natural gas under its blanket certificate issued in Docket No. CP86-578-000 on behalf of Coastal Gas Marketing Company (Coastal), a marketer, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest indicates that service commenced July 14, 1989, as reported in Docket No. ST89-4427-000 and estimates the volumes transported to be 200,000 MMBtu per day on a peak day, 800 MMBTU on a average day plus, 292,000 MMBtu on an annual basis for Coastal.

Northwest states that no new facilities are to be constructed.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

20. Northwest Pipeline Corporation

[Docket No. CP89-1957-000]

August 24, 1989

Take notice that on August 22, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-1957-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transporation service for Conoco Inc. (Conoco), a producer, under the blanket certificate issued in Docket No. CP86-578-000, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to a transportation agreement dated November 1, 1988, as amended December 5, 1988, under its Rate Schedule TI-1, it proposes to transport up to 30,000 MMBtu per day equivalent of natural gas for Conoco. Northwest states that it would transport the gas through its system from any transportation receipt point on its system to any transportation delivery point on its system, as defined in the December 5, 1988, amendment.

Northwest advises that service under Section 284.223(a) commenced November 1, 1988, as reported in Docket No. ST89-4421 (filed August 7, 1989). Northwest further advises that it would transport 3,300 MMBtu on an average day and 1,200,000 MMBtu annually.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

21. Northern Natural Gas Company, a Division of Enron Corp

[Docket No. CP89-1951-000]

August 24, 1989

Take notice that on August 15, 1989, Northern Natural Gas Company, (Northern), Division of Enron Corp., filed in the above referenced docket, pursuant to Sections 4 and 7(c) of the Natural Gas Act and Parts 154 and 157 of the commission's Regulations under the Natural Gas Act (18 CFR 157.14), its application for a certificate of public convenience and necessity authorizing the implementation of a gas inventory charge (GIC) on an interim basis, pursuant to the tariff sheets submitted therewith.

Specifically, Northern requests authorization to establish and implement a demand-based interim GIC, which it states is generally patterned after the provisions of the "Competitive Price Concept" described in the Commission's Notice of Proposed Policy Statement in Docket No. PL89-1-000. Northern asserts that it has made certain changes in its proposal which will: (1) Reduce the rate Northern's customers would otherwise pay, (2) provide a means for customers to mitigate the amoung billed by Northern, and (3) generally adapt The Commission's proposed guidelines to Northern's specific business operations.

The interim GIC Northern proposes herein would impose a monthly inventory charge of $4.60 per MMBtu on each unit of firm sales entitlement of the purchaser (adjusted for storage injections). The GIC would apply to all of Northern's buyers under its firm sales rate schedules. Northern proposes to implement the interim GIC on October 1, 1989, and proposes that such charge remain in effect for a two-year period until October 1, 1991 unless earlier terminated in the event Northern is issued a satisfactory certificate in Docket No. CP89-1227 or receives approval to implement a permanent or long-term GIC. Northern also proposes to provide for certain performance credits for volumes purchased.

Northern proposes to continue its current practice of announcing in advance the monthly price for its system supply gas. Northern states that it will calculate a composite competitive price for spot gas sales delivered into the main line of five major interstate pipeline companies in the Mid-Continent Area, plus a transportation and fuel component, and other applicable surcharges (such as ACA, GRI, and TOP charges). Northern's proposal requires that its announced system supply price be within or below a 4 percent tolerance of such competitive price.

Northern does not propose to provide any additional conversion rights to its buyers. Northern proposes to suspend certain portions of its current PGA mechanism during the effective period of the interim GIC and to direct bill or refund any PGA account 191 balances as of August 31, 1989. Northern proposes to reconcile all of its gas supply costs and sales and GIC revenues and make refunds, together with interest, within one year of the termination of the interim GIC, if revenues exceed cost.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of this notice.

22. Texas Gas Transmission Corporation

[Docket No. CP89-1978-000]

August 24, 1989.

Take notice that on August 21, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-1978-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natual Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for Natural Gas Clearinghouse, Inc. (NGC) under Texas Gas' blanket certificate issued in Docket No. CP88-686-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 300,000 MMBtu of natural gas equivalent on behalf of NGC pursuant to a gas transportation agreement dated November 18, 1988, between Texas Gas and NGC. Texas Gas would receive the gas at various existing points of receipt on its system in offshore Texas and redeliver equivalent volumes, less fuel and lost and unaccounted for volumes, at an existing delivery point in offshore Texas.

Texas Gas further states that the estimated average daily and annual quantities would be 50,000 MMBtu and 18,240,000 MMBtu, respectively. Service under § 284.223(a) commenced on July 8, 1989, as reported in Docket No. ST89-4204-000, it is stated.

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

23. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89-1973-000]

August 24, 1989.

Take notice that on August 21, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No, CP89-1973-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport gas on an interruptible basis for Transco Energy Marketing Company (TEMCO) under its blanket certificate issued in Docket No. CP88-328-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Transco states that it would receive the gas for TEMCO at various existing points of receipt in offshore Louisiana, Louisiana, offshore Texas, Texas, Alabama, Georgia, Pennsylvania and New Jersey, and would redeliver the gas at various existing delivery points located in Louisiana.

Transco further states that the maximum daily, average daily and annual quantities that it would transport for TEMCO would be 175,500 dt equivalent of natural gas, 175,500 dt equivalent of natural gas and 64,057,500 dt equivalent of natural gas, respectively.

Transco indicated that in a filing made with the Commission in Docket No. ST89-4441, it reported that transportation service for TEMCO commenced on July 1, 1989 under the 120-day automatic authorization provisions of § 284.223(a).

Comment date: October 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

24. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89-1938-000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1938–000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to the City of Laurens, South Carolina (Laurens), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 13, 1970, it entered into a service agreement with Laurens providing for the sale for resale of a maximum daily quantity of 7,840 Mcf of natural gas per day under Transco's Rate Schedule CD–2. Transco further states that the Commission authorized such service to Laurens by order issued in Docket No. CP70–193–000.

Transco indicates that on April 1, 1989, Laurens converted, pursuant to § 284.10 of the Commission's Regulations, 1,176 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states that in the instant application, it seeks authorization to partially abandon Laurens's present firm sales entitlement pursuant to Rate Schedule CD–2 by a total quantity of 1,176 Mcf of natural gas per day, resulting in a revised Rate Schedule CD–2 firm sales entitlement of 6,664 Mcf of natural gas per day for Laurens.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of this notice.

25. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–1936–000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1936–000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to the City of Danville, Virginia (Danville), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 12, 1970, it entered into a service agreement with Danville providing for the sale for resale of a maximum daily quantity of 26,000 Mcf of natural gas per day under Transco's Rate Schedule CD–2. Transco further states that the Commission authorized such service to Danville by order issued in Docket No. CP70–193–000.

Transco indicates that on April 1, 1989, Danville converted, pursuant to § 284.10 of the Commission's Regulations, a total of 4,000 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule CD–2. Transco states that in the instant application, it seeks authorization to partially abandon Danville's present firm sales entitlement pursuant to Rate Schedule CD–2 by a total quantity of 2,000 Mcf of natural gas per day, resulting in a revised Rate Schedule CD–2 firm sales entitlement of 22,000 Mcf of natural gas per day for Danville.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of the notice.

26. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–1935–000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1935–000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to Philadelphia Electric Company (PECO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on January 1, 1989, it entered into a service agreement with PECO providing for the sale for resale of 88,692 Mcf of natural gas per day under Transco's Rate Schedule CD–3. Transco further states that the Commission authorized such service to PECO by order issued in Docket No. CP70–193–000.

Transco indicates that on April 1, 1989, PECO converted, pursuant to Section 284.10 of the Commission's Regulations, 14,162 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states that in the instant application, it seeks authorization to partially abandon PECO's present firm sales entitlement pursuant to Rate Schedule CD–3 by a total quantity of 14,162 Mcf of natural gas per day, resulting in a revised Rate Schedule CD–3 firm sales entitlement of 74,530 Mcf of natural gas per day for PECO.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of the notice.

27. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–1933–000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1933–000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to the Pennsylvania Gas and Water Company (PG&W), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 5, 1970, it entered into a service agreement with PG&W providing for the sale for resale of 46,900 Mcf of natural gas per day under Transco's Rate Schedule CD–3. Transco further states that the Commission authorized such service to PG&W by order issued in Docket No. CP70–193–000.

Transco indicates that on April 1, 1989, PG&W converted, pursuant to § 284.10 of the Commission's Regulations, a total of 12,000 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states that in the instant application, it seeks authorization to partially abandon PG&W's present firm sales entitlement pursuant to Rate Schedule CD–3 by a total quantity of 12,000 Mcf of natural gas per day, resulting in a revised Rate Schedule CD–3 firm sales entitlement of 34,900 Mcf of natural gas per day for PG&W.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of this notice.

28. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–1939–000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1939–000 a request pursuant to Sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to Fort Hill Natural Gas Authority (Fort Hill), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 5, 1970, it entered into a service agreement

with Fort Hill providing for the sale for resale of a maximum daily quantity of 11,900 Mcf of natural gas per day under Transco's Rate Schedule CD–2. Transco further states that the Commission authorized such service to Fort Hill by order issued in Docket No. CP70–193–000.

Transco indicates that on April 1, 1989, Fort Hill converted, pursuant to § 284.10 of the Commission's Regulations, 1,785 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states that in the instant application, it seeks authorization to partially abandon Fort Hill's present firm sales entitlement pursuant to Rate Schedule CD–2 by a total quantity of 1,785 Mcf of natural gas per day, resulting in a revised Rate Schedule CD–2 firm sales entitlement of 10,115 Mcf of natural gas per day for Fort Hill.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of this notice.

29. Transcontinental Gas Pipe Line Corporation

[Docket No. CP89–1934–000]

August 24, 1989.

Take notice that on August 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89–1934–000 a request pursuant to sections 7(b) and 16 of the Natural Gas Act for permission and approval to abandon, partially, certain sales service to the Delmarva Power and Light Company (Delmarva), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that on November 5, 1970, it entered into a service agreement with Delmarva providing for the sale for resale of 54,800 Mcf of natural gas per day under Transco's Rate Schedule CD–3. Transco further states that the Commission authorized such service to Delmarva by order issued in Docket No. CP70–193–000.

Transco indicates that on October 1, 1988, Delmarva converted, pursuant to § 284.10 of the Commission's Regulations, a total of 8,220 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states Delmarva's current Rate Schedule CD–3 firm sales entitlement is 46,580 Mcf of natural gas per day. Transco indicates that on April 1, 1989, Delmarva converted, pursuant to § 284.10 of the Commission's Regulations, an additional 8,220 Mcf of natural gas per day of its firm entitlement under the service agreement to firm transportation under Transco's Rate Schedule FT. Transco states further that in the instant application, it seeks authorization to partially abandon Delmarva's present firm sales entitlement pursuant to Rate Schedule CD–3 by a total quantity of 8,220 of natural gas per day, resulting in a revised Rate Schedule CD–3 firm sales entitlement of 38,360 Mcf of natural gas per day for Delmarva.

Comment date: September 14, 1989, in accordance with Standard Paragraph F at the end of the notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission's, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 158.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF88–262–002]

Everett Energy Corp.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

August 25, 1989.

On August 16, 1989, Everett Energy Corporation (Applicant), of 236 North Falmouth Highway, North Falmouth, Massachusetts 02556, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in the City of Everett, Massachusetts. The facility will consist of two combustion turbine generating units, two waste heat recovery boilers and a steam turbine generating unit. Thermal energy recovered from the facility will be sold to Exxon Company, USA for heating its asphalt and heavy fuel oil tanks, and tracing pipelines. The net electric power production capacity of the facility will be 89.6 MW. The primary energy source will be natural gas. The facility is scheduled to be installed and in operation by December 1, 1991.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF89-325-000]

Metropolitan Knox Solid Waste Authority, Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

August 25, 1989.

On August 16, 1989, The Metropolitan Knox Solid Waste Authority, Inc. (Applicant), of 1211 Wray Street, Knoxville, Tennessee 37917 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Knoxville, Tennessee. The facility will consist of two (2) mass burn combustors, and associated boilers and steam turbine generators. The maximum electric power production capacity will be 30.3 megawatts. The primary energy source will be biomass in the form of municipal solid waste. Natural gas will be used for start-ups and shutdowns. The facility is scheduled to begin operation in August 1992.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF85-678-003]

Northeastern Power Co., Application for Commission Recertification of Qualifying Status of a Cogeneration Facility

August 25, 1989.

On August 18, 1989, Northeastern Power Company (Applicant) of 200 South Broad Street, Philadelphia, Pennsylvania 19102 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility is located in Kline Township, Schuylkill County, Pennsylvania. The facility is a 50 MW, net culm, silt, and coal fired plant. The application for recertification requests a change in ownership. Applicant states that the legal title to the facility will be transferred by the Applicant on or about October 1989, to The Connecticut National Bank, a national banking association, not in its individual capacity but solely as Owner Trustee under the Trust Agreement dated as of September 15, 1988 between Chrysler Capital Corporation, as the Owner Participant, and the Owner Trustee. The Owner Trustee will lease the facility to the Applicant pursuant to a lease agreement.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TQ89-10-51-000]

Great Lakes Gas Transmission Co.; Granting Late Intervention

August 25, 1989.

Motions to intervene in the above-captioned proceeding were due on June 29, 1989. A motion to intervene out of time was filed on July 14, 1989, by Northern Minnesota Utilities. No answers in opposition to the motion were filed.

The movant appears to have a legitimate interest under the law that is not adequately represented by other parties. It is in the public interest to allow the movant to appear in this proceeding. Accordingly, good cause exists for granting the late intervention.

Pursuant to § 375.302 of the Commission's Regulations (18 CFR 375.302 (1988)), the movant is permitted to intervene in this proceeding subject to the Commission's rules and regulations under the Natural Gas Act, 15 U.S.C. 717-171(w). Participation of the late intervenor shall be limited to matters set forth in its motion to intervene. The admission of the late intervenor shall not be construed as recognition by the Commission that the intervenor might be aggrieved by any order entered in this proceeding.

[Docket No. TM90-1-51-000]

Great Lakes Gas Transmission Co.; Proposed Changes in FERC Gas Tariff Annual Charges Adjustment Clause Provisions

August 25, 1989.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on August 21, 1989, tendered for filing Second Revised Sheet No. 57(iv) to its FERC Gas Tariff, First Revised Volume No. 1.

Second Revised Sheet No. 57(iv) reflects the new ACA rate to be charged per the Annual Charges Adjustment Clause provisions established by the Commission in Order No. 472, issued on

May 29, 1987. The new ACA rate to be charged by Great Lakes is per FERC notice given on July 14, 1989 and is to be effective October 1, 1989.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before September 1, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 3865-031]

Guadalupe-Blanco River Authority; Rejecting Appeal

August 25, 1989.

On July 14, 1989, Guadalupe-Blanco River Authority, licensee for the Canyon Dam Hydro Project No. 3865, filed a revised Exhibit A in compliance with Article 304 of its license issued December 4, 1986, [1] and ordering paragraph (c) of the order approving as-built exhibits issued May 18, 1989. [2] The revised Exhibit A describes the constructed configuration of the licensed project works. By order issued August 11, 1989, [3] the Director, Division of Project Compliance and Administration (Director), approved the revised Exhibit A.

On August 23, 1989, Canyon Lake Area Citizens Association (CLACA), an intervenor in the license proceeding, filed an appeal of the Director's August 11, 1989 order. The Commission has ruled that it will not entertain appeals of non-material post-license compliance orders. Accordingly, CLACA's appeal of the Director's August 11, 1989 order is dismissed.[4]

Inter-City Minnesota Pipelines Ltd., Inc.; Tariff Filing

August 25, 1989.

Take notice that on August 21, 1989, Inter-City Minnesota Pipelines, Ltd., Inc. ("Inter-City"), 245 Yorkland Boulevard, North York, Ontario, Canada M2J 1R1, tendered for filing a revised tariff sheet to Original Volume 2 of its FERC Gas Tariff to be effective December 1, 1988.

Original Volume No. 2

Substitute First Revised Fifth Revised Sheet No. 12

Inter-City states that this sheet corrects typographical errors discovered in the sheet filed on August 10, 1989. Those sheets were filed in compliance with the Commission orders issued in these dockets.

Inter-City states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any persons desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such protests should be filed on or before September 1, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons who are already parties to this proceeding need not file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

West Texas Gas, Inc.; Filing

August 25, 1989.

Take notice that on August 22, 1989, West Texas Gas, Inc. (WTG) filed Sixteenth Revised Sheet No. 3a to its FERC Gas Tariff, Original Volume No. 1, proposed to be effective October 1, 1989. Sixteenth Revised Sheet No. 3a and the accompanying explanatory schedules constitute WTG's annual PGA filing submitted in accordance with the Commission's purchased gas adjustments regulations.

WTG states that copies of the filing were served upon WTG's customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214 (1987)). All such motions or protests should be filed on or before September 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. G-2737-009, et al.]

Conoco Inc., et al.; Applications for Termination or Amendment of Certificates [1]

August 25, 1989.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to terminate or amend certificates as described herein, all as more fully described in the respective applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 14, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OOP-100067; FRL-3638-8]

Syracuse Research Corporation; Transfer of Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Syracuse Research Corporation (SRC) has been awarded a contract to perform work for the EPA Office of Environmental Criteria and Assessment and will be provided access to certain information submitted to EPA under FIFRA and the FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transferred to SRC consistent with the requirements of 40 CFR 2.307(h)(3) and 40 CFR 2.308(i)(2), respectively. This action will enable SRC to fulfill the obligations of the contract and this notice serves to notify affected persons.

DATE: Syracuse Research Corporation will be given access to this information no sooner than September 6, 1989.

FOR FURTHER INFORMATION CONTACT: By mail: Catherine S. Grimes, Program Management and Support Division (H7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 212 CM#2, 1921 Jefferson Davis Highway, Arlingotn, VA, (703) 557-4460.

SUPPLEMENTARY INFORMATION: This notice is to amend the list of chemicals that appeared in a **Federal Register** notice of January 13, 1988 (53 FR 794). The pesticide chemicals listed below are in addition to those mentioned in the above **Federal Register**. SRC will be preparing and updating environmental effects documents, including aquatic toxicity and environmental fate and transport. Other chemicals may be included in SRC's work later in this contract. Readers may contact the person named above in approximately 1 year to learn if chemicals other than those on this list and the original listing of January 13, 1988, will be involved in this contract. Atrazine, Carbaryl, Formaldehyde, Malathion, Methoxychlor.

The Office of Environmental Criteria and Assessment and the Office of Pesticide Programs have jointly determined that Contract No. 68-C3-3521, involves work that is being conducted in connection with FIFRA, in that pesticide chemicals will be the subject of certain evaluations to be made under this contract. These evaluations may be used in subsequent regulatory decisions under FIFRA.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 6, and 7 of FIFRA and obtained under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(3) and 2.308(i)(2), the contract with SRC prohibits use of the information for any purpose other than the purposes specified in the contract, prohibits disclosure of the information in any form to a third party without prior written approval from the Agency or affected businesses, and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release and to handle it in accordance with the FIFRA Information Security Manual. In addition, SRC has previously submitted for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. Records of information provided to this contractor will be maintained by the Project Officer for this contract in the EPA Office of Environmental Criteria and Assessment. All information supplied to SRC by EPA for use in connection with this contract will be returned to EPA when SRC has completed its work.

Dated: August 18, 1989.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Woody's Tire Fire Site: Notice of Proposed Settlement

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed settlement.

SUMMARY: Under Section 122(h) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), The Environmental Protection Agency (EPA) has agreed to settle claims for past response costs at the Woody's Tire Fire Site, Gastonia, North Carolina with Mr. Charles J. Woody. EPA will consider public comments on the proposed settlement for thirty days. EPA may withdraw from or modify the proposed settlement should such comments disclose facts or consideration which indicate the proposed settlement is inappropriate, improper or inadequate. Copies of the proposed settlement are available from: Ms. Carolyn McCall, Investigation Support Assistant, Investigation and Cost Recovery Unit, Site Investigation and Support Branch, Waste Management Division, U.S. EPA, Region IV, 345 Courtland St., NE., Atlanta, GA 30365, (404) 347-5059.

Written comments may be submitted to the person above by 30 days from date of publication.

Dated: August 22, 1989.

Patrick M. Tobin,

Director, Waste Management Division, EPA Region IV.

[FR Doc. 89-20638 Filed 8-31-89; 8:45 am]

BILLING CODE 6560-50-M

[ER-FRL-3638-7]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared August 14, 1989 through August 18, 1989 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 7, 1989 (54 FR 15007).

Draft EISs

ERP No. DS-AFS-G65042-00, Rating LO, Ouachita National Forest, Amended Land and Resource Management Plan, Updated and Additional Information with emphasis on the Issue of Even-Age and Uneven-Age Management, Implementation, Garland, Logan, Hot Spring, Montgomery, Howard, Perry, Pike, Polk, Saline, Scott, Sebastian and Yell Cos., AR and Leflore and McCurtain Cos., OK

Summary: EPA has no objections to the proposed action as described.

ERP No. D-COE-B36065-MA, Rating EO2, Saugus River and Tributaries Flood Damage Reduction Plan, Implementation, Lynn, Malden, Revere and Saugus Communities, Essex, Middlesex and Suffolk Counties, MA.

Summary: EPA believes the proposed project does not comply with Section 404(b)(1) of the Clean Water Act, because the placement of fill in Lynn Harbor can be avoided. In addition, this project may not comply with EPA's antidegradation policy (40 CFR 131.12) which mandates that existing water uses and the level of water quality necessary to protect existing uses be maintained and protected. Finally, the extent of both wetland and floodplain which may be affected must be better documented.

ERP No. D-FHW-D40720-VA, Rating EO2, VA-31/James River Crossing Improvement, VA-10 to VA-5, Funding, Section 10 and 404 Permits, Coast Guard Permits, Surry, James City and Charles City Counties, VA.

Summary: EPA has rated Alternatives A, B, C, and D EO-2, due to the dredging and disposal of kepone contaminated river sediment and the high potential for secondary development. The improved ferry and No Build Alternative were rated EC-2 due to the poor level of service predicted for the ferry system and the related socio-economic impacts.

ERP No. D-FHW-G40124-OK, Rating LO, East 71st Street South Reconstruction, South Lewis Avenue to South Memorial Drive, Funding, City and County of Tulsa, OK.

Summary: EPA has no objections to the proposed action as described.

Final EISs

ERP No. F-BLM-L61158-ID, Jacks Creek Wilderness Study Areas, Wilderness Designation, Owyhee County, ID.

BEST COPY AVAILABLE

Summary: Review of the final EIS has been completed and the project found to be satisfactory.

ERP No. F–SWF–B65001–00, New England Atlantic Salmon Restoration Activities 1989–2021, Implementation, Connecticut, Pawcatuck, Merrimack, Saco, Union, Androscoggin, Kennebec, Penobscot, St. Croix, Meduxnekeag and Aroostook Rivers, CT, RI, MA, NH, VT and ME.

Summary: EPA has no objections to the proposed Atlantic Salmon restoration effort. EPA's concerns regarding the draft EIS have been satisfactorily resolved.

Regulations

ERP No. R–FEM–A86231–00, 44 CFR Part 206; Disaster Assistance; Robert T. Stafford Disaster Relief and Emergency Assistance Act; Implementation (54 FR 22162).

Summary: Review of the final EIS has been completed and the project found to be satisfactory.

Dated: August 29, 1989.

[GEN Docket No. 89–549; DA 89–711]

North Central and North East Texas Public Safety Plan

AGENCY: Federal Communications Commission..

ACTION: Notice.

SUMMARY: The FCC is accepting the North Central and North East Texas Area's (Region 40's) plan for public safety. By accepting this plan, the FCC enables the licensing of the 821–824/866–869 MHz spectrum for public safety to begin. The North Central and East Texas Region is the second of the 55 regions in the National Plan to be accepted.

EFFECTIVE DATE: July 7, 1989.

FOR FURTHER INFORMATION CONTACT: Maureen Cesaitis, Private Radio Bureau, Policy and Planning Branch, Washington, DC 20554, (202) 632–6497.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order, adopted June 22, 1989, released July 7, 1989, accepting the North Central and North East Texas Area's Plan for Public Safety. The full text of this Commission action is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of the Order may also be purchased from the Commission's copy contractor, International Transcription Service, (20) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Order

The Chief, Private Radio Bureau and the Chief Engineer have accepted the regional public safety plan for the North

Central and North East Texas Region, Region 40. The Region 40 plan is the second of its kind to be accepted and it represents the culmination of the efforts of the many public safety organizations that participated in its development.

The Bureaus recognized the effort that went into preparing the Region 40 Plan and commended the Planning Committee for its work. They stated that Region 40 presented a challenge in terms of diversity and population concentration. They noted that Region 40, which includes 42 counties, is unique in that most of its population (78 percent) is concentrated in the Dallas/Fort Worth area. The Region 40 Plan represents a careful balance of the public safety and special emergency mobile communications needs throughout the area and will result in efficient use of the 800 MHz Public Safety radio spectrum.

In 1987, the Commission established policies and rules for a National Plan for public safety services to ensure that the new six megahertz of public safety spectrum (821–824/866–869 MHz) be used effectively and efficiently for important public safety functions. The Commission established 55 regions and instructed each region to develop a plan for use of the newly allocated spectrum to meet current and future mobile communications requirements of the public safety and special emergency entities operating in the area. After each plan is completed and approved by its regional planning committee, it must be submitted to the Chief, Private Radio Bureau, and the Chief Engineer. After the two Bureau Chiefs have formally accepted a plan, the individual public safety entities can begin applying for licensing in the new 800 MHz spectrum.

The Bureaus found that the Region 40 Plan conforms with the National Public Safety Plan and includes all the necessary elements specified in the 1987 Report and Order. Specifically, the plan includes a summary of the major elements of the plan, including usage guidelines, frequency reassigment, common channel implementation, encryption, use of long-range and cellular communications, application evaluation and appeal procedures. In a general description of how the spectrum is to be allotted among the various eligible users within the region, the Plan explains that the new channels have been initially assigned on a county-by-county basis, correlated to population with a minimum of two frequencies per county. The Regional Planning Committee used this approach to conserve spectrum and create more efficient frequency assignments. The Plan offers a detailed description of how the plan puts the spectrum to the best possible use by requiring system design with minimum coverage areas, by assigning frequencies so that maximum frequency reuse and offset channel use may be made and by using trunking technology.

The Bureaus noted that the seven adjacent regions, Oklahoma (34), Arkansas (4), Louisiana (18), Houston (51), Austin (49), El Paso (50), and Lubbock (52), not being as far along in their planning process, may require future coordination with Region 40. Therefore, the Bureaus accepted the Region 40 Plan subject to future coordination with its adjacent regions.

Upon release of the full text of the Order, the individual public safety entities in Region 40 may begin applying for licensing in the 821–824/866–869 MHz bands.

Action by the Chief, Private Radio Bureau and the Chief Engineer, June 22, 1989, by Order (DA 89–711).

Ordering Clauses

It is ordered that the North Central and North East Texas Area Plan for Public Safety *is accepted,* subject to amendments contained in the Order.

It is further ordered that this proceeding *is terminated.*

Federal Communications Commission.

Ralph A. Haller,

Chief, Private Radio Bureau.

Thomas P. Stanley,

Chief Engineer.

Report No. 1792

Petitions for Reconsideration of Actions in Rule Making Proceedings

August 28, 1989

Petitions for reconsideration have been filed in the Commission rulemaking proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in Room 239, 1919 M Street, NW., Washington, DC, or may be purchased from the Commission's copy contractor International Transcription Service (202–857–3800). Oppositions to these petitions must be filed within 15 days of the date of public notice of the petitions in the **Federal Register**. See Section 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations. (Charleston, South Carolina). (RM–6954) Number of Petitions Received: 1

Subject: Amendment of Parts 15 and 76 Relating to Terminal Devices Connected to Cable Television Systems. (Gen Docket No. 85–301) Number of Petitions Received: 1

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations. (Perry, Cross City, Holiday, Avon Park, Sarasota and Live Oak, Florida; Thomasville, Georgia) (MM Docket No. 87–455, RM's 5899, 6223, 6224, 6225 and 6226) Number of Petitions Received: 1

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast (Tallahassee, Quincy, Perry and Gretna, Florida and Thomasville, Georgia) (MM Docket Nos. 87–486 and 87–455, RM's 5938, 5899, 6225, 6242, 6223, 6278, 6224 and 6226) Number of Petitions Received: 3

Subject: Height and Power Increases in the public Land Mobile Radio Service. (CC Docket No. 88–135) Numbers of Petitions Received: 4

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations. (Jupiter and White City, Florida) (MM Docket No. 88–306, RM's 6280 and 6531) Number of Petitions Received: 1

Subject: Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations. (Mt. Morris and Savanna, Illinois, Belle Plaine, Maquoketa, Webster City and Winterset, Iowa) (MM Docket No. 88–369, RM's 6282, 6453 and 6580) Number of Petitions Received: 1

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–826–DR]

Alaska; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Alaska (FEMA–826–DR), dated May 10, 1989, and related determinations.

DATE: August 22, 1989.

FOR FURTHER INFORMATION CONTACT: Neva K Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646–3614.

NOTICE: The notice of a major disaster for the State of Alaska, dated May 10, 1989, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of May 10, 1989:

The communities of Chevak and Mountain Village for Public Assistance.

Grant C. Peterson,

Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–010839–004.

Title: Port of Seattle Terminal Agreement.

Parties:

Port of Seattle

American President Line, Ltd. (APL)

Synopsis: The Agreement provides for the substitution of three 20/40 foot, 50 ton capacity crane spreader beams with three new 20/40/45 foot, 50 ton capacity crane spreader beams. It also provides for the amortization of a portion of the cost differential by APL.

Agreement No.: 224–200281.

Title: City of New York Terminal Agreement.

Parties:

The City of New York Department of Ports International Trade & Commerce

Continental Terminals, Inc. (Continental)

Synopsis: The Agreement provides Continental with a ten-year lease of the 39th Street Pier and adjoining area, Brooklyn, New York, to be used for stevedoring and warehousing of cocoa and cocoa products. The Agreement provides for the payment of annual rent, wharfage and dockage fees. The Agreement may be renewed for two additional five-year periods.

By order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: August 29, 1989.

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011220–001.

Title: Bermuda Discussion Agreement.

Parties: Bermuda Container Line Ltd. Lloyd (Bermuda) Line Ltd.

Synopsis: The proposed modification would delete the requirement that each party give notice of any agreement or consensus not adhered to.

By Order of the Federal Maritime Commission.

Dated: August 28, 1989.

Joseph C. Polking,

Secretary.

[Docket No. 89–18]

Gulf Container Line (GCL), BV v. Port of Houston Authority Filing of Complaint and Assignment

Notice is given that a complaint filed by Gulf Container Line (GCL), B.V. ("Complainant") against Port of Houston Authority ("Respondent") was served August 28, 1989. Complainant alleges that Respondent engaged in violations of sections 10(d)(1), 10(d)(3), 10(b)(11) and 10(b)(12) of the Shipping Act of 1984, 46 U.S.C. app. 1709(d)(1), (d)(3), (b)(11), and (b)(12) in regard to its "reefer monitoring" practices at the Barbours Cut Terminal within the Port of Houston.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by August 28, 1990, and the final decision of the Commission shall be issued by December 28, 1990.

Joseph C. Polking,

Secretary.

Family Support Administration

Forms Submitted to the Office of Management and Budget for Clearance

The Family Support Administration (FSA) will publish on Fridays information collection packages submitted to the Office of Management and Budget (OMB) for clearance, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following package was submited to OMB:

(For a copy of the package below, call the FSA Reports Clearance Officer on 202 252–5598.)

Request for Approval of Information Collection Requirements Contained in Regulations (P.L. 100–485) Sections 121 and 122 of the Family Support Act. The information prescribed in the information collection is used to ensure that state IV–D agencies collect and maintain information so that child support services are effectively and expeditiously provided. Respondents will be state agencies involved in child support activities.

Number of Respondents: 54, Frequency of Response: 100,374.

Average Burden per Response: 5 minutes.

Estimated Annual Burden: 461,682 hours.

OMB Desk Clearance Officer: Justin Kopca.

Written comments and recommendations for the new information collection should be sent directly to the OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3201, 725 17th Street, NW., Washington, DC 20503.

Dated: August 20, 1989.

Naomi B. Marr,

Associate Administrator Office of Management and Information Systems, FSA.

BILLING CODE 4150-04-M

Forms Submitted to Office of Management and Budget for Clearance

The Family Support Administration (FSA) will publish on Fridays information collection packages submitted to the Office of Management and Budget (OMB) for clearance, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). Following is the package submitted to OMB since the last publication on August 25, 1989.

(Call the Reports Clearance Officer on 202–252–5598 for copies of package).

Uniform Statistical Report—FSA-104—NEW—This report is needed to meet the requirements in the Family Support Act. The information will be used to aid in the development of performance standards and to ensure that sections 402(g)(1)(A) and 402(a)(43) of the Social Security Act are being effectively implemented. Respondents: State or local governments; Number of Respondents: 51; Frequency of Response: Quarterly; Average Burden per Response: 50 hours; Estimated Annual Burden: 10,200 hours.

OMB Desk Clearance Officer: Justin Kopca.

Consideration will be given to comments and suggestions received within 60 days of publication. Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3201, 725 17th Street NW., Washington, DC 20503.

Dated: August 20, 1989.

Naomi B. Marr,

Associate Administrator, Office of Management and Information Systems.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 88D–0386]

Advisory Opinion and Compliance Policy Guide; Drug Product Entries in Periodic Publications; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of an advisory opinion on drug entries in *Monthly Prescribing Reference* and of Compliance Policy Guide (CPG) 7132b.17, "Drug Product Entries in Periodic Publications." The advisory opinion sets forth FDA's rationale for determining that the drug product entries in *Monthly Prescribing Reference* are not "advertisements" or "labeling" under the Federal Food, Drug, and Cosmetic Act (the act). The CPG establishes general factors FDA will use for determining whether drug product entries in periodic publications such as *Monthly Prescribing Reference* are "advertisements" or "labeling." The advisory opinion and CPG 7132b.17 do not limit the agency's enforcement discretion on whether to initiate regulatory action after an evaluation of all relevant facts.

ADDRESSES: The advisory opinion on drug entries in *Monthly Prescribing Reference* and CPG 7132b.17, "Drug Product Entries in Periodic Publications" may be ordered as one unit from National Technical Information Service (NTIS), U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22161.

Orders must reference NTIS order number PD 89–226344 and include payment of $10.95 for a copy of the documents. Payment may be made by check, money order, charge card (American Express, Visa, or Mastercard), or billing arrangements made with NTIS. Charge card orders must include the charge card account number and expiration date. For telephone orders or further information on placing an order, call NTIS at 703–487–4650. The advisory opinion (Docket No. 86A–0246/AP) and CPG 7132b.17 are available for public examination in the Docket Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Steven H. Unger, Center for Drug Evaluation and Research (HFD–362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857–1706, 301–295–8046.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of the advisory opinion and companion CPG 7132b.17. The advisory opinion was requested on behalf of Prescribing Reference, Inc., the publisher of *Monthly Prescribing Reference*. The request was submitted to FDA under 21 CFR 10.85 of the administrative practices and procedures regulations and was assigned Docket No. 86A–0246/AP. FDA's advisory opinion sets forth the agency's rationale for determining that drug product entries in the periodic publication *Monthly Prescribing Reference* are not "labeling" under section 201(m) of the act (21 U.S.C. 321(m)) or "advertisements" under section 502(n) of the act (21 U.S.C. 352(n)). CPG 7132b.17 establishes the agency's general policy regarding the regulation of drug product entries in periodic publications intended for distribution to physicians and other health professionals.

This notice is issued under 21 CFR 10.85 and 10.90.

Dated: August 15, 1989.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

Health Resources and Services Administration

National Advisory Committee on Rural Health

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1989:

Name: National Advisory Committee on Rural Health.

Date and Time: September 25–27, 1989, 8:30 a.m.

Place: The Columbia Inn, Wincopin Circle, Columbia, Maryland 21044.

The meeting is open to the public.

Purpose: The Committee provides advice and recommendations to the Secretary with respect to the delivery, financing, research, development and administration of health care service in rural areas.

Agenda: The meeting will include a welcome and opening remarks from the Chairman; a legislative update; a report of the National Library of Medicine's rural outreach study. The Committee will split into the three Work Groups (Health Services Delivery; Health Personnel; and Health Care Financing) for working sessions (rooms to be determined). Reports of the Work Groups' deliberations and considerations of any proposed recommendations for the Report to the Secretary. There will be brief segments for public comment, twice each day.

Persons interested in providing brief public comments should contact Ms. Arlene Granderson, Director of Operations, Office of Rural Health Policy, Health Resources and Service Administration, Room 14–22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–0835, for more specific information. Callers were asked to consider the option of preparing written statements which will be circulated to the whole Committee, or particular Work Groups if requested, prior to the meeting. Work Groups are particularly interested in receiving specific proposals for recommendations the Committee should make to the Secretary.

Anyone requiring information regarding the subject Council should contact Mr. Jeffrey Human, Executive Secretary, National Advisory Committee on Rural Health, Health Resources and Service Administration, Room 14–22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–0835.

Agenda items are subject to change as priorities dictate.

Date: August 28, 1989.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

National Institutes of Health

National Institute of Dental Research; Hearing To Obtain Comments From Organizations Regarding the NIDR "Long-Range Research Plan for the 1990s"

The National Institute of Dental Research (NIDR) has developed a draft of its "Long-Range Research Plan for the 1990s." Before the document is finalized, the NIDR will hold a hearing to obtain comments from organizations having a direct and immediate interest in the subject. The meeting will be convened on September 27, 1989, in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland from 9:00 a.m. to 11:45 a.m.

The meeting will be open to the public. Attendance will be limited to space available.

All organizations interested in presenting testimony should contact Dr.

James Lipton, Chief, Planning and Evaluation Section, Office of Planning, Evaluation, and Communications, NIDR, NIH, Room 2C–36, Building 31, 9000 Rockville Pike, Bethesda, MD 20892 (telephone 301/496–6705). Copies of the draft document will be made available to representatives of organizations prior to the meetings.

Dated: August 24, 1989.

William F. Raub,

Acting Director, NIH.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–89–2040]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESS: Interested persons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extention, reinstatement, or revision of an informantion collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 28, 1989.

David S. Cristy,

Deputy Director, Information Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Conveyance (Acquisition) and Disposition Information Collections Contained in Handbook 4310.5 Entitled "Property Disposition Handbook, One-to-Four Family Properties".

Office: Housing.

Description of the Need for the Information and its Proposed Use: HUD will use the information from the forms to complete, rent, renovate, modernize, insure, or sell for cash or credit, properties in the Single Family inventory.

Form Number: HUD–9516, 9516A, 9519, 9519A, 9556, 9544, 9548.

Respondents: Individuals or Households, Businesses or Other For-Profit, and Small Businesses or Organizations.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours

BILLING CODE 4210–27–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Intent To Prepare an Environmental Impact Statement; Raven Management Plan, California Desert Conservation Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: The Bureau of Land Management, in cooperation with the U.S. Fish and Wildlife Service, California Department of Fish and Game, and other agencies, will prepare an Environmental Impact Statement (EIS) reviewing alternative measures to manage ravens (*Corvus corax*) in the California Desert Conservation Area. Raven management has been proposed to reduce excessive raven predation on juvenile desert tortoises (*Xerobates Agassizzii*). The EIS will examine both lethal and nonlethal methods to control ravens in portions of the Mojave, Sonoran, and Colorado deserts of California. The goal of the management program is to increase recruitment rates of juvenile desert tortoises into adult age-classes.

Management measures that will be reviewed in the EIS include but are not limited to restricting nesting and perching sites, reducing availability of food sources, and selectively killing ravens using a combination of shooting and poisoning. The public is invited to participate in this process beginning with the identification of environmental issues.

DATE: Comments relating to the identification of environmental issues will be accepted up to 30 days from date of this publication.

ADDRESS: Send comments to the Bureau of Land Management, California Desert District Office, 1695 Spruce Street, Riverside, California 92507, Attn: Raven EIS.

FOR FUTHER INFORMATION CONTACT: Ted Rado, BLM California Desert District Office, (714) 351–6402.

SUPPLEMENTARY INFORMATION: The preliminary issues for the EIS include the following: (1) effects of raven control actions on other wildlife species; (2) identification of raven control areas; (3) measures to reduce food availability to ravens at landfills and sewage ponds; (4) means to limit raven nesting, perching, and roosting opportunities in areas of high tortoise predation; (5) mitigating program effects to other wildlife species; and (6) monitoring effectiveness of program actions. .

A public scoping meeting will be held at the Howard Johnson Lodge, 1199 University Avenue, Riverside, California, on September 15, 1989, between 10:00 a.m. and 12:00 p.m., in the Oakwood Room. No additional public meetings are planned prior to the release of the draft EIS. Both written and oral comments on the draft EIS will be accepted after its release. Notice of public meetings will be given in local papers and the **Federal Register.**

Dated: August 29, 1989.

Wesley T. Chambers,

Acting District Manager.

[CA–010–09–3110–CAPL; Casefile No. CACA 25679]

Realty Action; Exchange of Public and Private Lands in Los Angeles and San Luis Obispo Counties, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—CACA 25679.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 USC 1716):

San Bernardino Meridian, California

T. 4 N., R. 17 W.

Sec. 2 S½ NE¼ SE¼ SE¼ SW¼

Containing 1.25 acres of public land.

In exchange for these lands, the United States will acquire an equal value of lands within the Carrizo Plain Natural Area from The Nature Conservancy, a private, nonprofit organization.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to acquire a portion of the non-federal lands within the Carrizo Plain Natural Area. This Natural Area would promote the conservation of threatened and endangered species and preserve a representative sample of the historic southern San Joaquin Valley flora and fauna.

The ultimate goal of the Bureau of Land Management is to acquire approximately 155,000 acres within the Natural Area. A secondary purpose of the exchange is to consolidate the Bureau lands and reduce the number of scattered, isolated Bureau parcels that are difficult for the Bureau to manage. The public interest will be well served by completing the exchange.

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the public land laws and mining laws. The segregative effect will end upon issuance of patent or two years from the date of publication in the **Federal Register,** whichever occurs first.

After the exchange is completed, The Nature Conservancy plans to offer the former BLM land for sale to the Newhall Land and Farming Company, the surrounding landowner.

The exchange will be on an equal value basis. Acreage of the private land will be adjusted to approximate equal values. Full equalization of value will be achieved by future exchanges under a pooling agreement with The Nature Conservancy.

Land transferred from the United States will retain the following reservations:

1. A right-of-way for ditches or canals constructed by the authority of the United States under the Act of August 30, 1890 (43 USC 945).

2. All oil and gas subject to disposal under the general mineral leasing laws.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Caliente Resource Area Office, 4301 Rosedale Highway, Bakersfield, California 93308; (805) 861–4236.

DATE: For a period of 45 days from the date of publication of this notice in the **Federal Register,** interested parties may submit comments to the Area Manager, Caliente Resource Area Office, Bureau of Land Management, at the above address. Objections will be reviewed by the State Director who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

Dated: August 16, 1989.

Glenn A. Carpenter,

Caliente Resource Area Manager.

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service, Department of Agriculture, proposes that two withdrawals for recreation and historic sites, consisting of 270.00 acres, be continued for an additional 20 years. The lands are still being used as recreation and historic sites. These lands will remain closed to surface entry and mining, but have been and will remain open to mineral leasing.

DATES: Comments should be received on or before November 30, 1989.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208–334–1735. The U.S. Forest Service proposes that the existing land withdrawals, made by Public Land Order Nos. 3220 and 4251 for recreation and historic sites, be continued for a period of 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as they affect the following described land:

Boise Meridian

(IDI–011898)

Jerry Johnson Hot Springs
T. 36 N., R. 13 E.
  Sec. 17, SW¼SW¼NW¼
  Sec. 18, NW¼NE¼SE¼, SE¼SE¼SE¼.
T. 36 N., R. 13 E.
  Sec. 7, E½NE¼SE¼, SW¼NE¼SW¼, NE¼SW¼SW¼, N½SE¼SW¼, SE¼SE¼SW¼ and SW¼SW¼SE¼.
  Sec. 18, W½SW¼NE¼NE¼, W½NE¼NW¼NE¼, SE¼NE¼NW¼NE¼, E½NW¼NW¼NE¼, NW¼NW¼NW¼NE¼, N½SE¼NW¼NE¼, SE¼SE¼NW¼NE¼, NW¼SE¼NE¼ and SW¼SE¼NE¼.
Colgate Warm Springs Recreation Area
T. 36 N., R. 12 E.
  Sec. 15, SE¼NW¼NE¼, N½NE¼SW¼NE¼, W½SW¼NE¼NE¼ and NW¼NW¼SE¼NE¼.
Cedar Grove Campground (Devoto Memorial Cedar Grove)
T. 37 N., R. 14 E.
  Sec. 22, S½NE¼NE¼NE¼, SE¼NE¼NE¼ and N½NE¼SE¼NE¼.
Powell Campground and Lochsa Public Service Site
T. 37 N., R. 14 E.
  Sec. 32, NE¼NE¼ and E½NW¼NE¼.

(IDI–764)

Moose City Gravesite
T. 40 N., R. 11 E.
  Sec. 29, NE¼NW¼NW¼.

The areas described aggregate 270.00 acres in Clearwater and Idaho Counties.

The withdrawals are essential for protection of substantial capital improvements on the recreation sites and historic values in the Moose City Gravesite. The withdrawals closed the lands to surface entry and mining, but not to mineral leasing. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuations may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawals will be continued; and if so, for how long. The final determination of the withdrawals will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Dated: August 23, 1989.

William E. Ireland,

Chief Realty Operations Section.

National Park Service

North Rim Visitor Facilities Development Concept Plan; Grand Canyon National Park, Arizona; Intent to Prepare a Supplemental Environmental Impact Statement

SUMMARY: In accordance with the National Environmental Policy Act of 1969, Public Law 91–190, the National Park Service, Grand Canyon National Park, is preparing a supplemental environmental impact statement, to the 1976 Final Master Plan and Environmental Impact Statement for Grand Canyon National Park, to assess the impacts of providing additional visitor facilities at the North Rim of Grand Canyon National Park. This supplement to the 1976 Master Plan will evaluate various alternatives including no action; provision of a 100 unit lodge at the North Rim Inn campground area along with expansion of the existing campground, provison of a visitor contact center, and improvement of traffic flow and removal of parking from the immediate front of the Grand Canyon Lodge; placing the proposed lodge in the Upper Transept Canyon area with the North Rim Inn area left to overnight camping; renovation of the existing cabins in the North Rim Inn area for visitor use; and development of the proposed overnight facilities outside the park. An environmental assessment evaluating placing the new lodge in the North Rim Inn Area along with no action and Upper Transept Canyon alternatives was circulated for public review in March, 1988.

The responsible official is Stanley Albright, Regional Director, Western Regional Office. The draft supplemental environmental statement is expected to be completed and available for public review by the end of 1989, and the final supplemental environmental impact statement and Record of Decision expected to be completed from five to six months after issuance of the draft statement.

Comments on the preparation of this environmental statement are invited and should be received no later than thirty (30) days from the date of publication of this Notice in the **Federal Register**. These comments and requests for further information should be addressed to: Superintendent, Grand Canyon National Park, P.O. Box 129, Grand Canyon, AZ 86023, Telephone No. (602) 638–7888.

Dated: August 21, 1989.

Stanley T. Albright,

Regional Director, Western Region.

BILLING CODE 4310–70–M

Bureau of Reclamation

Proposed Resources Management Plan for Elephant Butte and Caballo Reservoirs and Percha and Leasburg Diversion Dam Reservations, New Mexico

AGENCY: Bureau of Reclamation.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), as amended, the Bureau of Reclamation (Reclamation) proposes to prepare a draft environmental impact statement (DEIS) on the proposed Resources Management Plan (RMP) for Elephant Butte and Caballo Reservoirs and Percha and Leasburg Diversion Dam Reservations, New Mexico. The purpose of the proposed plan is to produce a written management document that will be used as a guide by Reclamation and other involved agency personnel in the allocation of resources and permitting appropriate uses of land and water. The plan will address: multiple uses, Reclamation's operation and maintenance on the Rio Grande below San Marcial, New Mexico, and other agency management functions as delegated through agreements with Reclamation. The DEIS will present an analysis of the impacts of various alternative management practices associated with the use of land and water resources at the four locations.

Reclamation will conduct scoping meetings via "open house" formats to inform the public about the management areas and the RMP process, and to have the public assist in scoping issues to be addressed in the RMP and the DEIS.

DATES: The scoping meetings will be held on September 18, 19, 20, and 21, 1989.

ADDRESSES: The scoping meeting open houses will be held at the following four locations and times:

September 18, 5:00 p.m. to 8:00 p.m., El Paso Center—Juarez Room, One Civic Center Plaza, El Paso, Texas;
September 19, 5:00 p.m. to 8:00 p.m., Corbett Center, New Mexico State University, Las Cruces, New Mexico;
September 20, 5:00 p.m. to 8:00 p.m., Truth or Consequences Convention Center, corner of McAdoo and Daniels, Truth or Consequences, New Mexico;
September 21, 5:00 p.m. to 8:00 p.m., Tampico-Cozumel Room, Holiday Inn, San Francisco Road NE., Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT: Mr. Tom Shrader, Chief, Land and Environmental Branch, Rio Grande Project, U.S. Bureau of Reclamation, Federal Building (B–318), 700 East San Antonio, El Paso, Texas 79901; Telephone: (915) 534–6316; or Mr. Harold Sersland, Upper Colorado Regional Environmental Officer, U.S. Bureau of Reclamation, 125 South State Street, Salt Lake City, Utah 84138, Telephone: (801) 524–5580.

SUPPLEMENTARY INFORMATION: Reclamation has three NEPA documents that address operation and maintenance activities on the Rio Grande in New Mexico. The documents are: (1) 1977 Final Environmental Impact Statement, Operation and Maintenance Program for the Rio Grande—Velarde to Caballo Dam—Rio Grande and Middle Rio Grande Projects; (2) 1982 Final Environmental Assessment and Finding of No Significant Impact, Rio Grande Conveyance Rehabilitation, Operation and Maintenance Program, Elephant Butte Reservoir, New Mexico; and (3) 1985 Final Environmental Assessment and Finding of No Significant Impact, Rio Grande Channel Restoration, Operation and Maintenance Program, Elephant Butte Dam to Caballo Reservoir, Sierra County, New Mexico.

After the scoping meetings, the public will have an additional opportunity to comment individually and/or through a focus group composed or representatives of principal users and interest groups.

Anyone interested in more information concerning the study or who has suggestions as to significant environmental issues should contact Mr. Shrader or Mr. Sersland at the above addresses.

The DEIS is expected to be completed and available for review and comment by the end of 1991.

Dated: August 28, 1989.

Joe D. Hall,

Deputy Commissioner.

BILLING CODE 4310–09–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523–6331. Comments and questions about the items on the list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395–6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New Collection

Bureau of Labor Statistics
Survey of displaced workers
CPS 1
Other—one-time survey, to be conducted as a special supplement to the January 1990 Current Population Survey.
Individuals or households
Survey universe is 57,000 household;
Respondents burden is estimated at approximately 1,450 hours;
Supplement will utilize available space on regular CPS questionnaire.

The Current Population Survey (CPS) is the monthly household survey that provides the basis data on the labor force, total employment, and unemployment. The special CPS supplement on displaced workers, proposed for January 1990, would provide data on the persons who lost jobs over the 1985–89 period due to plant closing, companies going out of business, or layoffs from which they were not recalled. A similar survey was conducted in January 1988 (1220–0104).

Extension

Employment Standards Administration
OFCCP Complaint Form
1215–0131; CC–4
On occasion
Individuals or households; 1,750 respondents; 2,030 total hours; 1.16 hrs. per response; 1 form.

These complaint forms are prepared by individuals who allege illegal discrimination by federal contractors under any of the three programs administered by OFCCP. These forms are received by OFCCP, reviewed for coverage, and where appropriate, assigned for investigation.

Extension

Employment and Training Administration

Quarterly Narrative Reports for Test Development Program
1205–0220
Quarterly
20 Respondents; 128 total hours; 1–5 hrs per respondent; no forms.

The Employment Service Reimbursable Grant, pursuant to Section 7(c) of the Wagner-Peyser Act, as amended, is one overall grant to the States to fund special responsibilities of the Secretary of Labor not specifically authorized under Sections 7 (a) & (b) of the Act, such as Test Development.

Signed at Washington, DC this 25th day of August, 1989.

Theresa O'Malley,

Acting Departmental Clearance Officer.

[FR Doc. 89–20656 Filed 8–31–89; 8:45 am]

BILLING CODE 4510–24–M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted constructon projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S–3504, Washington, DC 20210.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January (1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 25th day of August 1989.

Robert V. Setera,

Acting Director, Division of Wage Determinations.

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 211(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 11, 1989.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below not later than (10 days after public). September 11, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 21st day of August 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-22,584]

Kellwood Company Lonoke, AR; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Kellwood Company, Lonoke, Arkansas. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-22,584; Kellwood Company, Lonoke, Arkansas (August 21, 1989)

Signed at Washington, DC, this 24th day of August 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-89-123-C]

Chapperal Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Chapperal Coal Corporation, 441 Marion Branch Road, Pikeville, Kentucky 41501, has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation; minimum requirements) to its No. 2 Mine (I.D. No. 15-08256) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that automatic fire sensor and warning device systems provide identification of a fire within each belt flight.

2. As an alternate method, petitioner proposes to install a carbon monoxide (CO) system in lieu of a point-type system. The CO system would provide identification of a fire within an area rather than within each belt flight.

3. In support of this request petitioner states that—

(a) A CO sensor would be installed at every belt drive and at intervals not to exceed 2,000 feet along the belts. The CO sensors would be capable of giving an early warning of a fire automatically. An audible an visual signal would be activated should the CO concentration reach 10 parts per million (ppm) above ambient level;

(b) The CO systems would upon activation provide an effective warning signal at a manned location on the surface where there is two-way communication. The CO sensor would be capable of identifying any activated sensor. All persons, except those required to investigate and take appropriate action in the event of a fire in the belt entry, would be immediately withdrawn to a safe area;

(c) If the CO system is affected by a power interruption or other malfunction, the belt conveyors would continue to operate only if a qualified person would monitor for CO with a suitable instrument at each section loading point in the malfunctioning sensor;

(d) Each CO sensor would be visually examined at least once each week during production periods to ensure proper functioning. The monitoring system would be calibrated with known concentrations of CO and gas every six weeks; and

(e) The primary intake would be separated from the belt conveyor entry with permanent stoppings.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 2, 1989. Copies of the petition are available for inspection at that address.

Dated: August 24, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefits Plans; Work Group Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Work Group on Pension Portability of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m., Friday, September 22, 1989, In Room N-3437, U.S. Department of Labor Building, Third and Contitution Avenue, NW., Washington, DC 20210.

This eight member group was formed by the Advisory Council to study issues relating to Pension Portability for employee welfare plans covered by ERISA.

Since enactment of ERISA in 1974, a viable resolution has not been found to the issue of short fall in pension entitlement from private sector defined Benefit Plans, due to breaks in employment throughout the normal working career. The lack of a workable "portability" concept to tie together deferred vested benefits and non-vested periods of service erodes ultimate retirement income for millions of employees who have worked an entire career for a series of employers in the same industry or different industries.

The purpose of the Pension Portability Work Group is to evaluate the alternatives to resolving this gap in the evolving National Retirment Income Policy and report its findings to the full ERISA Advisory Council.

The agenda for the first meeting will include the following:

I. Introduction of Work Group members
II. Chairperson's Opening Remarks
III. Discussion of Prior Portability Studies in Recent Proposed Legislation, and Current Administration Position on Issue
IV. Discussion of Scope of Study and Time Schedule of Findings
V. Establishing Dates of Future Meetings
VI. Public Witnesses Testimony
VII. Ajournment

The work group will also take testimony and or submissions from employee representatives, employer representatives and other interested individuals and groups regarding the subject matter.

Individuals, or representatives of organizations, wishing to address the work group should submit written requests on or before September 20, 1989 to William E. Morrow, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Suite N-5677, 200 Constitution Avenue, NW., Washington, DC 20210. oral presentations wil be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before September 20, 1989.

Signed at Washington, DC this 28th day of August, 1989.

William E. Morrow,

Executive Secretary ERISA Advisory Council.

BILLING CODE 4510-29-M

LIBRARY OF CONGRESS

National Film Preservation Board; Public Meeting

AGENCY: Library of Congress, National Film Preservation Board.

ACTION: Notice of public meeting.

This notice is issued pursuant to Public Law 100-446, The National Film Preservation Act of 1988, 2 U.S.C. 178, by Dr. James H. Billington, the Librarian of Congress, to inform the public that the next meeting of the National Film Preservation Board will be held in Washington, DC at the Library of Congress on September 26, 1989 at 2 p.m. in the Jefferson Building, Whittall Pavilion (ground floor). The building is located at the corner of Independence Avenue and First Street, SE.

FOR FURTHER INFORMATION CONTACT: Eric Schwartz, Counsel, The National Film Preservation Board, Library of Congress, Washington, DC 20540. Telephone: (202) 707-8350.

Dated: August 28, 1989.

Approved by:

James H. Billington,

The Librarian of Congress.

BILLING CODE 1410-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (89-59)]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC), Life Sciences Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee, Life Sciences Subcommittee.

DATES: September 18, 1989, 9 a.m. to 5:15 p.m.; September 19, 1989, 8:30 a.m. to 2 p.m.

ADDRESSES: Holiday Inn Capitol, Lewis Room, 550 C Street SW, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald J. White, Code EB, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1470).

SUPPLEMENTARY INFORMATION: The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long range plans for, work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Life Sciences Subcommittee provides advice to the Life Sciences Division concerning all of its programs in the space life sciences. The Subcommittee will meet to discuss the Life Sciences budget status, issues, implications for strategic planning, and activities of the SSAAC and the Aerospace Medicine Advisory Committee (AMAC). The Subcommittee is chaired by Dr. Francis J. Haddy and is composed of 17 members. The meeting will be closed on Tuesday, September 19, from 10:30 a.m. to 11:45 a.m. to discuss and evaluate qualifications of candidates being considered for membership on the Subcommittee. Such discussions would invade the privacy of the individuals involved. Since this session will be concerned with matters listed in 5 U.S.C. 552(c)(6), it has been determined that the meeting will be closed to the public for this period of time. The remainder of the meeting will be open to the public up to the capacity of the room (approximately 45 including Subcommittee members).

Type of Meeting: Open—except for a closed session as noted in the agenda below.

Agenda:

Monday, September 18.

9 a.m.—Introduction and Chairman's Remarks.

9:15 a.m.—NASA and OSSA Status and Implications for Life Sciences.

10:15 a.m.—Life Sciences Budget Status, Issues, and Implications for Strategic Planning.

1:30 p.m.—Activities of the Space Science and Applications Advisory Committee (SSAAC) and the Aerospace Medicine Advisory Committee (AMAC).

2:15 p.m.—Life Sciences Division Reports.

5:15 p.m.—Adjourn.

Tuesday, September 19.

8:30 a.m.—Discussion of Committee Tasks and Functions.

10:30 a.m.—Closed Session.

1 p.m.—Committee Strategy and Actions.

2 p.m.—Adjourn.

Dated: August 25, 1989.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NATIONAL SCIENCE FOUNDATION

Meeting

Name: Committee on Equal Opportunties in Science and Engineering.

Place: National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Dates: October 18, 19, 20, 1989.

Times/Rooms: October 18: Subcommittee on Persons with Disabilities 9:00 a.m.—12:00 p.m., Room 540.

October 18: Subcommittee on Minorities 1:30 p.m.—4:30 p.m., Room 540.

October 19: Full Committee Meeting 9:00 a.m.—5:00 p.m., Room 540.

October 20: Subcommittee on Women 9:00 a.m.—12:00 p.m.

Type of Meeting: Open.

Contact: Mary M. Kohlerman, Executive Secretary of the CEOSE, National Science Foundation, Room 635. Telephone Number: 202–357–7066.

Purpose of Meeting: To provide advice to the Foundation on policies and activities to encourage full participation of groups currently underrepresented in scientific, engineering, professional and technical fields.

Minutes: May be obtained from the Executive Secretary at the above address.

Agenda: To review progress by the subcommittees, become familiar with successful intervention programs, and to meet with the Director and other NSF staff.

M. Rebecca Winkler,

Committee Management Officer.

8–29–89

Instructional Materials Development Panel Meeting

The National Science Foundation announces the following meeting:

Name: Instructional Materials Development Panel Meeting.

Date and Time: September 22, 1989, from 8:30 a.m. to 5:00 p.m.

Place: National Science Foundation, 1800 G. St. NW., Washington, DC 20550. Room #1242.

Type of Meeting: Closed Meeting.

Contact Person: Alice J. Moses, National Science Foundation, 1800 G. St. NW., Washington, DC 20550, Instructional Materials Development, Room 635–A Phone (202) 357–7066.

Minutes: May be obtained from the Contract persons at the above address.

Purpose of Meeting: To attend Instructional Materials Development Panel and provide advice and recommendations concerning K–12 Math. Science and Technology education.

Agenda: To review end evaluate Instructional Materials Development proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a propriety confidential including nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Dated: August 29, 1989.

M. Rebecca Winkler,

Committee Management Office.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Individual Plant Examination

AGENCY: Nuclear Regulatory Commission.

ACTION: Initation of the Individual Plant Examination for Severe Accident Vulnerabilities.

SUMMARY: This notice announces the availability of NUREG–1335, "Individual Plant Examination: Submittal Guidance," and initiation of the Individual Plant Examination (IPE) process. In accordance with Generic Letter No. 88–20, licensees are requested to submit within 60 days of this notice, their proposed programs for completing their IPEs. The proposed programs should be submitted to the U.S. Nuclear Regulatory Commission, Document Control Desk, Washington, DC 20555 and should:

1. Identify the method and approach selected for performing the IPE,
2. Describe the method to be used, if it has not been previously submitted for staff review (the description may be referenced), and
3. Identify the milestones and schedules for performing the IPE and submitting the results to the NRC.

A copy of the IPE submittal guidance (NUREG–1335) is available for inspection and/or copying in the NRC Public Document Room, 2120 L Street NW., Lower Level of the Gelman Building, Washington, DC.

FOR FURTHER INFORMATION CONTACT: John H. Flack, Office of Nuclear Regularory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 492–3979.

Dated in Rockville, Maryland this 28th day of August, 1989.

For the Nuclear Regulatory Commission.

R. Wayne Houston,

Director, Division of Safety Issue Resolution, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–M

[Docket No. 030–07099]

The Applied Radiant Energy Corp.; Issuance of Director's Decision Under 10 CFR Section 2.206

[License No. 45–11406–01]

Notice is hereby given that the Director, Office of Nuclear Material Safety and Safeguards, has taken action with regard to a Petition for action under 10 CFR 2.206 received from Ms. Kristen Albrecht, Research Coordinator, National Coalition to Stop Food Irradiation, dated March 23, 1989, with respect to The Applied Radiant Energy Corporation (ARECO). The Petitioner requested that a proceeding be instituted to suspend the use of cesium-137 sealed sources at the ARECO facility.

The Director of the Office of Nuclear Material Safety and Safeguards has determined to deny the Petition. The reasons for this denial are explained in the "Director's Decision under 10 CFR 2.206," (DD–89–6) which is available for public inspection in the Commission's Public Document Room, 2120 L Street (Lower Level), NW., Washington, DC 20555. A copy of this decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR Section 2.206(c) of the Commission's regulations. As provided by this regulation, the Decision will constitute the final action of the Commission twenty-five (25) days after the date of issuance of the decision unless the Commission on its own motion institutes a review of the decision within that time.

Dated at Rockville, Maryland this 24th day of August, 1989.

For the Nuclear Regulatory Commission.

Guy A. Arlotto,

Deputy Director, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–M

[Docket No. 50–353]

Limerick Generating Station, Unit No. 2 Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Facility Operating License No. NPF–85 to the Philadelphia Electric Company, (the licensee) which authorizes operation of the Limerick Generating Station, Unit No. 2 (the facility), by Philadelphia Electric Company at reactor core power levels of 3293 megawatts thermal in accordance with the provisions of the License, the Technical Specifications and the Environmental Protection Plan.

The Limerick Generating Station, Unit No. 2, is a boiling water nuclear reactor located on the licensee's site in Montgomery and Chester Counties, Pennsylvania on the banks of the Schuylkill River approximately 1.7 miles southeast of the city limits of Pottstown, Pennsylvania and 21 miles northwest of the city limits of Philadelphia, Pennsylvania.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the License. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the **Federal Register** on August 21, 1981 (46 FR 42557 through 42558).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the exemptions included in this license will have no significant impact on the environment (54 FR 15851), (54 FR 24607) and (54 FR 33298).

For Further details in respect to this action, see (1) Facility Operating License NPF-85 complete with Technical Specifications and the Environmental Protection Plan; (2) the final report of the Advisory Committee on Reactor Safeguards, dated May 11, 1989; (3) the Commission's Safety Evaluation Report, dated August 1983 (NUREG-0991), Supplements 1 through 9; (4) the Final Safety Analysis Report and Amendments thereto; (5) the Environmental Report and supplements thereto; (6) the Final Environmental Statement dated April 1984 (NUREG-0974); (7) the Atomic Safety and Licensing Board Decision, LBP–85–25, dated July 22, 1985; (8) the Commission's Order dated July 7, 1989, and (9) the Commission's Memorandum and Order dated August 25, 1989.

These items are available for public inspection at the Commission's Public Document Room, 2120 L Street (Lower Level), NW., Washington, DC 20555, and at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania, 19464. A copy of Facility Operating License NPF–85 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II. Copies of the Safety Evaluation Report and its Supplements 1 through 9 (NUREG–0991) and the Final Environmental Statement (NUREG–0974) may be purchased through the U.S. Government Printing Office by calling (202) 275–2060 or by writing to the U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies may also be purchased from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Rockville, Maryland, this 25th day of August 1989.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

FR Doc. 89–20647 Filed 8–31–89; 8:45 am]

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Information Collection for OMB Review

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) and 5 CFR part 1320, we are announcing submission of our request to OMB for approval to extend the OMB clearance on the "Applicant's Statement of Selective Service Registration Status" which Federal job applicants must complete for agencies prior to appointment. Unless extended, use of the statement must terminate on October 31, 1989. By law, 5 U.S.C. 3328, agencies may not appoint non-registrants. Since the law is permanent, executive agencies will have a continuing need to obtain and review the information applicants provide in the statements to determine whether they have registered. (The text of the statement is published in our regulations on the Selective Service registration requirement at 5 CFR part 300, subpart G.) For jobs at OPM, we estimate about 500 applicants complete the statement annually. At .02 hours per statement, the public reporting burden is 10 hours. Governmentwide, we estimate about 150,000 applicants complete the statement, for a total public reporting burden of 3,000 hours. For copies of the statement, call Grace W. Butler, on (202) 632–0259.

COMMENT DATE: Comments on this proposal should be received within 10 working days from the date of this publication.

ADDRESS: Send or deliver comments to—

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415.

and

Joseph Lackey, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3201, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor, (202) 653–9407.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

POSTAL RATE COMMISSION

[Docket No. A89–14; Order No. 841]

Flomot, Texas 79234 (G.D. Pope, Petitioner); Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued August 29, 1989.

Before Commissioners; Henry R. Folsom, Vice-Chairman; John W. Crutcher; W.H. "Trey" LeBlanc, III; Patti Birge Tyson.

Docket Number: A89–14

Name of Affected Post Office: Flomot, Texas 79234

Name(s) of Petitioner(s): G.D. Pope

Type of Determination: Consolidation

Date of Filing of Appeal Papers: August 24, 1989

Categories of Issues Apparently Raised:

1. Effect on postal services [39 U.S.C. 404(b)(2)(C)].
2. Effect on Postal Service employees [39 U.S.C. 404(b)(2)(B)].

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule [39 U.S.C. 404(b)(5)], the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioners. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission orders:

(A) The record in this appeal shall be filed on or before September 8, 1989.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

Appendix

August 14, 1989: Filing of petition.

August 29, 1989: Notice and order of filing of appeal.

September 18, 1989: Last day of filing of petitions to intervene [*see* 39 CFR 3001.111(b)].

September 28, 1989: Petitioners' participant statement or initial brief [*see* 39 CFR 3001.115(a) and (b)].

October 18, 1989: Postal service answering brief [*see* 39 CFR 3001.115(c)].

November 2, 1989: Petitioners' reply brief should petitioners choose to file one [*see* 39 CFR 3001.115(d)].

November 9, 1989: Deadline for motions by any party requesting oral argument. The Commission will schedule oral argument only when it is a necessary addition to the written filings [*see* 39 CFR 3001.116].

December 11, 1989: Expiration of 120-day decisional schedule [*see* 39 CFR 404(b)(5)].

Date of Filing of Appeal Papers: August 17, 1989

Categories of Issues Apparently Raised:

1. Effect on postal services [39 U.S.C. 404(b)(2)(C)]
2. Economic savings [39 U.S.C. 404(b)(2)(D)]

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule [39 U.S.C. 404(b)(5)], the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission orders:

(A) The record in this appeal shall be filed on or before September 1, 1989.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Charles L. Clapp,

Secretary.

DEPARTMENT OF STATE

[Public Notice CM–8/1301]

Secretary of State's Advisory Committee on Private International Law; Study Group on International Trade Documentation; Meeting

The Study Group on International Trade Documentation will hold its second meeting at 10:00 a.m. on Monday, September 18, 1989 in New York at the Fordham University School of Law, Faculty Reading Room, 140 West 62d Street, New York, NY. The Study Group carries out its functions as part of the Secretary of State's Advisory Committee on Private International Law.

The meeting agenda will include (a) possible U.S. positions on the scope and content of a proposed model law on international letters of credit to be prepared by the United Nations Commission on International Trade Law (UNCITRAL) and (b) a review of proposed final rules on guarantees to be issued by the International Chamber of Commerce.

The meeting will cover the impact of the proposed rules on letter of credit law in the United States, and will cover other issues for possible inclusion in a model national law such as non-documentary conditions, defenses, party autonomy and jurisdiction. The Study Group will take into account recent studies on Articles 5 of the Uniform Commerical Code.

Information on the UNCITRAL project and the proposed ICC rules are set forth in several Reports prepared by the UNCITRAL Secretariat on Stand-By Letters of Credit and Guarantees—United Nations Docs. A/CN.9/301, March 21, 1988; A/CN.9/WG.II/WP.63, September 16, 1988, and A/CN.9/316, December 12, 1988. Copies of the Reports and the proposed final uniform ICC Rules may be requested by writing Harold S. Burman at the Office of the Legal Adviser, L/PIL, Room 402, 2100 "K" Street NW., Washington DC 20037-7180, by FAX to (202) 632–5283, or by calling direct to (202) 653–9852.

Members of the general public may attend the meeting up to the capacity of the meeting room. As access to the meeting room is controlled, the office indicated above should be notified not later than Wednesday, September 13, 1989 of the name, affiliation, address and phone number of persons wishing to attend. For additional information, please contact the office indicated above.

Peter H. Pfund,

Assistant Legal Adviser for Private International Law and Vice-Chairman, Secretary of State's Advisory Committee on Private International Law.

BILLING CODE 4710-08-M

DEPARTMENT OF TRANSPORTATION

Notice of Application for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended August 25, 1989

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each aplication. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 46459

Date filed: August 21, 1989.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 18, 1989.

Description:

Joint Application of Midway Airlines, Inc., Eastern Air Lines, Inc., and Continental Airlines, Inc. request the Department to approve, pursuant to section 401(a) and 401(h) of the Act, and Subpart Q of the Regulations requests (a) the amendment of two route certicates of Eastern and Continental so as to delete their Philadephia-Toronto/Montreal nonstop authority and (b) the transfer of such foreign route authority to an new certificate issued in the name of "Midway Airlines, Inc."

Docket No. 46463

Date Filed: August 23, 1989

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 1, 1989.

Description:

Application of Continental Airlines, Inc., pursuant to Order 89–8–8, requests a certificate of public convenience and necessity to provide scheduled foreign air transportation of persons, property and mail between Honolulu, Hawaii, on the one hand, and Tokyo, Japan on the other.

Docket No. 46466

Date Filed: August 24, 1989.

Due Date for Answers, Conforming Applications, or Motions to Modify Scope: September 1, 1989.

Description:

Application of Hawaiian Airlines, Inc. pursuant to Order 89–8–8, requests a certificate of public convenience and necessity to authorize non-stop scheduled foreign air transportation of persons, property and mail between Honolulu, Hawaii and Nagoya, Japan.

Docket No. 46463

Date Filed: August 25, 1989

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 1, 1989.

Description:

Application of Trans World Airlines, Inc. pursuant to Order 89–8–8 and Section 401 of the Act applies for a certificate of public convenience and necessity to permit TWA to provide air transportation services between Honolulu, Hawaii, on the one hand, and Tokyo-Japan, on the other.

Docket No. 46266

Date Filed: August 21, 1989

Due Date for Answers, Conforming Applications, or Motions to Modify Scope: September 18, 1989.

Description:

Fourth Amended Application of Servicios De Transportes Aereos Fueguinos, S. A., pursuant to Section 402 and the Act and Subpart Q of the Regulations requests that it be granted a foreign air carrier permit.

Docket No. 46472

Date Filed: August 25, 1989

Due Date for Answers, Conforming Applications, or Motion of Modify Scope: September 22, 1989.

Description:

Application of USAir, Inc. pursuant to section 401 of the Act and Subpart Q of the Act applies for a certificate of public convenience and necessity so as to authorize nonstop air service between Baltimore/Washington, on the one hand, and Ottawa, Ontario, and Montreal, Quebec, Canada, on the other hand.

Docket No. 45390

Due Date for Answers, Conforming Applications, or Motions to Modify Scope: September 19, 1989.

Description:

Amendment No. 1 to the Application of Alaska Airlines, Inc., pursuant to section 401 of the Act and Subpart Q of the Regulations requests that it be issued a certificate of public convenience and necessity authorizing Alaska to engage in scheduled foreign air transportation betwen Anchorage and Nome, Alaska and Magadan, Khabarovsk and Provideniya, U.S.S.R.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

[FR Doc. 89–20642 Filed 8–31–89; 8:45 am]

BILLING CODE 4910-62-M

Federal Aviation Administration

Life Preservers; Availability of Technical Standard

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability of technical standard order (TSO) and request for comments.

SUMMARY: The draft TSO–C13f prescribes the minimum performance standards that life preservers must meet in order to be identified with the TSO marking "TSO–C13f."

DATE: Comments must identify the TSO file number and be received on or before October 30, 1989.

ADDRESS: Send all comments on the proposed technical standard order to: Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service, File No. TSO–C13f, Federal Aviation Administration, Room 335, 800 Independence Avenue, SW., Washington, DC 20591

OR DELIVER COMMENTS TO: Federal Aviation Administration, Room 335, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267–9546.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interest persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they may desire. Communications should identify the TSO file number and be submitted to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director of the Aircraft Certification Service before issuing the final TSO.

Background

TSO–C13f is essentially identical to TSO–C13e except for the establishment of the new infant-small child category for life preservers and the deletion of the current infant category. The infant-small child category life preserver is for use by persons weighing up to 35 pounds and must prevent contact of the wearer's upper torso (i.e., from the waist up) with the water. For the establishment of the new life preserver category, changes are made in paragraph (b)(2) of the TSO and in the following paragraphs of Appendix 1, "Federal Aviation Administration Standard for Life Preservers," of the TSO: Paragraphs 2, 4.1.4.1, 4.1.4.3, 4.1.5, 4.1.8, 4.19, 4.1.10, 4.1.11, 4.1.12.2, 4.1.12,3, 4.2.2, and 5.7. Paragraph (d), Previously Approved Equipment, is revised to incorporate a change previously announced in the March 3, 1988, **Federal Register**. An editorial change is made in paragraph (e)(2) of the TSO.

How To Obtain Copies

A copy of the proposed draft TSO may be obtained by contacting the person under "For Further Information Contact." Federal Test Method Standard No. 191A may be examined at any FAA Aircraft Certification Office, and may be obtained (or purchased) from the General Services Administration, Business Service Center, Region 3, 7th and D Streets, SW., Washington, DC 20407.

Issued in Washington, DC, on August 28, 1989.

John K. McGrath,

Acting Manager, Aircraft Engineering Division Aircraft Certification Service.

[FR Doc. 89–20620 Filed 8–31–89; 8:45 am]

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket No. IP 88–04, Notice 2]

Chrysler Corp., Withdrawal of Petition for Determination of Inconsequential Noncompliance

On October 26, 1988, Chrysler Corporation of Detroit, Michigan, petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.100, Federal Motor Vehicle Safety Standard No. 100, "Controls and Displays." Chrysler had failed to provide horn symbols on more than 120,000 1988 Plymouth Horizon and Dodge Omni passenger cars. The basis of the petition was that the noncompliance was inconsequential as it relates to motor vehicle safety.

Notice of receipt of the petition was published on December 14, 1988, and an opportunity afforded for comment (53 FR 50348). Subsequently, Chrysler informed the agency that it would perform notification and remedial action by notifying all owners of the affected vehicles of the horn location, and urge that the notification be placed in the operator's manual for reference by future drivers. It asked NHTSA to "void" its inconsequentiality petition. NHTSA interprets this as a request for withdrawal of the petition, and therefore the agency will take no further action on it.

Authority: 15 U.S.C. 1417; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: August 29, 1989.

Barry Felrice,

Associate Administrator for Rulemaking.

[FR Doc. 89–20601 Filed 8–31–89; 8:45 am]

BILLING CODE 4910-59-M

[Docket No. EX89–4; Notice 1]

Isis Imports Ltd.; Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

Isis Imports, Ltd., of San Francisco, Calif., has petitioned for a temporary exemption from the passive restraint requirements of Motor Vehicle Safety Standard No. 208 *Occupant Restraint Systems*. The basis of the petition is that compliance would cause substantial economic hardship.

This notice of receipt of the petition is published in accordance with the regulations of the National Highway Traffic Safety Administration (49 CFR part 555) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

The brand of motor vehicle for which exemption is requested is the Morgan open car, or convertible. The British manufacturer of the Morgan has not offered its vehicle for sale in the United States since the early days of the Federal motor vehicle safety standards. In recent years, however, a small number of Morgan cars have been sold in the United States by Isis Imports. They differ from their British counterparts, not only in modifications necessary for compliance with the Federal motor vehicle safety standards, but also in their engines, which are propane fueled. Isis imports as motor vehicle equipment the individual components of the Morgan other than the engine, assembles them in the United States, adds the propane engine, and as the manufacturer of the vehicle, certifies its conformance to all applicable Federal safety and bumper standards. This has been a long-standing practice, and acceptable to NHTSA. In contrast to this is the practice of concern to NHTSA (see 54 FR 17775) in which all parts necessary to the vehicle, including its engine, are imported separately as motor vehicle equipment for subsequent assembly, in an attempt to avoid importation bond and NHTSA compliance procedures applicable to fully assembled nonconforming motor vehicles. The vehicle assembled by Isis in the U.S. is deemed sufficiently different from the one produced by Morgan in Britain that Isis may be regarded as its manufacturer, not its converter, even though the brand names are the same.

Isis assembled 11 Morgans for sale in the U.S. in the 12-month period preceding the filing of its petition. It argues that compliance with the passive restraint requirements of Standard No. 208 will cause it substantial economic hardship, and that it has in good faith attempted to comply with the standard. It asks for a 3-year exemption from the requirements, during which time it will continue to provide protection through its current three-point lap-shoulder belt system.

Preliminary, NHTSA notes that the passive restraint requirements have become effective for 100% of passenger car production, as of September 1, 1989, through a 3-year phase-in period during which convertibles such as petitioner's car, were exempted from compliance. On March 30, 1987, the agency published a notice announcing that it had reexamined the question of automatic restraint requirements for convertibles, and that it had concluded that it was reasonable and practicable for convertibles to meet these requirements as of September 1, 1989 (52 FR 10122). Two comments for reconsideration of the requirement were filed, one by Isis. It commented that the necessary automatic restraint components would not be available through its normal commercial channels until a considerable period of time after the major manufacturers' vehicles were equipped with automatic restraints. The agency denied these petitions on April

27, 1988 (53 FR 15087), on the basis that insufficient evidence had been submitted to show that automatic restraint systems could not be installed in vehicles that were not originally equipped with such systems. The denial was published approximately 16 months before the effective date of September 1, 1989.

In the 15 months since the denial, Isis has pursued several avenues of compliance, discussed in greater detail in its petition. Its initial interest was acquisition of an air bag system, but it found insufficient information available in the U.S. as to whether Chrysler's system would be suitable for its car. Because NHTSA's notice of denial had mentioned the automatic restraint system on Alfa Romeo convertibles as a viable and practicable method of compliance, Morgan on behalf of Isis contacted Autoliv, "U.K. agents for the Electrolux 2-point motorized belt system used in the Alfa." Although Autoliv submitted a proposal for installation of the Alfa system, it expressed reservations about the space available for its installation and the maintenance of rail form and reliability with vehicle movement over uneven surfaces. Morgan had contacted the Motor Industry Research Association (MIRA), which submitted a proposal late in March 1989, for development of an airbag system. In July 1989 the development costs of such a system were judged too high to be feasible, and MIRA's efforts then turned towards an automatic belt restraint system. Petitioner believes it can financially meet the MIRA development costs spread over a 3-year period, whereas a more immediate compliance (18 months) through the Autoliv system could not be amortized through a retail price increase in a volume of 11 cars without creating substantial financial hardship. Petitioner had a net loss exceeding $63,000 in 1988, and a cumulative net loss exceeding $60,000 for its last four tax years.

New car sales generate 90% of the petitioner's income, so that a denial of the petition would force it "to cease doing business". Sales of spare parts and service would be inadequate to fund development of a passive restraint system without new car sales. Isis argues that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act, because its vehicles contribute to the alternative fuel industry. Continued availability of the Morgan will help to maintain the existing diversity of motor vehicles in the United States. The small number of vehicles likely to be covered by the exemption, and the limited use that is made of them as second or third vehicles will have an immaterial effect upon motor vehicle safety.

Interested persons are invited to comment on the petition of Isis described above. Comments should refer to the docket number and be submitted to Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The petition and supporting materials, and all comments received, are available for examination in the docket both before and after the closing date. Comments received after the closing date will be considered to the extent practicable. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: October 2, 1989.

Authority: 15 U.S.C. 1410; delegations of authority at 49 CFR 1.50 and 501.8

Issued on: August 25, 1989.

Ralph J. Hitchcock,

Acting Associate Administrator for Rulemaking.

[FR Doc. 89–20602 Filed 8–31–89; 8:45 am]

BILLING CODE 4910-59-M

Urban Mass Transportation Administration

Intent To Prepare an Environmental Impact Statement for South Oak Cliff Corridor Transit Improvements in Dallas, TX

AGENCY: Urban Mass Transportation Administration, USDOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Urban Mass Transportation Administration (UMTA) and Dallas Area Rapid Transit (DART) are undertaking the preparation of an Environmental Impact Statement (EIS) for transit improvements in the South Oak Cliff Corridor of Dallas. The EIS is being prepared in conformance with 40 CFR Parts 1500–1508, Council on Environmental Quality, *Regulations for Implementing the Procedural Requirements of the National Environmental Policy Act of 1969 (as amended);* and 49 CFR Part 622, Urban Mass Transportation Administration, *Environmental Impact and Related Procedures.* In addition, in conformance with the Urban Mass Transportation Act and UMTA policy, the Draft EIS will be prepared in conjunction with an Alternatives Analysis, and the Final EIS in conjunction with Preliminary Engineering.

FOR FURTHER INFORMATION CONTACT:

Ms. Peggy Crist, UMTA Region VI, 819 Taylor Street, Suite 9A–32, Fort Worth, Texas 76102; telephone (817) 334–3787,

or

Mr. Doug Allen, Dallas Area Rapid Transit, 601 Pacific Avenue, Dallas, Texas 75202; telephone (214) 658–6297

SUPPLEMENTARY INFORMATION:

Scoping

Members of the public and affected Federal, State of Texas, and local agencies are invited to comment on all aspects of the study scope. Comments on the appropriateness of the alternatives and impact issues listed in this notice are encouraged. Specific suggestions on additional alternatives to be examined and issues to be addressed are welcome and will be given serious consideration in developing the final study scope.

Additional information on the EIS process, alternatives, and environmental impact issues to be addressed by the study is contained in a "Scoping Information" document. Copies have been sent to affected Federal, State and local government agencies and interested parties on record, and are available from the DART contact listed above.

Scoping meetings will be held on the dates, times, and places indicated below.

Day/date/time and location:

1. Monday, September 18, 1989, 7:00 p.m.—Rodger Q. Mills Elementary School Auditorium, 1515 Lynn Haven
2. Tuesday, September 19, 1989, 7:00 p.m.—B.F. Darrell Intermediate School, 4730 S. Lancaster Road
3. Thursday, September 21, 1989, 3:00 p.m.—DART Board Room, 7th Floor, 601 Pacific Avenue
4. Monday, September 25, 1989, 6:30 p.m.—Sears Community Room, 1409 S. Lamar Street

These meetings are not formal public hearings. Public hearings will be held after the Draft EIS is completed. DART staff will be present to describe project alternatives, answer questions and receive comments.

Scoping comments may be made either orally at the scoping meetings or in writing up to ten (10) days after the last meeting. General comments are welcome at any time throughout the study.

BEST COPY AVAILABLE

Statement of the Problem

Within the South Oak Cliff Corridor, local bus service on surface streets is the only transit service currently available for a population that:

- Is heavily dependent on transit. In the South Oak Cliff Corridor, there is greater use per capita of the existing DART bus system than in any other corridor in the City of Dallas.
- Has a low number of nearby job opportunities relative to the City of Dallas as a whole, and therefore South Oak Cliff workers travel farther to work than the average Dallas worker.
- Must use congested Trinity River crossings and congested Dallas Central Business District (CBD) streets and highways to reach their jobs and other attractions in a majority of cases.

Improved transit services will reduce travel times and thus increase the availability of opportunities for South Oak Cliff residents elsewhere in the DART Service Area, including job, education, medical, shopping, and cultural opportunities. Improved transit service will also provide opportunities for economic development in the Corrdior.

Corridor Description

The South Oak Cliff Corridor is a major travel corridor entirely within the Dallas city limits. The Corridor encompasses the Dallas CBD and that portion of southern Dallas bounded by U.S. 67 (R.L. Thornton Freeway and Marvn D. Love Freeway) on the west, the Dallas CBD on the north, I–45 (Julius Schepps Freeway) on the east, and the DART Service Area boundary which is generally along I–635 (Lyndon B. Johnson Freeway), on the south.

Linear public utility and railroad rights-of-way passing through the Corridor provide opportunities for new transit guideway without the high cost of tunneling or the disruption of assembling a new right-of-way in an urbanized area.

Alternatives

Transportation alternatives proposed for consideration in the Corridor are as follows:

- *No-Build.* Maintenance of transit service at levels commensurate with growth in the Corridor, including implementation of already programmed transportation improvements.
- *Transportation System Management (TSM) Alternative.* Enhanced bus service and facilities improvements without investing in a new fixed guideway. Improvements include rationalization of bus routes and frequencies, high occupancy vehicle (HOV) lanes on existing streets, signal timing improvements, bus park-and-ride and transfer centers and other low cost bus improvements.
- *Light Rail Transit (LRT) Alternative.* Standard light rail transit (LRT) with grade separations where warranted, stations with rider amenities, and standard 150–180 passenger capacity vehicles.

LRT Alignment Alternatives

Various DART LRT alignment studies during 1987 and 1988 suggest that the analysis should focus outside the Dallas CBD on an alignment that leaves the Dallas Railroad Right-of-Way District near I–30 (R.L. Thornton Freeway) and continues southeast along the Atchison, Topeka & Santa Fe Railroad Company (ATSF RR) City Branch right-of-way. This alignment then curves southwest and crosses the Trinity River adjacent to the ATSF RR right-of-way. South of the Trinity River, the alignment turns south off the ATSF RR right-of-way, and follows a high-tension power line right-of-way to Illinois Avenue. The alignment parallels Denley Drive, and then crosses Illinois Avenue and runs along the east side of Lancaster Road; near Ledbetter Drive it crosses to the west side of Lancaster Road and ends at Camp Wisdom Road (called Simpson Stuart Road on the east side of Lancaster Road).

This alignment is basically the alignment shown in DART's August 1986 Service Plan. It also reflects a preferred Trinity River crossing (Service Plan crossing) that was selected by the DART Board on September 8, 1987 following a 1987 Trinity River crossing refinement study and public hearings. It reflects a preferred alignment (East Lancaster) south of Illinois Avenue that was selected by the DART Board on May 10, 1988 following a 1988 study of an alignment south of Illinois Avenue. DART will reevaluate this alignment in the EIS.

Within the Dallas CBD, the 1989 System Plan suggests that the solution should focus on a surface Transitway Mall along Pacific Avenue and Bryan Street with improved pedestrian spaces and maintenance of necessary local building access for parking and deliveries. DART proposes to further evaluate this alignment in the EIS, as well as a surface treatment along Griffin Street to Elm Street to Harwood Street to Bryan Street. The Pacific/Bryan alignment crosses R.L. Thornton Freeway at the ATSF RR City Branch bridge and bends west to enter the railroad right-of-way behind Union Station. It then turns onto Pacific Avenue within the West End Historic District. It turns onto Bryan Street at its intersection with Pacific Avenue. This segment is generally at grade. For the South Oak Cliff AA/DEIS, the project ends in the vicinity of the North Central Expressway. DART has future plans to connect a locally funded North Central Corridor rapid transit line to the Transitway Mall at this point.

The Griffin/Elm/Harwood/Bryan alternative crosses R.L. Thornton Freeway just south of Griffin Street and bends north to follow Griffin Street. The number of traffic lanes on Griffin would be reduced to accommodate the transit tracks.

The alignment turns east at Elm Street. It continues on Elm Street as a Transitway Mall. At Harwood Street the alignment turns north and follows one side of the Harwood Street right-of-way. The alignment then turns east onto Bryan Street and continues as a Transitway Mall. It ends in the vicinity of the North Central Expressway where it would connect to the locally funded North Central Corridor transit line.

Comments are welcome and encouraged on the appropriateness of the alternatives listed above. Specific suggestions for additional alignment alternatives are also encouraged. All comments and suggestions will be given serious consideration in the compilation of a final set of alternatives for analysis.

Potential Impacts for Analysis

The potential impact issues proposed for analysis are:

- Transportation service changes, including transit cost, service, and patronage changes, and financial implications; the effect on traffic movement and railroad operations.
- Community impacts, including land use changes and zoning compatibility, neighborhood disruption, local and regional economic change, aesthetics, and utility relocation.
- Cultural resource impacts, including effects on historic, archeological, and park resources.
- Natural resource impacts, including air quality, noise and vibration, removal of preexisting hazardous waste, and effects on water resources and quality, natural features, and ecosystems.

The proposed impact assessment and its evaluation criteria will take into account both positive and negative impacts, direct and indirect impacts, short-term (construction) and long-term impacts, and site-specific and corridor-wide impacts. Evaluation criteria will be consistent with the applicable Federal, State of Texas, and local standards, criteria, regulations, and policies. Mitigation measures will be explored for any adverse impacts that are identified as part of the analysis.

Comments are welcome and encouraged on the completeness of the list of issues to be addressed. Descriptions of site-specific issues also are encouraged. The planned on-going public involvement program also will provide numerous opportunities for the presentation of additional site-specific issues as the alternatives are detailed and their analysis progresses.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Investment Policy Advisory Committee Services Policy Advisory Committee; Meetings and Determination of Closing of Meetings

The meetings of the Investment Policy Advisory Committee to be held September 13, 1989 from 7:45 a.m. to 9:00 a.m., in Geneva, Switzerland, the Services Policy Advisory Committee to be held September 25, 1989 from 9:30 a.m. to 11:30 a.m., in Washington, DC, will include the development, review and discussion of current issues which influence the trade policy of the United States. Pursuant to Section 2155(f)(2) of Title 19 of the United States Code, I have determined that these meetings will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions.

Additional information can be obtained by contacting Yvonne Beeler, Office of Private Sector Liaison, Office of the United States Trade Representative, Executive Office of the President, Washington, DC 20506.

Carla A. Hills,

United States Trade Representative.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 169
Friday, September 1, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION:

NOTICE OF AGENCY MEETING

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, September 5, 1989, to consider a memorandum and resolution proposing the adoption of final amendments to part 327 of the Corporation's rules and regulations, entitled "Assessments," which amendments, in response to the requirements of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, would: (1) Extend the Corporation's assessment procedures to cover savings associations, and (2) provide a mechanism for funding the Financing Corporation ("FICO") through the end of 1989.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation at (202) 898–3813.

Dated: August 29, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

RAILROAD RETIREMENT BOARD

Notice of Public Meeting

Notice is hereby given that the Railroad Retirement Board will hold a meeting on September 7, 1989, 9:00 a.m., at the Board's meeting room on the 8th floor of its headquarters building, 844 North Rush Street, Chicago, Illinois, 60611. The agenda for this meeting follows:

Portion Open to the Public

(1) Moving Expense Reimbursement.

(2) Regulations—Parts 202 and 301. Employers Under the Railroad Retirement Act and Railroad Unemployment Insurance Act.

(3) Regulations—Part 203, Employees Under the Act.

(4) Regulations—Part 212, Military Service.

(5) Regulations—Part 216, Eligibility for an Annuity.

(6) Regulations—Part 255, Recovery of Overpayments.

Portion Closed to the Public

(A) Appeal from Referee's Denial of Disability Annuity, Kenneth R. Finnission.

(B) Appeal of Nonwaiver of Overpayment, Charles Motkowski.

The person to contact for more information is Beatrice Ezerski, Secretary to the Board, COM No. 312–751–4920, FTS No. 386–4920.

Dated: August 29, 1989.

Beatrice Ezerski,

Secretary to the Board.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of September 5, 1989.

A closed meeting will be held on Wednesday, September 6, 1989, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (4), (8), (9)(i), and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Wednesday, September 6, 1989, at 2:30 p.m., will be:

Regulatory matter regarding financial institution.

Settlement of administrative proceedings of an enforcement nature.

Institution of injunctive actions.

Settlement of injunctive action.

Institution of administrative proceedings of an enforcement nature.

Discussion of enforcement matter.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Daniel Hirsch at (202) 272–2100.

Dated: August 29, 1989.

Shirley E. Hollis,

Assistant Secretary.

Part II

Department of Health and Human Services

Health Care Financing Administration

42 CFR Part 412

Medicare Program; Changes to the Inpatient Hospital Prospective Payment System for Fiscal Year 1990 Rates; Final Rule

---

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 412

[BPD-630-F]

RIN 0938-AE02

Medicare Program; Changes to the Inpatient Hospital Prospective Payment System and Fiscal Year 1990 Rates

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: We are revising the Medicare inpatient hospital prospective payment system to implement necessary changes arising from legislation and our continuing experience with the system. In addition, in the addendum to this final rule, we describe changes in the amounts and factors necessary to determine prospective payment rates for Medicare inpatient hospital services. In general, these changes are applicable to discharges occurring on or after October 1, 1989. We also set forth the rate-of-increase limits for hospitals and hospital units excluded from the prospective payment system.

EFFECTIVE DATE: This final rule is effective on October 1, 1989, except for 42 CFR 412.116, which is effective September 1, 1989.

FOR FURTHER INFORMATION CONTACT:

John Eppinger—Cancer Hospitals (301) 966–4516.

Linda McKenna—Interim Payment for Usually Long Lengths of Stay (301) 966–4530.

Barbara Wynn—All Other Issues (301) 966–4529.

ADDRESSES: To obtain individual copies of this document, contact the following:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

The charge for individual copies is $1.50 for each issue or for each group of pages as actually bound, payable by check or money order to the Superintendent of Documents.

SUPPLEMENTARY INFORMATION:

I. Background

A. Summary

Under section 1886(d) of the Social Security Act (the Act), a system of payment for acute care inpatient hospital stays under Medicare Part A (Hospital Insurance) based on prospectively-set rates was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each hospital discharge. All discharges are classified according to a list of diagnosis-related groups (DRGs). The regulations governing the inpatient hospital prospective payment system are located in 42 CFR part 412.

B. Summary of the Provisions of the Proposed Rule

On May 8, 1989, we published a proposed rule (54 FR 19636) which set forth changes to the prospective payment system that would be effective for the seventh year of operation of that system, that is, beginning on October 1, 1989. Following is a summary of the major changes we proposed to make to the system:

- As required by section 1886(d)(4)(C) of the Act, we proposed to adjust the DRG classifications and weighting factors for Federal fiscal year (FY) 1990.
- We proposed to update the wage index by basing it entirely on 1984 wage data. In addition, we proposed to make adjustments to the wage data to reflect the provisions of section 1886(d)(8)(C) of the Act, as enacted by section 8403(a) of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. 100–647).
- We discussed several current provisions of the regulations in 42 CFR part 412 and set forth certain proposed changes concerning—
  - —Annual publication of prospective payment rates;
  - —Payment for burn outlier cases;
  - —Payments to sole community hospitals;
  - —Beneficiary access to care in rural areas;
  - —Payments to cancer hospitals;
  - —Rural referral center criteria;
  - —Payment for disproportionate share hospitals; and
  - —Payment for the indirect costs of medical education.
- In the addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the FY 1990 prospective payment rates. We also proposed new target rate percentages for determining the rate-of-increase limits for FY 1990 for hospitals and hospital units excluded from the prospective payment system.
- As required by sections 1886(e)(4) and (e)(5) of the Act, in Appendix C of the proposed rule we provided our recommendation of the appropriate percentage change for FY 1990 in the—

—Large urban, other urban, and rural average standardized amounts for inpatient hospital services paid for under the prospective payment system; and

—Target rate-of-increase limits to the allowable operating costs of inpatient hospital services furnished by hospitals and hospital units excluded from the prospective payment system.

- In addition, the proposed rule discussed in detail the March 1, 1989 recommendations made by the Prospective Payment Assessment Commission (ProPAC). ProPAC is directed by section 1886(d)(4)(D) of the Act to make recommendations to the Secretary with respect to adjustments to the DRG classifications and weighting factors and to report to Congress with respect to its evaluation of any adjustments made by the Secretary.

ProPAC is also directed, by the provisions of sections 1886(e)(2) and (e)(3) of the Act, to make recommendations to the Secretary on the appropriate percentage change factor to be used in updating the average standardized amounts beginning with FY 1986 and thereafter. We printed ProPAC's report, which includes its recommendations, as appendix D to the proposed rule (54 FR 1975).

C. Number and Types of Public Comments

A total of 288 items of correspondence containing comments on the proposed rule were received timely. Approximately one-half of the letters we received were protesting the inappropriateness of the current DRG classification and weighting factors for electrophysiologic studies and automatic implantable cardioverter defibrillator implant procedures. Of the remaining letters, the main areas of concern addressed by the commenters were—

- The 1.35 percent reduction in the DRG weights to account for a portion of the increase in the case-mix index between FY 1986 and FY 1988;
- The proposal to base the wage index on 1984 data only; and
- The revisions made to the wage index for rural counties whose hospitals are deemed urban. The contents of the proposed rule, the public comments, and our responses to those comments are discussed throughout this document in the appropriate sections.

There are four general comments that we are responding to here rather than in the more issue-specific areas below.

Comment: We received one comment expressing concern that HCFA has made no provision for increased costs of care in hospitals and hospital units excluded from the prospective system resulting from the enactment of the catastrophic coverage provisions. The

commenter noted that there should be an adjustment to the target rate to cover increases in the cost per discharge resulting from this legislation.

Response: As we stated on the proposed rule (54 FR 19636), we made revisions to the regulations in the September 30, 1988 final rule to address changes resulting from enactment of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360). Those revisions included adjustments to the prospective payment system, and the rate of increase ceiling for hospitals and units excluded from the prospective payment system, to take into consideration the reduction in payments to hospitals by Medicare beneficiaries resulting from the elimination of the day limitation on Medicare inpatient hospital services (section 101 of Pub. L. 100–360). Although these changes were final, we allowed a 60-day period for public comment since the changes had not previously been published as proposed. We are developing a final rule that responds to the comments we received.

Comment: One commenter suggested that our proposed changes neglect to address the problems of rural hospitals.

Response: The financial viability of rural hospitals and ensuring access to health care by rural beneficiaries is a matter of highest concern at HCFA. It should be noted that in the proposed rule we strongly urged a higher update factor for rural hospitals (54 FR 19748). We also proposed to ease the requirements and streamline the review process for qualifying as a sole community hospital, as well as liberalizing the requirements for regaining sole community hospital status when a hospital has opted to give up that status (54 FR 19649). We also solicited comments as to how our policies could be changed or improved to assure "essential access" to health care. Finally, we noted in the proposed rule that we are studying long term refinements including the possibility of eliminating separate urban and rural payment rates and revising the payment methodology for sole community hospitals (54 FR 19651).

We believe that these regulatory revisions and the studies we are undertaking demonstrate our commitment to examining the problems of rural hospitals and making appropriate policy changes to the prospective payment system. We reiterate that we believe that changes in Medicare policy alone are not sufficient to assure essential access to rural health care. A viable and effective rural health policy must involve Federal, State and local governments, and private insurers.

Comment: We received one comment noting that the proposed rule did not address payments for capital expenditures. The commenter recommended that payment for capital be set at 100 percent for FY 1990.

Response: We are required by section 1886(g)(1)(A) of the Act to include payment for capital-related costs as part of the prospective payment system for cost reporting periods beginning on or after October 1, 1991. We plan to publish a notice of proposed rulemaking concerning this requirement, which would outline our proposals and request public comment, and to publish a final rule timely. With respect to capital payment for FY 1990, there is no provision in current law for a reduction in payments; however, the Department's budget proposal for FY 1990 contains a provision that would reduce payments for inpatient hospital capital-related costs by 25 percent.

Comment: One commenter was concerned that the proposed rule did not address the treatment of malpractice costs in FY 1990. HCFA has stated, in a HCFA ruling (HCFAR 89–1) issued on January 26, 1989, that the recent court rulings of Georgetown I and Georgetown II also apply to the treatment of Medicare malpractice costs. HCFAR 89–1 states that the cost of malpractice premiums will be included in base year costs to determine hospital-specific rates for the base period. HCFAR 89–1 also states that future costs of malpractice will be included in hospital administrative and general (A&G) costs. The current hospital cost reporting form 2552 still includes worksheet D–8, which calculates malpractice premiums based on a risk portion and an A&G portion. Since HCFA has stated this method is no longer applicable, the commenter believes that HCFA must detail the treatment of malpractice costs in FY 1990.

The commenter recommends that HCFA publish its policy on changes in the treatment of malpractice costs prior to the final rule on prospective payment system for FY 1990 and allow hospitals adequate time for comment.

Response: In *Bowen* v. *Georgetown University Hospital, et al.*, 57 U.S.L.W. 4057 (U.S. Dec. 12, 1989) (Georgetown I), the Court found that the Secretary was not authorized to issue a retroactively effective rule. It is HCFA's Ruling, in HCFAR 89–1, that the Court's decision in Georgetown I controls appeals challenging the 1979 malpractice rule or the 1986 malpractice rule for cost reporting periods beginning before May 1, 1986, provided that these appeals satisfy jurisdictional requirements and that the hospital did not accept the May 11, 1988 "HHS Settlement Offer—Medicare Malpractice Insurance Costs Litigation" or otherwise settle. Qualifying hospitals will be reimbursed for their malpractice insurance premiums under the utilization reimbursement method in effect prior to the 1979 or 1986 malpractice rules.

It is also HCFA's Ruling that the District of Columbia Circuit Court's decision in *Georgetown University Hospital, et al.* v. *Bowen*, Nos. 88–5028 and 88–5040 (D.C. Cir. Nov. 15, 1988) (Georgetown II) controls pending malpractice insurance cost reimbursement claims under the pre-1979 utilization method for a hospital that did not accept the May 11, 1988 "HHS Settlement Offer—Medicare Malpractice Insurance Costs Litigation." That is, for qualifying hospitals, application of the pre–1979 method to the hospital's malpractice premiums in its prospective payment system base year is applicable to its hospital-specific rate throughout the prospective payment system transition period.

Because Georgetown I affects only the Secretary's authority to issue retroactive rules, prospective application of the 1986 malpractice rule (51 FR 11142) for cost reporting periods beginning on or after May 1, 1986, is unaffected by the Court's decision. HCFAR 89–1 does not state, nor was it intended to imply, that the ruling applies to the prospective application of the 1986 rule. Therefore, the current hospital cost reporting forms properly incorporate the methodology to calculate reimbursement for malpractice premiums based on a risk portion and an administrative portion, as provided by the 1986 rule.

II. Changes to DRG Classifications and Weighting Factors

A. Background

Under the prospective payment system, we pay for inpatient hospital services on the basis of a rate per discharge that varies by the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case takes an individual hospital's payment rate per case and multiplies it by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG relative to the national average of resources used to treat all Medicare cases. Thus, cases in a DRG with a weight of 2.0 would, on average, require twice as many resources as the average Medicare case.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and weighting factors annually beginning with discharges occurring in FY 1988. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources. The changes to the DRG classification system and the proposed recalibration of the DRG weights for discharges occurring on or after October 1, 1989 are discussed below.

B. Reclassification of DRGs

1. General

Cases are classified into DRGs for payment under the prospective payment system based on the principal diagnosis, up to four additional diagnoses, and any procedures performed during the stay, as well as age, sex, and discharge status of the patient. The diagnostic and procedure information is expressed by the hospital using codes from the International Classification of Diseases, Ninth Edition, Clinical Modification (ICD–9–CM). The intermediary enters the information into its claims system and subjects it to a series of automated screens called the Medicare Code Editor (MCE). These screens are designed to identify cases that require further review before classification into a DRG can be accomplished.

After screening through the MCE and any further development of the claims, cases are classified by the GROUPER software program into the appropriate DRG. The GROUPER program was developed as a means of classifying each case into a DRG on the basis of the diagnosis and procedure codes and demographic information (that is, sex, age, and discharge status). It is used to classify past cases in order to measure relative hospital resource consumption to establish the DRG weights and to classify current cases for purposes of determining payment.

Currently, there are 477 DRGs in 23 major diagnostic categories (MDCs). Most MDCs are based on a particular organ system of the body (for example, MDC 6, Diseases and Disorders of the Digestive System); however, some MDCs are not constructed on this basis since they involve multiple organ systems (for example, MDC 22, Burns).

Principal diagnosis determines MDC assignment. Within most MDCs, cases are then divided into surgical DRGs (based on a surgical hierarchy that orders individual procedures or groups of procedures by resource intensity) and medical DRGs. Medical DRGs generally are differentiated on the basis of diagnosis, age, and presence or absence of complications or comorbidities (hereafter CC) only. Generally, GROUPER does not consider other procedures; that is, nonsurgical procedures or minor surgical procedures generally not done in an operating room are not listed as operating room (OR) procedures in the GROUPER decision tables. However, there are a few non-OR procedures that do affect DRG assignment for certain principal diagnoses, such as extracorporeal shock wave lithotripsy for patients with a principal diagnosis of urinary stones.

We proposed to make some changes to the DRG classification system on the basis of problems identified over the past year. These proposed changes and the comments we received concerning them as well as our responses are set forth below. In addition to comments related to each of the specific proposed DRG classification changes, we received some general comments, as follows:

Comment: One commenter indicated that HCFA should have made available to the public at the same time the proposed rule was published the proposed GROUPER and the maps used to change the FY 1988 diagnosis and procedure codes into their FY 1990 equivalents. The commenter would like this procedure to be followed in future years, also.

Response: Time does not permit us to make the proposed GROUPER available concurrent with proposed rule. We base our proposed changes on analysis of MEDPAR data received through December of the previous year in conjunction with medical consultation. Once the data are available, there is not sufficient time to perform the analysis, make the changes to the GROUPER, and then create a new GROUPER available for public purchase by the publication date of the proposed rule. Changes are not made to the GROUPER until shortly before publication of the final rule; that is, after all comments have been considered and further analysis has been made based on additional data received through June of the current year.

We believe it is possible for readers who have the current GROUPER and the MEDPAR data to develop the proposed GROUPER from the changes and methodology described in the proposed rule and to perform the review and confirm HCFA's projection, as the commenter desires. Thus, we believe that publishing the proposed GROUPER is not necessary to enable the public to comment on the significant issues related to DRG classification as set forth in the proposed rule.

With regard to the mapping of the FY 1988 cases into their FY 1990 equivalents, we do not as a matter of policy publish all the material because of the limited interest this material would have for the majority of readers and because of the voluminous amounts of information this would involve. However, this information is available to the public upon request. In addition, the MEDPAR file that was prepared for public release in conjunction with the proposed rule includes in each case its FY 1988 DRG and its proposed FY 1990 DRG assignments.

Comment: One vendor of computer software requested modifications to the GROUPER software. The commenter believe the GROUPER should indicate invalid procedure codes in addition to invalid principal diagnosis codes as a means of detecting mapping errors. In addition, the commenter stated that mapped codes are not usually submitted to a validation routine on the GROUPER or the MCE, and, therefore, a detection ability needs to be added.

Response: Mapping makes diagnosis and procedure codes that change in status (that is, new codes or codes that became obsolete or were revised) equivalent across GROUPER versions. Mapping is designed by a team of technical analysts, programmers, physicians, nurses, and medical records administrators. The GROUPER program does not judge the validity of a code; in mapping, the code is renamed so that the case is assigned to the proper DRG in each GROUPER version. Since both diagnosis and procedure codes and GROUPER logic may change annually, the GROUPER software must be redesigned each year based on patient care information.

The GROUPER overrides an invalid procedure or diagnosis code in many cases by ignoring the invalid code in favor of a coexisting valid code. This can be used to detect incorrect mapping even in an earlier GROUPER version.

The commenter's belief that mapped codes are not subjected to validation is incorrect. As part of reclassification and recalibration, we test the GROUPER, by analyzing a sample of MEDPAR cases that contain these mapped codes in order to make sure that the cases are being assigned to the intended DRG.

2. MDC 4: Diseases and Disorders of the Respiratory System

We have received a number of requests from hospitals and other organizations for the expansion of DRG 474 (Respiratory System Diagnosis with Tracheostomy) and DRG 475 (Respiratory System Diagnosis with Ventilator Support) to include principal diagnoses from any MDC when ventilator support is used. In addition, we have received reports of problems experienced by hospitals in the coding and billing of those cases in MDC 4 involving ventilator support.

Beginning with discharges occurring on or after October 1, 1987, cases with a principal diagnosis in MDC 4 and one of the tracheostomy procedure codes (31.1 (Temporary tracheostomy), 31.21 (Mediastinal tracheostomy), or 31.29 (Other permanent tracheostomy)) were assigned to the new DRG 474. Cases involving mechanical ventilation through endotracheal intubation were assigned to the medical DRG 475. DRG 475 included cases presenting a principal diagnosis assigned to MDC 4 and showing non-OR procedure codes 93.92 (Other mechanical assistance to respiration) and 96.04 (Insertion of endotracheal tube). Beginning with discharges occurring on or after October 1, 1988, the title for procedure code 93.92 was revised to "Other mechanical ventilation" and "Continuous positive airway pressure" was assigned a unique procedure code (93.90).

Currently, DRG 475 is assigned to cases with a respiratory system principal diagnosis when neither a temporary tracheostomy nor any operating room procedure is performed and both procedure code 96.04 and 93.92 or 93.90 are performed. The majority of cases involving surgery for respiratory diagnoses are routinely intubated endotracheally, if only on a prophylactic basis. This procedure is considered a part of the surgery and is not normally coded. Assuming that the hospital charges for the procedure, even when it is not coded, the weighting factors for surgical DRGs already account for the resources involved in intubating patients. Thus, DRG 475 was intended to account only for those cases for which there is no surgical procedure and the intubation will be likely to be of longer duration.

The American Association for Respiratory Care, the American College of Chest Physicians, the National Association of Medical Directors of Respiratory Care (NAMDRC), ProPAC, and numerous other commenters have expressed general support for the creation of DRGs 474 and 475. In addition, many commenters at that time encouraged the expansion of the DRGs to include patients with other than respiratory diagnoses. We stated that we would continue our research in this area, including analysis of superior means of identifying ventilator cases and ways to address this issue in postsurgical cases or for patients with nonrespiratory diagnoses.

We advised the medical community of our intent to target DRGs 474 and 475 for medical review by the Peer Review Organizations (PROs) to ensure that use of the diagnoses and procedures that result in assignment of cases to these DRGs was reasonable and appropriate. In fact, we were not aware of the extent of the problems experienced by hospitals until they were revealed by PRO review. In retrospect, we believe that we should have described in greater detail the situations in which these two new procedure-based DRGs would be assigned. In originally describing these DRGs, we did not reiterate that the necessary procedures had to be performed when the patient was an inpatient of the hospital submitting the bill.

Some hospital staffs believe that the GROUPER logic for DRGs 474 and 475 should be applied whenever prolonged ventilation is involved, regardless of where the intubation or tracheostomy was performed. This is a logical argument, since a hospital will very likely use as many resources in treating a ventilator patient who was intubated or received a tracheostomy in an ambulance or in another hospital's emergency room. Many hospitals requested a waiver of the rules governing billing and payment for inpatient and outpatient services under both parts A and B of Medicare. In the current situation, the stay in a second hospital will not be assigned DRG 474 or 475, respectively, since the procedures necessary for this assignment are not performed on an inpatient of that hospital and, thus, cannot be coded on the hospital's bill.

At least one of the situations that governed the development of these DRGs has changed since October 1987, and we proposed to revise DRG 475 to address the problems that hospitals have experienced with transfer and emergency room patients. As we stated above, procedure code 93.92 was revised beginning with discharges occurring on or after October 1, 1988 to "Other mechanical ventilation." More significant is the fact that continuous positive airway pressure was reclassified to its own code, 93.90, at that time. Since procedure code 93.92 now refers to other mechanical ventilation, we proposed to revise DRG 475 to remove the requirement of the coding of the insertion of an endotracheal tube. This would mean that cases would be assigned to DRG 475 when a ventilator patient with a principal diagnosis in MDC 4 is intubated elsewhere and no tracheostomy or operating room procedure is performed during the stay at the hospital. When a patient is admitted with an established tracheostomy, the receiving hospital would be paid under DRG 475 if the principal diagnosis is classified in MDC 4, the patient receives mechanical ventilation, and no operating room procedures were performed during the stay in the receiving hospital.

We recognize that ventilator cases in other MDCs tend to be more resource intensive than other cases within the same DRG. There is, however, no agreement as to the mechanism to be used in classifying them. Although NAMDRC has recommended that there be one ventilator DRG for all MDCs with a weight somewhere between that of DRGs 474 and 475, we are concerned that a single ventilator DRG for all MDCs may not be appropriate unless it is based upon an objective measure of the ventilator time involved, independent of the procedures performed.

Studies by the Yale DRG Refinement Project and by Health Systems International (HSI) under its contract with HCFA have both constructed models with DRGs for tracheostomies involving other than MDC 4 cases. We intend to analyze the impact these alternative models would have on the DRG classification system.

Comment: Several commenters expressed support for our proposal to remove the requirement that 96.04 (Insertion of endotracheal tube) must be coded with procedure code 93.92 (Other mechanical ventilation) for a case to be assigned to DRG 475 (Respiratory System Diagnosis with Ventilator Support). One commenter mentioned the need to evaluate whether the payment rate for DRG 475 is adequate for cases involving ventilator patients admitted with an established tracheostomy. However, ProPAC commented that its analysis indicated that the resource costs of the receiving hospital for patients transferred with a tracheostomy were similar to those for transfer cases involving mechanical ventilation without a tracheostomy.

Response: We will continue to monitor DRG 475 to evaluate the impact on the DRG of both removing the requirement that procedure code 96.04 be coded with procedure code 93.92 and of assigning patients admitted with an established tracheostomy to this DRG. However, we note that the information needed to assign those ventilator patients who were admitted with an established tracheostomy to a different DRG than ventilator patients who were intubated in an ambulance or at another hospital (that is, patients without a tracheostomy) is not available from the inpatient bill. This is because the procedures necessary to make this distinction were not performed during the hospital admission in question and, thus, cannot be coded on the hospital's bill. The bills for both sets of patients will show procedure code 93.92 only.

Comment: We received several comments concerning whether the length of time patients spend on a ventilator should be measured and taken into account in the DRG classification of ventilator patients. Several commenters expressed support for the modification of the existing ventilator procedure codes or development of new codes and DRGs that would reflect the length of ventilator time. However, other commenters opposed adding another digit to the ventilator procedure codes to identify the length of time spent on a ventilator in the belief that it would defeat the purpose of coding classification. That is, these commenters suggested that other data set fields should be used for furnishing this information because a disease classification system cannot provide details of treatment. One commenter suggested that if a length of time indicator is used, the length of time should be defined as the time period from the beginning of ventilation to the final cessation, regardless of any breaks for short periods of time.

Response: The ICD-9-CM Coordination and Maintenance Committee, which has the responsibility for maintaining and updating the ICD-9-CM codes, discussed this issue at its latest meeting, which was held August 10 and 11, 1989. A decision will be made on this issue before next year's ICD-9-CM coding changes are made. Interested parties are encouraged to submit their comments to the Committee at the address below before December 31, 1989.

Comment: Several commenters expressed their opinion that DRGs 474 and 475 should be expanded to include ventilator cases outside MDC 4 because ventilator cases in other MDCs tend to be more resource intensive than other cases in the same DRG. One commenter was concerned that the expansion of DRGs 474 and 475 might be delayed if it were linked to implementation of the recommendations of the Yale DRG Refinement Project.

Response: As indicated in the proposed rule (54 FR 19639), we recognize that ventilator cases in other MDCs tend to be more resource intensive than other cases within the same DRG and we intend to analyze the impact that alternative models for assigning ventilator cases would have on the DRG classification system. This was not, however, an analysis we could complete in time to consider changes in the classification of ventilator cases in FY 1990.

Although one alternative was developed as part of the Yale DRG Refinement Project, it could be implemented independently of the other DRG refinements recommended in the Yale study. Similarly, implementation of other DRG refinements recommended by the Yale study would not necessitate the adoption of the Yale model for ventilator cases should our analysis determine that a different model would be more appropriate.

Comment: One commenter incorrectly interpreted our proposed policy to mean that a ventilator patient who is transferred or intubated elsewhere would still be assigned to DRG 475 if a tracheostomy were performed at the receiving hospital.

Response: The proposed change addressed the situation where a patient in MDC 4 could not be assigned to a DRG 475 because only procedure code 93.92 (Other mechanical assistance ventilation) was shown on the bill. It does not affect the classification of patients in MDC 4 undergoing a tracheostomy at the receiving hospital since these patients would have one of the tracheostomy procedure codes shown on the bill and would continue to be assigned to DRG 474 as before.

As stated in the proposed rule, the receiving hospital would be paid under DRG 475 when a patient is transported with an established tracheostomy or was intubated elsewhere, the principal diagnosis is classified in MDC 4, the patient receives mechanical ventilation, and no operating procedures were performed during the stay in the receiving hospital. We included the criterion that no operating procedures be performed during the stay because patients on mechanical ventilation who receive an operating room procedure are not assigned to DRG 475. We did not intend to imply that those patients who received a temporary tracheostomy, which is a nonoperating room procedure, would also be assigned to DRG 475. Cases with a principal diagnosis in MDC 4 and one of the tracheostomy procedure codes (31.1, 31.21, or 31.29) will continue to be assigned to DRG 474. We also wish to clarify that cases with code 93.90 (Continuous positive airway pressure) will no longer be assigned to DRG 475 unless the patient also received 93.92 during the stay.

3. Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different DRG within the MDC to which the particular principal diagnosis is assigned. It is therefore necessary to have a decision rule by which these cases are assigned to a single DRG. The surgical hierarchy, an ordering of groups of procedures from most to least resource intensive, performs that function. Its application ensures that cases involving multiple surgical procedures are assigned to the DRG associated with the most resource-intensive procedure group.

Because the relative resource intensity of procedure groups can shift as a function of DRG reclassification and recalibration, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications, to determine if the ordering of procedures coincided with the intensity of resource utilization, as measured by the same billing data used to compute the DRG relative weights.

The surgical hierarchy is based upon procedure groups. Consequently, in many cases, hierarchy has an impact on more than one DRG. The methodology for determining the most resource-intensive procedure groups, therefore, involves weighting each DRG for frequency to determine the average resources for each procedure group. For example, assume procedure group A includes DRGs 1 and 2 and procedure group B includes DRGs 3, 4, and 5, and that the weighting factor for DRG 1 is higher than that for DRG 3, but the weights for DRGs 4 and 5 are higher than the weight for DRG 2. To determine the surgical hierarchy, we would weight the weighting factor of each DRG by frequency to determine average resource consumption for the group of procedures and order the procedure groups from that with the highest to that with the lowest average resource utilization, with the exception of "other (OR) procedures."

The "other OR procedures" group is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs regardless of the fact that the weighting factor for the DRG or DRGs in that procedure group may be higher than that for other procedure groups in the MDC. The "other OR procedures" group is a group of procedures that are least likely to be related to the diagnoses in the MDC but are occasionally performed on patients with these diagnosis. Therefore, these procedures should only be considered if no other procedure more closely related to the diagnoses in the MDC has been performed.

Based on the preliminary recalibration of the DRGs, we proposed to modify the surgical hierarchy as set forth below. As discussed below in section II.C. of this preamble, the final recalibrated weights are somewhat different from those proposed since they are based on more complete data. Consequently, we have further revised the hierarchy in this final rule as described below.

We proposed to revise the surgical hierarchy for MDC 5 (Diseases and Disorders of the Circulatory System) and MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue) as follows:

a. In MDC 5, we proposed to reorder Cardiac Pacemaker Replacement and/or Revision (DRGs 117 and 118) [1] above Vascular Procedures Except Major Reconstruction Without Pump (DRG 112).

b. In MDC 8, we proposed to reorder Biopsies (DRG 216) above Back and Neck Procedures (DRGs 214 and 215); and we proposed to reorder Arthroscopy (DRG 232) above Major Shoulder/Elbow Procedures or Other Upper Extremity Procedures With CC (DRG 223).

We received no comments concerning the proposed reordering within the surgical hierarchy of MDC 5 and we are making this change as proposed. We did, however, receive one comment on another issue concerning MDC 5 as well as two other comments, one on our proposed reordering of the surgical hierarchy of MDC 8 and one general comment.

Comment: One commenter noted that there were no changes in the number of cases shown on Tables 7A and 7B for DRGs that would be affected by a surgical hierarchy change. The commenter questioned whether the surgical hierarchy changes were reflected in the case counts and relative weights published in the proposed rule.

Response: The surgical hierarchy changes in the proposed rule are based on our preliminary recalibration of the DRG weights. We are not able to test the effects of the revisions and to reflect them in the proposed relative weights due to the unavailability of revised GROUPER software at the time of publication. Rather, in performing analysis of the surgical hierarchies, we simulate most major classification changes to approximate the placement of cases under the proposed reclassification and then recalibrate the weights. The weighting factor for each procedure group then serves as our best estimate of relative resource use for that procedure group. We test the proposed surgical hierarchy changes after the revised GROUPER is received and reflect the final changes to the surgical hierarchy in the DRG relative weights published in the final rule.

Comment: We received a number of comments questioning the appropriateness of the proposed reordering of DRG 216 above DRGs 214 and 215. The commenters believe that biopsies are less resource intensive than many of the procedures in DRGs 214 and 215.

Response: Although biopsy procedures may be less resource intensive than many of the surgical procedures in DRGs 214 and 215, we proposed the surgical hierarchy change because our data indicated cases requiring a biopsy are more resource intensive than cases in DRGs 214 and 215. Prior to making the surgical hierarchy change, the average standardized charges for cases in DRG 216 were $700 more than the average standardized charges for cases in DRGs 214 and 215. After reordering the surgical hierarchy, the difference increases to $1,245. We are making the surgical hierarchy change as proposed so that cases with multiple procedures will be assigned to the higher-weighted DRG; however, we will review the MDC 8 surgical hierarchy again next year.

Comment: We received two comments indicating that the change in the surgical hierarchy order for MDC 5 that was made in the September 30, 1988 final rule (53 FR 38485) and was effective October 1, 1988 has resulted in disputes between PROs and hospital medical records administrators as to the proper sequence for surgical procedures on the Medicare bill. This change was to reorder DRG 108 (Other Cardiothoracic or Vascular Procedures With Pump) above DRGs 106 and 107 (Coronary Bypass). The commenters requested that the surgical hierarchy change be reversed. We received two related comments expressing concern over the limited number of procedure codes that can be shown on the Medicare bill.

Response: The problem identified with DRGs 106 and 108 stems from the procedure code sequencing when more than three cardiac procedures are performed, including codes 36.10 through 36.19 (Coronary bypass graft). Although more than three procedures may be performed on the patient, only three may be reported on the bill and the DRG assignment and payment are based on the three reported procedures. For example, a patient may have had a coronary bypass graft, but the claim may show only code 37.61 (Pulsation balloon), code 37.21 (Cardiac catheterization), and code 39.61 (extracorporeal circulation). In this situation, the case would be assigned to the higher-weighted DRG 108 instead of DRG 106 or 107.

If there are a greater number of procedures performed than can be listed on the claim, our coding guidelines require that the procedure be reported based on the follow hierarchy:

—Procedures that relate to the principal diagnosis and that affect DRG assignment.
—Other procedures that affect DRG assignment.
—Other procedures which are listed in the ICD-9-CM (Volume 3, Procedures) between code numbers 01.01 and 86.99 which are performed in the operating room.

Based on the coding guidelines, we would normally expect to see the coronary bypass procedure coded on the claim. Although the ICD-9-CM lists code 39.61 as a "code also" peripheral procedure to the coronary bypass procedures, the GROUPER logic for DRGs 106 and 107 does not require the coding of the pump for DRG assignment. However, the FY 1989 surgical hierarchy change has created an incentive to leave the bypass procedure off the bill to allow room for 39.61 and other procedures that will result in the case being assigned to the higher-weighted DRG 108. This is a particular problem when a DRG software package is used that contains a resequencing function that will search for codes following the DRG logic trees found in the DRG Definitions Manual. Since the hierarchy change, when procedure codes entered by the hospital's medical records department include codes assigned to DRG 108, the programs will check for code 39.61 (Extracorporeal circulation) before assigning the case to a DRG ranked lower in the hierarchy. Frequently, the procedure codes that are assigned to DRG 108 are incidental to a coronary bypass procedure. In this regard, it is important for users of these packages to be aware of the capabilities of their system and ensure that the sequence of the procedures established by the medical records coder and the attesting physician is the sequence that is ultimately reported on the claim form.

---

[1] A single title combined with two DRG numbers is used to signify pairs, the first DRG of which is cases with CC and the second of which is cases without CC. If a third number is included, it represents cases of patients who are age 0–17.

We are aware of the difficulties that have developed in the coding and billing of these DRGs since the surgical hierarchy was changed. We are also concerned over the continued loss of data on the incidence of coronary bypass surgery in conjunction with the cardiothoracic and vascular procedures classified in DRG 108 as well as the loss of clinical coherence as increasingly more coronary bypass cases are assigned to DRG 108. However, we do not believe it would be appropriate to reverse the surgical hierarchy. We made the surgical hierarchy change in FY 1989 because the relative resource intensity of the cases assigned to DRG 108 had increased relative to the weighted average of those cases containing the procedure codes necessary for assignment to DRG 106 or 107. The pre-FY 1989 surgical hierarchy no longer resulted in the assignment of cases involving multiple procedure codes to the DRG associated with the most resource intensive procedure group. The FY 1988 data indicate the DRG 108 cases are still more resource intensive. The average standardized charges for cases in DRG 108, based on the current surgical hierarchy, are $3,400 higher than the weighted average standardized charges for cases in DRGs 106 and 107. We intend to re-examine this problem as part of our analytic agenda for FY 1991.

Finally, we believe that it would be advantageous to include more fields on the Medicare claim form to allow the hospital to enter both additional diagnoses and procedure codes. We plan to approach the National Uniform Bill Committee this year to request that they revise the Uniform Bill at the next available opportunity. This recommendation will, of course, be subject to the approval of the other members of the committee.

Since we published the proposed rule, we have received a revised GROUPER program and a more complete 1988 Medicare provider analysis and review (MEDPAR) file, and we were able to test the proposed surgical hierarchy changes. Test results indicated that two changes are necessary.

We regrouped the MDC 8 DRGs using the two proposed hierarchy changes to determine whether the standardized charges involved would continue to exceed that of the DRGs that are currently ranked above them in the hierarchy. We found that our proposal to reorder DRG 232 (Arthroscopy) produced anomalous results. We found that the number of patients classified in DRG 232 would increase seven-fold when the procedure group was moved up in the hierarchy. This result indicates that arthroscopy is more frequently performed in conjunction with a procedure from one of the groups for DRGs 221 and 222 (Knee Procedures), DRGs 226 and 227 (Soft Tissue Procedures), DRGs 230 and 231 (Local Incision and Removal of Internal Fixation Devices), and DRG 228 (Major Thumb or Joint Procedures or Other Hand or Wrist Procedures with CC) than it is performed by itself.

The fact that DRG 232 would pick up so many cases in and of itself is not troubling. However, the reassignment of so many cases results in a weighting factor that no longer supports the proposed surgical hierarchy change. The cases in the FY 1988 MEDPAR that would be assigned to DRG 232 if we changed the order as proposed would have an average standardized charge that would move the DRG back to its current ranking on the surgical hierarchy. It appears that the average Medicare beneficiary who undergoes arthroscopic surgery is often in an advanced stage of degenerative bone or joint disease, resulting in consistently high charges in those cases that do not include other MDC 8 surgeries. The data show that in the situation where arthroscopy is one of multiple procedures performed, the resource intensity of the case is not as high as when arthroscopy is the only procedure performed. Based on these results, we have decided not to implement the proposed reordering of DRG 232.

However, we found from analysis of the revised GROUPER program that another change in MDC 8 surgical hierarchy is necessary due to the revision of the arthroplasty codes and the assignment of the following ICD–9–CM procedure codes to DRG 209 effective October 1, 1989. Currently, all procedures involving shoulder arthroplasty and elbow arthroplasty are assigned to DRG 223 (Major Shoulder/Elbow Procedures or Other Upper Extremity Procedures With CC). With the code revisions, code 81.80 (Total shoulder replacement), 81.81 (Partial shoulder replacement), and 81.84 (Total elbow replacement) will be assigned to DRG 209 (Major Joint and Limb Reattachment Procedures). Consequently, the charges remaining in the cases classified in DRG 223, representing the less complicated arthroplasties, fell to a rank below DRG 231 (Local Excision and Removal of Internal Fixation Devices, Except Hip and Femur). As a result, we are revising the hierarchy in MDC 8 to reorder DRG 223 below DRG 231 and above DRG 228.

Based on these changes, the final MDC 8 surgical hierarchy is as follows:

Bilateral or Multiple Major Joint Procedures of the Lower Extremity (DRG 471)
Wound Debridement and Skin Graft Except Hand (DRG 217)
Major Joint and Limb Reattachment Procedures (DRG 209)
Hip and Femur Porcedures Except Major Joint (DRGs 210, 211, and 212)
Amputations (DRG 213)
Biopsies (DRG 216)
Back and Neck Procedures (DRGs 214 and 215)
Lower Extremity and Humerus Procedures Except Hip, Foot, Femur (DRGs 218, 219 and 220)
Knee Procedures (DRGs 221 and 222)
Soft Tissue Procedures (DRGs 226 and 227)
Local Excision and Removal of Internal Fixation Devices of Hip and Femur (DRG 230)
Local Excision and Removal of Internal Fixation Devices Except Hip and Femur (DRG 231)
Major Shoulder/Elbow Procedures or Other Upper Extremity Procedures With CC (DRG 223)
Major Thumb or Joint Procedures or Other Hand or Wrist Procedures With CC (DRG 228)
Arthroscopy (DRG 232)
Foot Procedures (DRG 225)
Shoulder, Elbow or Forearm Procedures Except Major Joint Procedures Without CC (DRG 224)
Hand or Wrist Procedures Except Major Joint Procedures Without CC (DRG 229)
Other Musculoskeletal System and Connective Tissue OR Procedures (DRGs 233 and 234)

4. Refinement of Complications and Comorbidities List

There is a standard list of diagnoses that are considered complications and comorbidities (CCs). This list was developed by physician panels to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial CC, in turn, is defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in length of stay by at least one day for at least 75 percent of the patients.

Based upon analysis by our medical consultants, we proposed to eliminate the following minor cardiac block and dysrhythmia diagnoses from the CC list:

426.10 Atrioventrical block, not otherwise specified (NOS)
426.11 Atrioventrical block, 1st degree

426.12 Atrioventrical block—Mobitz (type) II
426.13 Atrioventrical block, 2nd degree, not elsewhere classified (NEC)
426.2 Left bundle branch hemiblock
426.3 Left bundle branch block NEC
426.4 Right bundle branch block
426.50 Right bundle branch block NOS
426.51 Right bundle branch block and left posterior fascicular block
426.52 Right bundle branch block and left anterior fascicular block
426.53 Bilateral bundle branch block NEC

Each of these procedures would no longer be considered a CC for any principal diagnosis.

Comment: A number of comments were received recommending retention of some or all of the codes in the CC list or supporting deletion of all of the codes as proposed. One commenter suggested deleting an additional code, 426.9 (Conduction disorder, unspecified). The commenter believes the diagnosis to be rather nonspecific except for interventricular conduction delay (in the alphabetical list of the ICD–9–CM), which is not a significant cardiac defect. In the tabular list (of the ICD–9–CM), however, there are two conditions the commenter believes to be highly significant and suggested interventricular conduction defect may best be reclassified to another ICD–9–CM code.

Response: After further discussion with medical consultants, we agree with several commenters that there may be added risk with diagnosis codes 426.12, 426.13, and 426.53. The remaining codes represent clinical conditions of lesser significance to the patient with acute myocardial infarction, they may or may not be related to the acute myocardial infarction, and they should not cause difficulty in the majority of cases. Therefore, they do not represent comorbidities that can be expected to significantly change resource utilization needs or length of stay. The following is the final list of minor cardiac block and dysrhythmia diagnoses that are deleted from the CC list:

426.10 Atrioventrical block, not otherwise specified (NOS)
426.11 Atrioventrical block, 1st degree
426.2 Left bundle branch hemiblock
426.3 Left bundle branch block, not elsewhere classified (NEC)
426.4 Right bundle branch block
426.50 Right bundle branch block NOS
426.51 Right bundle branch block and left posterior fascicular block
426.52 Right bundle branch block and left anterior fascicular block

We appreciate the commenter's suggestions concerning 426.9, but since we did not propose to eliminate 426.9, we do not believe it would be appropriate to act on the suggestion at this time. We recommend that the commenter submit it to the ICD–9–CM Coordination and Maintenance Committee for consideration (see address below in section II.B.6. of this preamble).

We proposed a limited revision of the CC Exclusion List, which includes corrections of errors in the existing list, addition of a number of excluded CCs, and the deletion of a number of excluded CCs.

Table 6f in section IV of the addendum to the proposed rule contained the proposed additions to the CC Exclusions List that would be effective for discharges occurring on or after October 1, 1989. The table shows the principal diagnoses with proposed changes to the excluded CCs. Each of these principal diagnoses was shown with an asterisk and the additions to the CC Exclusions List are provided in an indented column immediately following the affected principal diagnosis. The indented diagnosis would not be recognized by the GROUPER as a valid CC for the asterisked principal diagnosis beginning with discharges on or after October 1, 1989.

In the proposed rule, many four-digit diagnosis codes on the master CC list were included on Table 6d (Expanded Diagnosis Codes That Are No Longer Accepted In GROUPER) since they have been replaced by two or more five-digit diagnosis codes. Since the five-digit definitions provide greater specificity in classifying the diagnoses, some of the new codes will no longer describe a CC or will describe a CC in a four-digit category that was not previously on the CC list.

Example

*25060
34501
34510
34511

The four-digit diagnosis code 3450 (Generalized nonconvulsive epilepsy) was not on the master CC list while 3451 (Generalized convulsive epilepsy) was on the list. Code 3451 was excluded as a CC for the principal diagnosis 25060 (Diabetes with neurological manifestations, adult or unspecified onset) for discharges occurring on or after October 1, 1988. Beginning with discharges on or after October 1, 1989, the ICD–9–CM adds a fifth digit designating whether or not intractable epilepsy is involved. The four-digit diagnosis codes are eliminated wherever they occurred on the Exclusion List. Both of the five-digit codes 34510 and 34511 are added to the Exclusion List in place of 3451. Even though the code 3450 was not considered a CC, 34501 (Generalized convulsive epilepsy with intractable epilepsy) is considered a CC and is added to the master list. Code 34501 will be excluded as a CC for the principal diagnosis 25060.

Comment: Several commenters suggested that codes from the Excludes Note, as set forth in the ICD–9–CM, for diagnosis code 496 (Chronic obstructive pulmonary disease) be added to the CC Exclusions List to improve coding consistency and accuracy.

Response: While we encourage efforts to ensure correct coding and consistent use of ICD–9–CM principles, we do not see the CC Exclusion List as the most appropriate vehicle to ensure this consistency. Furthermore, of the codes mentioned in the Excludes Notes, only two have payment implications and one of these will be changed as of October 1, 1989. However, we understand the commenter's point and as we do more extensive work on the CC list, we will consider ICD–9–CM coding conventions.

Comment: One commenter wanted to know if code 493.20 (Chronic obstructive asthma) will be considered as a comorbid condition and requested clarification regarding the combination of codes 493.90 (Asthma unspecified) and 492 (Emphysema), asking if it becomes part of 493.20.

Response: Diagnostic code 493.20 will be considered as a complication or comorbid condition and will be added to the CC list. The question as to how to code the combination of asthma and emphysema is answered in the final ICD–9–CM coding Addendum for October 1, 1989. Each diagnosis should be coded separately, as they are now.

The only CCs that we proposed to delete from the CC Exclusions List are those deleted diagnosis codes in Table 6d that are currently on the CC list and those diagnosis listed above that we proposed to delete from the main CC list. As proposed, the following diagnoses codes from Table 6d should be deleted from the CC list and wherever they appear on the CC Exclusions List: 345.1; 403.0; 404.0; 410.0–410.9; 411.8; 996.6; and 996.7. For the convenience of the reader, we have included a complete list of the deletions in Table 6g of the addendum to this final rule.

Copies of the original CC Exclusions List applicable to FY 1988 can be obtained from the National Technical Information Service (NTIS) of the Department of Commerce. It is available in hard copy for $84.95 and on microfiche for $18.50. These prices include $3.00 for shipping and handling. A request for the FY 1988 CC Exclusions List, which should include the identification accession number (PB) 88–133970, should be made to the following address:

National Technical Information Service,
United States Department of Commerce, Springfield, Virginia 22161; or by calling (703) 487–4650.

Users should be aware of the fact that both the revisions in Tables 6d and 6e of the September 30, 1988 final rule and those in Table 6f and 6g of this document must be incorporated into the list purchased from NTIS in order to obtain the CC Exclusions List applicable for discharges occurring on or after October 1, 1989. (We do not intend to update the listing available from NTIS to reflect these or any future revisions.)

Alternatively, the complete documentation of the GROUPER logic, including the current CC Exclusions List is available from Health Systems International (HSI). HSI, under contract with HCFA, is responsible for updating and maintaining the GROUPER program. The current DRG Definitions Manual, Sixth Revision is available for $195.00, which includes $15.00 for shipping and handling. The Sixth Revision of this manual includes the changes in this document. This manual may be obtained by writing HSI at: 100 Broadway, New Haven, Connecticut 06511; or by calling (203) 562–2101.

5. Review of Procedure Codes in DRGs 468 and 477

Each year, we review cases assigned to DRG 468 (Unrelated Operating Room Procedures) in order to determine whether, in conjunction with certain principal diagnoses, there are certain procedures performed that are not currently included in the surgical hierarchy for the MDC in which the diagnosis falls. In FY 1989, this review resulted in the addition of two new DRGs: DRG 476 (Prostatic OR Procedure Unrelated to Principal Diagnosis) and DRG 477 (Non-Extensive OR Procedure Unrelated to Principal Diagnosis). For a detailed discussion of the changes, see the September 30, 1988 final rule (53 FR 38487).

Since DRG 468 is reserved for those cases in which none of the OR procedures is related to the principal diagnosis, it is intended to capture atypical medical cases, that is, those cases not occurring with sufficient frequency to represent a distinct recognizable clinical group. DRGs 476 and 477 are assigned to specific subsets of these codes. DRG 476 is assigned to those discharges in which one of the following prostatic procedures is performed that is unrelated to the principal diagnosis:

60.2—Transurethral prostatectomy
60.61—Local excision of lesion of prostate
60.69—Prostatectomy NEC
60.94—Control of postoperative hemorrhage of prostate

DRG 477 is assigned to those discharges in which the only procedure performed is a nonextensive procedure that is unrelated to the principal diagnosis. In Table 6c in section IV of the addendum to the September 30, 1988 final rule, we listed the ICD–9–CM procedure codes for all of the procedures we consider nonextensive procedures if performed with an unrelated principal diagnosis. These cases are grouped in DRG 477.

Because of the addition of DRG 477, we conducted this year's review of procedures producing DRG 468 or 477 assignments on the basis of volume of cases with each procedure. Our medical consultants then identified those procedures occurring in conjunction with certain diagnoses with sufficient frequency to justify adding them to one of the surgical DRGs for the MDC in which the diagnosis falls. On the basis of this review, we proposed two DRG classification changes in order to reduce unnecessary assignment of cases to DRG 477.

In MDC 14 (Pregnancy, Childbirth and Puerperium), we proposed to add two procedure codes to the operating room procedures in DRG 374 (Vaginal Delivery With Sterilization and/or D&C). Currently these procedures, when combined with a principal diagnosis in MDC 14 such as 665.41 (High vaginal laceration), group to DRG 477. The two procedure codes to be added to DRG 374 are procedure codes 69.09 (Other dilation and curettage) and 69.52 (Aspiration curettage following delivery or abortion).

Comment: Several commenters objected to the addition of procedure code 69.09 (Other dilation and curettage) to DRG 374. The commenters noted that this procedure code should not be used with DRG 374 because there is a specific procedure code (69.02) for D&C following delivery. Since it would be inappropriate to use 69.09 to indicate a D&C following delivery, the procedure code should not be added to DRG 374.

Response: We agree with the commenters that procedure code 69.09 should not be used to code a D&C following delivery and that the correct code would be 69.02. However, the purpose of including 69.09 in DRG 374 is to address those occasions when this procedure code is nevertheless used with a principal diagnosis assigned to DRG 374. These cases currently group to DRG 477 (Non-Extensive OR Procedure Unrelated to Principal Diagnosis); they more appropriately belong in DRG 374 because 69.09 is not an unrelated procedure. Therefore, we are including procedure code 69.09 in DRG 374.

Comment: We have received several complaints that when splenectomy (codes 41.5 or 41.43) is performed for Felty's syndrome, which is an appropriate procedure for this syndrome, it inappropriately groups to DRG 468 (Extensive OR Procedure Unrelated to Principal Diagnosis).

Response: We agree with the commenters that this is an incorrect grouping and have assigned procedure codes 41.5 and 41.43 to MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue) in order to group to the appropriate DRGs 233 and 234 (Other Musculoskeletal System and Connective Tissue OR Procedure).

6. Changes to the ICD–9–CM Coding System.

As discussed above in section II.B.1. of this preamble, ICD–9–CM is a coding system for the reporting of diagnostic information and procedures performed on a patient. In September 1985, the ICD–9–CM Coordination and Maintenance Committee was formed. This is a Federal interdepartmental committee charged with the mission of maintaining and updating the ICD–9–CM. This includes approving new coding changes, developing errata, addenda, and other modifications to the ICD–9–CM to reflect newly developed procedures and technologies and newly identified diseases. The Committee is also responsible for promoting the use of Federal and non-Federal educational programs and other communication techniques with a view toward standardizing coding applications and upgrading the quality of the classification system.

The Committee is co-chaired by the National Center for Health Statistics (NCHS) and HCFA. The NCHS has responsibility for the ICD–9–CM diagnoses codes included in Volumes 1 and 2—Diseases: Tabular List and Diseases: Alphabetic Index, while HCFA has responsibility for the ICD–9–CM procedure codes included in Volume 3—Procedures: Tabular List and Alphabetic Index.

The Committee encourages participation in the above process by major health-related organizations. In this regard, the Committee holds public meetings for discussion of educational

issues and proposed coding changes. These meetings provide an opportunity for input into coding matters from representatives of recognized organizations in the coding fields, such as the American Medical Record Association, the American Hospital Association, and the Commission on Professional and Hospital Activities, as well as physicians, medical record administrators, and other members of the public. Considering the opinions expressed at the public meetings, the Committee formulates recommendations, which then must be approved by the agencies.

The Committee presented proposals for coding changes at public meetings held on April 14, 1988, July 21–22, 1988, and December 1, 1988 and finalized the coding changes after consideration of comments received at the meetings and in writing in the 30 days following the December 1, 1988 meeting. The initial meeting for consideration of coding issues for resolution in FY 1990 was held on April 4, 1989 and a second meeting was held August 10–11, 1989. Copies of the minutes of these meetings may be obtained by writing to the co-chairpersons representing NCHS and HCFA. We encourage commenters to address suggestions on coding issues involving diagnosis codes to:

Ms. Sue Meads, R.R.A, Co-Chairperson,
ICD–9–CM Coordination and Maintenance Committee, NCHS, Rm 2–19, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

Questions and comments concerning the procedure codes should be addressed to:

Ms. Patricia E. Brooks, R.R.A., Co-Chairperson, ICD–9–CM Coordination and Maintenance Committee, HCFA, Office of Coverage Policy, Rm 1–J–2 East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

The additional new ICD–9–CM codes that have been approved will become effective October 1, 1989. The new ICD–9–CM codes are listed, along with their DRG classifications, in Tables 6a, 6b, and 6c in section IV of the addendum.

Further, the ICD–9–CM diagnosis codes shown on Table 6d will be expanded to categories requiring a fifth digit for valid diagnosis code assignment. Thus, these diagnosis codes will not be recognized by GROUPER 7 beginning with discharges occurring on or after October 1, 1989. The corresponding five-digit codes are shown in Table 6a. Finally, the ICD–9–CM procedure codes shown in Table 6e will be deleted. These codes were vacated because of the new and revised codes established by the Committee and will be reserved for future refinements of the ICD–9–CM.

Comment: Several commenters noted errors in Tables 6a, 6b, 6c, 6d, and 6e as set forth in section IV of the addendum to the proposed rule (54 FR 19709–19712). Specifically mentioned was the assignment of procedure codes 77.56 (Repair of hammer toe) and 77.57 (Repair of claw toe) to DRG 63 (Other Ear, Nose, Mouth and Throat OR Procedures).

Response: We have revised Tables 6a, 6b, 6c, 6d, and 6e to reflect the correct spelling, additions, deletions, and DRG assignments. Tables 6a, 6b, 6c, 6d, and 6e should now be correct as set forth in section IV of the addendum to this final rule.

Comment: One commenter asked which of the new diagnosis codes from Table 6a would be added to the CC list.

Response: We have revised Table 6a as set forth in section IV of the addendum to this final rule to add a yes/no column for CCS that will indicate for each of the new diagnoses listed whether or not it is considered a CC.

Comment: Two commenters questioned the assignment of procedure codes 81.57 (Replacement of joint of foot or toe), 81.72 (Arthroplasty of metacarpophalangeal and interphalangeal joint without implant), 81.74 (Arthroplasty of carpocarpal or carpometacarpal joint with implant), and 81.75 (Arthroplasty of carpocarpal or carpometacarpal joint without implant) to DRGs 7 and 8 (Peripheral and Cranial Nerve and Other Nervous System Procedures).

Response: Code 81.57 was incorrectly shown as assigned to DRGs 7 and 8 due to an error in Table 6b in the proposed rule (54 FR 19711). This has been corrected and now is shown assigned to DRG 225 (Foot Procedures) and DRGs 442 and 443 (Other OR Procedures for Injuries) in Table 6b. Codes 81.72, 81.74, and 81.75 are assigned to DRGs 7 and 8 because joint surgery may be performed in a neurologically deficient and unstable hand.

Comment: Three commenters questioned the assignment of code 996.73 (Other complications due to renal dialysis device, implant and graft) to DRGs 144 and 145 (Other Circulatory System Diagnoses). They recommended that it group to DRGs 331, 332, and 333 (Other Kidney and Urinary Tract Diagnoses) because this is a complication of a vascular prosthetic device that is a renal dialysis device.

Response: Code 996.73 is a general category of diagnoses including vascular implants or grafts that may be associated with many different medical conditions. We find no medical or coding rationale for further DRG differentiation. Code 996.73 will remain assigned to DRG 144 and 145.

Comment: Several commenters supported the new ICD–9–CM codes for intractable epilepsy as a separate diagnosis and the new codes for procedures performed in the diagnosis of people with intractable epilepsy. They stated that by differentiating between intractable epilepsy and routine epilepsy, the new diagnosis codes recognize the varying severity of epilepsy. The commenters also pointed out that these new diagnosis codes will provide the first opportunity to identify this group of patients and to distinguish between routine epilepsy admissions and the far more resource intensive admissions for intractable epilepsy. They recommended that we recognize the far higher cost of intractable epilepsy cases and establish more appropriate payment than exists under the current DRGs. The commenters also expressed concern that insufficient Medicare payments may limit access to needed diagnostic procedures and treatment.

Response: We appreciate the input from these commenters and their support for the new diagnosis codes (345.00 through 345.91) and procedure codes (88.10 and 89.19), as well as their concern and request for further refinements in the classification and payment of intractable epilepsy cases. With these new codes, we will be able to collect and evaluate data concerning resource requirements for patients with intactable epilepsy compared to patients with routine epilepsy and to determine whether any additional classification changes should be proposed.

Comment: One hospital raised a question about the use of the new diagnosis code 411.81 (Acute ischemic heart disease without myocardial infarction) in the case of those patients who had an embolism or occlusion (diagnosed by EKG) but were so successfully treated with tissue plasminogen activator (TPA) or a similar pharmacologic preparation that no infarction resulted.

Response: Clarification of the new diagnosis code 411.81 resolves this issue. This code is for acute ischemic heart disease without myocardial infarction and includes coronary occlusion from embolus or clot formation resulting in ischemia but not infarction.

If a myocardial infarction is diagnosed either by clinical picture, EKG, or enzymes, it qualifies as an acute myocardial infarction and is assigned to category 410 (fourth and fifth digits are required). The new diagnosis code 411.81 is reserved for those cases in which no myocardial infarction occurs. In cases in which the EKG indicates occlusion with ischemia but without definitive signs of infarction, this patient would be classified under the new diagnosis code 411.81 (Acute ischemic heart disease without myocardial infarction). If TPA were administered, in the absence of a myocardial infarction, 411.81 would be the correct code.

However, if the patient is diagnosed as having an acute myocardial infarction, the case is coded in the 410 category, even if TPA is administered and restores perfusion in the occluded coronary artery.

Comment: Two commenters supported the new diagnosis codes for acute myocardial infarction and the proposed DRG reassignment for myocardial infarction subsequent episode of care cases to DRGs 132 and 133. However, both commenters expressed concern that the FY 1990 DRG weights for DRGs 121 and 122 (Circulatory Disorders with Acute Myocardial Infarction, Discharged Alive) would be too low for acute cases because they are based on all cases currently assigned to these DRGs. The commenters suggested that an adjustment be made in the weights for DRGs 121 and 122 to reflect the reassignment of less resource-intensive cases to DRG 132 and 133. If the weights are not adjusted, one of the commenters suggested leaving the less resource-intensive cases in DRGs 121 and 122 until the DRG reassignment could be reflected in recalibration.

Response: Effective with discharges on or after October 1, 1989, we are requiring the use of a new fifth digit subclassification within the ICD-9-CM category 410 (Acute myocardial infarction). This subclassification distinguishes an initial episode of care from a subsequent episode of care. A fifth digit of "1" (initial episode of care) is used to designate the acute phase of care regardless of the location of treatment. It includes cases that are transferred for care and treatment within the acute phase of care. Any subsequent episode of care for another myocardial infarction is also assigned a fifth digit of "1." All of these cases will be assigned, as they have been in the past, to one of the myocardial infarction DRGs 121, 122, or 123 (or, in the case with pacemaker implantation, DRG 115).

A fifth digit of "2" is used to designate observation, treatment, or evaluation of myocardial infarction within 8 weeks of onset, but following the acute phase, or in the healing state in which the episode of care may be for related or unrelated conditions. All of these cases will be assigned to one of the atherosclerosis DRGs (132 or 133) if acute myocardial infarction, subsequent episode of care is identified as the principal diagnosis. Our reasons for assigning these cases to the atherosclerosis DRG rather than to a myocardial infarction DRG relate to two of the basic characteristics of the DRG patient classification system. First, each DRG should contain cases with a similar pattern of resource intensity and, second, each DRG should contain cases that are similar from a clinical perspective. We note that cases that would require surgical procedures upon readmission or cases that are readmitted with a complication of myocardial infarction would group to a different MDC 5 DRG.

Without the creation of a new fifth digit subclassification, we would have continued to be unable to distinguish the resource-intensive, clinically-coherent group of patients admitted to the hospital with an acute myocardial infarction from less resource-intensive and clinically-different group of patients who are not suffering an acute myocardial infarction but who are readmitted to the hospital within 8 weeks of a myocardial infarction. Until now, according to ICD-9-CM coding convention, various cases of chronic ischemic heart disease (for example, coronary atherosclerosis) have been classified as acute myocardial infarctions if they occur within 8 weeks of the date of a previous infarction. Thus, cases of acute myocardial infarction have been classified with cases that are not acute myocardial infarctions. This coding convention was developed and is appropriate for mortality reporting purposes but is inappropriate for morbidity reporting purposes. In addition to the problems this coding convention has created for the DRG classification system, it has also distorted the statistical data in the United States concerning the incidence of myocardial infarction.

We believe these problems will be solved by the use of the fifth digit subclassification. However, until the new diagnosis codes are reflected in our MEDPAR data, we are unable to distinguish between the acute and nonacute cases for purposes of recalibration. Thus, as the commenters noted, relative weights for DRGs 121 and 122 are based on the resource requirements for both the high-cost acute myocardial infarction cases and the less resource-intensive nonacute cases that will be paid under DRGs 132 and 133 in FY 1990. The reassignment of the lower cost cases from DRGs 121 and 122 will not be reflected in the DRG weights until FY 1992, when FY 1990 data will be used in recalibration.

We have not adopted either of the commenters suggested alternatives because they are not consistent with our general policy on reclassification and recalibration. When ICD-9-CM diagnosis codes that affect DRG assignment are added, revised, or deleted, we try to take these changes into account in recalibration. To the extent possible, we convert the existing codes into their equivalents under the revised code definitions so that cases including these codes will be classified in their new DRG assignments before recalibration. When we are unable to determine how cases will be coded under the revised definitions, our policy is to leave the cases in their current DRG assignment for recalibration purposes only. We still assign the codes to the appropriate DRG for payment purposes. Because we are unable to predict which cases will no longer be assigned to DRGs 121 and 122 in FY 1990, we have left all acute myocardial infarction cases in DRGs 121 and 122 in recalibrating the weights. In addition, since we cannot predict which cases will no longer be assigned to DRGs 121 and 122 in FY 1990, we have no basis for determining an appropriate adjustment to the DRG weights for DRGs 121 and 122 to reflect the new DRG assignments.

We believe it would be inappropriate to continue assigning the nonacute cases to DRGs 121 and 122 for payment purposes until FY 1992 because it would result in continued excessive payments for the nonacute cases without improving the payment accuracy for the acute cases in DRGs 121 and 122.

Finally, we note that to the extent DRG reclassification and recalibration contribute to a lower case-mix index value in FY 1990 than we projected in normalization, this effect would be taken into account in any future adjustment for the aggregate effects of the FY 1990 GROUPER changes and recalibration on changes in the case-mix index.

Comment: One commenter expressed opposition to our decision to assign cases involving the readmission of patients within 8 weeks of a myocardial infarction to one of the atherosclerosis DRG (132 or 133) rather than to one of the myocardial infarction DRG (121, 122, or 123). The commenter claims that Medicare patients who have had myocardial infarctions can be expected to have increased admissions in the first four weeks following infarction because of complications. The commenter asserted that the resources required to care for this group of patients increases because of the recent myocardial infarction and, thus, these cases should be assigned to one of the myocardial infarction DRGs.

Response: We acknowledge that some Medicare patients are at risk of complications in the first few weeks after a myocardial infarction. We believe that the commenter may have misinterpreted the proposed rule in which we indicated in Table 6a that the new codes for myocardial infarction, subsequent episode of care would be assigned to one of the atherosclerosis DRGs (132 or 133). The GROUPER will only assign these cases to DRG 132 or 133 if myocardial infarction subsequent episode of care is listed as the principal diagnosis. If the patient is admitted with a complication of myocardial infarction, then the complication would be listed as the principal diagnosis and the patient would be assigned to a DRG other than 132 or 133. It should be noted that we have created two new diagnosis codes (429.71 (Acquired cardiac septal defect) and 429.79 (Other certain sequelae of myocardial infarction, not elsewhere classified)) to allow for accurate reporting of complications of myocardial infarction. These codes are assigned to DRG 124, 144, or 145.

Comment: Several commenters opposed the addition of the new procedure codes specific to alcohol and drug detoxification and rehabilitation (94.61 through 94.69) to DRG 433 (Alcohol/Drug Abuse or Dependence, Left Against Medical Advice). These commenters noted that adding these new procedure codes to DRG 433 was unnecessary because the presence or absence of these procedure codes would not affect assignment to DRG 433.

Response: We agree with the commenters that it is unnecessary to add procedure codes 94.61 through 94.69 to DRG 433. A case in which the patient was discharged from the hospital against medical advice will group to DRG 433 regardless of whether detoxification or rehabilitation has been provided. Therefore, we are not adding procedure codes 94.61 through 94.69 to DRG 433. In addition, we are not adding procedures codes 94.62 (Alcohol detoxification), 94.65 (Drug detoxification), or 94.68 (Combined alcohol and drug detoxification) to the GROUPER logic for DRG 434 or 435. Detoxification procedures should be coded only if provided, but are not required for grouping to DRG 434 or 435. Rehabilitation procedure codes are required for DRG 436; both rehabilitation and detoxification codes are required for DRG 437.

7. Other Issues

a. *Cochlear Implants.* In the September 30, 1988 final rule (53 FR 38476), we agreed to reevaluate the placement of cochlear implant discharges in DRG 49 (Major Head and Neck Procedures) based upon billing data from FY 1988. While cochlear implant cases may not be clinically coherent with other discharges assigned to DRG 49, the FY 1988 Medicare data still do not indicate there would be a material difference in the weighting factors if a separate DRG were created for cochlear implants.

Comment: Several commenters expressed concern that the classification of cochlear implant cases to DRG 49 is inappropriate in terms of both clinical coherency and resource intensity and could limit the availability of cochlear implants to Medicare beneficiaries. One commenter suggested that there are several causes for the low average charges in the MEDPAR data. First, the data reflect the less expensive single-channel device that is no longer manufactured and, as a result, understate the cost of the multi-channel device. Second, the commenter noted that the cost of the device is 84 percent of the charges and maintains that this creates an "expensive device bias" that provides hospitals with little incentive to control the nondevice related expenses and makes cochlear implant procedures not clinically coherent with the other procedures in DRG 49. Finally, the commenter has analyzed the FY 1988 MEDPAR file and alleges that 25 percent of the cases coded as cochlear implants do not reflect the cost of the cochlear implant device. The commenter believes that procedure code 20.96 (Unspecified cochlear implants) has been misused and should be eliminated.

Response: We have re-examined the most recent FY 1988 MEDPAR file and continue to believe that it would not be appropriate to establish a separate DRG for cochlear implant procedures at this time. As indicated in the proposed rule (54 FR 19642), the 113 cases coded as cochlear implants constitute only two percent of the total discharges in DRG 49. Moreover, if we were to remove the cochlear implant cases from DRG 49 and establish a separate DRG based on the FY 1988 MEDPAR data, the weighting factor for cochlear implants would be less than the factor for DRG 49.

We examined the effect the removal of procedure code 20.96 (Implantation or replacement of cochlear prosthetic device NOS) and 20.97 (Single-channel device) would have on the average charges for DRG 49 cases and for cochlear implant cases. We determined that the removal of either or both of these two procedure codes would have no significant impact of the weighting factor for DRG 49. Further, the average charge for cases coded with procedure code 20.98 (Multi-channel device) is less than the average charge for DRG 49 cases. With regard to the commenter's concern that the average charges may be understated because 25 percent of the cases coded as cochlear implants do not reflect the cost of the cochlear implant device, we can only assume that what a hospital submits as its charges on each bill are in fact the actual total charges for the case. A hospital is under no obligation to show charges equal to or greater than its costs for the services.

Finally, we recognize that some hospitals may be experiencing problems with the coding of cochlear implant cases. As an educational effort to encourage proper use of the cochlear implant codes, we are asking the American Hospital Association to address this issue in their coding publication "Coding Clinic for ICD-9-CM". In addition, we will furnish all Peer Review Organizations with a copy of this document for their consideration in reviewing the proper coding and DRG assignment of cases.

b. *Expansion of the List of DRGs Partitioned by Complications and Comorbidities (CCs).* In the September 30, 1988 final rule (53 FR 38491), we agreed to reevaluate the importance of CCs in DRGs not currently partitioned by the presence or absence of CCs. We have funded a number of studies in recent years designed to evaluate and improve the measurement of hospital case mix. In one recently completed study, Yale University has developed a refined DRG system that differentiates patients within each DRG based on whether they had catastrophic, major, moderate, or minor or no CCs.

The DRG refinement model produces significant improvements in predicting resource use and does not represent a radical departure from the current structure of the DRGs nor does it require the collection of any additional data. Although the results of this study appear promising, we are unable to implement the refined DRG system at this time since the appropriateness of the expanded DRGs has not been confirmed. Also, we need to analyze whether adoption of the refined DRG system would require other conforming changes to the payment system (that is, reestimation of the indirect medical education adjustment factor and the disproportionate share adjustment factor and reevaluation of the need for separate urban and rural rates) in order to mitigate a potentially large redistribution of Medicare payments across different categories of hospitals. We intend to reevaluate the importance of CCs in the nonpaired DRGs as part of our analysis of the Yale study results.

Comment: One commenter requested information on how many DRGs are defined in the "Refined Yale GROUPER" and its possible use for FY 1991.

Response: Under the Refined Yale GROUPER (the Yale model), a patient is first assigned to an MDC based on his or her principal diagnosis code. Then, if the patient had a temporary tracheostomy (except for patients assigned to MDC 3 or MDC 15) or died within 2 days of admission (medical patients only), the case is assigned to a tracheostomy or early death group. The MDCs in the Yale model are identical to the MDCs defined GROUPER 6 (effective October 1, 1988).

A patient not classified as "temporary tracheostomy" or "early death" is assigned to one of 317 subgroups (referred to as ADRGs) based on his or her principal diagnosis (medical hospitalization) or major procedure performed (surgical hospitalization). Finally, patients in each of the medical and surgical ADRGs are divided into final groups (RDRGs) based on classes of additional diagnoses. The classes for medical cases represent subsets of additional diagnoses on the GROUPER 6 comorbidities and complications (CCs) list to indicate a major, moderate, and minor or no effect on resource use. Surgical classes represent those cases with a catastrophic, major, moderate, or minor or no effect on resource use. Patients with no additional diagnoses are assigned to the class with minor or no effect on resource use.

This assignment algorithm applies to all MDCs except MDC 3 and MDC 15. In MDC 3 (Diseases and Disorders of the Ear, Nose and Throat), only medical patients can be assigned to the initial tracheostomy group. In MDC 15 (Newborns and Other Neonates with Conditions Originating in the Perinatal Period), a model specific to neonates was developed. Excluding MDC 15, there are a total of 1,126 refined DRGs: 167 medical ADRGs with three classes; 145 surgical ADRGs with four classes; 22 early death groups; 22 temporary tracheostomy groups; and one group for discharges with ADRGs 468, 469, 470, 476, and 477.

We are continuing to evaluate the Yale recommendations and to assess the most appropriate DRG groupings as part of our ongoing research concerning potential methodologies for incorporating severity measures into the prospective payment system. We have no plans to implement the Yale model in FY 1991. However, it is possible that selected aspects of the system (for example, the method for assigning ventilator patients) could be implemented independently of the rest of the Yale model if our analysis indicates that they are the preferred models for classification.

c. *Limb Salvage Surgery.* In the September 30, 1988 final rule (53 FR 38483), we stated that we had become involved in a broad analysis of the classification of certain major cardiovascular procedures that could potentially result in the restructuring of DRG 108 (Other Cardiothoracic or Vascular Procedures With Pump), DRG 109 (Other Cardiothoracic Procedures Without Pump), DRGs 110 and 111 (Major Reconstructive Vascular Procedures Without Pump), and DRG 112 (Vascular Procedures Except Major Reconstruction Without Pump). This analysis evolved from our ongoing DRG refinement analysis.

The problem that has been observed is that the DRG system provides the same payment to hospitals for patients who require an arterial reconstruction for intermittent claudication as it does for those patients who require the same kind of operation for limb threatening ischemia (that is, for gangrene, a nonhealing ischemic ulcer, or severe ischemic rest pain).

Based on our review of these cases, we have not determined if this problem can be solved through a change in the GROUPER logic. Since the same surgical procedure is performed for each group, it is impossible to differentiate on that basis alone.

It appears from all the data we have analyzed thus far that we are dealing with different quantities that legitimately fall under virtually identical categories in the ICD–9–CM. Different surgeons are performing the same basic procedures on patients who fall at the opposite ends of the range in severity of the manifestations of peripheral vascular disease. The GROUPER program can assign only the codes listed on the billing record, and the distinguishing secondary diagnoses of gangrene and decubitus ulcers are perhaps not shown as often as they actually occur. As long as the procedures involved are found to be medically appropriate, it would be contrary to one of the basic premises of the prospective payment system to create expensive and inexpensive subcategories of cases exhibiting similar ICD–9–CM coding.

Therefore, although we will continue to examine this issue, we did not propose to make any changes to DRGs 108 through 112.

Comment: Several commenters expressed concern that continued inadequate payment for limb salvage cases could limit the availability of the procedure and create incentives to perform amputation. One commenter recommended that cases in DRG 110 (Major Reconstructive Vascular Procedure Without Pump With CC) be differentiated based on whether there is a gangrenous lesion that could lead to amputation of the limb. This change would not require modification of the procedure codes.

Response: We will continue to analyze the cases in DRG 110 with attention to the classification change suggested by the commenter.

d. *Reassignment of Patients with Guillain-Barre Syndrome.* Guillain-Barre syndrome is a postinfectious polyneuropathy in which patients may require plasmapheresis, ventilation assistance, and long intensive-care stays. Guillain-Barre syndrome discharges have been assigned to DRGs 18 and 19 (Cranial and Peripheral Nerve Disorders). ProPAC believes that the classification of Guillain-Barre syndrome cases into DRGs 18 and 19 is inappropriate in terms of resource use; that is, the average resource use associated with Guillain-Barre syndrome cases is higher than the resource use for average cases in DRGs 18 and 19. In its recommendation 13, ProPAC recommended that the Secretary reassign patients with Guillain-Barre syndrome from DRGs 18 and 19 to DRG 20 (Nervous System Infection Except Viral Meningitis) and DRG 34 (Other Disorders of Nervous System With CC); alternatively, a new DRG could be established.

As we stated in the proposed rule, we are unable to evaluate the appropriateness of a classification change for Guillain-Barre syndrome patients without further analysis of the FY 1988 MEDPAR data. Moreover, the issue of whether reclassification to DRGs 20 and 34 would be clinically consistent warrants further examination. We will examine this issue as part of our ongoing DRG refinement analyses.

Comment: ProPAC expressed concern that, given the magnitude of differences between costs for Guillain-Barre cases and other cases with cranial and peripheral nerve disorders in DRGs 18 and 19 (Cranial and Peripheral Nerve Disorders) found in its analysis of FY 1987 MEDPAR data, it was unclear why HCFA feels analysis of FY 1988 data is required before a classification change can be proposed. ProPAC believes that the prospective payment system must be sufficiently flexible to correct payment inequities in a timely fashion.

Response: When possible payment inequities are brought to our attention, we try to analyze and respond in a timely fashion. However, ProPAC's recommendation concerning alternative classification methods for Guillain-Barre cases was not presented to us until March 1, 1989. This did not provide adequate time to investigate the issue thoroughly and to analyze the appropriateness of the alternative classifications suggested by ProPAC before publication of the proposed DRG changes and relative weights.

While we appreciate and welcome ProPAC's analyses of DRG classification issues, ProPAC's studies do not relieve us of our responsibility to analyze the data and other evidence that would support a classification change and to determine the impact the change would have on the affected DRGs.

Our review of the FY 1988 MEDPAR data since publication of the proposed rule confirms ProPAC's finding that Guillain-Barre cases are more resource intensive than other cases within the same DRG. As we indicated in the proposed rule, we will examine the issue of the appropriate DRG classification for these cases as part of our ongoing DRG refinement analyses.

e. *Electrophysiological studies.* In the September 30, 1988 final rule, we discussed our inability to determine whether electrophysiologic (EP) studies should be treated as OR procedures in order to have an effect on DRG assignment. (53 FR 38488.) We stated that the FY 1987 MEDPAR data indicated that the incidence of EP studies was too small to warrant differential payment. We encouraged hospitals to code EP studies on their billing forms so that we might conduct a more thorough analysis of this procedure.

Comment: The American College of Cardiology, a number of cardiologists and electrophysiologists, and a major health industry manufacturer objected to the continued treatment of procedure code 37.26 (Cardiac electrophysiologic stimulation and recording studies) as a non-OR procedure since this would mean that this procedure would continue to have no effect on DRG assignment.

A majority of the commenters believe that EP studies should be treated as either a cardiac catheterization or an OR procedure for the purpose of DRG assignment. Although generally performed in a catheterization laboratory or radiology suite rather than in an operating room, EP studies involve significant levels of time and resources in managing patients with potentially life-threatening cardiac arrhythmias. Multiple drug testing in cases that do not ultimately involve surgery can involve stays of over 2 weeks in length.

Response: EP studies and cardiac mapping were previously identified temporarily under procedure code 37.29 (Other diagnostic procedures on the Heart) long with HIS Bundle until October 1, 1988 when the distinct ICD–9–CM procedure code for EP studies became effective. EP studies have been used since the early 1980's to determine the appropriate antifibrillation agent to be prescribed for patients with inducible cardiac arrhythmias. In the absence of verifiable data under the temporary code, we reasoned that the cost of EP studies should have already been reflected in the relative weights of both the medical and surgical DRGs in which such cases had been classified.

In our analysis of this issue as presented in the September 30, 1988 final rule, we concluded that the number of cases available for review from the FY 1987 MEDPAR file was too small to warrant differential payment and that there are sufficient numbers of other cases to average out payments (53 FR 38489). To the extent that EP studies occurred much more frequently than our data suggested, we encouraged hospitals to record these codes on their billing forms so that we might conduct a more thorough analysis of these procedures in the future. At that time, however, we believed in was inappropriate to construct a new DRG or to test EP studies as an OR procedure.

We now have been able to analyze the bill data for a portion of FY 1989 for DRGs showing procedure code 37.26. We believe it supports the comparability of EP studies to cardiac catherization procedures in terms of resource use and time required. Based on this analysis and the concurrence of our medical staff, we are making a number of changes in the DRG assignment of procedure code 37.26 for discharge occurring on or after October 1, 1989.

We found code 37.26 in 1.0 percent of the available FY 1989 data for DRGs 138 and 139. Although this is not a great increase, we believe that it is significant that over 80 percent of the codes were shown in medical DRGs. (We would not necessarily expect to find EP studies coded on surgical bills because in the limited space available, there are procedure codes that are much more likely to be coded if performed because, unlike EP studies, these other codes may affect DRG assignment.)

Therefore, based on public comment and our analyses, in MDC 5, DRGs 104 and 108, we are adding 37.26 to the listing of nonoperating room procedures. In DRGs 108 and 112, we are adding 37.26 as a nonoperating room procedure. This HSI Definitions Manual will show this as: Or, NON-OPERATING ROOM PROCEDURE, 3726 Cardiac electrophysiologic stimulation and recording studies. (The code will be shown in the short description.)

We have determined from our discussions with a manufacturer of the automatic implantable cardioverter defibrillator (AICD) that the EP studies performed during the implantation, revision, or replacement of an AICD is considered to be a part of the procedure and thus would not be coded in addition to the AICD procedure codes (37.94–37.98). The HCFA representatives on the ICD–9–CM Coordination and Maintenance Committee and the Editorial Advisory Board of AHA's "Coding Clinic" intend to publish information to clarify the use of this code in its new classification.

f. *Automatic Implanted Cardioverter Defibrillator (AICD).*

Comment: The manufacturer of the automatic implanted cardioverter defibrillator (AICD) system currently available recommended three specific changes in the DRG assignment of the AICD procedure codes as follows:

- Cases in which a patient undergoes initial AICD system implantation and EP testing should be classified into DRG 104 (Cardiac Value Procedure With Pump and With Cardiac Catherter).
- When a total AICD system is implanted in two stages on different days in the same hospitalization (that is, the lead system is implanted on one day and the AICD device is implanted on a subsequent day), the case should be assigned to DRG 104.
- AICD replacement cases should be moved from DRG 120 (Other Circulatory System OR Procedures) and be reassigned to DRG 109 (Other Cardiothoracic Procedures Without Pump).

The commenter submitted a contractor study that concluded that the average standardized charges for AICD replacement cases are understated in the FY 1987 MEDPAR file. Based on a survey of physicians and hospitals that perform this procedure that analyzed the 167 AICD replacement cases in the FY 1987 MEDPAR file, the contractor found that—

- 31 percent of the cases were from hospitals that had never purchased an AICD device, which implies that the ICD–9–CM coding shown on the claim is not correct;
- 6 percent of the cases were not AICD replacements but nevertheless

BEST COPY AVAILABLE

were from hospitals that purchased and implanted AICD devices; and

- 8 percent of the cases were from hospitals that undercharged or never charged for the device.

We also received a large number of comments from physicians and organizations that made the same recommendations.

Response: We agree that when a patient undergoes complete baseline EP testing to determine the proper treatment of their cardiac arrhythmias ultimately receives a defibrillator implant in the same admission, that discharge should be assigned to DRG 104. Accordingly, as discussed above, we have added EP testing as a nonoperating room procedure to DRG 104.

In response to the suggestion concerning AICD systems that are implanted during two separate operations on different days in the same hospital stay, we had not previously classified these cases in DRGs 104 and 105 for two reasons. We did not have data for either the separate initial implant or replacement of a defibrillator device and leads in our data base. Additionally, our medical staff and consultants were not convinced that this technique of separate operations is widely practiced. Thus, the ICD–9–CM procedure codes 37.95 (Implantation of automatic cardioverter/defibrillator lead(s) only) and 37.96 (Implantation of cardioverter/defibrillator pulse generator only) are assigned to DRG 120 (Other Circulatory System OR Procedures). Code 37.95 is currently included on the Medicare Code Editor (MCE) list of noncovered OR procedures.

It is our understanding that medical records administrators would not generally substitute code 37.94 (Implantation or replacement of automatic cardioverter/defibrillator, total system [AICD]) for the two separate procedures because it would not represent the events involved in the patient's treatment. We have not previously found cases with the two initial implant codes nor have we found the two replacement codes (37.97 and 37.98) in combination in prior data bases. However, the FY 1988 MEDPAR data include one case with a two-stage initial implant and three cases with a two-stage replacement.

Even though it seems to be rare in the Medicare population, we agree that if an entire system is implanted or replaced in separate stages of the same admission, it should be assigned to DRG 104 or DRG 105. Therefore, we are removing code 37.95 from the MCE noncovered procedure edit and adding the following code pairs to the OR procedure list for DRGs 104 and 105:

37.95 and 37.96
37.97 and 37.98

With regard to the classification of replacement or insertion of AICD leads or pulse generator alone, we continue to believe that placement in DRG 120 is appropriate for these procedures. Our analysis of the FY 1988 MEDPAR data for DRG 120 indicates that the standardized charges for cases with the code for replacement of an AICD lead or pulse generator alone is more than $3,000 lower than the standardized charge for the DRG. In addition, the standardized charge for the DRG is $14,250 compared to the $15,000 minimum cost estimated in the contractor's study for an AICD replacement case in FY 1987 (based on the cost of the device and a 2-day hospital stay). Even allowing for inflation, the estimated cost for the replacement cases is well within the variation in charges for DRG 120.

The commenter's recommendation to reassign the AICD replacement cases to DRG 109 is based on comparing the average weight for DRG 109 with an imputed weight for the AICD replacement cases based on the cases in the study with the average charges in excess of $15,000 and imputed charges for those cases in which the hospital implanted the device but undercharged or or did not charge for the device. The imputed charges were based on the cost of the device plus a 14 percent markup. We do not believe it is appropriate to make DRG classification changes using imputed charges in this manner. We can only assume that what the hospital submits as its charges on each bill are in fact the actual total charges. A hospital is not under any obligation to show charges equal to or greater than its costs for services.

Finally, we share the commenter's concern that the procedure codes for AICD replacement should be properly used. Therefore, we will furnish the information provided by the commenter about potential improper coding to the PRO's for their review.

g. *Tissue Plasminogen Activator (TPA).*

Comment: A commenter expressed concern that the recalibration process does not account adequately for the costs incurred by hospitals in using tissue plasminogen activator (TPA). The commenter requested an adjustment in the weights to ensure that the use of TPA is adequately reflected and recommended further analysis of the DRG classification for patients with acute myocardial infarctions to ensure that the DRGs consist of homogenous groupings based on clinical and cost criteria.

Response: As indicated in the September 30, 1988 rule 53 FR 38491), we believe that the update factors provided for in section 1886(b)(3)(B)(i) of the Act and the annual recalibration process provide sufficient recognition of the cost of TPA. Since the recalibration process uses actul charges, hospital resources directly associated with TPA in FY 1988 were used in the calculation of the DRG weights. In this regard, the costs of the drug may be offset by shorter hospital stays.

With regard to the DRG classification of patients with acute myocardial infarctions, we note the change we are making that is effective for discharges on or after October 1, 1989 to assign the less resource-intensive patients who are not suffering an acute myocardial infarction but who are readmitted to the hospital within 8 weeks of a myocardial infarction to one of the atherosclerosis DRGs (DRG 132 or 133) should improve the clinical homogeneity of the acute myocardial infarction DRGs (DRGs 121, 122 and 123). As data reflecting this change become available, we will review the appropriateness of the DRG assignments as part of our ongoing review of the DRG classification system.

h. *MDC 8: Diseases and Disorders of the Musculoskeletal System and Connective Tissue.*

Comment: We received one comment concerning DRG 209 (Major Joint and Limb Reattachment Procedures) and DRG 471 (Bilateral or Multiple Major Joint Procedures of Lower Extremity). The commenter asserted that, in terms of weighting and classification, the prospective payment system has not kept pace with technological advancements connected with these two DRGs. The commenter stated that there are two variations in joint replacement surgery that are more costly than the average joint replacement surgery case: one that involves the use of a porous-coated prosthesis and the other is revision joint replacement surgery. The commenter recommended that we analyze our data to determine whether they support the addition of a new DRG for porous-coated joint replacement surgery and a new DRG for revision joint replacement surgery.

Response: The commenter raises a new issue concerning DRGs 209 and 471 that was not discussed in the proposed rule. With regard to the variations in joint replacement surgery described by the commenter, several coding changes have been made (see Tables 6b and 6c as set forth in the addendum to this final rule) that will be effective for procedures performed on or after October 1, 1989. Basically, the codes no longer differentiate between procedures in which cement is used and those in which it is not. However, new codes were added and revisions to existing codes were made to better identify and separate revision joint replacement surgery cases from initial joint replacement surgery cases. We will evaluate the effect of these coding changes on DRG assignment and weights after data reflecting these changes become available.

i. *Autologous Bone Marrow Transplantation.*

Comment: One commenter addressed the methodology for classifying autologous bone marrow transplants and the payment levels of DRG 394 (Other OR Procedures of the Blood and Blood Forming Organs), DRG 400 (Lymphoma and Leukemia with Major OR Procedure), DRG 406 (Myeloproliferative Disorder or Poorly Differential Neoplasm With Major OR Procedure with CC), and DRG 407 (Myeloproliferative Disorder or Poorly Differential Neoplasm With Major OR Procedure without CC) in which most autologous bone marrow transplant cases would be assigned. The commenter submitted its study of operating costs and Medicare payments for autologous bone marrow transplants. The findings of this study suggest there is a significant classification problem with autologous bone marrow transplant cases with the existing DRGs and that this problem results in very significant losses to hospitals.

The commenter pointed out that because there is no unique DRG for bone marrow transplants, these cases are placed in the same DRGs as much less resource intensive cases, and as a result of averaging, the bone marrow transplant cases will be underpaid. The commenter stated that the difference between costs and the low Medicare payment level provides significant disincentives for hospitals to perform autologous bone marrow transplants for Medicare patients. The commenter expressed concern that hospitals that perform autologous bone marrow transplants could be forced to shift costs to other programs or payers and that access to bone marrow transplants might be reduced for Medicare patients due to inadequate payment policies.

Response: The commenter has raised an issue that was not discussed in the proposed rule. Medicare began coverage for autologous bone marrow transplants on April 28, 1989. Our methodology for classifying and determining the weight for bone marrow transplants cases is the same as the methodology for all other nonorgan transplant cases. (The Medicare manual issuances (Medicare Hospital Manual Transmittal No. 586, published in June 1989 and Medicare Intermediary Manual Transmittal No. 1426, published in May 1989) that announced our coverage of autologous bone marow transplants contained some errors concerning payment for these bone marrow transplants. We incorrectly stated that bone marrow acquisition costs are paid on a reasonable cost basis; however, this is incorrect as this cost is included in the prospective payment amount. Also, physician services are billed under Part B at 80 percent of the reasonable charge as determined by the Medicare carrier (rather than 100 percent as stated in the manual issuances).)

Bone marrow transplants cases will be assigned to existing DRGs until data on Medicare patient experience is developed that indicate that a separate DRG would improve both clinical coherence and homogeneity with respect to resource use for a new DRG. Since coverage of the procedure was established only in April 1989, limited data will be available for analysis in the coming year. However, we will review the available data and, in doing so, we will take into account the commenter's findings.

j. *GROUPER E codes.*

Comment: One commenter recommended that the GROUPER be modified so that E codes, which are used to classify external causes of injury and poisoning, will not affect DRG assignment of cases in MDC 15 (Newborns and Other Neonates with Conditions Originating in Perinatal Period). The commenter pointed out that cases in MDC 15 with E codes are assigned to DRG 390 (Neonates with Other Significant Problems) and recommends that the GROUPER be modified to eliminate this problem even though this is not a major problem for Medicare's population since the GROUPER is used by payors other than Medicare.

Response; We agree that the GROUPER should not assign MDC 15 cases with an E code to DRG 390. We will address this problem in next year's GROUPER changes; that is, the DRG reclassification changes effective for FY 1991.

k. *Thoracoabdominal Aortic Aneruysm (TAAA) Repair.*

Comment: A commenter expressed concern that the level of resources associated with TAAA was not properly recognized by the current DRG classification system. The commenter noted that the September 30, 1988 final rule (53 FR 38483) had indicated that we would continue to review the classification of this procedure but that we had not addressed the issue in the May 8, 1989 proposed rule. The commenter suggested that the prospective payment system, which operates on the law of averages, discourages specialization even though there is no evidence that high-volume hospitals have lower complication and mortality rates.

Response: Currently, TAAA repairs are classified in DRG 108 (Other Cardiothoracic or Vascular Procedures with Pump) and DRG 109 (Other Cardiothoracic Procedures without Pump). During FY 1988, there were 69 cases in DRG 108, the same number as in FY 1987. During FY 1988, there were 293 cases in DRG 109, an increase of approximately seven percent over the number of cases in FY 1987. TAAA repairs account for approximately two percent of all cases in these DRGs. Further, analysis of the coefficient of variation for TAAA repairs shows a much higher variable in charges within the TAAA cases than within DRGs 108 and 109.

As we noted in the September 30, 1988 final rule (53 FR 38483), we are not generally persuaded that such small numbers warrant special treatment in the context of a system built on averages. While analysis indicates that cases with TAAA procedures appear to consume more resources than the average case in DRGs 108 and 109, there is no evidence that providers of these services are suffering a financial hardship as a result of performing these services.

l. *Percutaneous Transluminal Coronary Angioplasty (PTCA).* In the course of analyzing the DRG logic for DRGs 106, 107, and 108 (see discussion on surgical hierarchy for MDC 5 in section II.B.3., above), we noted a problem with the assignment of percutaneous transluminal coronary angioplasty (PTCA) (procedure codes 35.96 through 36.05). PTCA involves the insertion of a catheter in the arm or leg that is passed into the vessels that supply the heart muscle. Although PTCA is comparable clinically in resource intensity to other cardiac catheterization procedures, it is not listed as a cardiac catheterization in DRG 106 (Coronary Bypass With Cardiac Catheterization). As a result, if PTCA is performed but the patient still requires coronary bypass surgery (and does not receive another cardiac catheterization procedure), the case will be assigned to the lower-weighted DRG 107 (Coronary Bypass without Cardiac Catheterization). Even though we did not propose a change in the PTCA assignment, we are assigning PTCA as a cardiac catheterization procedure to DRG 106 in this final rule. The title "Non-Operating Room Procedures" is being changed to "Cardiac Catheterization Procedures" in the GROUPER definitions for DRG 106. Given the comparability of PTCA with other cardiac catheterization procedures, we believe it would be inappropriate to delay implementation of this change for another year. We note that only a small number of cases will be affected by this change.

C. Recalibration of DRG Weights

One of the basic issues in recalibration is the choice of a data base that allows us to construct DRG relative weights that most accurately reflect current relative resource use. Since FY 1986, the DRG weights have been based on charge data. The latest recalibration, which was published as a part of FY 1989 prospective payment final rule, used hospital charge information from the FY 1987 MEDPAR file. For a discussion of the options we considered and the reasons we chose to use charge data beginning in FY 1986, we refer the reader to the rules published on June 10, 1985 (50 FR 24372) and September 3, 1985 (50 FR 35652).

We proposed to use the same basic methodology for the FY 1990 recalibration as we did for FY 1989. That is, we recalibrated the weights based on charge data for Medicare discharges. However, we used the most current charge information available, the FY 1988 MEDPAR file, rather than the FY 1987 MEDPAR file. The MEDPAR file is based on fully-coded diagnostic and surgical procedure data for all Medicare inpatient hospital bills.

The proposed recalibrated DRG relative weights were constructed from FY 1988 MEDPAR data received by HCFA through December 1988 from all hospitals subject to the prospective payment system and short-term acute care hospitals in waiver States. That MEDPAR file included data for approximately 9.7 million Medicare discharges (erroneously indicated as 9.5 million in the proposed rule). The MEDPAR file updated through June 1989 includes data for approximately 10 million Medicare discharges and this is the file used to calculate the weights set forth in Table 5 of the addendum to this final rule.

The methodology used to calculate the DRG weights from the FY 1988 MEDPAR file is as follows:

- All the claims were regrouped using the revised DRG classifications discussed above in section II.B. of this preamble.
- Charges were standardized to remove the effects of differences in area wage levels, indirect medical education costs, disproportionate share payments, and, for hospitals in Alaska and Hawaii, the applicable cost-of-living adjustment.
- The average standardized charge per DRG was calculated by summing the standardized charges for all cases in the DRG and dividing that amount by the number of cases classified in the DRG.
- We then eliminated statistical outliers using the same criterion as was used in computing the current weights. That is, all cases outside of 3.0 standard deviations from the mean of the log distribution of charges per case for each DRG were eliminated.
- The average charge for each DRG was then recomputed excluding the statistical outliers and divided by the national average standardized charge per case to determine the weighting factor.
- We established the weighting factor for heart transplants (DRG 103) in a manner consistent with the methodology for all other DRGs except that the heart transplant cases that were used to establish the weight were limited to those Medicare-approved heart transplant centers that have cases in the FY 1988 MEDPAR file.
- Kidney acquisition costs continue to be paid on a reasonable cost basis but, unlike other excluded costs, kidney acquisition costs are concentrated in a single DRG (DRG 302, Kidney Transplant). For this reason, it was necessary to make an adjustment to prevent the relative weight for DRG 302 from including the effect of kidney acquisition costs, since these costs are paid separately from the prospective payment rate. Kidney acquisition charges were subtracted from the total charges for each case involving a kidney transplant prior to computing the average charge for the DRG and prior to eliminating statistical outliers.
- Heart acquisition costs, like kidney acquisition costs, continue to be paid on a reasonable cost basis and are similarly concentrated in a single DRG (DRG 103, Heart Transplant). Accordingly, for the heart transplant cases in the updated MEDPAR file used for recalibration, we subtracted from the total charges of each case an estimate of heart acquisition charges prior to computing the average charge for the DRG and prior to eliminating statistical outliers, identical to the adjustment we make for removing kidney acquisition charges from cases in DRG 302. For additional information about the methodology for estimating heart acquisition costs, see the September 1, 1987 final rule at 52 FR 33037. In the proposed rule, we indicated that if adequate heart acquisition charge data were available from the bills used to determine the final DRG weights, we would use the actual heart acquisition charges in establishing the final FY 1990 weight for DRG 103. Our analysis indicates there were 110 cases in DRG 103 in the updated MEDPAR file. However, only eight of these cases had heart acquisition charges shown on the bill. Given the discrepancy between the total number of cases in the DRG and the number of cases with heart acquisition charges, we have decided to continue to estimate heart acquisition charges rather than to use the limited charge data reported on the MEDPAR file.

When we recalibrated the DRG weights for FY 1986, FY 1988, and FY 1989, we set a threshold of 10 cases as the minimum number of cases required to compute a reasonable weight. In FY 1989, there were 35 DRGs that contained fewer than 10 cases. We proposed to use that some case threshold in recalibrating the DRG weights for FY 1990. In the FY 1989 recalibration, we computed the weight for the 35 low-volume DRGs by adjusting the original weights of these DRGs by the percent change in the weight of the average case in the remaining DRGs. We proposed to use this same methodology for the FY 1990 recalibration. Using the FY 1988 MEDPAR data set, there are 27 DRGs that contain fewer than 10 cases.

ProPAC, in its March 1, 1988 report, had recommended that the DRG weights be recalibrated annually on the basis of costs rather than charges. However, ProPAC indicated concern about the Medicare cost-finding methods for estimating costs because the limitations of the Medicare cost report data may in some cases produce imprecise DRG weights. In the May 27, 1988 proposed rule, we indicated that we would examine the feasibility of adopting cost-based DRG weights (53 FR 19507).

Accordingly, we contracted with the Rand Corporation to evaluate both methodologies to determine which provided the better measure of resource consumption across DRGs. While there were noted differences in the recalibration results using each methodology (that is, charge-based weights resulted in higher weights for surgical DRGs and lower weights for medical DRGs, on average, relative to cost-based weights), Rand found no conclusive evidence favoring one methodology over the other. We continue to believe that the

disadvantages associated with charge-based weights are compensated for by the fact that, for purposes of recalibration, charge data are available on a more timely basis than cost data. For example, for the recalibrated weights for FY 1990, we are using FY 1988 Medicare billing data from the MEDPAR file. However, we have yet to obtain a full file of FY 1987 Medicare cost reports. Thus, any cost data we were to use for recalibration would be at least 1 year and perhaps as much as 2 years older than the most recent available charge data.

In addition, since costs are not accumulated on an individual case basis, DRG by DRG, it is necessary even in developing cost-based weights to link ancillary charge data from the claims file to cost report data as part of the process of estimating the average costs of cases in each DRG. In an attempt to make more timely estimates of costs, ProPAC also proposed in its March 1, 1988 report that the latest cost report data be used in conjunction with the most recent patient bills. However, as noted in the Rand study, this mismatch of data might cause distortions in estimating costs because it assumes that per diem costs rise uniformly across hospitals and that cost-to-charge ratios remain constant over time. In order to maintain consistency and to determine relative resource use accurately, we believe that charge data for the same period as the cost data should be used in cost-based recalibration. Therefore, if we were to recalibrate on the basis of costs, both the charge and cost data that would be used would be significantly older than the most recently available charge data.

We believe that using old data is inappropriate, particularly given the rapid advances in medical technology and resulting changes in treatment patterns. We further believe that it is in the best interest of the hospitals and Medicare beneficiaries that the resource use associated with these major new medical advances be reflected in the DRG weights as soon as possible. This can be accomplished by the use of charge-based weights computed on an annual recalibration schedule. We are concerned that use of cost-based weights would significantly delay recognition of new technologies or greatly complicate the recalibration process by necessitating a number of special adjustments to take such new technologies into account. Therefore, absent conclusive evidence that cost-based DRG weights provide a better measure of resource consumption across DRGs, we proposed to continue using charges as the basis for recalibrating the DRG relative weights.

The purpose of making changes in the DRG classifications and weights is to reflect changes in the relative resource costs across DRGs. Thus, the changes are intended to affect the relative distribution of payments across DRGs and should not affect aggregate payments to hospitals under the prospective payment system. Each time we have recalibrated (beginning with the first recalibration in FY 1986), we have normalized the new weights by an adjustment factor intended to ensure that recalibration by itself neither increases nor decreases projected total payments under the prospective payment system. With normalization, the average case weight after recalibration equals the average case weight prior to normalization for the same set of cases.

The case-mix index is a measurement of the average DRG weight for a given set of cases. In theory, any changes in the average case-mix index value for Medicare cases after recalibration and implementation of the new GROUPER and corresponding DRG weights should be attributable to an increase in the complexity of cases that are treated or to coding changes. However, our analysis indicates that the case-mix index value for FY 1988 cases is higher when those cases are processed with the FY 1988 GROUPER than when the same cases are processed with the FY 1986 GROUPER. This demonstrates that changes we made to the GROUPER program between FY 1986 and FY 1988 inflated the case-mix index and, therefore, program expenditures.

Several changes were introduced into the GROUPER 4 program used to pay for discharges in FY 1987. These changes, which are discussed in detail in a June 3, 1986 final notice on changes to the DRG classification system (51 FR 20192) and the September 3, 1986 final rule (51 FR 31476), included the following:

- Creation of a new DRG for extensive burns with a burn-related operating procedure.
- Elimination of age considerations from the criteria for classification of two pairs of DRGs in MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue).

Changes that were made in the GROUPER 5 program used to pay for discharges in FY 1988 are discussed in detail in a September 1, 1987 final notice on changes to the DRG classification system (52 FR 33143). The most significant of these changes were—

- Creation within MDC 4 (Diseases and Disorders of the Respiratory System) of two new DRGs for tracheostomy and mechanical ventilator cases;
- Reconfiguration of the alcohol and drug DRGs;
- Elimination of age over 69 as a criterion for classification in all of the pairs of DRGs in which age over 69 and/or CC was a factor; and
- Changes to the CC list.

We analyzed the changes in the case-mix index between FY 1986 and FY 1988 because the FY 1986 cases were used to recalibrate the DRG weights in the GROUPER 5 program, which, in turn, was used to pay the FY 1988 cases that are being used to recalibrate the FY 1990 weights that will be used with GROUPER 7. To the extent that the DRG classification changes and relative weights contributed to the increase in the case-mix index, an adjustment should be made to the FY 1990 weights in order not to build the inflated FY 1988 case weights permanently into the average case weight values.

Our analysis indicated that there was a total increase in the case-mix index of 6.4 percent between FY 1986 and FY 1988, as follows:

CASE-MIX INDEX CHANGE—FYS 1986–1988

Fiscal year	Number of discharges	GROUPER version	Case-Mix index [1]	Percent increase over FY 1986
1986	8,842,953	3	1.2045	....
1987	9,501,374	4	1.2367	2.7
1988	9,142,064	5	1.2824	6.4

[1] Index values reflect GROUPER version and MEDPAR data set appropriate to each year.

We analyzed the case-mix change in order to determine what portion of the increase was attributable to changes made in the GROUPER program from FY 1986 to FY 1988.

To evaluate this question, in the proposed rule, we used each of the three GROUPER programs to process and classify the bills from the FY 1988 MEDPAR. In order to process the FY 1988 cases through the earlier GROUPER versions, FY 1988 diagnostic and surgical codes were remapped into their FY 1987 equivalents prior to being processed with GROUPER 4. These codes were then remapped into their FY 1986 equivalents prior to being processed with GROUPER 3. Since the same FY 1988 cases were processed through each of the GROUPER versions, we assumed that any differences in the average case-mix index values between the three GROUPER versions are attributable to recalibration and the changes in the GROUPER program.

We found that the FY 1988 case-mix index value was 1.35 percent greater when the cases were processed using GROUPER 5 than when using GROUPER 3, as shown below:

EFFECT OF GROUPER VERSION ON FY 1988 CASE-MIX INDEX

	FY 1988 discharges	Case-Mix index [1]	Percent difference from GROUPER 3
GROUPER 3	9,142,064	1.2553	
GROUPER 4	9,142,064	1.2596	.34
GROUPER 5	9,142,061	1.2724	1.35

[1] Represents FY 1988 MEDPAR run through each GROUPER version.

Based on this analysis, we concluded that, of the total increase in the case-mix index value from FY 1986 to FY 1988 (that is, 6.4 percent), 1.35 percent was the result of recalibration and changes made to the GROUPER program.

In normalization, we compare the average case weight before recalibration (for FY 1990, this is determined by mapping the FY 1988 claims into their FY 1989 equivalents and processing them through GROUPER 6) to the average case weight after reclassification and recalibration. Based on the above analysis, we proposed to reduce the average case weight by 1.35 percent. Without this adjustment, we would build into the FY 1990 weights an inflated average case-weight value. We did not propose to recover the excess payments that have already been made based on the inflated weights; however, it would be inappropriate to continue to pay based on these weights. Therefore, we proposed to normalize the FY 1990 weights by an adjustment factor so that the average GROUPER 7 case weight after recalibration is equal to the average GROUPER 6 case weight prior to recalibration reduced by 1.35 percent.

We received many comments from the public on the adjustment to the DRG weights, as well as many comments on DRG recalibration in general. The specific comments and our responses follow.

Comment: Many commenters supported our policy of using charge data to recalibrate the DRG weighting factors. However, several commenters stated that we should use cost data in lieu of charges when recalibrating the DRG weights.

Response: We addressed the issue of recalibration based on cost data versus charge data in detail in the May 27, 1988 proposed rule (53 FR 19507) and the September 30, 1988 final rule (53 FR 38492). We continue to believe that while, in principle, recalibration based on cost data is preferable for calculating DRG weights, in fact, there is no choice but to rely heavily on charges. The reason is that ancillary "costs" are just ancillary charges adjusted by cost-to-charge ratios. Since both "cost" and "charge" weights are very dependent on the charge data, the co-called "cost" weights are subject to many of the same limitations as the "charge" weights. Charge data, unadjusted by cost report data on cost-to-charge ratios, only lag a year behind the current fiscal year; however, cost data lag at least 1 year and up to 2 years behind the latest available charge data. Although we are attempting to accelerate the process for submitting and reviewing cost report data, there is an inherent limitation in this process in that cost reports cannot be submitted until after the end of a cost reporting period. We continue to be concerned that using older cost data would delay the recognition of new technologies and changes in medical practice patterns.

Finally, we are sensitive to the criticism expressed by some that cost-based weights are more compressed than charge-based weights, so that the use of charges tends to favor more costly, high technology services, which are more often furnished in urban hospitals. Nevertheless, we believe that the advantages of timely charge data outweigh the disadvantages discussed above that are inherent in the use of cost data.

Comment: One commenter opposed the lower relative weight for DRGs 336 and 337 (Transurethral prostatectomy) as set forth in the proposed rule. In addition to the commenter's opposition to the overall 1.35 percent reduction (included in a separate comment and response, below), the commenter believes that any reduction in the weight of these DRGs would only increase the amount of the underpayment to hospitals for these two DRGs. The commenter provided copies of an audit of 11 Medicare and seven non-Medicare transurethral prostatectomy cases discharged within a 3-month period during FY 1989. The commenter compares the hospital's charges to the wage-adjusted DRG payment that the hospital received with no adjustment for teaching costs or the additional cost of treating a disproportionate share of low-income patients.

Response: The commenter has expressed a basic misconception that a hospital's charges for services are comparable to the amount of Medicare prospective payment system payments to the hospital. The Medicare program has never paid on the basis of charges for inpatient services (except that, under the reasonable cost payment system, allowable costs could not exceed the hospital's charges). Moreover, the prospective payment system payment does not include capital and other pass-through costs. Therefore, an accurate comparison cannot be made between a hospital's charges for a case and the Medicare payment in order to determine the amount that payment exceeded or fell short of the cost of treating that

case. For example, we adjusted the average of the charge amounts presented by the commenter by the appropriate Statewide urban cost-to-charge ratio as set forth in Table 8 of the addendum to the September 30, 1988 final rule (53 FR 38628). The adjusted average amounts were very close to the applicable DRG payment amounts cited by the commenter.

With respect to the commenter's concern regarding adequate payment for transurethral prostatectomy cases under the prospective payment system, we must reiterate that the prospective payment system is not designed so that the payment received covers the full cost of every discharge. A hospital's payment may be greater than its costs for some DRGs and less than its costs for other DRGs. While the Medicare prospective payment amount may not cover the complete cost of care for some cases that develop complications or involve more severe illnesses or multiple procedures, there are likely to be many cases in which the Medicare payment exceeds the cost of treating the patient, and the excess payments received in these cases should offset these higher cost cases. Thus, the prospective payment system is intended to provide an incentive for hospitals to manage their operations more efficiently by evaluating those areas where increased efficiencies can be instituted without adversely affecting the quality of care and by treating a mix of cases so that payment in excess of cost on one DRG will offset costs in excess of payment of another DRG.

Comment: We received a large number of comments questioning our authority to impose an across-the board reduction in the DRG weights in order to correct for increases in the case-mix index resulting from changes in the DRG classification system and recalibration. Many commenters stated that the update factor is the traditional vehicle for incorporating coding effects into the prospective payment system and suggested that HCFA was, in effect, making an adjustment for case-mix increase twice; once in the weights and again in the update recommendation. The commenters also noted that since Congress has eliminated HCFA's discretion in setting the update factor, the decision to reduce the DRG weights by 1.35 percent is HCFA's attempt to circumvent congressional intent.

Response: We believe that the reduction in the DRG weights is necessary in order to maintain budget neutrality, and that we have the authority to make appropriate adjustments to the DRG weights to ensure that any changes in the DRG classifications and weights do not affect aggregate payments to hospitals under the prospective payment system. Section 1886(d)(4)(A) of the Act requires the Secretary to establish a classification system for measuring relative resource consumption using diagnosis-related groups and a methodology for classifying specific inpatient hospital discharges within these groups. Section 1886(d)(4)(C) of the Act requires that these classification and weighting factors be adjusted annually beginning in FY 1988 "to reflect changes in treatment patterns, technology, and other factors which may change the relative use of hospital resources."

Since changes in the DRG classifications and weighting factors are intended to account for "relative" changes in resource consumption across DRGs, we believe it is implicit that any reclassification or recalibration, or both, of the DRGs should not influence aggregate payments to hospitals. Changes in the DRG classification system and the DRG weights are intended only to redistribute prospective payments among cases and should not increase or decrease total payments. Without the reduction in the DRG weights, we would build the inflated DRG weights resulting from changes in the classification system and recalibration into the FY 1990 prospective payment system payments.

With regard to those commenters who stated that the update factor is the vehicle that should be used to account for the effect of changes in the case-mix index on aggregate payment levels, we disagree with respect to the effects of reclassification and recalibration changes. When the increase in the case-mix index is directly related to reclassification and recalibration of the DRG system, we believe it is more appropriate for the adjustment to be made in the DRG weights as an integral part of the recalibration process. We note that our update recommendation does not include this increase as a factor of consideration.

Comment: A few commenters expressed concern that a reduction in all DRG weights would have a greater effect on hospitals with a low case-mix index value than those with higher values. At least one commenter believes that .0135 would be subtracted from each DRG weight.

Response: We are implementing an across-the-board percentage reduction in the DRG weights. The impact of this reduction will fall equally on all hospitals as a percentage reduction in their average case weight and will not be proportionately greater for hospitals with low case-mix index values.

Comment: Several commenters argued that the 1.35 percent reduction is inappropriate because GROUPER changes are made to better account for actual resource use on very costly cases and that an increase in the average case-mix index value across GROUPER versions should be an expected result. Other commenters expressed concern that the methodology used to arrive at the 1.35 percent reduction appears to discount changes in case mix, either real or related to coding, that could not be identified and measured with GROUPER 3. Once commenter suggested that some of the case-mix increase may reflect the ability of the GROUPER improvements to capture some of the increase within DRG complexity. This commenter argues that this increase represents a real increase in patient resource requirements that justifies an increase in hospital payments.

Response: The purpose of the GROUPER changes is to improve the way past cases are classified to measure relative resource consummption in establishing the DRG weights and the way current cases are classified for payment purposes. In the year in which the change are made, they are intended to be budget neutral; that is, the payments in that year should be no more or no less than the payments would have been without the changes. We proposed the 1.35 percent reduction in DRG weights because our analysis indicated that of the total increase in the case-mix index value between FY 1986 and FY 1988 (that is, 6.4 percent), 1.35 percent (about one-fifth of the total increase) resulted from the GROUPER changes and recalibration in those years. No adjustment in the DRG weights was proposed for the remaining increase in total case-mix.

To the extent the classification changes capture differences in relative resource consumption that were not previously measured (such as increases in DRG complexity) and as the frequency of the more resource-intensive cases increases relative to the frequency of the less resource-intensive cases in subsequent years, we agree that there is a change in case mix. The portion of the change in the case mix that is real (that is, that does not result from coding improvements) represents an increase in resource requirements that should be recognized by increased payments in the subsequent years. However, the actual resource requirements for a set of cases does not change merely because the cases are processed through different GROUPER versions. Consequently, for the year in which the GROUPER refinements are initially effective, the average case weight should be the same when the cases are processed through the old and the new GROUPER versions.

In the proposed rule, we based the 1.35 percent reduction in the DRG weights on a comparison of the average FY 1988 case-mix index value with the average case-mix index value for the FY 1988 cases processed through GROUPER 3. We used only FY 1988 cases paid under the prospective payment system. Upon further analysis, we have decided to make two changes in our methodology. First, we have used data from all hospitals subject to the prospective payment system and short-term acute care hospitals in the waiver States in order to be consistent with the data set used to recalibrate and normalize the DRG weights. Second, we have concluded that the method we used in the proposed rule does not give appropriate recognition to changes in the distribution and resource intensity of FY 1987 cases in determining the overall adjustment for case-mix increases occurring between FY 1986 and FY 1988. To take these changes into account, we have determined the case-mix adjustment in this final rule by using two steps. First, we processed FY 1987 MEDPAR data (cases that were paid using GROUPER 4) through GROUPER 3 and computed a case-mix index value. The difference between the actual FY 1987 case-mix index value and the case-mix index value for the FY 1987 cases using GROUPER 3 represents the change in case mix attributable to the GROUPER 4 classification changes. We determined there was a .29 percent increase in the case-mix index between GROUPER 3 and GROUPER 4 using the FY 1987 cases. Next, we processed FY 1988 data through GROUPER 4 and computed an average case-mix index value. The FY 1988 case-mix index value was .93 percent higher than the case-mix index value for the FY 1988 cases processed through GROUPER 4. The combined increase was 1.22 percent. Based on this analysis, in this final rule, we have reduced the FY 1990 weights to remove the 1.22 percent increase in the average case weight attributable to GROUPER changes and recalibration between FY 1986 and FY 1988. We make this reduction by multiplying the FY 1990 weights after normalization by .9879 (1 divided by 1.0122). The results of our analysis are shown below:

EFFECT OF GROUPER VERSION ON FY 1988 CASE-MIX INDEX VALUE

	Number of FY discharges	GROUPER 3 case-mix index	GROUPER 4 case-mix index	GROUPER 5 case-mix index	Percent difference between GROUPER versions
1987	9,753,095	1.2354	1.2390		.29
1988	9,983,903		1.2691	1.2609	.93
					1.22

If we had made no change in methodology between the proposed rule and the final rule, but merely used updated FY 1988 data, the reduction would have remained at 1.35 percent.

Comment: Several commenters noted that the GROUPER changes result in a better classification system and suggested that the case-mix index value and payments that results from GROUPERS 3 and 4 were inappropriately low because these enhancements were not reflected in those GROUPERS. These commenters suggested that it is inappropriate to assume that the GROUPER 5 weights are inflated; instead, it is just as likely that the GROUPER 3 weights were deflated.

Response: The relative weights distribute payments across DRGs and should not influence aggregate payment levels. Although the new GROUPER contains improvements in the classification system and updated weights, these changes do not affect the actual resource requirements of the cases to be processed with the GROUPER and the average case weight should remain the same. If there is a change, it means that implementation of the new GROUPER was not budget neutral. Thus, the issue is not whether the GROUPER 5 weights were inflated or the GROUPER 3 weights were deflated relative to an appropriate payment level. Rather, the issue is whether the GROUPER 5 average case weight is inflated relative to what the average case weight would be if the GROUPER revisions were implemented in a budget neutral manner.

Comment: One commenter expressed concern that HCFA attributes increases in the average case-mix index value to coding changes and suggested that no major changes have occurred in coding practices in the last three years. Therefore, it is inappropriate for HCFA to attribute increases in the case mix index value to coding changes without conducting actual reviews of coding to substantiate this claim. Another commenter noted that the upward shift in the measured case-mix index value between the two GROUPERS fails to isolate the effect of coding changes and could as readily be observed even if no DRG classifications were changed as long as the relative costliness of DRGs in the two GROUPERS is not identical. One commenter submitted an analysis concluding that changes in the average case-mix index value could be the result of three factors: real change in patient mix and improvements in the DRG system; changes in coding result in apparent or nominal changes in case mix; and changes in the relative cost structure of the DRGs. The commenter indicated that real changes in case mix cannot be distinguished from changes in case mix that are the result of coding practices and concluded that, since HCFA cannot demonstrate that the increase in case mix is not real, the reduction in the DRG weights should not be made.

Response: In the proposed rule, we indicated that we were making the reduction in the DRG weights because our analysis indicated that changes made to the GROUPER program and recalibration, coupled with changes in hospital reporting practices made in response to those changes, inflated the case-mix index value and, therefore, program expenditures. Unfortunately, our mention of changes in hospital coding practices has confused the underlying problem the reduction in DRG weights is to address; that is, for whatever reason, the changes in GROUPER versions and relative weights between FYs 1986 and 1988 artificially inflated the FY 1988 case-mix index value and a reduction is needed in the DRG weights in order not to build the

inflated values into future prospective payment amounts.

As several commenters noted, the reason the case-mix index value for the FY 1988 cases is higher than it would have been if the GROUPER changes had not been made is because there was a change in the distribution of cases across DRGs between the cases used to determine the GROUPER 4 and GROUPER 5 relative weights and the FY 1988 cases. Relatively more cases fell into higher-weighted DRGs in FYs 1987 and 1988 than had been projected when the GROUPER 4 and GROUPER 5 relative weights were established. To some extent, the change in distribution represents a real change in resource requirements between, for example, the FY 1986 cases used in the GROUPER 5 recalibration and the FY 1988 cases paid using GROUPER 5.

The remainder of the change in distribution represents only a nominal change in the resource requirements between the two sets of cases. For example, one of the GROUPER 5 changes was to eliminate age 70 or over as a factor that would automatically classify a case into the "with CC" (complications or comorbidities) DRG of a paired DRG. We projected the impact of this change in establishing the GROUPER 5 relative weights based on the CCs coded on the FY 1986 bills. A case previously assigned to the "with CC" DRG on the basis of age was reclassified to the "without CC" DRG if no CCs were shown on the bill. In FY 1988, a higher percentage of cases in the paired DRGs had CCs shown on their bills than had been projected on the basis of the FY 1986 bills. In part, more CCs were shown because there was a real change in the percentage of patients with CCs; however, more CCs were also shown because coding of CCs had not been required under the prior GROUPER versions in order for a patient age 70 or older to be classified in the "with CC" DRG. The latter cases represent only a nominal change in resource requirements since the CCs existed but had not been coded in FY 1986. It was this type of change that prompted the reference in the proposed rule to changes in reporting practices contributing to the inflated case-mix index value.

For purposes of establishing the FY 1990 DRG weights, we do not believe it is necessary to determine how much of the change in distribution of cases was real and how much was nominal. This determination is not relevant to the basic issue of whether implementation of the new GROUPER versions and relative weights was budget neutral. There is no change in the actual resource requirements of the FY 1988 cases when they are processed through GROUPER 4 or when the FY 1987 cases are processed through GROUPER 3. Any measured differences in the case-mix index must be attributable to the GROUPER changes and recalibrations made in those years.

Comment: One commenter maintained that with the refinements in the new GROUPER, we should expect some changes in distribution of cases and that the appropriate test for budget neutrality is the changes in the data base on which the GROUPER is developed rather than a comparison based on two different GROUPERs. Other commenters argued that our proposal to reduce the DRG weights represents a break with our historical policy of making DRG reclassification and recalibration budget neutral. Some commenters contended that the reduction is solely a budget strategy and not a methodological improvement.

Response: When we make the DRG classification changes and recalibrate the DRG weights to reflect changes in the relative resource intensity across DRGs, we normalize the new DRG weights by an adjustment factor intended to ensure that implementation of the new GROUPER version and DRG weights will be budget neutral. With normalization, the average case weight after making the GROUPER changes and recalibrating the weights equals the average case weight for the same set of cases before making any changes. We use the most recent data available to estimate the average case weight used in normalization. Nevertheless, there is a 2-year lag between the data used to establish the new DRG weights and the year the new weights are effective. For example, we used FY 1986 data to establish the FY 1988 DRG weights. Since normalization is based on the distribution of cases from 2 years earlier, the resulting factor is an estimate of the adjustment needed to ensure that the GROUPER changes and recalibration achieve budget neutrality. There is no assurance that actual expenditures will not be affected by the changes. The appropriate test for determining whether budget neutrality is actually achieved is to compare the average case weight for the actual cases processed during the year the new DRG weights were effective with the average case weight for the same set of cases using the GROUPER and DRG weights in effect in the prior year. This comparison determines what the normalization factor would have been had the actual data needed to ensure budget neutrality had been available at the time the new DRG weights were established. We believe that this refinement is needed to assure, at the very least, that any changes in the case-mix index resulting from GROUPER versions are not built into future prospective payment amounts. Therefore, the reduction is entirely consistent with our policy of making GROUPER changes and recalibration budget neutral.

Comment: One commenter argued that since HCFA is required by law to recalibrate annually, the argument that FY 1988 payments would have been lower if the GROUPER in effect in FY 1986 had still been in place for FY 1988 is irrelevant. The commenter further notes that HCFA could not have continued to use the FY 1986 reclassifications without rescinding the FY 1987 reclassifications and concluded that, at the very least, HCFA should not have compared the case-mix index value for FY 1988 cases using the FY 1986 GROUPER, but rather with the case-mix index value obtained with the FY 1987 GROUPER.

Response: We do not believe the commenter's assertion is correct. We recognize that we are required to make appropriate DRG classification changes and recalibrate annually and have not suggested otherwise. However, the GROUPER changes and changes due to recalibration should be budget neutral. The test for whether the effect of the GROUPER revisions is budget neutral is whether the case-mix index value for FY 1988 cases is the same as it would have been in the absence of those revisions.

The reduction in DRG weights is based on the changes in the case-mix index value between FYs 1986 and 1988. We chose this time period because the FY 1986 cases were used to recalibrate the DRG weights in the GROUPER 5 program, which, in turn, was used to pay the FY 1988 cases that are being used to establish the FY 1990 DRG weights. In the proposed rule, we compared the actual case-mix index value for the FY 1988 cases with the case-mix index value for these cases processed with the FY 1986 GROUPER. The 1.22 percent reduction in the final rule is based on the combined differences in the average case-mix index values between the actual FY 1988 case-mix index value and the case-mix index value for the FY 1988 cases processed with the FY 1987 GROUPER and between the actual FY 1987 case-mix index value and the case-mix index value for the FY 1987 cases processed with the FY 1986 GROUPER.

Comment: One commenter asked why the FY 1988 claims were not processed through GROUPER 6 and GROUPER 7 and noted that there were changes made to these GROUPERs that may also have affected the case mix. Since GROUPER 7 will be used to pay the FY 1990 claims, the commenter suggested that normalization should be based on GROUPER 7 rather than the GROUPER that was used to pay the claims in FY 1988.

Response: The commenter appears to be confusing the normalization process with the methodology for arriving at the proposed 1.35 percent reduction (1.22 percent in this final rule). In normalizing the FY 1990 weights, we processed the FY 1988 claims through GROUPER 6 and GROUPER 7. The GROUPER 7 weights after recalibration are adjusted so that the average GROUPER 7 case weight equals the average case weight for the FY 1988 cases processed through GROUPER 6. This average case weight is then reduced to remove the inflated amounts attributable to GROUPER changes and recalibration between FY 1986 and FY 1988.

Comment: One commenter noted a difference between the number of cases used for the case-mix index comparison (9,142,064) and the 9.7 million cases shown in Table 7. The commenter suggested that each of the references to the 1988 MEDPAR data should have been identified with the date of the update and an indication of which data had been excluded.

Response: In the proposed rule, we used FY 1988 MEDPAR data received through December 1988. In establishing the proposed relative weights, we used discharge data from all hospitals subject to the prospective payment system and short-term acute care hospitals in the waiver States. In the case-mix comparison, we included only those hospitals that were subject to the prospective payment system.

To establish the final DRG relative weights set forth in this document, we are using FY 1988 MEDPAR data received through June 1989. The number of cases used for this purpose total 9,983,359, including 81,534 statistical outlier cases and 159 cases in low-volume DRGs that were eliminated for purposes of recalibration. The statistical outlier cases are included in normalization and both statistical outlier cases and low-volume DRG cases are included in Table 7.

The 1.22 percent reduction to the DRG weights is based on analysis of both FY 1987 MEDPAR data received through June 1988 and the FY 1988 MEDPAR data received through June 1989. In this final rule, we have included data from all hospitals subject to the prospective payment system and short-term acute care hospitals in the waiver States in order to be consistent with the data set used to recalibrate and normalize the DRG weights. There were 9,753,095 cases in FY 1987 and 9,983,903 in FY 1988 data. Slightly more FY 1988 cases (544) were used in this analysis than in recalibration because some claims could not be associated with the hospital-specific data required to standardize the charges on the bill. If we had limited the data set to prospective payment system hospitals only, as we did in the proposed rule, the resulting reduction factor would have been 1.24 percent.

Comment: One commenter questioned whether the validity of our assumption that application of the case-mix index to different GROUPERs using the same data should result in the same average case weight. The commenter suggested several factors that could account for the difference in the case-mix index value among GROUPERs using the same data:

- A difference in the crosswalk codes used to map and to remap the data.
- Errors in remapping the diagnosis and procedure codes.
- Differences in the CCs that would be recognized in the GROUPER versions.
- A different distribution of cases grouping to each DRG across years.

Response: If a new GROUPER version is implemented in a budget-neutral manner, by definition, the average case weight for the cases processed using the new DRG version and weights should be the same as the average case weight for the same cases processed with the earlier GROUPER version and weights.

We believe that the first three factors the commenter has suggested would have an immaterial effect on the average case weight difference between GROUPER versions. For example, a difference in the crosswalk codes to map the FY 1986 codes into their FY 1988 equivalents for purposes of establishing the GROUPER 5 weights and the crosswalk codes to remap the FY 1988 codes into their FY 1987 equivalents for purposes of the analysis is not relevant. The issue was not whether the same crosswalks were used to map and to remap the data but rather whether the remapping was appropriately done. The remapping was based on "A Conversion Table of New ICD–9–CM Codes" by Robert Seaman, published in "Coding Clinic", Second Quarter 1988. This information and an explanation on how 12 surgical codes that remap into more than 1 code were handled in the analysis were provided during the comment period to individuals who requested information on this aspect of our analysis. We received no public comments claiming that our remapping was incorrect.

The commenter correctly pointed out a problem with the CC Exclusions List (one of the GROUPER 5 changes), under which certain diagnoses included in the standard list of complications and comorbidities are not considered a valid CC in combination with a particular principal diagnosis. As a result, a FY 1988 bill in one of the affected DRGs would not necessarily contain any GROUPER 4 CCs that are not also CCs in GROUPER 5. When this bill is crosswalked back to GROUPER 4, it may not contain any GROUPER 4 CCs and would group to the lower-weighted DRG for the principal diagnosis "without CC." Although this situation could occur, we believe it would happen fairly infrequently and, for several reasons, should not have a significant effect on the results of our analysis. First, this issue relates only to the portion of the analysis concerning the remapping of FY 1988 cases from GROUPER 5 to GROUPER 4 since the CC would still be coded on the FY 1987 cases. Second, the potential situation would be limited to cases falling into one of the 115 DRG pairs. Third, most cases classified "with CC" in GROUPER 4 were because the patient was age 70 or over. This information would still appear on the FY 1988 bill and would still result in the patient being remapped into the "with CC" DRG. Finally, our analysis indicates that the percentage of CC cases within the paired DRGS using FY 1988 cases processed through GROUPER 4 (85.7 percent) is slightly higher than the percentage of CC cases within the paired DRGs using FY 1987 cases processed through GROUPER 4. Thus, it would appear that only an insignificant number of cases might have been dropped as CCs in the remapping.

The change in the relative distribution of cases between GROUPER 3 and GROUPER 5 partially explains the 6.4 percent increase in the case-mix index. However, the reduction in the weights that we proposed is not intended to account for the changes in the relative distribution of cases because it uses the same set of cases, FY 1988, in both GROUPERs.

Comment: Several commenters noted that the reduction in the DRG weights will have a differential impact on those hospitals that have not had any increase in case mix attributable to the GROUPER changes and recalibration. One commenter noted that the causes for the increase are not spread equally across all DRGs or across all hospitals. Another commenter suggested that it

would be more appropriate to make the reduction on a hospital-specific basis based on each hospital's actual experience.

Response: We recognize that the DRG changes and recalibration in GROUPER 4 and GROUPER 5 affected the case-mix index value for some hospitals more than for others. However, the DRG weights reflect the national experience with regard to the relative resource requirements of Medicare cases. Any changes in the DRG weights are based on national average data and must apply across all classes of hospitals. To do otherwise would require establishing separate sets of weights by classes of hospitals. We believe this is neither feasible nor desirable.

Comment: One commenter expressed concern that tables equivalent to Tables 7A and 7B (length of stay tables for GROUPERs 6 and 7) were not published in the proposed rule for GROUPER 3, GROUPER 4, and GROUPER 5. The commenter suggested that these tables were needed to verify the results of HCFA's analysis. The commenter recommended that any reduction in weights be delayed until HCFA publishes these tables and the actual codes and computer procedures used to remap the codes for GROUPER 5 to GROUPER 4 and for GROUPER 4 to GROUPER 3 as well as the original codes used to map from GROUPER 3 to GROUPER 4 and from GROUPER 4 to GROUPER 5. Another commenter stated that the proposed reduction in the DRG weights represented a major departure from previous policy and the commenter indicated that more detailed information should be made available for public review and comment. One commenter believes that documentation that is adequate to evaluate the calculation of the reduction was not made available and suggested that the entire data set be submitted for a qualified, independent audit and statistical analysis.

Response: We do not publish all the material used in preparation of our proposals because of the voluminous amounts of information that would have to be published and because these data would be of limited interest to most readers. However, we agree that relevant data and information should be made available to the public. For this reason, in the proposed rule, we set up a process for expediting data requests (54 FR 19657; May 8, 1989). Thus, information relating to our study was made available during the public comment period. This information continues to be available on request.

With respect to submitting study data for an independent audit and analysis, we do not believe such an action is necessary because we receive independent analysis through the public comment process.

III. Changes to the Hospital Wage Index

A. Background

Section 1886(d)(2)(C)(ii) of the Act required, as a part of the process of developing separate urban and rural standardized amounts for FY 1984, that we standardize the average cost per case of each hospital for differences in area wage levels. Section 1886(d)(2)(H) of the Act required that the standardized urban and rural amounts be adjusted for area variations in hospital wage levels as part of the methodology for determining prospective payments to hospitals for FY 1984. To fulfill both requirements, we constructed an index that reflects average hospital wages in each urban or rural area as a percentage of the national average hospital wage.

For purposes of determining the prospective payments to hospitals in FY 1984 and 1985, we constructed the wage index using calendar year 1981 hospital wage and employment data obtained from the Bureau of Labor Statistics (BLS) ES 202 Employment, Wages and Contributions file for hospital workers. Beginning with discharges occurring on or after May 1, 1986, we have been using a hospital wage index based on HCFA surveys of hospital wage and salary data as well as data on paid hours in hospitals. The methodology used to compute the first HCFA wage index was set forth in detail in the September 3, 1985 final rule (50 FR 35661).

For discharges occurring on or after May 1, 1986 and before September 30, 1987, the wage index was based on wage data from calendar year 1982. For discharges occurring on or after October 1, 1987 and before September 30, 1988, the wage index was based on an equal blend of calendar year 1982 and 1984 wage data.

In the September 30, 1988 final rule, we continued to use the blended wage index based on 1982 and 1984 data for determining prospective payments to hospitals in FY 1989. However, we did make some changes to the index because of the enactment of section 4005(a) of the Omnibus Reconciliation Act of 1987 (Pub. L. 100–203), which added a new section 1886(d)(8)(B) to the Act, as discussed below in section III.C. of this preamble.

B. Updating the Wage Index Data

For discharges occurring in FY 1990, we proposed to base the wage index solely on 1984 wage data. Previously, we had proposed to base the wage index for FY 1989 solely on 1984 wage data (in the May 27, 1988 proposed rule (53 FR 19506)). However, as a result of a number of revisions to the 1984 wage data that were made between the May 27, 1988 proposed rule and the September 30, 1988 final rule, the national average hourly wage increased slightly, thereby reducing the wage index values for areas not affected by the changes. Therefore, given our concern about the negative impact on aggregate payments to hospitals, we decided to postpone adoption of a wage index based solely on the 1984 wage data. Our current analysis indicates that moving from a blended wage index to one based solely on 1984 data does not have a significant impact on aggregate prospective payments.

As discussed below in section III.D. of this preamble, we indicated that we are conducting a survey to collect wage data for the FY 1991 update to the wage index.

Comment: Several commenters indicated that, even though it would result in using older data, we should continue to use the blended wage index based on 1982 and 1984 wage data until the wage index based on data from the new wage survey Form 2561 is available for use. Many of these commenters believed that the 1984 wage data contain numerous errors as evidenced by HCFA's continuous actions to make corrections to these data. However, there were several commenters who believed that using the 1984 wage survey data represents an improvement over the current blended wage index.

Response: While it is true that we continue to accept corrections to the 1984 wage survey data, we believe that the 1984 wage data are generally accurate. The 1984 wage survey was completed by 99.5 percent of all hospitals subject to the prospective payment system, while only 92.5 percent of hospitals responded to the 1982 survey. We have resolved each correction that has come to our attention and we have revised the wage index prospectively.

In addition, over 67 percent of the 1984 wage surveys were audited, while the final 1982 data came from the hospital directly and were not audited. We believe that the fact that corrections have been made to the 1984 data should not be construed as an indication that the 1984 data are less valid; we have made corrections to the 1982 wage data as well. We believe that the 1984 wage data represent the latest and most complete and accurate data currently available for constructing the hospital wage index. Given the criticisms we have received concerning the use of old data, we do not believe it is appropriate to continue to use 1982 wage data in constructing the wage index.

We note that recent corrections have resulted in relatively small changes to the wage index values for most affected Metropolitan Statistical Areas (MSAs) and rural areas. As a matter of fact, several corrections resulted in no change or a change to only the third or fourth decimal place of the wage index value for the affected area.

Comment: Several commenters suggested that the wage index based solely on 1984 data should be adjusted so that implementation of the wage index does not result in any reduction to total aggregate prospective payments (that is, changes to the wage index should be budget neutral). One of these commenters believes that any change made to the prospective payment system should be budget neutral except for provisions that Congress has specifically indicated should result in an increase or decrease in payments. Another commenter cited language in the Conference Committee Report that accompanied Pub. L. 100–203, which states, "The conferees intend that the Secretary implement any update of the wage index in a budget neutral manner." (H.R. Rep. No. 495, 100th Cong., 1st Sess. 526 (1988).)

Response: While it is true that implementation of the new wage index does have the effect of reducing Medicare payments by an estimated 0.1 percent, we are not making a budget neutrality adjustment to the revised wage index for several reasons. First, we consider 0.1 percent to be insignificant in terms of total program payments made to hospitals under the system. In addition, the 0.1 percent reduction results not only from the implementation of a wage index based solely on 1984 data but also from the wage data corrections. If the original wage data had been reported accurately, implementation of the new wage index would have less impact on program outlays.

Finally, since the implementation of the prospective payment system, we have made other changes to the hospital wage index without making a budget neutrality adjustment. Historically, these changes have both decreased and increased the total Medicare prospective payment to hospitals. For example, when we implemented the wage index for FY 1988 (that is, the 1982/1984 blended wage index), we estimated that the total Medicare prospective payments would increase by 0.1 percent, but we made no budget neutrality adjustment.

The conference committee language cited by one commenter accompanied changes made by Congress in section 4004 of Pub. L. 100–203. Section 4004(a) of Pub. L. 100–203 amended section 1886(d)(3)(E) of the Act to require the Secretary to update the hospital wage index no later than October 1, 1990 (and at least every 36 months thereafter) based on a survey of wages and wage-related costs in prospective payment hospitals. We interpret the committee report language as applying to changes to the wage index beginning in FY 1991. We are conducting a new wage survey and intend to implement a new wage index based on this survey in FY 1991 in a budget neutral manner.

Comment: One commenter indicated that in duplicating HCFA's construction of the wage index, several methodological shortcomings were discovered. Although the changes recommended by the commenter would have little impact in terms of aggregate Medicare payments, they could have a significant impact on the affected wage areas. Specifically, the commenter indicated that the data base contains data from hospitals that reported wages and hours over a period of time of less than or greater than 12 months. It was suggested that the short and long reporting periods be eliminated from the data base. Alternatively, the wages and hours reported for these short periods should be weighted to reflect a full 12-month period. The commenter also noted that HCFA has inflated the wages reported to a common date (August 31, 1985) using the year end data of the cost reporting period. The commenter suggested that if HCFA continues to use short and long reporting periods, the inflator used should be determined and calculated based on the midpoint of the reporting period. Finally, the commenter pointed out that the wages reported from hospitals with reporting years ending after August 31, 1985 were not deflated to the date, and some hospitals were identified as having a September 30, 1985 year end but were eliminated even though it represented a 13-month cost reporting period.

Response: We agree that it would be preferable for the wage index methodology to provide for special handling of hospitals with short or long cost reporting periods. However, because of the limited number of hospitals in certain MSAs upon which we can base the wage index values, we cannot, for purposes of determining the wage index values for these MSAs, eliminate these hospitals' data. Therefore, we have not accepted the commenter's recommendation to eliminate these short or long reporting periods. Furthermore, we agree with the commenter that a short reporting period (that is, 1 to 6 months) may not be representative of hospital's average wage levels. Therefore, we do not believe it would be appropriate to weight the wages and hours in a short reporting period to reflect a full 12-month period. We will, however, continue to analyze this issue in conjunction with the construction of the FY 1991 wage index from the new survey data.
